The 1980 GUIDE to the EVALUATION of EDUCATIONAL EXPERIENCES in the ARMED SERVICES

Awarding Credit For Extrainstitutional Learning

The following statement by the ACE Commission on Educational Credit and Credentials has been approved by the ACE Board of Directors and endorsed by the Council on Postsecondary Accreditation.

The American Council on Education recommends that postsecondary education institutions develop policies and procedures for measuring and awarding credit for learning attained outside their sponsorship.[1]

American society abounds in resources for learning at the postsecondary level. Public, private, and proprietary education institutions exercise the central but not exclusive responsibility for instruction and learning. Associations, business, government, industry, the military, and unions sponsor formal instruction. In addition, independent study and reading, work experiences, the mass media, and social interaction contribute to learning and competency.

Full and effective use of all educational resources is a worthy educational and social goal. Achieving this goal will depend to a large extent on providing equitable recognition for extrainstitutional learning:

- Educational credentials have a significant bearing on the economic, professional, and social status of the individual. Thus, social equity requires that equivalent learning, regardless of where and how it is achieved, be incorporated into the system of records for learning and competency, and
- Recognition encourages learning and contributes to pedagogical effectiveness. Teaching students what they already know is both stultifying to them and wasteful of educational and personal resources.

Postsecondary education institutions legally authorized and accredited to award degrees and other educational credentials have a special responsibility to assess extrainstitutional learning as part of their credentialing function.

In the development of institutional policies and procedures, the American Council on Education recommends the following guidelines.

Guidelines

1. Reliable and valid evaluation of student achievement is the sine qua non in awarding credit. Experience, whether acquired at work, in social settings, in the library, at home, or in the formal classroom, is in itself an inadequate basis for awarding credit. Increased attention in choosing evaluation procedures and techniques and more thorough evaluation are necessary when learning has been attained without participation in a program of study prescribed by an educational institution and offered by its faculty.
2. In determining whether it is appropriate to accept a student's extrainstitutional learning for credit, the governing considerations should be its applicability to the student's program of study, including graduation requirements, and the relationship of the learning to the institution's mission, curricula and standards for student achievement. Learning should be articulated, documented and measured in these terms.
3. Institutions should evaluate extrainstitutional learning only in subject-matter fields in which they have or can arrange for faculty expertise or where they can rely on nationally validated examinations or other procedures for establishing credit equivalencies. Institutions should award credit in these areas only if the quality of learning meets their standards for student achievement. Normally, institutions should evaluate learning and award credit only in subject fields in which they offer courses or curricula. However, if the acquisition of college level learning outcomes has been demonstrated in an area not taught by the institution, but related to the student's program of study, an exception may and ought to be made.
4. Institutions awarding credit for extrainstitutional learning should develop clearly stated policies regarding administrative responsibility, student eligibility, means of assessment, recording of results on transcripts, storage of documentation, student fees, and maximum number of credits allowable. Information on these and related institutional policies and procedures should be disseminated to students and faculty for maximum awarenesss and utilization.
5. Institutional policy should include provision that the institution's policies and procedures for awarding credit for extrainstitutional learning should be subject to periodic reevaluation.

---

[1] "Extrainstitutional learning" is defined as learning that is attained outside the sponsorship of legally authorized and accredited postsecondary educational institutions. The term applies to learning acquired from work and life experiences, independent reading and study, the mass media, and participation in formal courses sponsored by associations, business, government, industry, the military, and unions.

Foreword

For more than thirty-five years, the *Guide to the Evaluation of Educational Experiences in the Armed Services* has been the standard reference work for recognizing learning acquired in military life. ACE has worked cooperatively with the Department of Defense and the armed services in assisting hundreds of thousands of servicemen and women to achieve recognition for their learning. The long-term success of the *Guide* evaluation system for military training has resulted in it serving as a model for the evaluation of programs offered by other noncollegiate organizations, including business, industry, government agencies, voluntary and professional associations, and labor unions. Collectively, these efforts are resulting in students combining extra-institutional learning opportunities with study at postsecondary institutions to achieve degree-related educational objectives. Not only is this sound educational practice, it is also an efficient use of educational resources and an incentive for the persons affected to undertake further study.

Special recognition must be paid to hundreds of individuals who have served as evaluators and the many educational institutions, professional and disciplinary associations, and the apprenticeship training community for their wholehearted cooperation in this endeavor. Without their support and assistance, the *Guide* would not have been possible. We are greatly indebted to them.

Once again, we are pleased to commend this work to you in your continuing work with servicemen and women and veterans.

J. W. PELTASON
President
American Council on Education

How to Find and Use Course Exhibits

This volume contains recommendations for formal courses offered by the Army and the Department of Defense.

The instructions that follow provide a step-by-step procedure for finding and using the exhibits and recommendations. Readers unfamiliar with the ACE evaluation procedures should read Appendix A. Additional information on using the *Guide* and awarding credit is provided in the Questions and Answers section.

Step 1

Have the applicant complete a "Request for Course Recommendation" form.

A "Request for Course Recommendation" form appears at the back of this volume. It may be reproduced and should always be filled out by the applicant, using the information provided on official and personal records, as well as the applicant's own knowledge of the service course. *Applicants should never refer to the Guide while completing the form.* (See questions 4 through 8 in Questions and Answers.)

Step 2

Verify course completion from military records.

It is the responsibility of the school official to verify course completion. The following military records are normally used to verify successful completion of course requirements:

1. DD Form 295, "Application for the Evaluation of Educational Experience During Military Service"—available to active-duty service personnel from military education officers. (Form must be certified by an authorized commissioned officer or his designee in order to be official.)
2. DD Form 214, "Armed Forces of the United States Report of Transfer or Discharge"—available to veterans, together with other in-service training records, from the General Services Administration, National Personnel Records Center (Military Personnel Records), 9700 Page Boulevard, St. Louis, Missouri 63132.
3. Course Completion Certificates—may be used to complement other records or when service courses are not recorded on official records.

If these records are not available, see Question 29 in the Questions and Answers section for alternative forms of verification.

(See question 1, 3, 10, and 29 in Questions and Answers.)

The following steps refer to a "course exhibit." See sample course exhibit, page ix.

Step 3

Find the course exhibit by identifying the OECC ID Number in the Course Number Index or the Keyword Index.

A. *Course Number Index.* All available military course numbers are listed in the Course Number Index in alphanumeric sequence. If the applicant's military course number cannot be located in the Course Number Index, search for the course title in the Keyword Index. (See also question 27 in Questions and Answers.)

B. *Keyword Index.* Identify all possible keywords within a formal course title. For example, the keywords in the title, "Ground Radio Communications Equipment Technician," are *Radio, Communications,* and *Equipment.* Find one or all of those keywords in the Keyword Index and search the listing under the keyword for the course title. *If the title cannot be found under one keyword, search all other possible keywords.*

C. *Identify OECC ID Number.* When the title or military course number has been located, note the corresponding OECC ID Number. This number refers to the course exhibit's location in the *Guide.* The two-letter prefix refers to the section of the Course Exhibits chapter, i.e., AR = Army section and DD = Department of Defense section. Within each section, OECC ID Numbers are presented in numeric sequence. (See question 2 in Questions and Answers.)

Step 4

Match the course identifying information with the corresponding data in the course exhibit.

Course identifying information includes the official military title, military course number, length of course, dates of attendance, location, etc., and is provided by the applicant on the "Request for Course Recommendation" form. When the course exhibit consists of multiple versions, determine which version applies to the applicant's course by considering exhibit dates and course length. (See questions 6, 7, 8, and 12 in Questions and Answers.) It is important to match all items.

Step 5

Read the course objectives and description.

Consideration should be given not only to the amount of credit and to the subject area, but also to the course objectives and description which are part of the course exhibit. These portions of the exhibit outline the course content and scope and also provide essential information about the nature of the course. (See question 9 in Questions and Answers.) This information is essential to you in determining the appropriate placement of credit for each individual student within the requirements and programs at your institution.

Step 6

Award credit, as appropriate.

Users are free to modify the credit recommendations in accordance with institutional policy and the educational goals of each individual applicant. (See questions 11 and 13-17 in Questions and Answers.)

Step 7

When assistance is required, contact the Office on Educational Credit and Credentials.

Whenever problems arise in Steps 1 through 6, and assistance is desired, contact the OECC Information Service at:

Office on Educational Credit and Credentials

Sample Course Exhibit

AF-1715-0260.

1. TELETYPEWRITER EQUIPMENT REPAIR
2. TELETYPEWRITER EQUIPMENT REPAIR (TELETYPEWRITER EQUIPMENT MAINTENANCE)

Course Number: *Version 1:* 160-31J20. *Version 2:* 11-R-341; 11-R-340; 11-E-11.

Location: Southeastern Signal School, Ft Gordon, GA.

Length: *Version 1:* 21-25 weeks (771-930 hours). *Version 2:* 18-20 weeks (703-736 hours).

Exhibit Dates: *Version 1:* 9/66-Present. *Version 2:* 12/53-8/66.

Objectives: To train maintenance personnel to operate, maintain, and repair teletypewriters and associated equipment.

Instruction: *All versions:* Lectures and laboratories in communications introduction; teletypewriter fundamentals; installation of teletypewriter systems; field and depot shop maintenance. *Version 1:* Includes facsimile equipment. *Version 2:* Includes introductory electricity.

Credit Recommendaton: *Version 1:* In the vocational certificate category, 5 semester hours in teletype repair, 1 in facsimile repair, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (6/74); in the upper-division baccalaureate category, 2 semester hours in electrical laboratory and additional credit in electrical laboratory on the basis of institutional examination (6/74). *Version 2:* In the vocational certificate category, 1 semester hour in basic electricity, 5 in teletype repair, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity, 2 in electrical laboratory (6/74); in the upper division baccalaureate category, 1 semester hour in basic electricity, 2 in electrical laboratory, and additional credit in electrical laboratory on the basis of institutional examination (6/74).

Related Occupation Codes: 31J.

ID Number. *A number assigned by OECC to identify each course.*

Military Course Number. The number assigned to the course by the military. Listed by version.

Length. The length of the course in weeks, with contact hours in parentheses; by version.

Exhibit Dates: The start and end dates, by month and year, by version. When course was first evaluated and when, if applicable, it was eliminated. "Present" denotes publication cut-off for this edition of *the Guide* (3/80).

Instruction. Description of instruction, including teaching methods, facilities, equipment, major subject areas covered. Normally applies to all course versions; occasionally a note may be added regarding a specific version.

Related Occupation Codes. A cross-reference to related MOS exhibits. Officials awarding credit for a course and an MOS should compare the exhibit for the course with that for the MOS before awarding credit.

Course Version Numbers and Titles. Version 1 is the most recent. If course has only one version, version number is omitted throughout exhibit.

Alternate Titles. In parentheses under the more recent title.

Location. By version. The service school, military installation, state in this example, applies to all versions (version number is omitted).

Objectives. The purpose for which the course was designed; applies to all versions.

Credit Recommendation. By version. Given in four categories: vocational certificate; lower-division baccalaureate/associate degree; upper-division baccalaureate; and graduate degree. Expressed in semester hours. (See Appendix A for detailed explanation of credit categories.)

Evaluation Date: Date when the credit recommendation was established, month and year in parentheses following each recommendation.

Important: The appropriate course version can be found by using the course title and number, its length, exhibit dates, and location.

How to Find and Use MOS Exhibits

This volume contains recommendations for all Army enlisted and warrant officer military occupational specialties (MOS's) evaluated through March 1, 1980.

The instructions that follow provide a step-by-step procedure for finding and using the MOS exhibits and recommendations. Readers unfamiliar with MOS's—how they are structured and how MOS proficiency is demonstrated—should read Appendix A. Additional information on MOS's is provided in the Questions and Answers section.

Step 1

Have the applicant submit official Army documentation to you.

Several records may be used for MOS verification. A servicemember or veteran may submit one or several of the following forms:

Enlisted Personnel:

- *Orders.* (Commanding Officer Orders, awarding a particular MOS to the individual.)
- *Course Completion Certificates.*
- USAEEC Form 10, *Enlisted Evaluation Data Report.*
- DA Form 2-1, *Personnel Qualifications Record.*
- DA Form 20, *Enlisted Qualifications Record.*
- DA Form 2166-5, *Enlisted Evaluation Report (EER).*
- DA Form 2166-5A, *Senior Enlisted Evaluation Report (SEER).*
- *Individual Soldier's Report (ISR).*

Warrant Officers:

- DA Form 67-8, 67-7, 67-6, *Officer Evaluation Report (OER).*
- DA Form 67-8-1, *Officer Evaluation Report Support Form.*
- DA Form 2-1, *Personnel Qualifications Record.*
- DA Form 66, *Officer Qualifications Record.*
- DA Form 4037, *Officer Record Brief.*

NOTE: Many warrant officers began their careers as enlisted personnel; in such cases, warrant officers may also submit their enlisted records for evaluation.

As an alternative, *enlisted soldiers and warrant officers still in active, National Guard, or reserve service* may submit DD Form 295, "Application for the Evaluation of Educational Experiences During Military Service, when it includes the necessary occupational information. (The April 1975 version has a section "Major Service Jobs and Billets"; the July 1979 version has a section "Military Occupational History.") Both versions are acceptable when the following information is included: (1) the MOS designation, (2) the MOS title, (3) the period during which the MOS was held, (4) the MOS evaluation score (70 or above), and (5) the date of evaluation. If the reported score is an SQT score, you must still refer to the Individual Soldier's Report (ISR) for MOS verification. (See Step 2.) A person still in active or reserve service may request that DD Form 295 be completed by the education services officer and certified by an authorized commissioned officer, or his designee, at the installation where he or she is assigned.

Army records must be requested by the individual. Records may be obtained as follows:

Active-duty enlisted soldier or warrant officer. The Army installation to which he or she is assigned.

Army National Guard personnel. The National Guard unit to which he or she is assigned.

Army Reservist or retired personnel. The U.S. Army Reserve Component and Administrative Center (TAGO), 9700 Page Boulevard, St. Louis, Missouri 63132.

Army veteran. General Services Administration, National Personnel Records Center (Military Personnel Records), 9700 Page Boulevard, St. Louis, Missouri 63132. The veteran may request service records by submitting U.S. Government Standard Form 180, which may be obtained from a state's veterans affairs office, the Veterans Administration, or the National Personnel Records Center.

Step 2

Referring to military records, verify each MOS the person has successfully held.

When verifying MOS's it is important to identify the skill level. Since the higher skill levels of an MOS encompass the duties of the lower skill levels (i.e., a person with MOS 12B40 is able to perform the duties of 12B30), the credit recommendation for MOS 12B40 would include the recommendation for 12B30. Thus, you need to verify the highest skill level a person held. To do this, you may need to consult several records. To verify the MOS and the skill level, refer to the records listed in Step 1. Look for the following information:

Enlisted Personnel:

Orders: Check for the MOS designation and the date the MOS was awarded.

Course Completion Certificate: Check for the MOS designation and the date the course was completed. The certificate verifies that the person has qualified to perform the entry-level duties of a particular MOS skill level. In order to verify that a person has performed satisfactorily in the MOS, another source of verification should be required before granting credit.

USAEEC Form 10: Check for MOS evaluation score (70 or higher indicates MOS proficiency) and a breakdown of how the person performed on each section of the MOS evaluation test.

DA Form 2-1 (items 3 and 6) and *DA Form 20* (items 22 and 23): Check for MOS designation, skill level, relevant dates, evaluation scores (70 or higher indicates MOS proficiency), and dates of evaluation.

DA Form 2166-5 (EER): See sections on duty performance traits, demonstrated overall performance of assigned duties, and advancement potential. The maximum score is 125.

DA Form 2166-5A (SEER): See sections on performance qualities, leadership skills, demonstrated overall performance, and advancement potential. The maximum score is 125.

Individual Soldier's Report (ISR): Report of SQT results. Check for MOS designation, skill level, dates, and the section entitled "Verified Minimum." A "yes" in this section indicates MOS proficiency.

Warrant Officers:

DA Form 67-7: See section on description of duties for MOS designation, professional attributes, demonstrated performance, and potential.

DA Form 67-8: See section on duty description for MOS designation, performance evaluation, and performance and potential evaluation.

DA Form 67-8-1: See written statements by the rated officer and the rater.

DA Form 2-1: See items 3 and 6 for MOS designation, relevant dates, and dates of evaluation.

DA Form 66: See section 9 for MOS designation, title, and relevant dates.

DA Form 4037: See Section I for MOS designations and titles.

See Appendix H for sample copies of the above forms.

Step 3

Find the appropriate MOS exhibit in the Guide.

Using the military records, find the information necessary for locating the correct MOS exhibits. Pertinent information includes: the MOS designation, the MOS title, the dates each MOS was held, and when appropriate, the date associated with an MOS evaluation (MOS Evaluation Test score, SQT results, EER/SEER). When you cannot verify MOS proficiency through a careful examination of military records, you may wish to conduct your own assessment. (See question 25 in Questions and Answers.) Verification of MOS proficiency should precede the granting of credit or advanced standing.

There are two sections for MOS exhibits: the Army Enlisted MOS Exhibits, beginning on page 2-1, and the Army Warrant Officer MOS Exhibits, beginning on page 3-1. Within each section, exhibits are arranged by OECC ID number.

The exhibit(s) for a given MOS can easily be found when the MOS designation is known. Each MOS exhibit is assigned an OECC ID number that has three components. The first component, *MOS*, identifies the exhibit as one that pertains to an Army military occupational specialty. The second component consists of the MOS designation, e.g., 81C or 271A. The third component, a three-digit, sequentially assigned number, e.g., -001, -002, -003, uniquely identifies the exhibit. Enlisted MOS exhibit ID numbers have nine characters, e.g., MOS-81C-001. Warrant officer MOS exhibit ID numbers have ten characters, e.g., MOS-271A-001.

When the title of the MOS is known, the exhibit ID number(s) can be found by referring to the **Army Occupational Title Index.**

There may be several exhibits for an MOS. Each time there is a new recommendation for an MOS, there is a new exhibit. For example, three exhibits appear for MOS 12B. The OECC ID numbers for the three exhibits are MOS-12B-001, MOS-12B-002, and MOS-12B-003. The oldest exhibit for the MOS, the first to be evaluated, is assigned -001 as the last three characters. The last exhibit for an MOS, the exhibit ending in the higher number, is the most recent.

When there is more than one exhibit, select the correct one by referring to the exhibit dates which conform to the time frame in which the individual was awarded the MOS. The exhibit dates for each new exhibit establish continuity with the previous exhibit, e.g., if the end date for the first exhibit is 8/75, the start date for the next exhibit would be 9/75. In many cases, the date of the soldier's last MOS evaluation will indicate which exhibit is most appropriate. However, when the time period that a person held an MOS skill level spans more than one exhibit for the MOS, you should exercise your own judgment in deciding which exhibit is most appropriate. (See questions 15 and 19 in Questions and Answers.)

Step 4

Read the entire MOS exhibit.

Although credit is granted for a particular skill level of an MOS, users are urged to read the entire MOS exhibit. This will assist you in applying a given recommendation to the student's program of study at your institution. Each item in the exhibit has been prepared to help you identify or interpret the recommendations. (See sample exhibits.) The descriptions and the special notes on career progression will be particularly helpful to you.

The descriptions, which are similar to learning outcome statements of postsecondary courses and programs of study, will provide you with essential information about the learning required for proficiency in the MOS. Comparing the MOS "Description" with a description of the course or program of study that the student will pursue at your institution will help you:

- determine how much of the recommended credit applies to the course or program of study at your institution,
- identify additional areas of possible credit,
- resolve duplication of credit, when the applicant has applied for credit for more than one military learning experience,
- place the student at the appropriate point in the course sequence or program of study.

In addition, the exhibits contain special notes on career progression. These notes will help you identify other areas of possible credit and resolve duplication of credit. Enlisted MOS descriptions often include special notes on prerequisite MOS's and normal patterns of career progression. In warrant officer MOS exhibits, other MOS's an individual may have held are listed in the exhibit item, "Career Pattern."

Step 5

Award credit, as appropriate.

The MOS recommendations are advisory. They are intended to assist in formally recognizing the learning of enlisted soldiers, warrant officers, and veterans and in placing them in postsecondary programs of study, apprenticeship programs, and jobs. The recommendations may be modified.

When an applicant has applied for credit for more than one military learning experience, you may find that you will have to reduce the recommended credit to avoid granting duplicate credit. (See questions 11, 18, 20, and 21 in Questions and Answers.)

You may also wish to increase the recommended credit to account for the learning that the applicant may have acquired in other military or nonmilitary settings. (See questions 22 and 24–26 in Questions and Answers.)

Step 6

When assistance is required, contact the Office on Educational Credit and Credentials.

OECC operates an information service to assist education officials, apprenticeship and training officials, and employers in evaluating the learning experiences of military personnel. Publication of the *Guide* is part of that service. However, there are instances when additional assistance is needed.

When requesting an exhibit for an enlisted or warrant officer MOS, complete a copy of the "Request for Army Enlisted and Warrant Officer MOS Exhibits" form that appears at the back of this volume. Use the form only to request exhibits for MOS's that are listed as "Pending evaluation." When an MOS is not listed in the *Guide*, OECC has not evaluated the MOS and has no plans to do so. (See question 19 in Questions and Answers.)

When assistance in interpretation is needed and it appears that official military records will help OECC staff members in responding to an inquiry, copies should be attached to the letter of inquiry. *Do not send original records.*

When an MOS exhibit or assistance in interpretation is needed immediately you may telephone the Office on Educational Credit and Credentials at (202) 833-4685. (Sorry, no collect calls). Whether inquiring by letter or telephone, however, you should always obtain information concerning MOS exhibits directly from the Office on Educational Credit and Credentials, not the applicant. (See question 8 in Questions and Answers.)

Inquiries concerning *MOS exhibits* should be addressed to:

Office on Educational Credit and Credentials
American Council on Education
One Dupont Circle, N.W.
Washington, D.C. 20036
ATTN: MOS Evaluation Program

Sample Enlisted MOS Exhibit

ID Number. A nine-character code assigned by OECC to identify each enlisted MOS exhibit.

MOS Designation. The five-character codes that identify the MOS and each of its skill levels. An MOS may have as many as five skill levels (e.g., Skill Levels 10, 20, 30, 40, and 50) or as few as one. The enlisted MOS structure is fully described in Appendix A.

Career Management Field. Two digits and a title designating a group of related MOS's, if divided into subfields (three digits and a title), the subfield is also provided. When a person has held more than one MOS in the same career management field or subfield, you should be alert to the possibility of overlapping recommendations. Brief descriptions of enlisted career management fields are provided in Appendix D.

Description. A summary description applying to all skill levels and a specific description for each skill level. Provides information about the duties performed and the qualifications required for proficiency in the MOS. It indicates the rationale behind a given recommendation and provides information that can be used as a starting point should you wish to conduct further assessment of the learning a soldier or veteran has acquired. The description is also useful in making decisions when recommendations from more than one learning experience appear to duplicate each other.

Date of evaluation. By month and year. Follows the recommendation for each skill level.

Important: Read entire MOS exhibit before awarding educational credit or advanced standing in an apprentice training program.

MOS-81C-001

CARTOGRAPHIC SPECIALIST
(CARTOGRAPHIC DRAFTSMAN)

81C20
81C30
81C40
81C50

Exhibit Dates: 10/74–2/77.

Career Management Field: 81 (Topographic Engineering and Map Reproduction), *subfield* 811 (Drafting).

Description

Summary: Supervises or performs cartographic drafting activities, compilation or revision of planimetric and topographic maps, or construction of scale models of terrain. *Skill Level 20:* Draws or scribes cultural, topographic, hydrographic, or other features on drawings, transparent overlays, and scribing surfaces for reproduction of maps. NOTE: May have progressed to 81C20 from 81A10 (General Draftsman). *Skill Level 30:* Able to perform the duties required for Skill Level 20; compiles and revises planimetric and topographic maps. *Skill Level 40:* Able to perform . . .

Recommendation, Skill Level 20

In the lower-division baccalaureate/associate degree category, 6 semester hours in cartography, 3 in mechanical drawing, and 3 in aerial photographic interpretation, for a total of 12 semester hours (12/75).

Recommendation, Skill Level 30

In the lower-division baccalaureate/associate degree category, 6 semester hours in cartography, 4 in photogrammetry, 3 in mechanical drawing, and 3 in aerial photographic interpretation, for a total of 16 semester hours (12/75).

Recommendation, Skill Level 40

In the lower-division baccalaureate/associate degree category, 6 semester hours in cartography, 4 in photogrammetry, 3 in mechanical drawing, 3 in aerial photographic interpretation, and 3 in introduction to management, for a total of 19 semester hours (12/75).

Recommendation, Skill Level 50

In the lower-division baccalaureate/associate degree category, 6 semester hours in cartography, 4 in photogrammetry, 3 in mechanical drawing, 3 in aerial photographic interpretation, and 3 in introduction to management, 3 in personnel supervision, and 3 for field experience in management, for a total of 25 semester hours (12/75).

Title. The official Army title of the MOS during the period of the exhibit dates. If the title changed during that period, the newer title is given first and the older title is given in parentheses on the next line.

Exhibit Dates. Start and end dates by month and year. The earliest start date for enlisted MOS's is 10/73 because ACE does not have the information necessary to evaluate enlisted MOS's as they may have existed earlier than 10/73. When an end date is given, the MOS was either discontinued (an explanation is provided) or changed (another exhibit will follow for the MOS, e.g., MOS-81C-002). The term, "Present," as the end date indicates that the MOS still exists and the exhibit is current as of March 1, 1980. Some exhibits will end with the phrase "Pending Evaluation."

Recommendation. By skill level. Only the recommendation for the *highest* skill level held should be used; skill-level recommendations should *not* be added.

Educational credit is recommended in four possible categories: vocational certificate; lower-division baccalaureate/associate degree; upper-division baccalaureate; and graduate degree. (See Appendix A for category definitions.) The recommendation normally specifies the number of semester hours recommended and the appropriate subject area, program of study, or discipline in which the credit might be applied.

Advanced standing in an apprentice training program, when recommended, is expressed in clock hours of experience and contact hours of related instruction. For example, the apprenticeship recommendation in the exhibit MOS-22K-001 at Skill Level 40 is: "In an electronic technician apprentice training program, 1,200 clock hours of experience and 250 contact hours of related instruction (3/75)."

You are free to modify the recommendation.

Sample Warrant Officer MOS Exhibit

ID Number. A ten-character code assigned by OECC to identify each warrant officer MOS exhibit.

MOS Designation. The four-character code that identifies the MOS plus the neutral fifth character, zero ("0"). The zero is added as a reminder that the MOS evaluation does not include the evaluation of learning associated with Special Qualifications Identifiers (SQIs). When a person's MOS designation includes an SQI, signified by a letter or number other than zero as the fifth character, additional credit may be granted on the basis of individual assessment (refer to Appendix E).

Description. Provides information about the duties performed and the qualifications required for proficiency in the MOS. It indicates the rationale behind a given credit recommendation and provides information that can be used as a starting point should you wish to conduct further assessment of the learning a warrant officer or veteran has acquired. The description is also useful in making decisions about how much credit to grant when credit recommendations from more than one learning experience appear to duplicate each other.

MOS-271A-001

LAND COMBAT SUPPORT MISSILE SYSTEMS
REPAIR TECHNICIAN

271AO

Exhibit Dates: 10/66–Present.

Career Pattern

May have progressed to Land Combat Support Missile Systems Repair Technician from MOS 27B (Land Combat Support System Test Specialist/Lance Repairer), MOS 27D (Lance Missile System Repairman), MOS 27E (Wire-Guided Missile Systems Repairman or TOW/Dragon Repairer), MOS 27H (Shillelagh Repairer), or MOS 27Z (LCSS Missile Maintenance Chief).

Description

Manages supply, equipment, facility, and personnel assets in the maintenance and repair of land combat support missile systems (short- or medium-distance guided missile weapon systems), associated system-designed electronic test systems, and training devices; directs the activities of personnel engaged in isolating malfunctions occurring in electronic firing and guiding systems and components; analyzes complex malfunctions; supervises repair of and modifications to systems components, including guidance control systems, optical . . .

Recommendation

In the vocational certificate category, 6 semester hours in electronics theory and laboratory and 2 in use of basic hand tools. In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics theory and laboratory, 3 in personnel supervision, 3 for field experience in management, 3 in industrial/human relations, 2 in maintenance management, and 1 in technical report writing for a total of 18 semester hours. In the upper-division baccalaureate category, 3 semester hours in personnel management and training and 3 in management electives (3/77).

Title. The official Army title of the MOS during the period of the exhibit dates. If the title changed during that period, the newer title is given first and the older title is given in parentheses on the next line. A title in the exhibit may be different from the title that appears on the person's Army records, which may be the title of a Special Qualifications identifier (see Appendix E).

Exhibit Dates. Start and end dates by month and year. The start dates vary considerably for each warrant officer MOS exhibit. Each start date reflects an historical tracing of the MOS requirements. The end date for all warrant officer MOS's that have been evaluated is given as "Present," indicating that the exhibit is current as of March 1, 1980. Some exhibits will end with the phrase, "pending evaluation."

Career Pattern. Enlisted or other warrant officer MOS's that an individual may have held. You should be alert to the possibility of overlapping recommendations when a warrant officer has held one or more of these MOS's.

Recommendation. Educational credit is recommended in four possible categories: vocational certificate, lower-division baccalaureate/associate degree, upper-division baccalaureate, and graduate degree. (See Appendix A for category definitions.) The recommendation normally specifies the number of semester hours recommended and the appropriate subject area, program of study, or discipline in which the credit might be applied.

Recommendations for warrant officer MOS's are limited to recommendations for educational credit. No warrant officer MOS's have been evaluated for advanced standing in apprentice training programs because warrant officer duties are administrative and supervisory in nature.

You are free to modify the recommendation.

Date of Evaluation. By month and year.

Important: Read entire MOS exhibit before awarding educational credit.

Questions and Answers

This section is designed to answer questions that may arise about using the Guide and awarding credit.

1

An applicant at my institution has submitted a DD Form 214 that lists abbreviated course titles which I cannot decipher. The form does not contain enough information for me to find the courses in the *Guide*. What should I do? Military records often provide insufficient information for education officials to properly identify courses. For that reason, OECC has designed the "Request for Course Recommendation" form, which can be used to supplement records. The applicant for credit should be responsible for interpreting the information on his or her records and presenting the data in readable form. You may also use course completion certificates and other training records to verify entries on the DD Forms 214 and 295. It is recommended that you automatically require students to complete the Request for Course Recommendation Form. Then, if you need help from OECC, simply authorize the form and submit it to OECC.

2

When an applicant brings information on a number of courses completed, I can usually find exhibits for only a small percentage of the courses in the *Guide*. Am I doing something wrong? The course evaluations done by the Office on Educational Credit and Credentials probably represent about 30 percent of the total number of courses offered by the armed services. The remaining 70 percent cannot be evaluated for one reason or another. In general, courses evaluated and published in the *Guide* are offered on a full-time basis (a minimum of thirty contact hours of instruction a week) for not less than two weeks' duration; or, if less than two weeks in length, the courses must include a minimum total of sixty contact hours of academic instruction. (Prior to 1973 the minimum length requirement was three weeks or 90 contact hours.) Very few correspondence courses are listed in the *Guide* because such programs were not evaluated until the mid-1970s. However, recently we have begun to evaluate selected correspondence courses. These courses will be listed in the Keyword Index under "Correspondence" for easy identification. One criterion for reviewing correspondence courses is the establishment of an ongoing proctored end-of-course examination program. Another requirement for evaluation is that a course be formal as defined by the services, i.e., offered to meet servicewide training requirements and published in the formal schools catalog for the service. This requirement generally excludes locally organized and command-level training programs, as well as courses offered on a one-time basis. You will find no courses conducted prior to 1954 listed in this guide. You must always submit a Request for Course Recommendation Form to this office for assistance with courses taken from the 1940s up until 1954. When in doubt about the availability of any evaluation for any service course, contact the OECC Information Service by telephone or by submitting a Request for Course Recommendation form.

3

I understand many military records were destroyed in a fire at the General Services Administration several years ago. What do I do if the applicant's military records were among those destroyed? Many records were reclaimed or reconstructed and are now available. In addition, the applicant's copies of certificates may be used in lieu of records destroyed in the GSA fire.

4

May I submit a Request for Course Recommendation form that the student has filled out with information from the *Guide*? A form filled out by a student who copies information from the *Guide* cannot be used by the OECC Information Service staff for identification purposes because that information only duplicates data already published. One of the purposes of the Request for Course Recommendation form is to secure information about a course from the student, ideally through official records, but also from his or her personal knowledge or memory of the course. With this first-hand information, you may find the correct course exhibit in the *Guide*. If you cannot find it, you may send the request form to the OECC Information Service.

The OECC staff can then use this additional information to search its extensive files for matching information. When a student attempts to identify a course taken years ago by extracting *current* titles and/or course numbers from the *Guide,* he or she may in fact be identifying a *similar* course but not the one he or she may have taken. This can be misleading and it seriously handicaps the OECC research staff. Only accurate and verified information is to be submitted.

5

Who should send in the Request for Course Recommendation form? The form should be completed by the applicant and authorized by you, the institution official. Credit recommendations will be forwarded to your institution only when you authorize us to do so. While we do provide credit recommendations to applicants upon receipt of their requests, we encourage them to apply through their schools. We do not normally send a credit recommendation to a college at the request of a student applicant.

6

Why is so much information needed on the Request for Course Recommendation form? You cannot be sure that you have identified the correct exhibit in the *Guide* unless all the information on the form matches the corresponding items in the course exhibit. The course title, course number, name and location of the service school, and length of the course shown on the form should be identical to the information in the exhibit. In addition, the dates of attendance should fall within the exhibit dates.

A complete and accurate form will also help the OECC Information Service research the course. OECC credit recommendations are for *specific* courses; therefore, all items must be identical if a positive identification is to be made.

7

What do I do when the information on the Request for Course Recommendation form doesn't exactly match the information in the course exhibit? Send an authorized form to the OECC Information Service. Send the form in yourself; do not give it to the student to submit. Send *copies* of military records if you think they'll provide additional information. If OECC cannot identify the course and supply a credit recommendation, you may still grant credit to the applicant by conducting your own assessment of the applicant's learning. (See question 25 for information about assessment techniques.)

8

How long does it take to receive a response if I submit a properly completed request form? About three weeks for most requests, longer for those requiring extensive research. Every effort will be made to respond as quickly as possible. If you wish, you may call in requests, but if research is involved, OECC will ask you to send a written response. If you are calling in with a request, be sure to have all pertinent information (See Question 6) available to give to the OECC staff person.

9

How can I get additional information about the courses in the *Guide?* Sometimes the descriptive material in the exhibit is not detailed enough for me to make a decision about granting credit. What do I do then? With the exception of a few computer-taught or classified courses, OECC has on file the programs of instruction for all courses listed in the *Guide.* When necessary, OECC can provide the topic outline from the military syllabus, and in those instances where an entire program of instruction is needed, arrangements can be made to photocopy the entire syllabus.

10

What are USAFI and DANTES? Can I grant credit for the courses and tests listed on an applicant's USAFI or DANTES military test reports? USAFI was the United States Armed Forces Institute, which offered an extensive educational program to active-duty personnel. USAFI correspondence, seminar, and self-study courses, end-of-course tests, and Subject Standardized Tests (SSTs) were made available to service personnel worldwide until 1974, when USAFI was disestablished. Subsequently, the Defense Activity for Non-Traditional Education Support (DANTES) was established in 1974, and that agency continued the development and administration of Subject Standardized Tests and other educational services. OECC continues to recommend credit for USAFI offerings and DANTES SSTs.

In verifying completion of USAFI or DANTES courses or tests, the military test report should not be considered official. That report is given to all service personnel who have taken a course or test. To obtain official USAFI or DANTES transcripts, refer to the addresses provided in Appendix A, under "Other Recommendations."

11

What is the significance of the date which appears after each credit recommendation? That date is called the "evaluation date" and represents the month and year the credit recommendation was established. Each time a course or MOS is evaluated, a date is provided so that you know when the course or MOS was last considered in terms of a credit equivalency. The date tells you how recently a recommendation was established so that you can judge the currency of the credit recommended. This information is particularly useful in subject areas where "state of the art" is important in determining the applicability of credit. You can also use the evaluation date when your institution has established a "statute of limitations" for acceptance of transfer credit. The date is provided purely for your information; do not confuse the date with exhibit dates or effective dates.

12

An applicant completed a course in 1973, but the *Guide* exhibit dates are 5/74 to Present. Should I grant credit based on the *Guide?* The exhibit dates shown in the *Guide* indicate the time period for which OECC has information on the course. The course may have been offered for several years prior to the exhibit "start" date, but since the service branch did not submit information on the course during that time period, OECC is not able to backdate the exhibit to cover it. If you can be reasonably sure, from other information provided by the applicant (length, course content description), that his or her course was the same or similar to the course listed in the *Guide,* then you may want to grant credit based on the *Guide* recommendation. If the applicant's course was a number of weeks longer or shorter than the one covered in the *Guide* exhibit, you may be able to grant credit based on a comparison of the applicant's information with the descriptive information in the *Guide.* The Office on Educational Credit and Credentials encourages you to conduct your own assessment of courses for which no credit recommendation is available. (See Question 25 for information about assessment techniques; for information on MOS exhibit dates, see questions 15 and 19, and Step 3 in How to Find and Use MOS Exhibits.) OECC staff can often provide you with military formal school catalog descriptions of a course outside the time period in the exhibit. This should help you determine whether you might apply the credit listed in the guide exhibit based on your own comparison.

13

What does it mean when an MOS is listed as PMOS, SMOS, AMOS, or DMOS? Can I still use the ACE recommendation for the MOS? Army records may show an enlisted MOS as primary (PMOS), secondary (SMOS), additional (AMOS), or duty (MOS); a recommendation for any type of MOS can be used, provided the individual has demonstrated proficiency in that MOS.

14

How do I determine whether an applicant is eligible to receive the credit recommended in the enlisted MOS exhibits? To determine eligibility for an MOS recommendation, you must first verify the applicant's MOS proficiency. There are a number of sources available for MOS verification. The information in italics lists the forms on which you can find the information:

1. Supervised on-the-job training (10/73–Present).
   Military Orders Awarding the MOS
2. MOS-producing course (10/73–Present).
   Course Completion Certificate.
3. MOS Test (10/73–12/76).
   - *USAEEC Form 10, Enlisted Evaluation Data Report. Gives the MOS evaluation score and a breakdown of how the person performed on each section of the written test.*
   - *DA Form 2-1, Personnel Qualifications Record, Items 3 and 6. Lists each MOS and skill level a person held, relevant dates, evaluation scores, and dates of evaluation.*
   - *DA Form 20, Enlisted Qualifications Record, Item 22. Lists each MOS and skill level a person held, relevant dates, evaluation scores, and dates of evaluation.*
4. Enlisted Evaluation Report (EER) and Senior Enlisted Evaluation Report (SEER) (10/73–Present).
   DA Form 2166-5 (EER) or DA Form 2166-5A (SEER). Gives the supervisor's rating and comments regarding occupational performance.
5. Skill Qualification Test (SQT) (1/77–Present).
   Individual Soldier's Report (ISR). Indicates whether or not the minimum score required to verify the MOS or requalify in it has been achieved.

15

What if the applicant held the MOS before the start date of the MOS exhibit? Should I still use the recommendation to grant credit to this person? If you have the institutional resources to do so, you should do some investigating before deciding to accept or modify the recommendation. Since MOS duties and skill level structures sometimes change, you need to determine if the earlier MOS is the same as the current MOS described in the *Guide.* You may be able to confirm the comparability of the new MOS description with an old description. There are three steps you will need to follow in deciding whether or not to award credit:

1. Obtain a description of the MOS as it existed when the person held it. If the person held it since October 1973, write to the OECC Information Service for a copy of the Army description (be sure to tell us when the person held the MOS). If the person held it before October 1973, ask the person to provide a copy of the Army Regulation description of the MOS that was in effect when he or she held the MOS. Use the description to identify the learning outcomes represented by the MOS.

2. Determine whether the individual demonstrated proficiency in the MOS. If the person held the MOS since October 1973, follow the procedures outlined in Question 14 and Steps 1 and 2 in the "How to Find and Use MOS Exhibits" section to determine MOS proficiency. If the person held the MOS before October 1973, conduct your own assessment to verify that the person achieved the learning outcomes represented by the MOS. (See Question 25 for information about assessment techniques.)

3. Determine how much credit may be granted to the person. A careful comparison of the description in the MOS exhibit and the one obtained in Step One, above, may reveal whether the MOS was substantively different. If it was not, the credit recommendation in the exhibit may be used. If specific differences are identified, then the recommended credits may need to be modified accordingly.

16

Is a four-digit number such as 5241 an acceptable warrant officer MOS designation? In some cases, yes. The four-digit number is the warrant officer MOS designation that was used before the present warrant officer MOS classification system was adopted in June 1961. For example, the MOS designation for Bandmaster was 5241 and is now 031A. When the start date for a warrant officer MOS exhibit is earlier than 6/61, the four-digit MOS designation is provided in the MOS exhibit because some warrant officer records may show the old number.

17

Do I have to verify an MOS evaluation score for warrant officers, too? No. A warrant officer's eligibility for the recommendation can be verified by checking DA Form 67-7, "Officer Evaluation Report."

18

Should I award credit to a warrant officer for his or her *enlisted MOS's?* Yes, you may award credit for any combination of learning experiences. (See also question 20.)

19

When an MOS exhibit includes the statement, "Pending evaluation," how will I know when the ACE recommendations will be available? The "abbreviated" exhibit format was developed to let you know the evaluation status of MOS's. Such exhibits include only the OECC ID number, the MOS title, the MOS designations, and the exhibit dates with the statement, "Pending evaluation." When you encounter the statement, two things are certain: (1) the MOS is one that was in use as of the publication cut-off date of March 1980 and (2) ACE plans to evaluate it. As MOS recommendations are available they will be announced in the *OECC Newsletter.* Inquiries about the evaluation status of an MOS should be directed to the OECC Information Service (see Step 6).

20

I have looked up several courses and MOS's for one applicant. It appears that a lot of the recommended credit is in the same subject area. How can I avoid granting too much or duplicate credit to this person? Also, if I grant credit for a course, should I also grant credit for the MOS? You may grant credit for any combination of learning experiences. In doing so, however, you must be alert to the possibility of overlapping credit recommendations. If the person is applying for credit for more than one learning experience, the recommendations might cover some of the same learning. In such cases, awarding a simple total of the recommended credits could result in the award of more credit than the learning merits. Credit recommendations may overlap between (1) related courses, (2) MOS's and related courses, (3) related enlisted MOS's, and (4) enlisted and warrant officer MOS's. The course exhibits and the MOS exhibits contain information that will assist you in identifying cases of duplication.

1. *Course recommendations* will overlap when the individual has participated in several military courses in the same subject area and at the same level.

2. *Course recommendations and MOS recommendations* will overlap when the individual has acquired his or her proficiency, or a significant portion of it, through completion of one or more formal service school courses. That is, some formal courses are MOS-producing; successful completion of the course leads to the award of a specific MOS. Other courses often supplement on-the-job training and work experience and are clearly related to the skills, competencies, and knowledge required for proficiency in a

warrant officer MOS or in one or more enlisted MOS skill levels. Related MOS's include those awarded upon completion of the course, those required as a prerequisite to the course, and those for which the course is supplementary.

3. *Enlisted MOS recommendations* will overlap when the soldier or veteran has held two or more MOS's that require related qualifications and the performance of related or similar duties. MOS's in the same career management field or subfield are probably related. Related MOS's are also noted in the summary and skill-level descriptions in the exhibit. You may also encounter overlap in the apprenticeship recommendations for two or more enlisted MOS's. You may wish to evaluate the individual's proficiency by performance examination before awarding advanced standing in an apprentice training program or waiving apprenticeship requirements.

4. *Enlisted and warrant officer MOS recommendations* will probably overlap because most warrant officers progress through the enlisted ranks, in enlisted MOS's directly related to warrant officer positions. Related MOS's are noted in the "Career Pattern" item in warrant officer MOS exhibits.

To reconcile overlapping credit recommendations, compare the descriptions and recommendations for each course and/or MOS and interview the soldier or veteran to obtain additional information. When the learning outcomes, courses in which credits are recommended, and the number of credits recommended for a given course or subject are the same or very similar, there is overlap, and you should modify the credit recommendations to avoid granting duplicate credit. To determine how much credit may be awarded without duplication to an individual who has completed a number of courses and held a number of MOS's, use the following steps:

1. Identify Army MOS's held and formal courses completed by the individual from the official military records the individual provides.
2. Locate all pertinent and available MOS exhibits and course exhibits in the *Guide,* and note the "Related Occupation Codes" listed in the course exhibit.
3. For enlisted MOS's, locate the correct skill level within each enlisted MOS exhibit; for courses, locate the correct version within each course exhibit.
4. Read and compare all the descriptions.
5. Identify the appropriate recommendations in each exhibit, on the basis of the person's program of study.
6. Read and compare all the pertinent recommendations. It may be helpful to list the amount of credit and the subject areas of each recommendation.
7. If necessary, obtain additional information from the individual through interview or further assessment.
8. When the nature and extent of the individual's learning has been identified, refer to all pertinent recommendations and make decisions on how much credit may be awarded without duplication. Credit should be awarded as appropriate to the educational goals of the individual and the institution.

If you cannot determine whether duplication exists, write the OECC Information Service.

21

Why does the MOS I just looked up have more credit recommended than the course that leads to it? Discrepancies between the credit recommendations for related courses and MOS's are not uncommon. Indeed, it is rare for the subject matter covered in a course to perfectly coincide with the learning represented by occupational proficiency. In most cases, there is quite a difference in scope: a difference in the subject matter mastered by the learner and, when the subject matter is the same, a difference in the depth, breadth, and extent of the learning.

Usually the scope of a course is narrower than that of the job. Most Army courses are designed to prepare the soldier to be able to function on-the-job or to take on additional tasks. As such, the courses normally provide entry-level occupational skills and competencies. However, successful performance on the MOS test is predicated on the additional factor of job experience and/or extensive self-instruction.

Enlisted and warrant officer MOS's related to courses are listed in the course exhibit item, "Related Occupation Codes," in Army course exhibits. A related MOS may be one that is awarded upon completion of the course, one for which the course is supplementary, or one which is required as a prerequisite to the course. Therefore, this item in the course exhibit tells you that there is a relationship—a likelihood of overlapping credit recommendations—between the MOS and the course. The term "overlapping" connotes that at least part of the learning represented by the MOS is the same as that for the course; therefore, some of the credits recommended may duplicate each other. A suggested procedure for resolving duplication is given in the answer to question 20.

22

When credit is recommended in more than one category, what should I do? Credit has frequently been recommended in more than one category. One reason for multiple-category recommendations is that the scope of a given MOS or course reflects learning in several subject fields at different levels of complexity. The learning outcomes acquired in a course or MOS in one subject field may apply to courses normally included in lower-division baccalaureate/associate degree programs while those in another subject field may apply to courses normally included in upper-division baccalaureate programs. Another reason for multiple-category recommendations is that faculty members who serve as evaluators decide that learning in a given subject field can be applied to courses and programs of study encompassed by more than one of the categories; that is, learning in electronics, for example, may apply to the vocational certificate category and to the upper-division baccalaureate category. A thorough reading of the exhibit will help you to determine which category is the best for you to apply. You will need to read the exhibit and compare learning outcomes achieved and course objectives and content with those of your own institution.

In the first instance—learning in several subject fields—the recommended credits may be added as long as all the subjects are applicable to the student's program of study at your institution.

> *Example A:*
> In the lower-division baccalaureate/associate degree category, 1 semester hour in communication skills and 1 in principles of management. In the upper-division baccalaureate category, 3 semester hours in personnel management (6/75).

In Example A, up to 5 semester hours may be awarded if they apply to the student's program: 1 in communication skills, 1 in principles of management, and 3 in personnel management.

In the second instance—learning in a given subject field that is applied to two or more categories—the recommended credits probably should not be added. You will have to determine how they apply to the student's program of study at your institution.

> *Example B:*
> In the vocational certificate category, 15 semester hours in electricity or electronics. In the lower-division baccalaureate/associate degree category, 10 semester hours in electricity or electronics. In the upper-division baccalaureate category, 5 semester hours in electricity or electronics.

In Example B, to determine how many credits to award, compare the information in the exhibit description with the desired outcomes of electricity or electronics or related courses and programs of study at your institution. Award credit based on comparison of these outcomes.

As a general rule, you should read the course description or the MOS summary and skill level descriptions, and then award credit as it best applies to the student's program of study, as determined through academic counseling.

Credit may be applied to a student's program in various ways: (1) applied to the major to replace a required course; (2) applied as an optional course within the major; (3) applied as a general elective; (4) applied to meet basic degree requirements; or (5) applied to waive a prerequisite. Credit granted by a postsecondary institution will depend on institutional policies and degree requirements.

23

I have a course recommendation in which credit in more than one category—but in the same subject area—is recommended. It looks like a combination of the previous examples. What do I do in that case? Credit categories could be combined, if, for example, the recommendation is:

> In the lower-division baccalaureate/associate degree category, 3 semester hours in typing and 3 in office management. In the upper-division baccalaureate category, 3 semester hours in office management and 2 for field experience in management (11/75).

The 3 semester hours in office management recommended in the lower-division baccalaureate/associate degree category and the 3 in office management recommended in the upper-division baccalaureate category should not be combined for a total of 6. Eight semester hours might be granted if they apply to the student's program: 3 in typing, 3 in office management, and 2 for field experience in management. The evaluators have described the course content, and using that description from the course exhibit, you must determine the appropriate application of the credit recommendation.

24

Do I have to grant credit *exactly* as it appears in the recommendation? No. You are under no obligation to grant credit, although most colleges do recognize learning that occurs in a military setting. The use of ACE recommendations is the prerogative of education officials and employers. The recommendations are provided to assist you in assessing the applicability of a person's military learning experiences to his or her educational program or occupation. *You may modify the recommendations in accordance with your institution's policies and practices.*

You should keep in mind that the recommendations are advisory and are designed as a tool for use in giving due recognition to an individual for his or her learning experiences in the armed services. You should also keep in mind that the learning of some service personnel may exceed the skills, competencies, and knowledge evaluated for a specific course or MOS. In these cases, you may wish to conduct further assessment. (See question 25 for information about assessment techniques.)

25

May I conduct my own assessment of an applicant's learning? Yes. In a sense, you are *always* conducting your own assessment, even when you use the recommendations in this book. The *Guide* is one of many tools you can use to assess what an applicant has learned and how that learning can be applied to a specific program of study at your institution. When you cannot find a recommendation in the *Guide* or obtain one from OECC Information Service, we encourage you to use other means to assess what the person has learned.

There are a wide variety of assessment techniques that you can use, e.g., written examinations, oral examinations, faculty committee assessment, evaluation of materials supplied by the applicant, personal interviews, performance tests, and standardized examinations such as CLEP. A combination of several techniques will usually result in a reliable assessment of the person's learning.

You may learn more about assessment techniques through the publications of the Council for the Advancement of Experiential Learning (CAEL), formerly the Cooperative Assessment of Experiential Learning. Two CAEL reports give particularly helpful overviews of the topic: *A Compendium of Assessment Techniques*, by Joan Knapp and Amiel T. Sharon (CAEL-11; $4.50), and *Principles of Good Practices in Assessing Experiential Learning*, by Warren W. Willingham (CAEL-27; $4.00 for a single copy, $3.00 each for ten or more). The publications may be purchased from CAEL, American City Building, Suite 212, Columbia, Maryland 21044.

You should also watch for new additions to the *ACE Guide Series*, which now comprises the *Guide* and a companion volume, *The National Guide to Educational Credit for Training Programs*, which lists recommendations for courses offered by business and industry, government agencies, professional and voluntary associations, and labor unions. The 1980 edition of *The National Guide* may be purchased from the ACE Publications Department ($22.00 a copy, prepaid). The office plans to add a guide to credit-by-examination programs to the series. Availability of the new guide will be announced in the *OECC Newsletter*.

26

I am an employer. How will the *Guide* be useful to me? Employers may find the exhibits helpful in hiring and placing veterans in jobs. The recommendations and descriptions enable you to compare a veteran's training and experience with the qualifications and requirements for jobs. The recommendations relate learning to postsecondary courses and curricula and, in some cases, to apprentice training programs.

27

The Course Number Index in the *Guide* contains Army course numbers that are eight digits long, but service records usually provide only a five-digit course number. How can I identify a course with this type of number? The Army course numbering system consists of the three-digit DoD Enlisted Occupation Code followed by the Army five-digit MOS code. Many service records, however, provide only the MOS code that relates to an Army course. To identify the correct course exhibit when you have only an MOS code, refer to Appendix G, the Conversion Table of MOS's to DoD Enlisted Occupation Codes.

To use this table, you must identify the first three digits of the five-digit MOS code (e.g., the first three digits of MOS 35E20 are 35E). Look up the three-digit code (35E) in the table and find the corresponding DoD code (198). You now have the complete Army Course Number (198-35E20) and are able to use the Course Number Index.

28

I found the correct exhibit in my 1978 Guide but under Credit Recommendation it says "Pending Evaluation." My student can't wait for the 1980 Guide to find out what credit she might receive. What should I do in such a case? Staff members of the Office on Educational Credit and Credentials regularly schedule site evaluations. We publish the titles of courses, Army MOS's, and Navy ratings in the Newsletter so that you may be aware of the availability of recommendations. When a course or occupation is listed as "Pending Evaluation," you may call the office to find out if a credit recommendation is available, or you may simply send in your authorized "Request for Course Recommendation" or "Request for Army Enlisted and Warrant Officer MOS Exhibits" form. The Guide system is constantly growing as courses and occupations are added to the data base.

29

One of my students completed a formal military course but does not have a DD Form 295 or DD Form 214 because he was not on active-duty service. Can I grant credit for the course and how can I verify that the course was actually completed? We recommend that school officials use the DD 295 or DD 214 whenever available in verifying successful completion of a service course. This suggestion is not intended to exclude those individuals who do not have access to the forms because they were 1) on reserve status, 2) in the National Guard, or 3) civilians attending military courses. In such cases, we suggest that alternative forms of certification, such as course completion certificates or other acceptable records of training, be used to verify eligibility for credit. The following summary of records sources might be used in seeking alternative records:

National Personnel Records Center (Military Personnel Records), 9700 Page Boulevard, St. Louis, MO 63132—the primary source for in-service training records for discharged or retired personnel.

USAF, Military Personnel Center, Military Personnel Records Division, Randolph AFB, TX 78148—for active AF members including National Guard on active duty in the Air Force and general officers retired with pay.

Air Reserve Personnel Center, 3800 York Street, Denver, CO 80205—for reserve personnel, retired reservists in non-pay status, and members of the National Guard released from active duty and transferred to reserve.

Commandant, U.S. Coast Guard, Washington, DC 20590—for Coast Guard active, reserve, and officers separated before 1-1-29.

Commandant of the Marine Corps, Headquarters, U.S. Marine Corps, Washington, DC 20380—for Marine Corps active members, reserve officers, and Class II enlisted reserve.

Marine Corps Reserve Forces Class III, 1500 E. Bannister Road, Kansas City, MO 64131—for Marine Corps Class III reservists (inactive).

National Archives and Records Service, National Archives Building, Washington, DC 20408—for Army officers separated before 7-1-17 and enlisted separated before 11-1-12.

Commanding Officer, U.S. Army Administration Center, TAGO, 9700 Page Boulevard, St. Louis, MO 63132—for Army Reserve, current National Guard members, records of active duty in U.S. Army, and living retired members other than general officers.

The Adjutant General, ATTN: AGPF, Department of the Army, Washington, DC 20310—for active Army officers, including National Guard on active duty in the U.S. Army, and retired general officers.

Commanding Officer, U.S. Army Enlisted Personnel Support Center, Ft. Benjamin Harrison, IN 46249—for active enlisted personnel, including National Guard, on active duty in the U.S. Army.

Chief of Naval Personnel, Department of the Navy, Washington, DC 20370—for Navy active members, reserve officers, and enlisted reserve in drill status.National Guard Bureau, Washington, DC 20310—for current National Guard officers not on active duty in the Army or Air Force.

The Adjutant General of the Appropriate State, District of Columbia, or Puerto Rico—for current National Guard enlisted personnel not on active duty in the Army or Air Force.

30

As registrar of a four-year college, I use only the upper-division baccalaureate category in granting credit for military courses listed in your Guide. That is the correct approach, isn't it? Not necessarily. Depending on the recommendation, the programs of study available at the institution, and the objectives of the student, four-year colleges and universities can use any *or all* of the four categories used in the *Guide*, namely the vocational certificate category, the lower-division baccalaureate/associate degree category, the upper-division baccalaureate category, and the graduate degree category. Please read "Categories of Credit," p. A-7, of the 1980 edition of the *Guide to the Evaluation of Educational Experiences in the Armed Services.*

31

We have received from a military service school a transcript listing semester credits and carrying the statement that the school is accredited by one of the six regional accrediting associations. How do we handle this? At this time we know of no military schools that are accredited above the certificate level other than the following: Community College of the Air Force, which is accredited at the two-year community college level, Army Command and Staff College at Fort Leavenworth, Kansas, which is accredited to grant an M.A. degree, Armed Forces Institute of Technology at Wright-Patterson Air Force Base, which is accredited through the doctoral level and of course, the Service Academies.

We recommend that you handle the certificate level credit listings in accordance with your institutional policy regarding certificate level credit.

32

I understand that basic training was recently evaluated. What happened to OECC's former statement on basic and recruit training, and where do I find the new credit

recommendations? We did conduct on-site evaluations of the basic training offered for both men and women by the Army, Coast Guard, Marine Corps, and Navy. We believe that the differences in the missions of the services had not been sufficiently addressed by our earlier policies and believed that the differences in training for males and females also were not reflected. Consequently, you will find our credit recommendations in the Course Exhibits section of each volume of the *Guide;* look under "basic" or "recruit" in each Keyword Index to find the course exhibit number.

Additional questions and answers about using the Guide *and the recommendations appear in the* OECC Newsletter. *If you are not already receiving the newsletter, write to the Editor,* OECC Newsletter, *Office on Educational Credit and Credentials, American Council on Education, One Dupont Circle, Washington, D.C. 20036.*

Transfer and Award of Credit

This statement was developed by the three national associations whose member institutions are directly involved in the transfer and award of academic credit—the American Association of Collegiate Registrars and Admissions Officers, the American Council on Education, and the Council on Postsecondary Accreditation. The need for such a statement came from an awareness of the growing complexity of transfer policies and practices, which have been brought about, in part, by the changing contours of postsecondary education. With increasing frequency, students are pursuing their education in a variety of institutional and extra-institutional settings. Social equity and the intelligent use of resources requires that validated learning be recognized wherever it takes place.

The statement is intended to serve as a guide to institutions in the development or review of policies dealing with transfer and award of credit. It is under periodic review by the three associations and reactions would, of course, be welcome. Comments may be directed to Henry Spille, Director of the Office on Educational Credit and Credentials, ACE.

J. W. Peltason, President

This statement is directed to institutions of postsecondary education and others concerned with the transfer of academic credit among institutions and award of academic credit for extra-institutional learning. Basic to this statement is the principle that each institution is responsible for determining its own policies and practices with regard to the transfer and award of credit. Institutions are encouraged to review their policies and practices periodically to assure that they accomplish the institution's objectives and that they function in a manner that is fair and equitable to students. Any statements, this one or others referred to, should be used as guides, not as substitutes, for institutional policies and practices.

Transfer of credit is a concept that now involves transfer between dissimilar institutions and curricula and recognition of extra-institutional learning, as well as transfer between institutions and curricula of similar characteristics. As their personal circumstances and educational objectives change, students seek to have their learning, wherever and however attained, recognized by institutions where they enroll for further study. It is important for reasons of social equity and educational effectiveness, as well as the wise use of resources, for all institutions to develop reasonable and definitive policies and procedures for acceptance of transfer credit. Such policies and procedures should provide maximum consideration for the individual student who has changed institutions or objectives. It is the receiving institution's responsibility to provide reasonable and definitive policies and procedures for determining a student's knowledge in required subject areas. All institutions have a responsibility to furnish transcripts and other documents necessary for a receiving institution to judge the quality and quantity of the work. Institutions also have a responsibility to advise the students that the work **reflected** on the transcript **may or may not** be accepted by a receiving institution.

INTERINSTITUTIONAL TRANSFER OF CREDIT

Transfer of credit from one institution to another involves at least three considerations:

(1) the educational quality of the institution from which the student transfers;

(2) the comparability of the nature, content, and level of credit earned to that offered by the receiving institution; and

(3) the appropriateness and applicability of the credit earned to the programs offered by the receiving institution, in light of the student's educational goals.

Accredited Institutions

Accreditation speaks primarily to the first of these considerations, serving as the basic indicator that an institution meets certain minimum standards. Users of accreditation are urged to give careful attention to the accreditation conferred by accrediting bodies recognized by the Council on Postsecondary Accreditation (COPA). COPA has a formal process of recognition which requires that any accrediting body so recognized must meet the same standards. Under these standards, COPA has recognized a number of accrediting bodies, including:

(1) regional accrediting commissions (which historically accredited the more traditional colleges and universities but which now accredit proprietary, vocational-technical, and single-purpose institutions as well);

(2) national accrediting bodies that accredit various kinds of specialized institutions; and

(3) certain professional organizations that accredit free-standing professional schools, in addition to programs within multi-purpose institutions. (COPA annually publishes a list of recognized accrediting bodies, as well as a directory of institutions accredited by these organizations.)

Although accrediting agencies vary in the ways they are organized and in their statements of scope and mission, all accrediting bodies that meet COPA's standards for recognition function to assure that the institutions or programs they accredit have met generally accepted minimum standards for accreditation.

Accreditation affords reason for confidence in an institution's or a program's purposes, in the appropriateness of its resources and plans for carrying out these purposes, and in its effectiveness in accomplishing its goals, insofar as these things can be judged. Accreditation speaks to the probability, but does not guarantee, that students have met acceptable standards of educational accomplishment.

Comparability and Applicability

Comparability of the nature, content, and level of transfer credit and the appropriateness and applicability of the credit earned to programs offered by the receiving institution are as important in the evaluation process as the accreditation status of the institution at which the transfer credit was awarded. Since accreditation does not address these questions, this information must be obtained from catalogues and other materials and from direct contact between knowlegeable and experienced faculty and staff at both the receiving and sending institutions. When such considerations as comparability and appropriateness of credit are satisfied, however, the receiving institution should have reasonable confidence that students from accredited institutions are qualified to undertake the receiving institution's educational program.

Admissions and Degree Purposes

At some institutions there may be differences between the acceptance of credit for admission purposes and the applicability of credit for degree purposes. A receiving institution may accept previous work, place a credit value on it, and enter it on the transcript. However, that previous work, because of its nature and not its inherent quality, may be determined to have no applicability to a specific degree to be pursued by the student.

Institutions have a responsibility to make this distinction, and its implications, clear to students before they decide to enroll. This should be a matter of full disclosure, with the best interests of the student in mind. Institutions also should make every reasonable effort to reduce the gap between credits accepted and credits applied toward an educational credential.

Unaccredited Institutions

Institutions of postsecondary education that are not accredited by COPA-recognized accrediting bodies may lack that status for reasons unrelated to questions of quality. Such institutions, however, cannot provide a reliable, third-party assurance that they meet or exceed minimum standards. That being the case, students transferring from such institutions may encounter special problems in gaining acceptance and transferring credits to accredited institutions. Institutions admitting students from unaccredited institutions should take special steps to validate credits previously earned.

Foreign Institutions

In most cases, foreign institutions are chartered and authorized by their national governments, usually through a ministry of education. Although this provides for a standardization within a country, it does not produce useful information about comparability from one country to another. No other nation has a system comparable to voluntary accreditation. The Division of Higher Education of the United Nations Educational, Scientific, and Cultural Organization (UNESCO) is engaged in a project to develop international compacts for the acceptance of educational credentials. At the operational level, four organizations—the Council on International Educational Exchange (CIEE), the National Council on the Evaluation of Foreign Student Credentials (CEC), the National Association for Foreign Student Admissions (NAFA), and the National Liaison Committee on Foreign Student Admissions (NLC)—often can assist institutions by distributing general guidelines on admission and placement of foreign students. Equivalency or placement recommendations are to be evaluated in terms of the programs and policies of the individual receiving institution.

VALIDATION OF EXTRA-INSTITUTIONAL AND EXPERIENTIAL LEARNING FOR TRANSFER PURPOSES

Transfer-of-credit policies should encompass educational accomplishment attained in extra-institutional settings as well as at accredited postsecondary institutions. In deciding on the award of credit for extra-institutional learning, institutions will find the services of the American Council on Education's Office of Educational Credit helpful. One of the Office's functions is to operate and foster programs to determine credit equivalencies for various modes of extra-institutional learning. The Office maintains evaluation programs for formally structured courses offered by the military, and civilian noncollegiate sponsors such as business, corporations, government agencies, and labor unions. Evaluation services are also available for examination programs, for occupations with validated job proficiency evaluation systems, and for correspondence courses offered by schools accredited by the National Home Study Council. The results are published in a Guide series. Another resource is the General Education Development (GED) Testing Program, which provides a means for assessing high school equivalency.

For learning that has not been validated through the ACE formal credit recommendations process or through credit-by-examination programs, institutions are urged to explore the Council for Advancement of Experiential Learning (CAEL) procedures and processes. Pertinent CAEL publications designed for this purpose are also listed.

USES OF THIS STATEMENT

This statement has been endorsed by the three national associations most concerned with practices in the area of transfer and award of credit—the American Association of Collegiate Registrars and Admissions Officers, the American Council on Education/Commission on Educational Credit, and the Council on Postsecondary Accreditation.

Institutions are encouraged to use this statement as a basis for discussions in developing or reviewing institutional policies with regard to transfer. If the statement reflects an institution's policies, that institution might want to use this publication to inform faculty, staff, and students.

It is recommended that accrediting bodies reflect the essential precepts of this statement in their criteria.

Course Exhibits

AR

AR-0101-0001

DOD Pest Management

Course Number: None.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 2-3 weeks (89-136 hours).

Exhibit Dates: 10/77-Present.

Objectives: To prepare individuals in general and special pest management.

Instruction: Lectures and practical exercises in pest management including fertilization programs, classification and mode of action herbicides, biology and control of weeds, and natural resources conservation programs. Students completing the course are eligible to take the certification examination in their specialized area of pest control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in agricultural pest management; for those students completing the herbicide certification, an additional 1 credit in herbicide management; for those completing the pest management certification, an additional 3 credits in agricultural pest management (8/79).

AR-0102-0001

Army Medical Department (AMEDD) Officer Orientation (VC)

Course Number: 6-8-C21(VC).

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 6 weeks (234 hours).

Exhibit Dates: 2/79-Present.

Objectives: To provide veterinary officers with the necessary skills and techniques to supervise subordinate personnel in the performance of all military veterinary activities.

Instruction: Conferences and practical exercises in general administration; meat and waterfood technology, including inspection of meats; dairy and poultry science, including inspection, identification, and evaluation of milk products; surveillance inspections; preventative veterinary medicine; and sanitation.

Credit Recommendation: In the graduate degree category, 4 semester hours in general administration, 4 in the field of veterinary science (8/79).

AR-0102-0002

Veterinary Specialist

Course Number: 321-91T20.

Location: Walter Reed Institute of Research, Washington, DC.

Length: 8 weeks (290-302 hours).

Exhibit Dates: 3/67-Present.

Objectives: To provide enlisted personnel with a general and working knowledge of the basic principles and techniques of animal care, management, and treatment, to enable them to assist the veterinary officer.

Instruction: Lectures and clinical practicum in laboratory procedures; anatomy and physiology; veterinary pathology; diseases of the systems; handling, care and treatment of animals; surgical procedures; and veterinary diseases.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in basic veterinary science and 2 in clinical practicum (6/75).

AR-0102-0003

Installation Veterinary Activities

Course Number: 6G-F3; 321-F4.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 2 weeks (80 hours).

Exhibit Dates: 5/77-Present.

Objectives: To provide selected Veterinary Corps officers and enlisted personnel with standardized training to perform or supervise tasks involved in providing installation veterinary service support.

Instruction: Lectures and practical exercises in administration, meat and waterfood technology and quality assurance, surveillance inspections and veterinary preventative medicine.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in administration, 1 in food technology, 1 in inspection procedures, 1 in veterinary preventative medicine (8/79).

Related Occupation Codes: 91R.

AR-0102-0004

Veterinary Officer Statistics and Epidemiology

Course Number: 6G-F1.

Location: Academy of Health Sciences, Ft Sam Houston, TX.

Length: 3 weeks (126 hours).

Exhibit Dates: 4/78-Present.

Objectives: To enable veterinary officers to perform statistical analysis, design experiments and analyze epidemiological data to the degree that they can present and interpret epidemiological problems.

Instruction: Instruction and practical exercises in statistics, including probability, distribution, limit theorem and sampling, hypothesis testing, analysis of variance, regressive and Chi theorem and nonparamedic statistics. Principles of epidemiology are also discussed including data interpretation, strategies, variances, investigative techniques and experimental design.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in statistics, 3 in epidemiology (8/79).

AR-0104-0001

1. Veterinary Specialist
2. Food Inspection Procedures (Advanced)
3. Food Inspection Advanced

Course Number: *Version 1:* 321-91R20. *Version 2:* 321-91R20; 8-R-934.2. *Version 3:* 8-E-37.

Location: *Version 1:* Academy of Health Sciences, Ft. Sam Houston, TX. *Version 2:* Medical Department Veterinary School, Chicago, IL. *Version 3:* Medical Department Veterinary School, Chicago, IL.

Length: *Version 1:* 10 weeks (340 hours). *Version 2:* 10-16 weeks (440-704 hours). *Version 3:* 24 weeks (1056 hours).

Exhibit Dates: *Version 1:* 4/76-Present. *Version 2:* 3/58-3/76. *Version 3:* 2/56-2/58.

Objectives: To provide food inspection specialists with a working knowledge of advanced procedures and techniques of food hygiene, safety and quality assurance inspections.

Instruction: Lectures and practical exercises in procedures and techniques of food inspection, including applied chemistry and microbiology; processing, handling, and inspecting dairy, poultry, and meat products; inspection of food storage and food processing facilities; detection, salvage, and decontamination of foods exposed to chemical, biological, or radiological contaminants.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 9 semester hours in food science, 6 in inspection procedures and regulations, 2 in veterinary preventive medicine (6/77). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in food science (2/74); in the upper-division baccalaureate category, 3 semester hours in meat and dairy hygiene, 3 in veterinary laboratory procedures (12/68). *Version 3:* In the lower-division baccalaureate/associate degree category, 3 semester hours in food science (2/74); in the upper-division baccalaureate category, 3 semester hours in meat and dairy hygiene, 6 in veterinary laboratory procedures (12/68).

Related Occupation Codes: 91R.

AR-0104-0002

1. Veterinary Specialist Basic
2. Food Inspection Procedures Basic (Food Inspection)

Course Number: *Version 1:* 321-91R10. *Version 2:* 321-91R10; 8-E-2; 8-R-934.1.

Location: *Version 1:* Academy of Health Sciences, Ft. Sam Houston, TX. *Version 2:* Medical Department Veterinary School (Medical Service Meat and Dairy Hygiene School), Chicago, IL; Medical Service School, Ft. Sam Houston, TX.

Length: *Version 1:* 8 weeks (352 hours). *Version 2:* 8-10 weeks (275-440 hours).

Exhibit Dates: *Version 1:* 6/76-Present. *Version 2:* 2/56-5/76.

Objectives: To provide food handlers with the necessary skills to perform basic quality assurance inspection techniques.

Instruction: *Version 1:* Lectures and practical exercises in administration, food technology and inspection, and veterinary preventive medicine so that when given applicable documents, inspection equipment and raw materials for meat, dairy products, poultry and waterfood, students perform appropriate component, process or end item inspection; conduct surveillance inspections for a variety of fresh fruits and vegetables; perform product wholesomeness inspection and detect unsanitary conditions in food handling facilities. *Version 2:* Lectures and practical exercises in the fundamentals of food inspection techniques, including detection and reporting of sanitary defects, field and surveillance inspection, and contract administration.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in administration, 4 in meat and waterfood technology, 3 in dairy and poultry science, 3 in food inspection techniques, 1 in veterinary preventive medicine (6/77). *Version 2:* In the vocational certificate category, 3 semester hours in food inspection (2/74).

Related Occupation Codes: 91R.

AR-0104-0003

Meat Plant Management

Course Number: 10-E-6.

Location: Quartermaster School, Ft. Lee, VA.

Length: 8 weeks (352 hours).

Exhibit Dates: 9/54–12/56.

Objectives: To train meat cutters and food handlers to supervise the operation of a central meat plant or field butchery unit.

Instruction: Lectures in the basic principles of meat plant management, including types, classes, and grades of fresh meat and poultry; meat processing; personnel management and supervision; and modern plant organization and administration.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in meat plant management (1/74); in the upper-division baccalaureate category, 3 semester hours in meat plant management (12/68).

AR-0104-0005

Veterinary Preventive Medicine and Food Inspection

Course Number: 6-G-3221.

Location: Medical Service Veterinary School, Chicago, IL.

Length: 8 weeks (364 hours).

Exhibit Dates: 7/67–12/68.

Objectives: To provide veterinarians with a working knowledge of applied food hygiene and technology.

Instruction: Lectures in the fundamentals of applied food hygiene and technology, including contract administration, surveillance inspection, and food procurement, storage, and shipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

AR-0104-0006

Veterinary Specialist (Basic) Reserve Component (Nonresident/Resident)

Course Number: 321-91R10(RC).

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: Resident 2 weeks (80–81 hours).

Exhibit Dates: 1/78–Present.

Objectives: To provide enlisted reserve personnel with skills to perform food hygiene, safety and quality assurance inspections under direction of a first line NCO/officer supervisor.

Instruction: Phase I has approximately 200 hours of instruction conducted at the unit level over a period of one year. Phase II consists of actual hands-on instruction and demonstrations covering meat and waterfowl technology, dairy and poultry sciences, surveillance inspections and veterinary preventive medicine.

Credit Recommendation: Pending evaluation.

AR-0104-0007

Animal Care Specialist

Course Number: 321-91T10.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 9 weeks (313 hours).

Exhibit Dates: 12/79–Present.

Objectives: To train enlisted personnel as veterinary technicians

Instruction: Course includes basic sciences and diagnostic laboratory procedures, veterinary pathology and diseases, handling, care and management of animals.

Credit Recommendation: Pending evaluation

AR-0104-0008

1. Subsistence Officer
2. Subsistence Officer
3. Subsistence Officer
4. Subsistence Technology

Course Number: *Version 1:* 8D-4130. *Version 2:* 8D-4130. *Version 3:* 8D-4130; 10-G-4130. *Version 4:* 10-G-4130.

Location: Quartermaster School, Ft. Lee, VA.

Length: *Version 1:* 13 weeks (452 hours). *Version 2:* 13 weeks (466 hours). *Version 3:* 18 weeks (642–660 hours). *Version 4:* 24 weeks (837–856 hours).

Exhibit Dates: *Version 1:* 1/74–Present. *Version 2:* 6/70–12/73. *Version 3:* 7/63–5/70. *Version 4:* 1/60–6/63.

Objectives: To provide commissioned officers with a working knowledge of policies, principles, standards, technology, techniques, and procedures involved in management of the subsistence commodity.

Instruction: *All Versions:* Lectures and practical exercises in food science, food packaging and packing, meat products, water foods, dairy products and eggs, fresh and processed fruits and vegetables, and general products. *Version 1:* Includes personnel and food supply management, food science, food packaging, and the characteristics of various food types. *Version 3:* Includes subsistence management, marketing, and procurement. *Version 4:* Includes subsistence management, marketing, and procurement.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 6 semester hours in food service management (6/75). *Version 2:* In the upper-division baccalaureate category, 6 semester hours in institutional food management, 4 in general business, and 2 in applied science (7/74). *Version 3:* In the upper-division baccalaureate category, 6 semester hours in institutional food management, 4 in business management, 3 in food marketing, and 2 in applied science (12/68). *Version 4:* In the upper-division baccalaureate category, 6 semester hours in institutional food management, 6 in business management, 3 in food marketing, 3 in food preparation, 2 in nutrition, and 2 in applied science (12/68).

AR-0301-0001

Accounting

Course Number: 14-O-21.

Location: Finance School, Ft. Benjamin Harrison, IN.

Length: 17 weeks (600 hours).

Exhibit Dates: 8/56–6/57.

Objectives: To train finance officers in the principles of accounting.

Instruction: Lectures and practical exercises in the principles of accounting, including cost accounting, intermediate and advanced accounting, auditing theory, municipal and governmental accounting, and analysis of financial statements.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 14 semester hours in elementary through advanced accounting, 3 in cost accounting (7/74); in the upper-division baccalaureate category, 13 semester hours in elementary through advanced accounting, 5 in cost accounting (12/68).

AR-0301-0002

Cost Estimating for Engineers

Course Number: None.

Location: Logistics Management Center, Ft. Lee, VA; On-Site Locations, Continental U.S..

Length: 2 weeks (69 hours).

Exhibit Dates: 7/72–Present.

Objectives: To provide an understanding of cost estimating techniques and the analytical and statistical methods of predicting system costs.

Instruction: Lectures and practical exercises in the qualitative and quantitative techniques of cost estimating and analysis, and methods of developing cost estimates and evaluating uncertainties.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in cost analysis (12/73); in the graduate degree category, 1 semester hour in cost analysis (12/73).

AR-0317-0001

Operations Research/Systems Analysis Executive

Course Number: 5A-F4.

Location: *All Versions:* Logistics Management Center, Ft. Lee, VA; On-Site Locations, Continental U.S.. *Version 2:* Management School, Ft. Belvoir, VA.

Length: *Version 1:* 4 weeks (159 hours). *Version 2:* 4–5 weeks (168–177 hours).

Exhibit Dates: *Version 1:* 1/73–Present. *Version 2:* 9/67–12/72.

Objectives: To train officers in operations research and systems analysis methodologies.

Instruction: *All Versions:* Lectures and practical exercises in operations research and systems analysis methodologies, including economic analysis, concepts of games and strategy, calculus and algebra, mathematical models, model construction and analysis, statistics, decision theory, linear programming, dynamic programming, measures of effectiveness, effectiveness analysis, queuing theory, and human factors. *Version 1:* Includes risk analysis, communications, linear algebra, mathematical programming and applications, input/output analysis, reliability theory, network analysis and theory, sequencing, probability concepts and applications, experimental design, forecasting and statistical application to logistics. *Version 2:* Includes basic elements of automatic data processing.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 6 semester hours in operations research (8/74); in the graduate degree category, 3 semester hours in operations research (8/74). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in operations research in the field of computer science (8/74).

AR-0317-0002

Operations Research Models and Techniques

Course Number: 5A-F1.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 4 weeks (157 hours).

Exhibit Dates: 7/75–Present.

Objectives: To provide students with a working knowledge of, and an ability in, formulating and analyzing problems concerned with optimal allocation of resources, and to provide training in the use of probablistic methods for solving managerial, scientific and engineering problems involving random processes. Emphasis is on practical field applications.

Instruction: Course is concerned with development of mathematical and probablistic principles necessary to formulate and use operations research models. Topics include basic probability concepts, combinational analysis, distribution theory, generating function, birth and death processes, and statistical inference. Applications are made in the areas of sequential decisions processes, waiting lines, production processes, maintenance replacement, and competitive strategies. The application of mathematical programming techniques to the assignment problem, transportation problem, and network flow problems is made. Advanced mathematical concepts are described. Experience is gained in formulating problems for the computer.

Credit Recommendation: In the graduate degree category, 4 semester hours in operations research (11/76).

AR-0326-0001

Army Management
(Command Management)

Course Number: 900-G-F1; 400-O-2.

Location: Army Management School, Ft. Belvoir, VA; Command Management School, Ft. Belvoir, VA.

Length: 3 weeks (92–132 hours).

Exhibit Dates: 1/56–12/68.

Objectives: To train commissioned officers to manage military installations.

Instruction: Lectures and practical exercises in the management of a military installation. Course includes general management procedures, military management concerns, and executive practices.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in business organization and management (7/74).

AR-0326-0002

Quartermaster Commodity

Course Number: 10-O-38.

Location: Quartermaster School, Ft. Lee, VA.

Length: 10 weeks (350 hours).

Exhibit Dates: 12/55–12/68.

Objectives: To provide commissioned officers with training in the nature and characteristics of the primary commodities procured, stored, and distributed by the Quartermaster Corps.

Instruction: Lectures and practical exercises in the nature and characteristics of the primary commodities procured, stored, and distributed by the Quartermaster Corps, including foods and food industries; petroleum products and industries; chemicals and allied chemical industries; textile and apparel industries; laundry and dry cleaning; leather and shoe industries; embalming, funerals, and other-nation customs; metal industries; quartermaster inspection service; forest products industries; and quartermaster research and development.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in institutional management introduction (7/74); in the upper-division baccalaureate category, credit in institutional management introduction on the basis of institutional evaluation (12/68).

AR-0326-0003

1. Associate Logistics Executive Development
2. Associate Logistics Executive Development
3. Associate Logistics Executive Development
4. Associate Army Logistics Management

Course Number: *Version 1:* 8A-F19. *Version 2:* 8A-F19. *Version 3:* 8A-F19. *Version 4:* 8A-F5.

Location: Logistics Management Center, Ft. Lee, VA.

Length: *Version 1:* 10 weeks (355 hours). *Version 2:* 10 weeks (350 hours). *Version 3:* 10 weeks (350 hours). *Version 4:* 8 weeks (284 hours).

Exhibit Dates: *Version 1:* 8/79–Present. *Version 2:* 12/76–7/79. *Version 3:* 12/70–11/76. *Version 4:* 10/67–11/70.

Objectives: To train officers in logistics management.

Instruction: *All Versions:* Lectures and practical exercises in logistics management, including management systems and development; inventory management; personnel management; financial management; statistical methods; maintenance management; logistical organization of the military; procurement; contract law, policies, and definitions; contract development and administration; depot operations management; containerization; distribution management; and maintenance economics. *Version 2:* Lecture conferences, cases, practical exercises, guest speakers, and field trips covering management principles, financial management, the acquisition process, assets management, economic and statistical principles, and logistics management. Note: Course is offered two weeks a year for five years. *Version 3:* Includes logistics planning, information systems, transportation services and disposal operations, mathematics, computer applications, systems analysis, international logistics, personnel support logistics, facilities management, and combat support operations. NOTE: Course is offered two weeks a year for five years. *Version 4:* Includes additional contract subjects and warehouse operations.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the upper-division baccalaureate category, 4 semester hours in general management, 4 in economic principles and decision making, and 6 in logistics management (12/76); in the graduate degree category, 3 semester hours in general management (12/76). *Version 3:* In the upper-division baccalaureate category, 6 semester hours in general management electives on the basis of institutional evaluation (8/74); in the graduate degree category, 3 semester hours in general management electives on the basis of institutional evaluation (8/74). *Version 4:* In the upper-division baccalaureate category, 6 semester hours in general management electives (8/74).

AR-0326-0004

1. Logistics Management Development
2. Army Integrated Materiel Systems Management
3. Army Integrated Materiel Systems Management

Course Number: 8A-F16.

Location: Logistics Management Center, Ft. Lee, VA; On-Site Locations, Continental U.S..

Length: *Version 1:* 4 weeks (148 hours). *Version 2:* 6 weeks (223 hours). *Version 3:* 6 weeks (223–225 hours).

Exhibit Dates: *Version 1:* 9/75–Present. *Version 2:* 6/73–8/75. *Version 3:* 8/69–5/73.

Objectives: To provide military and civilian personnel with an overview of the Army wholesale logistics system and to develop their managerial skills.

Instruction: *Version 1:* Lectures, conferences, seminars, simulation exercises, and case studies. Topics include life-cycle material management, procurement, functional management of assets, information concepts for managers, management theory and decision making, quantitative techniques, working capital funds, and introduction to defense financial management. *Version 2:* Lectures and practical exercises in integrated materiel management systems and logistics management structures, including behavioral and management considerations, quantitative methods for economic analysis, management and systems engineering, automatic data processing systems and systems applications, financial management, procurement management, concept formation, contract definition and development, materiel lifecycle operations, and production and disposal. *Version 3:* Same as Version 2.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 4 semester hours in basic materiel systems management (12/75). *Version 2:* In the upper-division baccalaureate category, 6 semester hours in materiel systems management (8/74); in the graduate degree category, 2 semester hours in materiel systems management (8/74). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in principles of management (8/74).

AR-0326-0005

Maintenance Management

Course Number: *All Versions:* 8A-F3. *Version 4:* 400-I-F4.

Location: Logistics Management Center, Ft. Lee, VA; On-Site and Off-Campus Locations, Continental U.S..

Length: *Version 1:* 5 weeks (176 hours). *Version 2:* 6 weeks (228 hours). *Version 3:* 6 weeks (227–228 hours). *Version 4:* 8 weeks (320 hours).

Exhibit Dates: *Version 1:* 6/75–Present. *Version 2:* 7/72–5/75. *Version 3:* 10/65–6/72. *Version 4:* 10/57–9/65.

Objectives: To train officers and warrant officers in maintenance management techniques.

Instruction: Lectures and practical exercises in maintenance systems management, including management development, supply functions, maintenance control, communications skills, human relations, programming and financial management, maintenance organization and policies, reporting, repair parts management, and production management.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in production management (12/75). *Version 2:* In the vocational certificate category, 3 semester hours in production management (8/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in production management (8/74); in the upper-division baccalaureate category, 3 semester hours in production management (12/73); in the graduate degree category, 2 semester hours in production management (12/73). *Version 3:* In the vocational certificate category, 3 semester hours in maintenance management (8/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management (8/74); in the upper-division baccalaureate category, 3 semester hours in maintenance management (12/68). *Version 4:* In the upper-division baccalaureate category, 3 semester hours in maintenance management (12/68).

Related Occupation Codes: 421A; 441A; 630A; 631A; 632A; 310A; 521A; 621A; 214E; 241F; 214G; 222B; 251B; 223B; 223D; 251D; 224B; 500A; 561B; 561C; 561D; 561E; 510A; 562B; 562C; 562D; 562E.

AR-0326-0006

Defense Advanced Inventory Management

Course Number: 8B-F12.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 5 weeks (188 hours).

Exhibit Dates: *Version 1:* 7/72–Present. *Version 2:* 10/67–6/72.

Objectives: To train inventory management officers in advanced inventory management.

Instruction: *All Versions:* Lectures and practical exercises in inventory management, including management relationships and philosophy, management of human resources, financial management and controls, management control techniques, inventory management, computer-assisted logistics management, and interface with procurement and maintenance. *Version 1:* Includes performance measurement for management control and computer-assisted industrial management. *Version 2:* Includes international logistics.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in inventory management (8/74); in the graduate degree category, 2 semester hours in inventory management (8/74). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in inventory management (8/74).

AR-0326-0007

Logistics Support Design Management

Course Number: None.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 5 weeks (263 hours).

Exhibit Dates: 7/72–6/75.

Objectives: To train officers to apply integrated logistics support management and system engineering techniques in all life-cycle phases.

Instruction: Lectures and practical exercises in the application of integrated logistics support management and system engineering techniques in all life-cycle phases, including new-item or system field actions and support, support and engineering interrelationships, mathematics and simulation support requirements, trade-off determinations and analyses, maintenance support planning, maintenance engineering analysis, and analytical techniques.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in industrial management (8/74); in the graduate degree category, 2 semester hours in industrial management (8/74).

AR-0326-0008

1. Army Depot Operations Management
2. Defense Depot Operations Management
3. Defense Depot Operations Management

Course Number: *Version 1:* 8B-F10. *Version 2:* 8B-F10. *Version 3:* 8B-F10A.

Location: Logistics Management Center, Ft. Lee, VA; On-Site and Off-Campus Locations, Continental U.S..

Length: *Version 1:* 5 weeks (194 hours). *Version 2:* 6 weeks (229 hours). *Version 3:* 6 weeks (218 hours).

Exhibit Dates: *Version 1:* 5/75–Present. *Version 2:* 7/72–4/75. *Version 3:* 10/67–6/72.

Objectives: To train officers and civilian personnel in depot directorate-level management.

Instruction: *Version 1:* Lecture-conferences, guest speakers, computer-assisted simulations, workshop, cases and field trip. Topics include depot operations management, general management and practices, automated logistics simulation, and procurement, maintenance, and disposal management. *Version 2:* Lectures and practical exercises in depot management, including management philosophy, management of human resources, scientific management and controls, financial management, computer-assisted simulations, automatic data processing systems, procurement management, property disposal management, maintenance management, transportation and traffic management, inventory, international logistics, distribution systems, receipt, storage, material handling, quality control, packaging, shipping, and installation management. *Version 3:* Same as Version 2 except does not include transportation and traffic management.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 4 semester hours in supply depot management. *Version 2:* In the upper-division baccalaureate category, 6 semester hours in management of physical distribution (8/74); in the graduate degree category, 3 semester hours in management of physical distribution (8/74). *Version 3:* In the upper-division baccalaureate category, 4 semester hours in supply management (8/74).

Related Occupation Codes: 761A; 726A.

AR-0326-0009

1. Management of Defense Acquisition Contracts
   (Defense Procurement Management)
2. Defense Procurement Management
   (Defense Basic Procurement)
   (Armed Services Procurement Management)
3. Procurement Management

Course Number: *All Versions:* 8D-4310; 8D-4320. *Version 3:* 400-1-4320.

Location: Logistics Management Center, Ft. Lee, VA; On-Site and Off-Campus Locations, Continental U.S..

Length: *Version 1:* 4 weeks (153–155 hours). *Version 2:* 5–6 weeks (184–200 hours). *Version 3:* 8 weeks (240 hours).

Exhibit Dates: *Version 1:* 2/71–Present. *Version 2:* 7/62–1/71. *Version 3:* 9/56–6/62.

Objectives: To train officers in procurement management.

Instruction: *All Versions:* Lectures and practical exercises in procurement management, including statutes, regulations, and policies; budgets and funds; specifications and allocations; potential contractors; small business and labor surplus programs; elements of a contract; government roles in contracts; purchase by advertisement; negotiation; cost and price analysis; contract types and purposes; clauses and provisions; taxes and other financial considerations; coordinated procurement; contract administration and modifications; quality control; termination of contracts; labor problems; and appeals. *Version 1:* Includes construction procurement and foreign purchases.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in procurement management (8/74); in the graduate degree category, 2 semester hours in procurement management (8/74). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in purchasing or procurement (8/74). *Version 3:* In the upper-division baccalaureate category, 6 semester hours in purchasing or procurement (8/74).

Related Occupation Codes: 761A; 762A.

AR-0326-0010

Management of Acquisition Contracts Advanced
(Defense Advanced Procurement Management)

Course Number: 8D-F12.

Location: Logistics Management Center, Ft. Lee, VA; On-Site Locations, Continental U.S..

Length: *Version 1:* 3 weeks (105 hours). *Version 2:* 3 weeks (115 hours).

Exhibit Dates: *Version 1:* 6/73–Present. *Version 2:* 1/64–5/73.

Objectives: To train procurement management officers in advanced procurement management.

Instruction: *All Versions:* Lectures and practical exercises in procurement management, including procurement planning, funding, technical requirement impact; small business, labor surplus and disaster area relief operations; procurement by formal advertising and negotiation; contract types and purposes; cost and price analysis; contract administration; terminations and remedies; patents and data; and procurement trends. *Version 2:* Includes industrial readiness planning, coordinated procurement, and control services.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in procurement management (8/74); in the graduate degree category, 1 semester hour in procurement management (8/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in procurement management (8/74).

AR-0326-0011

Planning and Conducting Management Audits and Studies

Course Number: 7A-F53.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (78 hours).

Exhibit Dates: 9/76–Present.

Objectives: To provide students with the capability to plan and conduct management audits and studies so that they can analyze and solve management problems and improve the utilization of resources.

Instruction: Covers management audits and studies; styles of studies and audits; planning the management study; study initiation and problem analysis; developing problem alternatives and solutions; preparing recommendations and reports; measuring management performance; modern styles of analytical approach planning and conducting of studies; and the future of management.

Credit Recommendation: In the graduate degree category, 3 semester hours in management controls (11/76).

AR-0326-0012

Decision Risk Analysis

Course Number: None.

Location: Logistics Management Center, Ft. Lee, VA; On-Site Locations, Continental U.S..

Length: 2 weeks (78 hours).

Exhibit Dates: 7/72–Present.

Objectives: To provide a basic understanding of the concepts and techniques of decision risk analysis for the design, analysis, and control of large-scale military programs.

Instruction: Lectures and practical exercises in the theory and application of qualitative and quantitative techniques of decision risk analysis.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in risk analysis (12/73); in the graduate degree category, 1 semester hour in risk analysis (12/73).

AR-0326-0013

Decision Risk Analysis for Logisticians

Course Number: None.

Location: Logistics Management Center, Ft. Lee, VA; On-Site Locations, Continental U.S..

Length: 2 weeks (78 hours).

Exhibit Dates: 7/72–Present.

Objectives: To provide a basic understanding of concepts and techniques of decision risk analysis as applied to logistics problems.

Instruction: Lectures and practical exercises in analysis techniques in logistics problems; application of analysis techniques; and case studies of actual problems in such logistics areas as requirements, procurement, distribution, and disposal.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in decision risk analysis (12/73); in the graduate degree category, 1 semester hour in decision risk analysis (12/73).

AR-0326-0014

Advanced Decision Risk Analysis

Course Number: None.

Location: Logistics Management Center, Ft. Lee, VA; On-Site Locations, Continental U.S..

Length: 1–2 weeks (72 hours).

Exhibit Dates: 7/72–Present.

Objectives: To provide knowledge of advanced methods and techniques of decision-risk analysis.

Instruction: Lectures' and practical exercises in decision analysis and risk analysis, including application of Bayes' Theorem to update distributions, measures of effectiveness and Markov processes, decision analysis using decision trees and computer models, advanced cost and schedule modeling, multiattribute decision techniques and critical review of studies and analyses.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in advanced risk analysis (12/75); in the graduate degree category, 1 semester hour in advanced risk analysis (12/75).

AR-0326-0015

Modern Analytic Techniques for Executive Decision Making

Course Number: None.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 3 weeks (93 hours).

Exhibit Dates: 10/68–12/71.

Objectives: To provide personnel with the basic knowledge of modern analytic techniques that are amenable to the decision-making process within the U.S. Army Materiel Command.

Instruction: Instruction includes overview of mathematics, statistics, and economic analysis; regression and forecasting techniques; design of experiments and hypotheses testing; simulation, behavioral, probability, replacement, and network models, mathematical and dynamic programming; industrial dynamics; game and information theory; and gaming.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in quantitative methods (8/74).

AR-0326-0016

3. Army Medical Service Officer Career
4. Army Medical Service Officer Career
   (Army Medical Service Officer Advanced)
5. Army Medical Service Officer Advanced

Course Number: *Version 1:* 6-8-C22. *Version 2:* 6-8-C22; 8-A-C22. *Version 3:* 8-A-C22. *Version 4:* 8-A-C22. *Version 5:* 8-A-C4.

Location: Medical Field Service School, Ft. Sam Houston, TX.

Length: *Version 1:* 22–23 weeks (766–796 hours). *Version 2:* 21–23 weeks (646–785 hours). *Version 3:* 33 weeks (1023 hours). *Version 4:* 21–22 weeks (662–739 hours). *Version 5:* 34 weeks (1031–1341 hours).

Exhibit Dates: *Version 1:* 10/71–Present. *Version 2:* 7/65–9/71. *Version 3:* 7/62–6/65. *Version 4:* 7/56–6/62. *Version 5:* 7/54–6/56.

Objectives: To provide Nurse Corps and Medical Department officers with knowledge of management principles, tools, and techniques required to function as administrative officers.

Instruction: Classroom and practical instruction in principles of management; organization and control; planning, purchasing, and scheduling; electronic data processing; communications; and various military-related topics.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in principles of management (7/74). *Version 2:* In the upper-division baccalaureate category, 6 semester hours in business organization and management (7/74). *Version 3:* In the upper-division baccalaureate category, 9 semester hours in business organization and management (7/74). *Version 4:* In the upper-division baccalaureate category, 6 semester hours in business organization and management (7/74). *Version 5:* In the upper-division baccalaureate category, 9 semester hours in business organization and management (7/74).

AR-0326-0017

Army Materiel Command Installation Management

Course Number: None.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 3 weeks (114 hours).

Exhibit Dates: 9/75–Present.

Objectives: To improve management effectiveness within Army Materiel Command installations by providing military and civilian managers with a knowledge of techniques and skills required for the solution of contemporary management problems.

Instruction: Lecture-conference sessions, case studies, workshops, and guest speakers to examine organizational structures and areas of management responsibility within an Army Materiel Command installation. Topics include command relationships, personnel management, labor relations, nonappropriated fund activities, ecology and abatement control, management of real property and family housing, comptroller activities, Army Industrial Fund, and management information systems.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in general management (12/75).

AR-0326-0018

Integrated Logistics Support and Materiel Acquisition (ILS-R)

(Materiel Acquisition and Integrated Logistics Support Design Management (LSDM))

Course Number: 8A-F21.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 4 weeks (153 hours).

Exhibit Dates: 7/75–Present.

Objectives: To train officers and civilian personnel to apply integrated logistics support management and analytical systems engineering techniques to the materiel acquisition process and support systems.

Instruction: Lecture-conferences and practical exercises. Topics include concepts and techniques of materiel acquisition and life cycle management; logistics support analysis; economic analysis; and support/design engineering analysis and trade-off determinations.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in materiel acquisition process and support systems (12/75); in the graduate degree category, 2 semester hours in materiel acquisition process and support systems (12/75).

AR-0326-0019

Integrated Logistics Support Management Techniques in Materiel Acquisition (ILS-MGT)

(Management Techniques in Materiel Acquisition and Integrated Logistics Support Design Management (LSDM-MGT))

Course Number: None.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 2 weeks (74–76 hours).

Exhibit Dates: 9/75–Present.

Objectives: To train management-level officers and civilian personnel in the application of integrated logistics support managerial techniques for planning acquisition strategy of military materiel.

Instruction: Lecture-conferences, practical exercises, and case discussions. Topics include policies, procedures, and concepts of materiel acquisitions and project management, logistic support analysis, and limited quantitative techniques.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in materiel acquisition process and support systems (12/75); in the graduate degree category, 1 semester hour in materiel acquisition process and support systems (12/75).

AR-0326-0020

LOGISTICS SUPPORT ANALYSIS TECHNIQUES IN MATERIEL ACQUISITION (LSAT)
(Quantitative Techniques in Materiel Acquisition and Integrated Logistics Support Design Management (LSD-Quant))

Course Number: None.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 2 weeks (73 hours).

Exhibit Dates: 10/75–Present.

Objectives: To train officers and civilian personnel in the concepts and quantitative techniques employed by the system engineer and logistics planner in the application of integrated logistics support.

Instruction: Lecture-conferences, practical exercises, and computer simulations in the application of integrated logistics support management. Topics include concepts, principles, and policies of materiel acquisition and logistics management; quantitative techniques in materiel acquisition and integrated logistics support; analytical techniques related to decision making and cost effectiveness; and trade-off determinations using logistic parameters.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in materiel acquisition process and support systems (12/75); in the graduate degree category, 1 semester hour in materiel acquisition process and support systems (12/75).

AR-0326-0021

ECONOMIC ANALYSIS FOR DECISION MAKING

Course Number: 7A-F10.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (77 hours).

Exhibit Dates: 9/72–Present.

Objectives: To provide the concepts and economics analysis techniques for evaluating cost impacts on an organization prior to final management decisions.

Instruction: Lecture, conferences, practical exercises, programmed instruction, and case study to include management and decision making, cost estimating techniques, time value money, basic methods for comparison of alternatives, equipment replacement, regulating policies, and cost-benefit analysis.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in financial management (11/76).

AR-0326-0022

DIMES ANALYST BASIC (WORK METHODS AND STANDARDS)

Course Number: 7A-F19.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: *Version 1:* 5 weeks (197 hours). *Version 2:* 5-8 weeks (200–317 hours).

Exhibit Dates: *Version 1:* 7/74–Present. *Version 2:* 5/64–6/74.

Objectives: To develop skills necessary to analyze and design work methods and procedures, establish engineered and non-engineered work measurement standards, and design and use a work measurement hierarchical structure that will support the information needs of the management processes of budgeting, manpower control and work planning and control.

Instruction: Thorough grounding is provided in the various techniques employed in methods improvement and work measurement. Topics include cost analysis, job enrichment, human relations, human factors engineering, value engineering, work sampling, process analysis, operations analysis and multi-activity analysis. Lecture and practical exercise activity in analyzing, designing, developing and presenting improved methods for the flow of work, man activities, and man-machine and crew activities. In work measurement, instruction is directed to developing skills in engineered standards via direct-time study, rated-work sampling, standard and predetermined time systems.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 4 semester hours in time and motion theory, production management techniques and systems, or work measurements and methods (11/76). (7/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in work measurement (7/74); in the upper-division baccalaureate category, 2 semester hours in work measurement and 1 in principles of management (7/74).

AR-0326-0023

DEFENSE IN-PLANT QUALITY ASSURANCE

Course Number: 8D-F34.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (78 hours).

Exhibit Dates: 7/75–Present.

Objectives: To provide an understanding of the principles of industrial quality systems; government requirements related to such systems; and the principles of governing quality assurance activities relating to individual systems.

Instruction: Course covers objectives of defense in-plant quality assurance and planning; contract review; review and appraisal of contractor's quality plan; audit of contractor's quality-related operations; validation of contractor's quality plan and operations; and government acceptance inspection.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in procurement quality control (11/76).

AR-0326-0024

ADMINISTRATIVE SYSTEMS ANALYSIS AND DESIGN

Course Number: 7A-F18.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (78 hours).

Exhibit Dates: 1/66–Present.

Objectives: To provide students with the principles and techniques employed in analyzing, evaluating, improving, and designing effective administrative systems to support management policy and decision making.

Instruction: Lecture conferences and group and individual practical exercises to cover an introduction to administrative systems, systems analysis, flow charting (procedures), forms and report analysis and design, various automated systems, planning for systems, role of manager and analyst, and a major analysis and design project of a current management problem.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in business systems management (11/76).

AR-0326-0025

PROJECT PLANNING AND CONTROL TECHNIQUES

Course Number: 5L-F1.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (77 hours).

Exhibit Dates: 5/62–Present.

Objectives: To provide knowledge and develop skills in selecting and applying techniques for planning and controlling projects.

Instruction: Practical exercises, group projects and computer simulations are used in addition to lecture presentations to provide the student with a systematic approach to planning and controlling the cost, schedule, and technical performance of medium-to-large-sized projects. Techniques include network-based management techniques such as PERT and CPM, work breakdown structures, requirements determination, cost estimating, economic analysis, risk analysis long-range and detail cost, schedule and technical performance planning, design impact on cost, configuration management, data and systems management, and technical performance management.

Credit Recommendation: In the graduate degree category, 3 semester hours in industrial and systems engineering management or program and project management (11/76).

AR-0326-0026

ENGINEERED PERFORMANCE STANDARDS (EPS) FOR FACILITIES ENGINEERING ESTIMATORS

Course Number: AMETA-11.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (78 hours).

Exhibit Dates: 7/74–Present.

Objectives: To provide a working knowledge of engineered performance standards for planning and estimating work relative to facilities engineering.

Instruction: Thorough development of skill in application of standard data for real-property maintenance applications. Covers the fundamentals of general data available in the areas of job preparation, craft allowance and travel time, fundamentals of craft data, job phasing, data presentation, and the procedures for applying engineering standards using job planning sheets and monographs.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in public works administration (11/76).

AR-0326-0027

HUMAN BEHAVIOR IN ORGANIZATIONS

Course Number: 7C-F7.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (78 hours).

Exhibit Dates: 10/76–Present.

Objectives: Course is designed to provide an understanding and working knowledge of the principles and applications of the behavioral sciences in order to increase individual achievement and group performance in organizational settings.

Instruction: Provides for a behavioral approach to management; coverage of traditional theories of behavior in organizations; the role of communications; individual behavior and increasing individual effectiveness; organizational behavior, communication programs, and development; process consultation; and a synthesis of theory of the behavioral sciences and management.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in organizational behavior (11/76).

AR-0326-0028

Managing with Contractor Performance Measurement Data

Course Number: AMETA-14.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (77 hours).

Exhibit Dates: 9/70–Present.

Objectives: To provide skills necessary to effectively obtain, analyze, and use performance measurement data in the management of the material-acquisition process for weapon-equipment systems.

Instruction: Lecture and case study method is utilized to explain the need for cost, schedule, and technical performance measurement. Experience in the selection, acquisition, and use of performance measurement data is provided. Emphasis is on the validation, full-scale development, and production phases of the material-acquisition, life-cycle processes which are project or product managed.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in procurement management (11/76).

AR-0326-0029

Management of Managers

Course Number: 7A-F38.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (78 hours).

Exhibit Dates: 9/75–Present.

Objectives: To assist in the development of practicing managers at the intermediate or upper level of responsibility.

Instruction: Course covers management behavior, various management systems, skill development (i.e., team building, interviewing, counseling) and consideration of principles, philosophies, and ethical values to broaden the scope and growth of the administrator. Methods include lectures, discussion, case studies, simulation, role playing, and laboratory activities.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in practices and philosophies of management (11/76).

AR-0326-0030

Organization Planning

Course Number: 7A-F8.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (78 hours).

Exhibit Dates: 1/66–Present.

Objectives: To provide students with a knowledge of the practical concepts, principles, and techniques of systematic organization planning and design.

Instruction: Course covers fundamentals of organizational planning; impact of behavioral sciences; organization guidelines and departmentalization; staff and special considerations; and future organizational considerations.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in organization planning (11/76).

AR-0326-0031

Principles and Applications of Value Engineering

Course Number: 8D-F27.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (77 hours).

Exhibit Dates: 12/64–Present.

Objectives: To provide students with a working knowledge of the principles and techniques of value engineering and their application to current engineering projects.

Instruction: Lecture-conferences, practical exercises and group projects to include description of value engineering methodology, application in the design process considering life-cycle effects, uses of cost estimating, analytical techniques and standards and description of contractual provisions for use of value engineering. Emphasis is on class study and case studies in which value engineering methodology is applied to current and real projects.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in procurement management (11/76).

AR-0326-0032

Defense Work Measurement Standard Time Data (DWMSTD)

Course Number: 7A-F17.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (77 hours).

Exhibit Dates: 7/75–Present.

Objectives: To provide students with a working knowledge of the defense work measurement standard time data program and the latest techniques of work measurement for use in the development of standard time data.

Instruction: Emphasis is on uniform application of the standard time data elements included in the DWMSTD program. Topics include coding structures, source and location of various levels of data and selection of universal and occupation-related data. Emphasis is on application of the data in developing labor performance data through utilization of standard time data.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in time study, work measurement, time and motion study, or standard time (11/76).

AR-0326-0033

Systems Engineering

Course Number: AMETA-15.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (76 hours).

Exhibit Dates: 7/70–Present.

Objectives: To provide students with a working knowledge of systems engineering theory, procedures, and managerial practices. Emphasis is on using the system engineering process as a methodical, analytical approach to the development of total systems; and examining the functions of systems engineering management.

Instruction: Practical exercises and lectures to include the systems engineering process, functional analysis, synthesis, evaluation and decision, system description, systems engineering management and relationships, system engineering in the request for proposal and evaluating system engineering management plans.

Credit Recommendation: In the graduate degree category, 3 semester hours in systems development management (11/76).

AR-0326-0034

Technical Data Package Development/Preparation

Course Number: AMETA-13.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (77 hours).

Exhibit Dates: 7/71–Present.

Objectives: To provide students with a working knowledge of the requirements and responsibilities for the development and preparation of technical data packages used for procurement and production of military design equipment.

Instruction: Lecture-conferences, individual and team practical exercises, and case studies covering current practices in technical data package, acquisition and preparation of technical data package, quality assurance provisions, and review, proofing, maintenance, improvement, and transmission of the technical data package.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in procurement management—quality assurance (11/76).

AR-0326-0035

Product/Production Engineering Intern Program

Course Number: None.

Location: DARCOM Intern Training Center, Red River Depot, Texarkana, TX.

Length: 52 weeks (1,890 hours).

Exhibit Dates: 7/75–Present.

Objectives: To provide comprehensive training in disciplines required for enhancing the producibility and production of components designed and manufactured for Army materiel.

Instruction: Lectures, practical exercises, computer simulation, cases, field trips, and individual and group research to cover the following areas: general administration, data processing, quantitative methods, product and production engineering, and production management and control.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in engineering management, 2 in economic analysis, 4 in engineering applications of computer technology, 3 in mathematical statistics, 3 in statistical quality control, 3 in operations analysis, 3 in systems engineering, 4 in product and production engineering, 2 in cost estimating for engineers, 2 in production system design, 5 in operations management (12/76); in the graduate degree category, 1 semester hour in general and industrial administration and management, 1 in data systems, 6 in quantitative and statistical methods and operations, 3 in product and production engineering, 1 in production management (12/76).

AR-0326-0036

Army Depot Operations Management Correspondence Course

Course Number: 8B-F10.

Location: Sponsored by Logistics Management Center, Ft. Lee, VA.

Length: 216 "credit"* hours.

Exhibit Dates: 6/76–Present.

Objectives: U *Version To:* train officers and civilian personnel in depot directorate-level management.

Instruction: *A "credit" hour is a measured unit of correspondence work. The number of credit hours assigned to a course is the estimated time required for an average student to read assignments and solve the exercises. These 'credit' hours do not refer to academic credit hours. Correspondence lessons cover depot operations management; general management and practices; and procurement, maintenance, and disposal management.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in supply depot management (12/76).

AR-0326-0037

Army Maintenance Management
Correspondence Course

Course Number: 8AF-F3.

Location: Sponsored by Logistics Management Center, Ft. Lee, VA.

Length: 242 "credit"* hours.

Exhibit Dates: 6/75–Present.

Objectives: To train officers in maintenance management techniques.

Instruction: *A "credit" hour is a measured unit of correspondence work. The number of credit hours assigned to a course is the estimated time required for an average student to read assignments and solve the exercises. These 'credit' hours do not refer to academic credits. Correspondence lessons cover maintenance system management, including management development, supply functions, maintenance control, communications skills, human relations, programming and financial management, maintenance organization and policies, reporting, repair parts management, and production management.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in production management (12/76).

AR-0326-0038

Defense Procurement Management
Correspondence Course

Course Number: 8D-4320.

Location: Sponsored by Logistics Management Center, Ft. Lee, VA.

Length: 126 "credit"* hours.

Exhibit Dates: 12/76–Present.

Objectives: To train officers in procurement management.

Instruction: *A "credit" hour is a measured unit of correspondence work. The number of credit hours assigned to a course is the estimated time required for an average student to read assignments and solve the exercises. These 'credit' hours do not refer to academic credits. Correspondence lessons cover fundamentals of procurement, procurement law, the procurement function and post-award functions.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in procurement management (12/76).

AR-0326-0040

Logistics Management Development
Correspondence Course

Course Number: 8A-F16.

Location: Sponsored by Logistics Management Center, Ft. Lee, VA.

Length: Average 4 weeks (Ft. Lee, VA hours).

Exhibit Dates: 7/77–Present.

Objectives: To provide personnel with an overview of the Army wholesale logistics system and to develop managerial skills.

Instruction: Correspondence lessons cover life-cycle material management, procurement, functional management of assets, information concepts for managers, management theory and decision making, quantitative techniques, working capital funds, and an introduction to defense financial management.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in basic materiel systems management (3/78).

AR-0406-0001

Commissary Middle Management,
Phase III (Commissary Produce
Management
(Commissary Produce Management)

Course Number: 800-F7; 800-F5.

Location: Quartermaster School, Ft. Lee, VA.

Length: 2 weeks (69–70 hours).

Exhibit Dates: 10/72–Present.

Objectives: To train enlisted personnel in the principles, procedures, and responsibilities involved in the operation of commissary produce markets.

Instruction: Lectures, conferences, demonstrations, and practical exercises in identifying sources of supply of fresh fruits and vegetables; produce market management; and personnel supervision.

Credit Recommendation: In the vocational certificate category, 1 semester hour in produce market management (6/75).

Related Occupation Codes: 76X; 76Z.

AR-0406-0002

Air Force Commissary Management

Course Number: None.

Location: Quartermaster School, Ft. Lee, VA.

Length: 6 weeks (210 hours).

Exhibit Dates: 9/71–Present.

Objectives: To train commissary personnel to obtain, store, issue, sell, and account for authorized subsistence supplies.

Instruction: Lectures and practical exercises in the problems of subsistence supply; commissary accounting, processing technology, and inspection; and commissary resale store management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in retail management (2/74); in the upper-division baccalaureate category, 3 semester hours in retail management (2/74).

AR-0406-0003

1. Commissary Management
   (Commissary Operations)
2. Commissary Operations
   (Commissary Officer)

Course Number: *Version 1:* 8G-4223; 551-F2; 10-G-4223. *Version 2:* 10-O-15.

Location: Quartermaster School, Ft. Lee, VA.

Length: *Version 1:* 7 weeks (245–252 hours). *Version 2:* 4–5 weeks (148–176 hours).

Exhibit Dates: *Version 1:* 6/59–Present. *Version 2:* 9/54–5/59.

Objectives: To provide officer, enlisted, and civilian personnel with training in the principles and procedures of commissary operation and management.

Instruction: Lectures and practical exercises in commissary operation and management, including accounting, fiscal procedures, processing technology, merchandising, personnel management, installation-level supply management, and inventory management and control.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in retail management (2/74); in the upper-division baccalaureate category, 3 semester hours in retail management or store management (12/68). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in retail management (2/74); in the upper-division baccalaureate category, 2 semester hours in store management (12/68).

AR-0406-0004

Commissary Middle Management,
Phase IV (Commissary
Administration Management)
(Commissary Administration Management)

Course Number: 800-F7; 800-F3.

Location: Quartermaster School, Ft. Lee, VA.

Length: 2 weeks (75–76 hours).

Exhibit Dates: 10/72–Present.

Objectives: To train enlisted personnel in the principles, procedures, duties, and responsibilities of commissary administration management.

Instruction: Conferences, lectures, demonstrations, and practical exercises in subsistence supply, commissary accounting, personnel management, and commissary equipment and fiscal procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in grocery store office management (6/75).

Related Occupation Codes: 76Z; 76X.

AR-0406-0005

Commissary Middle Management,
Phase II (Commissary Meat
Market Management)
(Commissary Meat Market Management)

Course Number: 800-F7; 800-F4.

Location: Quartermaster School, Ft. Lee, VA.

Length: 2 weeks (72 hours).

Exhibit Dates: 11/72–Present.

Objectives: To provide enlisted personnel with a working knowledge of the principles, procedures, duties, and responsibilities involved in commissary meat market management.

Instruction: Instruction is through lectures, conferences, demonstrations, and practical exercises. Topics include manpower and subsistence supply; and processing, technology, merchandising, and preservation.

Credit Recommendation: In the vocational certificate category, 1 semester hour in meat market management (6/75).

Related Occupation Codes: 94C.

AR-0406-0006

Commissary Middle Management,
Phase I (Commissary Store
Management)
(Commissary Store Management)

Course Number: 800-F7; 800-F6.

Location: Quartermaster School, Ft. Lee, VA.

Length: 2 weeks (73 hours).

Exhibit Dates: 11/72–Present.

Objectives: To provide enlisted personnel with a working knowledge of the principles, procedures, duties, and responsibilities involved in commissary store management.

Instruction: Instruction is through lectures, conferences, demonstrations, and practical exercises. Topics include subsistence supply and store operations.

Credit Recommendation: In the vocational certificate category, 1 semester hour in grocery store management (6/75).

Related Occupation Codes: 76P; 76X; 76Z.

AR-0417-0001

ARMY HOUSING MANAGEMENT

Course Number: ALM-61-0298.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 3 weeks (117 hours).

Exhibit Dates: 10/77-Present.

Objectives: To familiarize personnel with the policies and procedures for the management of all types of family, bachelor, transient and guest housing.

Instruction: Lectures, guided discussions, and practical exercises in various phases in the management of military housing: budgeting, maintenance, construction and inventory.

Credit Recommendation: In the vocational certificate category, 1 semester hour in housing management (3/78).

AR-0419-0001

1. TERMINAL OPERATIONS SPECIALIST
   (Cargo Handler)
2. CARGO HANDLER
   (Basic Stevedore)
3. STEVEDORE

Course Number: *Version 1:* 822-57H10. *Version 2:* 822-57H20; 822-56E20. *Version 3:* 55-E-32.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 6 weeks (191-199 hours). *Version 2:* 5 weeks (184-192 hours). *Version 3:* 6 weeks (246 hours).

Exhibit Dates: *Version 1:* 2/71-Present. *Version 2:* 4/67-1/71. *Version 3:* 7/55-3/67.

Objectives: To train enlisted personnel to perform as winch operators, signalmen, and stevedores.

Instruction: *All Versions:* Lectures and practical experience in cargo handling, including the rigging and operation of ship's gear, winch operations, and storage and safety of cargo. *Version 1:* Characteristics of water terminal facilities, forklift operation, cargo transfer operations, stevedoring, and marking supplies for overseas shipment. *Version 3:* Rigging of booms, wire rope splicing, and block and tackle.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in stevedoring and containerization (6/75). *Version 2:* In the vocational certificate category, 3 semester hours in transportation/stevedoring (2/74). *Version 3:* In the vocational certificate category, 6 semester hours in transportation/stevedoring (2/74).

Related Occupation Codes: 57H.

AR-0419-0002

MOVEMENTS SPECIALIST SUPERVISION
(Transportation Movements Control Supervision)

Course Number: 514-F1.

Location: Transportation School, Ft. Eustis, VA.

Length: 5-6 weeks (202-208 hours).

Exhibit Dates: 10/65-Present.

Objectives: To provide enlisted personnel with a working knowledge of the operating procedures, organization, and supervision of transportation movements in the military service.

Instruction: Introduction to transportation regulation and Department of Defense traffic management; movement of dependents; shipment of personal property; routing of freight shipments; classification rates and tariffs; small shipment services; demurrage; documentation of freight shipments; and unitization.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in traffic management (12/68).

AR-0419-0003

AMMUNITION (ENTRY)
(Ammunition Helper)

Course Number: 9-R-410.0; 9-E-32.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 8 weeks (280-304 hours).

Exhibit Dates: 4/56-12/68.

Objectives: To train enlisted personnel to assist in the receipt, storage, shipment, issuance, and maintenance of ammunition.

Instruction: Conferences and practical exercises in the ammunition field; military explosives; ammunition material; safety and hand tools; storage and handling; transportation of ammunition; surveillance, maintenance, and destruction; ammunition documentation; and operation of field ammunition installations.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

AR-0419-0004

CARGO HANDLER SUPERVISOR
(Stevedore Supervisor)
(Stevedore Supervision)

Course Number: 822-57H40; 822-56E40; 55-R-555.7; 55-E-31.

Location: Transportation School, Ft. Eustis, VA.

Length: 6-9 weeks (234-315 hours).

Exhibit Dates: 7/55-12/68.

Objectives: To train enlisted personnel to perform cargo handling activities at water, air, motor, and rail terminals and transfer points.

Instruction: Lectures and practical exercises in terminal cargo operations and documentation procedures; cargo transfer operations; wharf and beach management; supply organization; transportation modes; and stevedoring, including blocking, bracing, and stowage of cargo and cargo-handling gear; and safety procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in transportation or cargo handling (2/74).

AR-0419-0005

1. MOVEMENTS SPECIALIST
2. TRANSPORTATION MOVEMENT SPECIALIST
3. TRANSPORTATION MOVEMENT CONTROL
4. TRANSPORTATION MOVEMENTS
   (Transportation Movement Control)

Course Number: *Version 1:* 514-71N20. *Version 2:* 514-71N20. *Version 3:* 514-719.1. *Version 4:* 55-R-719;1 55-E-39.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 5 weeks (167 hours). *Version 2:* 5-6 weeks (178-213 hours). *Version 3:* 4-5 weeks (168 hours). *Version 4:* 7 weeks (245-308 hours).

Exhibit Dates: *Version 1:* 9/73-Present. *Version 2:* 2/68-8/73. *Version 3:* 10/65-1/68. *Version 4:* 8/55-9/65.

Objectives: To provide enlisted personnel with the techniques and procedures necessary to control the movement of supplies and personnel by rail, water, highway, and air.

Instruction: *All Versions:* Lectures and practical demonstrations in modes of transportation; transportation procedures and regulations; and motor, rail, water, and terminal transportation systems. *Version 1:* Topics include the development of transportation tariff and rate structures, and regulations of traffic management. *Version 2:* Lectures include air transportation management. *Version 3:* Lectures include military tactics, overseas supply processing, and transportation movements. *Version 4:* Lectures include military tactics, overseas supply processing, and traffic management.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in transportation or traffic operations (6/75). *Version 2:* In the vocational certificate category, 6 semester hours in transportation or traffic operations (2/74). *Version 3:* In the vocational certificate category, 6 semester hours in traffic operations (2/74); in the upper-division baccalaureate category, 2 semester hours in traffic operations (12/68). *Version 4:* In the vocational certificate category, 6 semester hours in traffic operations (2/74); in the upper-division baccalaureate category, 3 semester hours in traffic operations (12/68).

Related Occupation Codes: 71N.

AR-0419-0006

1. MOTOR TRANSPORT OPERATION AND MAINTENANCE
2. MOTOR TRANSPORT OPERATION AND MAINTENANCE
   (Highway Transportation Operation and Maintenance)
   (Highway Transport Operations)

Course Number: *All Versions:* 55-B-0600; 55-B-0605; 55-B-0660. *Version 1:* 55-B-631A. *Version 2:* 55-0-6.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 9 weeks (310 hours). *Version 2:* 12 weeks (419 hours).

Exhibit Dates: *Version 1:* 9/60-12/68. *Version 2:* 11/54-8/60.

Objectives: To train officers and warrant officers to manage and supervise the operation and maintenance of transportation highway units and administrative motor pools.

Instruction: Diverse training in many areas of transportation, including transportation intelligence, guerilla and antiguerilla operations, motor transportation in a theatre of operations, convoy organization and operation, vehicle research and development planning, highway traffic planning, commercial truck operations, and dispatch methods and procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in transportation and maintenance management (2/74); in the upper-division baccalaureate category, 4 semester hours in transportation and maintenance management (12/68). *Version 2:* In the vocational certificate category, 6 semester hours in transportation and maintenance management (2/74); in the upper-division baccalaureate category, 6 semester hours in transportation and maintenance management (12/68).

Related Occupation Codes: 630A; 631A; 632A.

AR-0419-0007

Railway Operations

Course Number: 55-R-663.1; 55-E-36.
Location: Transportation School, Ft. Eustis, VA.
Length: 10 weeks (350 hours).
Exhibit Dates: 9/55-12/68.
Objectives: To train enlisted personnel to coordinate and control railway rolling stock by means of proper car distribution and car accounting.
Instruction: Teaches personnel to recognize and use terms of rolling stock; block and yard operations; familiarity with demurrage, car records, and railway office procedures; includes practical railroad experience on the Baltimore and Ohio Railroad.
Credit Recommendation: In the vocational certificate category, 6 semester hours in transportation or railway operations (2/74).

AR-0419-0008

Theater of Operations Movements Officer

Course Number: 8C-F8.
Location: Transportation School, Ft. Eustis, VA.
Length: 2 weeks (70 hours).
Exhibit Dates: 9/69-Present.
Objectives: To give commissioned officers working knowledge of the responsibilities and duties in managing import and export movement of cargo and personnel in a theater of operations.
Instruction: Principles of transportation movements; movements programming; demurrage; unitization; management of transportation resources; aerial port operations; routing of retrograde shipments; and traffic management research.
Credit Recommendation: In the vocational certificate category, 1 semester hour in transportation and traffic movements (2/74).

AR-0419-0009

Supply (SU-CMF) Noncommissioned Officer (NCO) Basic

Course Number: 5-SU-C40B.
Location: Transportation School, Ft. Eustis, VA.
Length: *Version 1:* 8-10 weeks (299-371 hours). *Version 2:* 12 weeks (365 hours).
Exhibit Dates: *Version 1:* 5/74-Present. *Version 2:* 8/72-4/74.
Objectives: To provide selected enlisted personnel with the knowledge and skills required to perform the duties of a noncommissioned officer.
Instruction: Lectures and practical exercises in leadership training; military operations and management; communication skills; transportation modes and supply; planning and documentation; and supply operations, including loading and unloading.
Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in stevedoring and containerization (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision (6/75). *Version 2:* In the vocational certificate category, 3 semester hours in transportation and supply (2/74).
Related Occupation Codes: 57H

AR-0419-0010

Cargo Handler (SU-CMF) Noncommissioned Officer (NCO) Advanced
(Supply (SU-CMF) Noncommissioned Officer (NCO) Advanced)

Course Number: 5-SU-C42B.
Location: Transportation School, Ft. Eustis, VA.
Length: 8-12 weeks (278-385 hours).
Exhibit Dates: 9/72-Present.
Objectives: To provide enlisted personnel with the necessary supervisory skills to perform as noncommissioned officers.
Instruction: Discussions and practical exercises in logistical combat support, leadership, management, communication techniques, storage operations, procurement management, and property disposal.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in principles of management (6/75).
Related Occupation Codes: 76N; 76Q; 76S; 76U; 76X; 76P; 76R; 76T; 76V; 76Y.

AR-0419-0011

Marine (MR-CMF) Noncommissioned Officer (NCO) NCO Basic
(Amphibian Operator Skill Development Base)

Course Number: 0-MR-C40; 813-61D40-1.
Location Transportation School, Ft. Eustis, VA.
Length: 8-17 weeks (304-795 hours).
Exhibit Dates: 10/68-Present.
Objectives: To train selected enlisted personnel in the operation and maintenance of amphibious watercraft.
Instruction: Lectures and practical exercises in leadership and supervisory training; communication skills; marine electrical systems; high-speed marine diesel engines; power trains and auxiliaries; navigation and piloting; diving techniques and equipment; marine hull repair; welding; and pipefitting.
Credit Recommendation: In the vocational certificate category, 6 semester hours in transportation and watercraft operation (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision (6/75).
Related Occupation Codes: 61B; 61C; 61D; 61E; 00B.

AR-0419-0012

Marine (ME-CMF) Noncommissioned Officer (NCO) Advanced

Course Number: 0-MR-C42.
Location: Transportation School, Ft. Eustis, VA.
Length: 9-10 weeks (275-288 hours).
Exhibit Dates: 8/72-Present.
Objectives: To provide enlisted personnel with the knowledge necessary to perform the duties of a senior noncommissioned officer.
Instruction: Lectures on military operations and staff, management, transport and marine operations, air movement planning, military justice, and logistics and financial management.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in marine depot operations (6/75), in the upper-division baccalaureate category, 3 semester hours in principles of management (6/75).
Related Occupation Codes: 61B; 61C; 61D; 61E; 00B.

AR-0419-0013

Motor Transport (MT-CMF) Noncommissioned Officer (NCO) Basic

Course Number: 8-MT-C40.
Location: Transportation School, Ft. Eustis, VA.
Length: 7-9 weeks (244-319 hours).
Exhibit Dates: 6/72-Present.
Objectives: To train enlisted personnel to perform as noncommissioned officers in the motor transportation field.
Instruction: Lectures and practical exercises in motor pool organization and administration; personnel management, communications skills, and human development; motor vehicle operation, maintenance, and safety; and special motor transport problems, such as dangerous cargo transport, accident reports, and night driving.
Credit Recommendation: In the vocational certificate category, 2 semester hours in motor transportation supervision (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision (6/75).
Related Occupation Codes: 64C.

AR-0419-0014

Railway Dispatching

Course Number: 55-R-664.2; 55-E-15.
Location: Transportation School, Ft. Eustis, VA.
Length: 10 weeks (350 hours).
Exhibit Dates: 7/55-12/68.
Objectives: To train enlisted personnel in all aspects of railway dispatching.
Instruction: Lectures and practical experience in basic railway operation, including control and coordination of train movements, transportation rules and regulations, railway station operation, and on-the-job training in railway dispatching.
Credit Recommendation: In the vocational certificate category, 3 semester hours in railway operations (1/74).

AR-0419-0015

Truckmaster

Course Number: 55-R-643.6.
Location: Transportation School, Ft. Eustis, VA.
Length: 9 weeks (318 hours).
Exhibit Dates: 2/57-2/65.
Objectives: To train qualified heavy vehicle drivers to supervise the operation and maintenance of wheeled vehicles and to control motor transport movements of personnel, supplies, and equipment.
Instruction: Lectures and practical exercises in the supervision of wheeled vehicle operation and maintenance and the control of motor transport movements, including internal combustion engines; lubrication, electrical, and fuel systems; brakes; transmission; tires and wheels; supervision and inspection; motor transport and planning operations; and dispatch procedures and reports.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in transportation management programs, 3 in truck driver training, 2 in automotive technology (4/74).

AR-0419-0016

Administration (AG-CMF) Noncommissioned Officer (NCO) Basic

Course Number: 5-AG-C40B.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 8–9 weeks (295–337 hours). *Version 2:* 11 weeks (365 hours).

Exhibit Dates: *Version 1:* 4/74–Present. *Version 2:* 10/72–3/74.

Objectives: To train noncommissioned officers in the administration of Army transportation units.

Instruction: Lectures and practical exercises in transportation unit administration. Course includes principles of leadership; problem solving in personnel management; communications skills in testing, writing, and methods of instruction; transportation movements of supplies and personnel; traffic management; organization of transportation offices; freight shipping routing; commercial freight services; demurrage; unitization loss and damage; modes of transport; movements planning; procedures for air and surface transportation documentation; marshalling; aerial port operations; railway services and equipment, and beach operations.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision (6/75). *Version 2:* In the vocational certificate category, 3 semester hours in transportation, 3 in personnel administration or human relations (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in transportation, 3 in personnel administration or human relations (6/74); in the upper-division baccalaureate category, 3 semester hours in transportation (6/74).

Related Occupation Codes: 71N.

AR-0419-0017

1. Movements Specialist (AG-CMF) Noncommissioned Officer (NCO) Advanced
2. Administration (AG-CMF) Noncommissioned Officer (NCO) Advanced

Course Number: 5-AG-C42B.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 8 weeks (291 hours). *Version 2:* 10 weeks (313 hours).

Exhibit Dates: *Version 1:* 11/74–Present. *Version 2:* 9/72–10/74.

Objectives: To train noncommissioned officers to handle administrative responsibilities in a transportation unit.

Instruction: Lectures and practical exercises in the administration of a transportation unit. Course includes military leadership, staff organization and functions, supply procedures, traffic management, demurrage, carrier qualifications, claims, freight movements, movements management, tariffs, freight classification, documentation of freight shipments, loss and damage, emergency traffic management, air movement, railway transport, marshalling trends, and developments in motor transportation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of management (6/75). *Version 2:* In the vocational certificate category, 4 semester hours in transportation, and 3 in personnel administration or human relations (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in transportation, and 3 in personnel administration or human relations (6/74); in the upper-division baccalaureate category, 4 semester hours in transportation (6/74).

Related Occupation Codes: 71N.

AR-0419-0018

Associate Transportation Officer Career

Course Number: 55-A-C23.

Location: Transportation School, Ft. Eustis, VA.

Length: 12–17 weeks (432–610 hours).

Exhibit Dates: 6/60–12/68.

Objectives: To train commissioned officers to perform as transportation officers.

Instruction: Lectures and practical exercises in duties of transportation officers, including utilization and management of transportation modes (aviation, motor, rail, and water); terminal operations; transportation movements; intelligence and communications procedures; nuclear weapons, chemical, biological, and radiological warfare; logistics; personnel and administration; and military science and tactics.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in transportation management (12/68).

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 26 weeks (679 hours). *Version 2:* 32 weeks (1065 hours). *Version 3:* 36 weeks (1095 hours). *Version 4:* 24–30 weeks (529–918 hours). *Version 5:* 35–36 weeks (1059–1400 hours).

Exhibit Dates: *Version 1:* 12/75–Present. *Version 2:* 1/75–11/75. *Version 3:* 6/72–12/74. *Version 4:* 5/58–5/72. *Version 5:* 9/54–4/58.

Objectives: To qualify commissioned officers, who have completed the transportation officer basic course or its equivalent, for command and staff duties at battalion, brigade or comparable levels, and in the duties of Transportation Corps officers.

Instruction: *All Versions:* Lectures and practical exercises on the duties of Transportation Corps officers at command and staff levels, including military staff; management; internal defense and development; military operations; logistics; nuclear, biological, and chemical operations; air, motor, rail, and water terminals and transport; traffic management; and educational development. *Version 2:* Topics include economics, data processing, and public speaking. *Version 4:* Topics include operations and intelligence, aviation, personnel and administration, nuclear weapons, communication skills, counterinsurgency, and professional development. *Version 5:* Topics include map reading and the organization and operation of the U.S. Army, the U.S. Navy, and the Canadian Army.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory data processing, 3 in public speaking, and 6 in principles of transportation (6/75); in the upper-division baccalaureate category, 6 semester hours in transportation management and 6 in economics of transportation (6/75). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in general management, 6 in traffic management (7/74). *Version 4:* In the upper-division baccalaureate category, 3 semester hours in business organization, 6 in traffic management (12/68). *Version 5:* In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in business organization, and 6 in traffic management (12/68).

AR-0419-0020

Transportation Officer Familiarization

Course Number: 55-A-C21.

Location: Transportation School, Ft. Eustis, VA.

Length: 7 weeks (245–252 hours).

Exhibit Dates: 11/59–12/68.

Objectives: To train commissioned officers to perform as transportation officers.

Instruction: Lectures and practical exercises in transportation, including subjects of military significance (logistics, operation, and intelligence), transportation organization, plans and employment, general transportation aviation, transportation movements, and rail, motor, and water transport.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in transportation organization and management (12/68).

AR-0419-0021

Air Transportability

Course Number: 822-F10.

Location: Transportation School, Ft. Eustis, VA.

Length: 2 weeks (74 hours).

Exhibit Dates: 8/72–11/75.

Objectives: To train selected noncommissioned officers to plan, organize, and conduct air management training and/or operations in their organizations.

Instruction: Lectures and practical exercises in the planning, organization, and coordination of air management training and/or operations. Topics include aircraft characteristics, unit air movement planning, loading and lashing fundamentals, shoring, and handling of dangerous cargo.

Credit Recommendation: In the vocational certificate category, 2 semester hours in air transportation (7/74).

AR-0419-0022

Associate Transportation Officer Advanced

Course Number: 55-O-4.

Location: Transportation School, Ft. Eustis, VA.

Length: 12–16 weeks (421–579 hours).

Exhibit Dates: 11/55–6/60.

Objectives: To train officers to be transportation officers.

Instruction: Lectures and practical exercises in organization, planning, and management of air, rail, motor, and water transportation.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in transportation management (12/68).

AR-0419-0023

Transportation Officer Orientation

Course Number: 8-55-C21.

Location: Transportation School, Ft. Eustis, VA.

Length: 5 weeks (168–209 hours).

Exhibit Dates: 9/67-12/71.

Objectives: To provide initial branch training and orientation for commissioned officers assigned to the Transportation Corps.

Instruction: Lectures and practical exercises in transportation, including officer orientation, logistics, air and rail transport, terminal and water transport, motor transport, transportation movements, and integrated training.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in transportation management and organization (7/74); in the upper-division baccalaureate category, 2 semester hours in transportation organization and management (12/68).

AR-0419-0024

Motor Transport (MT-CMF) Noncommissioned Officer (NCO) Advanced

Course Number: 8-MT-C42.

Location: Transportation School, Ft. Eustis, VA.

Length: 9-10 weeks (284-301 hours).

Exhibit Dates: 10/72-Present.

Objectives: To train noncommissioned officers in motor transport operations.

Instruction: Lectures and practical exercises in the duties of a noncommissioned officer in motor transportation. Topics include military operations, military staff and management; general transportation subjects (air, marine, rail, and motor); and the organization, operation, mission, and function of specific transportation units.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in motor transport supervision (6/75); in the upper-division baccalaureate category, 3 semester hours in principles of management (6/75).

Related Occupation Codes: 64C.

AR-0419-0025

Transportation Officer Candidate

Course Number: 8-55-F1.

Location: Transportation School, Ft. Eustis, VA.

Length: 23 weeks (862 hours).

Exhibit Dates: 8/66-Present.

Objectives: To train officers for duty in transportation units.

Instruction: Lectures and practical exercises in transportation, including military science and tactics; nuclear weapons and CBR; map and air photo reading; general communication skills; air, motor, and rail transport; terminal and water transport; and transportation movements.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in transportation organization, and credit in advanced military training at institutions which normally offer such credit (12/68).

AR-0419-0026

Airdrop Loadmaster

Course Number: Not available.

Location: Quartermaster School, Ft. Lee, VA.

Length: 3 weeks (146 hours).

Exhibit Dates: 8/64-12/68.

Objectives: To train personnel to pack cargo parachutes used in airdrops.

Instruction: Lectures and practical exercises in packaging procedures, airdrop containers, and aircraft operations, including parachute packing and cargo parachutes, rigging supplies and equipment, aircraft loading, rehabilitation of equipment, heavy-drop extraction procedures, recovery, cargo platform preparation, parachute release assemblies, cargo slings and bags, and parachute release assemblies.

Credit Recommendation: In the vocational certificate category, 3 semester hours in transportation—airdrop loadmaster (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in transportation—airdrop loadmaster (7/74).

AR-0419-0027

Preservation and Intermediate Protection

Course Number: 8B-F1(JT).

Location: Joint Military Packaging Training Center, Aberdeen Proving Ground, MD.

Length: 2 weeks (76 hours).

Exhibit Dates: 5/70-Present.

Objectives: To train commissioned officers, enlisted personnel, and civilian personnel in the techniques of cleaning, drying, preserving, and packing military supplies and equipment.

Instruction: Lectures and practical exercises on preservation and intermediate protection of military supplies and equipment, including packing specifications, cleaning, preservatives, sprayable and strippable films, controlled humidity, packaging inspection, preparation of retrograde material for shipment, and packaging costs and documentation.

Credit Recommendation: In the vocational certificate category, 2 semester hours in the transportation, preservation, and protection of supplies (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in the transportation, preservation, and protection of supplies (7/74).

AR-0419-0028

Packing and Containerization

Course Number: 8B-F2 (JT).

Location: Joint Military Packaging Training Center, Aberdeen Proving Ground, MD.

Length: 2 weeks (76 hours).

Exhibit Dates: 4/70-Present.

Objectives: To train personnel in the packing, marking, and loading of military supplies and equipment for storage and shipment.

Instruction: Lectures and practical exercises in the packing, marking, and loading of military supplies and equipment for storage and shipment, including introduction to packing and containerization, crate design, cargo unitization and containerization, cushioning and blocking, bracing and anchoring, loading for shipment, utilization of packing lines, parcel post, and packing cost reduction.

Credit Recommendation: In the vocational certificate category, 2 semester hours in transportation, packing, and containerization (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in transportation, packing, and containerization (7/74).

AR-0419-0029

1. Trainman
2. Railway Trainman

Course Number: *Version 1:* 55-R-662.1. *Version 2:* 55-E-3.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 8 weeks (280 hours). *Version 2:* 10 weeks (374 hours).

Exhibit Dates: *Version 1:* 7/58-12/61. *Version 2:* 9/54-6/58.

Objectives: To train enlisted personnel to operate trains and handle railway cars in railway yards and over the road.

Instruction: Lectures in railway operating rules, train and engine service, and practical experience on the B & O railroad.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in trainman techniques (7/74). *Version 2:* In the vocational certificate category, 8 semester hours in trainman techniques (7/74).

AR-0419-0030

1. Locomotive Operation
2. Railway Locomotive Operation

Course Number: *Version 1:* 55-R-661.2. *Version 2:* 55-E-7.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 8 weeks (280 hours). *Version 2:* 10 weeks (350 hours).

Exhibit Dates: *Version 1:* 7/58-12/68. *Version 2:* 9/55-6/58.

Objectives: To train enlisted personnel to operate steam and diesel-electric locomotives used in yard and road service.

Instruction: Lectures and practical exercises in steam and diesel-electric locomotive operation, including railway operating rules, locomotive operation, locomotive inspection and maintenance, and practical exercises on the B & O railroad.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in locomotive operation (7/74). *Version 2:* In the vocational certificate category, 8 semester hours in locomotive operation (7/74).

AR-0419-0031

Air Transportability Planning

Course Number: 8C-F2; 822-F10.

Location: Transportation School, Ft. Eustis, VA.

Length: 2 weeks (84-85 hours).

Exhibit Dates: 9/65-Present.

Objectives: To train commissioned officers and warrant officers to plan, organize, and conduct unit air movement training and operations.

Instruction: Lectures and practical exercises in the duties of a unit air movement officer. Course includes manifesting procedures, aircraft characteristics, air movement planning, loading fundamentals, and handling dangerous cargo.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in air transportation planning (7/74).

Related Occupation Codes: 160A; 103A; 100B.

AR-0419-0032

1. Cargo Officer
2. Stevedore Officer

Course Number: *All Versions:* 8C-0804. *Version 2:* 55-A-0804.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 9 weeks (346 hours). *Version 2:* 8-9 weeks (278-315 hours).

Exhibit Dates: *Version 1:* 6/68-Present. *Version 2:* 9/57-5/68.

Objectives: To train officers to be cargo and stevedore officers in transportation terminal units.

Instruction: *All Versions:* Lectures and practical exercises in introduction to transportation modes, terminal facilities involved in cargo handling, water transportation terminal cargo planning and documentation, stevedore operations supervision, and cargo preparation and loading for shipment. *Version 2:* Instruction emphasizes stevedore operations and terminal organization and operations.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in cargo handling (7/74). *Version 2:* In the vocational certificate category, 5 semester hours in cargo handling (7/74).

Course Number: *Version 1:* 55-A-C2. *Version 2:* 55-O-1; 55-A-C2. *Version 3:* 55-O-1.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 21 weeks (643 hours). *Version 2:* 34-36 weeks (1083-1146 hours). *Version 3:* 30 weeks (1056 hours).

Exhibit Dates: *Version 1:* 6/58-12/68. *Version 2:* 8/56-5/58. *Version 3:* 9/55-7/56.

Objectives: To train commissioned officers in the responsibilities appropriate to company grade transportation officers.

Instruction: Lectures and practical exercises in transportation, including personnel and administration; intelligence; operations and training; logistics; motor and rail transport; terminal and water transport; aviation; general transport; U.S. Navy, U.S. Air Force, and Canadian Army transportation procedures; and instructional methods.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in business organization, 3 in traffic management (12/68). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in business organization, and 6 in traffic management (12/68). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in business organization, 3 in traffic management (12/68).

AR-0602-0001

U.S. Army Institute for Advanced Russian and East European Studies

Course Number: None.

Location: Institute for Advanced Russian and East European Studies, Garmisch, Germany.

Length: 104 weeks (3120 hours).
Exhibit Dates: 7/69–Present.

Objectives: To train officers in advanced Russian language and area studies, and in East European area studies.

Instruction: Lectures, readings, and student research and discussions in advanced Russian language and area studies, and in East-European area studies, including intensive review of Russian, basic vocabulary, and grammar; armed forces subjects, including tactics and training, command and staff structures, map reading, history and organization of the Soviet armed forces, mobilization procedures of the Soviet armed forces, military operations on the Eastern front in World War II, logistics, counterintelligence and intelligence studies, Soviet military doctrine and strategy, principles of war, roles of insurgency and revolution, and current Soviet military affairs and problems; physical geography of the U.S.S.R.; economic subjects, including economic theories of Marx, Engels and Lenin, Soviet planning and control methods, organization of the Soviet economy, principles of Soviet regionalization, impact of recent economic reforms, and a study of the history, characteristics, production, distribution, development, and overall role of each branch in the economic complex; political subjects, including political history of Russia and the U.S.S.R. since 1800, development of the Soviet state, role of the Communist Party, organs of centralized control, elements of the population, communist doctrine and ideology, contemporary revisionism and dogmatism, governmental structure of the Soviet Union, contrast of the official and actual Soviet system of government, tactics of the Communist Party, leading personalities and opposition to the party, the U.S.S.R. in international relations since 1918, communist insurgency and subversive activities, and Soviet law and judicial system; communist states subjects, including international economic organization of the states, and the geography, population, natural resources, economy, history, government, foreign relations, strategic importance, and relationship to the Soviet Union of East Germany, Poland, Czechoslovakia, Hungary, Rumania, Bulgaria, Yugoslavia, and Albania; and social science subjects, including brief treatments of contemporary Soviet literature, drama, television, painting and music, survey of the Soviet press and organization of published materials, seminar on Soviet society, and development of Russian and Soviet literature with emphasis on elements of continuity and change.

Credit Recommendation: In the graduate degree category, for the entire two-year program, 6 semester hours in advanced Russian language, including formal instruction and 'total immersion' in content courses taught in Russian, 3 in Russian and Soviet literature, 6 in politico-economic area studies (8/74).

AR-0602-0002

Military Assistance Training Advisor
Senior Noncommissioned Officer
(NCO)

Course Number: None.
Location: Institute for Military Assistance, Ft. Bragg, NC; Special Warfare School, Ft. Bragg, NC.
Length: 6 weeks (196–233 hours).
Exhibit Dates: 2/66–4/73.

Objectives: To provide senior noncommissioned officers selected for advisory duty in Vietnam, with a familiarization with the Vietnamese language and a general knowledge of the duties and responsibilities of the military advisor.

Instruction: Lectures and practical exercises to provide a general background orientation to the history and present social, political and economic environment of Vietnam; the insurgent threat and allied programs being conducted to counter the insurgency.

Credit Recommendation: In the upper-division baccalaureate category, credit in Vietnamese on the basis of institutional evaluation (12/68). NOTE: If the student has a Defense Language Institute (DLI) transcript indicating completion of the entire 12-week Vietnamese course, 8 semester hours in Vietnamese may be granted.

AR-0602-0003

Military Assistance Training Advisor
Field Grade Officer

Course Number: None.
Location: Institute for Military Assistance, Ft. Bragg, NC.
Length: 6 weeks (218 hours).
Exhibit Dates: 1/70–4/73.

Objectives: To provide officers selected for duty in the Republic of Vietnam with a working knowledge of the duties, organizations, programs, techniques, and procedures that make up the advisory effort.

Instruction: Lectures and practical exercises in the history, geography, ethnic groups, social structure, and other general subjects dealing with the background of Vietnam; map reading, first aid, weapons, field fortifications, communications, and other general subjects; and Vietnamese language. Language training in this course is the first 4 weeks of the 12-week Vietnamese (Saigon dialect) course given by the Defense Language Institute (DLI) at Ft. Bliss. If the entire 12-week course has been completed, student will have a DLI transcript.

Credit Recommendation: In the upper-division baccalaureate category, credit in Vietnamese on the basis of institutional examination (7/74). Note: If student has a DLI transcript indicating completion of the entire 12-week Vietnamese course, 8 semester hours in Vietnamese may be granted.

AR-0602-0004

Military Assistance Training Advisor
CORDS Officer

Course Number: None.
Location: Institute for Military Assistance, Ft. Bragg, NC.
Length: 6 weeks (200 hours).
Exhibit Dates: 11/71–4/73.

Objectives: To provide selected officers with a knowledge of duties of a military advisor and to familiarize them with the Vietnamese language.

Instruction: Lectures and practical exercises to include general orientation to Vietnam, the art and technique of the advisor, internal defense and internal development, Vietnamese familiarization. Language training in this course is the first 4 weeks of the 12-week Vietnamese (Saigon dialect) course given by the Defense Language Institute (DLI) at Ft. Bliss. If entire 12-week course has been completed, student will have a DLI transcript.

Credit Recommendation: In the upper-division baccalaureate category, credit in Vietnamese on the basis of institutional examination. Note: If student has a Defense Language Institute (DLI) transcript indicating completion of the entire 12-week Vietnamese course, 8 semester hours in Vietnamese may be granted (7/74).

AR-0602-0005

Military Assistance Training Advisor
Company Grade Officer

Course Number: None.
Location: Institute for Military Assistance, Ft. Bragg, NC.
Length: 6 weeks (219 hours).
Exhibit Dates: 1/70–4/73.

Objectives: To provide officers selected for advisory duty in the Republic of Vietnam with a working knowledge of the duties, organizations, programs, techniques, and procedures that make up the advisory effort.

If the entire 12-week course has been completed, student will have a DLI transcript.

Credit Recommendation: In the upper-division baccalaureate category, credit in Vietnamese on the basis of institutional examination (7/74). Note: If student has a DLI transcript indicating completion of the entire 12-week Vietnamese course, 8 semester hours in Vietnamese may be granted.

AR-0602-0006

Military Assistance Training Advisor
ARVN Officer

Course Number: None.
Location: Institute for Military Assistance, Ft. Bragg, NC.
Length: 6 weeks (200 hours).
Exhibit Dates: 11/71–4/73.

Objectives: To provide commissioned officers selected for advisory duty with a unit of the Army of the Republic of Vietnam with a working knowledge of the duties and responsibilities of the military advisor.

Instruction: Conferences and practical exercises in the organization, programs, and operations of the U.S. advisory effort, and familiarization with the Vietnamese language.

Credit Recommendation: In the upper-division baccalaureate category, credit in Vietnamese on the basis of institutional evaluation. Note: If the student has a Defense Language Institute (DLI) transcript indicating completion of a 12-week Vietnamese course, 8 semester hours in Vietnamese may be granted (7/74).

AR-0701-0001

Dental Laboratory Procedures
(Basic)
(Dental Laboratory)

Course Number: 331-42D10; 8-R-452.1; 8-E-1.
Location: Medical Field Service School, Ft. Sam Houston, TX.
Length: 8–16 weeks (280–704 hours).
Exhibit Dates: 2/56–Present.

Objectives: To train enlisted personnel to perform basic dental prosthetic laboratory techniques.

Instruction: Lectures and practical exercises in basic dental prosthetic laboratory techniques. Course includes anatomy and tooth morphology, basic dental materials, and complete denture prosthetics.

Credit Recommendation: in the lower-division baccalaureate/associate degree category, 2 semester hours in anatomy and tooth morphology, 1 in dental materials, 1 in complete dentures (6/77).

Related Occupation Codes: 42D; 42F.

AR-0701-0002

Dental Hygienist
(Dental Assistant (Advanced))

Course Number: 330-91E20; 330-91E30; 8-R-917.2; 8-E-35.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Medical Field Service School, Ft. Sam Houston, TX.

Length: 8-20 weeks (281-640 hours).

Exhibit Dates: 3/56-Present.

Objectives: To provide dental specialists with a working knowledge of oral hygiene prophylactic procedures and oral disease control methods.

Instruction: Lectures, practical exercises and laboratories in the performance of oral hygiene prophylactic procedures, determination of patients' individual problems relative to oral health, counseling of patients, flossing techniques, tooth brushing methods and application and flourides.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic dental science, 2 in dental health, 8 in clinical training, 3 in dental materials (6/77).

Related Occupation Codes: 91E.

AR-0701-0003

Dental Laboratory Specialist Senior

Course Number: 331-42D30.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 10 weeks (356-394 hours).

Exhibit Dates: 12/76-Present.

Objectives: To train enlisted personnel in advanced prosthetic dental laboratory techniques, including basic orthodontic procedures and ceramic (porcelain) procedures.

Instruction: Lectures and practical exercises in basic orthodontic-pedodontic procedures. Emphasis is placed on porcelain fused to metal restorations. Course includes an introduction to basic maxillofacial appliances.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hours in dental anatomy (occlusion), 2 in orthodontic procedures, 4 in dental ceramic procedures (6/77).

Related Occupation Codes: 42D.

AR-0701-0004

Dental Administration

Course Number: 330-F1.

Location: Medical Field Service School, Ft. Sam Houston, TX.

Length: 4 weeks (176 hours).

Exhibit Dates: 10/67-Present.

Objectives: To provide enlisted personnel with a working knowledge of dental administration in treatment facilities.

Instruction: Lectures and practical experience in the basic principles of dental administration, including personnel management, dental equipment supply and maintenance, dental facility organization, implementing a preventive dentistry program, and administration of a field dental treatment facility.

Credit Recommendation: Credit is not recommended because of the military nature of the course (2/74).

Related Occupation Codes: 91E; 42D; 42F.

AR-0701-0005

Dental Fixed Prosthetic Specialist

Course Number: 331-42F20.

Location: *Version 1:* Brooke Army Medical Center, Ft. Sam Houston, TX. *Version 2:* Medical Field Service School, Ft. Sam Houston, TX.

Length: *Version 1:* 10 weeks (405 hours). *Version 2:* 10 weeks (368 hours).

Exhibit Dates: *Version 1:* 7/70-8/79. *Version 2:* 10/67-6/70.

Objectives: To provide dental removable prosthetic specialists with a working knowledge of fixed partial denture techniques.

Instruction: Lectures and laboratories in the fundamentals of fixed partial denture techniques, including applied dental sciences; dental metals and materials; inlays, crowns, and fixed partial dentures; models, dies, and waxing; and maintenance of dental laboratory equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in dental laboratory on the basis of institutional examination (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in dental laboratory on the basis of institutional examination (2/74); in the upper-division baccalaureate category, credit in dental laboratory on the basis of institutional examination (2/74). *Version 2:* In the vocational certificate category, 3 semester hours in dental laboratory on the basis of institutional examination (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in dental laboratory on the basis of institutional examination (2/74); in the upper-division baccalaureate category, credit in dental laboratory on the basis of institutional examination (12/68).

Related Occupation Codes: 42D; 42F.

AR-0701-0006

1. Dental Laboratory Specialist Advanced
2. Dental Removable Prosthetic Specialist
3. Dental Removable Prosthetic Specialist

(Dental Laboratory Procedures (Advanced))

Course Number: *All Versions:* 331-42D20. *Version 2:* 8-R-452;2 8-E-34.

Location: Academy of Health Sciences, Ft. Houston, TX; Medical Service School, Ft. Houston, TX.

Length: *Version 1:* 15 weeks (556 hours). *Version 2:* 10 weeks (350 hours). *Version 3:* 10-20 weeks (352-630 hours).

Exhibit Dates: *Version 1:* 5/76-Present. *Version 2:* 1/72-4/76. *Version 3:* 3/56-12/71.

Objectives: To train personnel to perform basic and advanced dental prosthetic laboratory techniques.

Instruction: *Version 1:* Lectures and practical exercises in basic and advanced dental prosthetic laboratory techniques. Course includes study of dental anatomy including immediate dentures, relines and rebases; removable partial dentures and fixed restorative procedures. *Version 2:* Complete maxillofacial prostheses; removable partial maxillofacial prostheses; orthodontic appliances; splints. *Version 3:* Dental materials; complete and partial dentures; fixed and removable partial dentures; inlays and crowns.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in complete dentures, 3 in partial dentures, 3 in fixed restorative, 1 in dental anatomy (tooth morphology) (6/77). *Version 2:* In the upper-division baccalaureate category, 5 semester hours in dental technology (7/74). *Version 3:* In the lower-division baccalaureate/associate degree category, 5 semester hours in dental technology (7/74); in the upper-division baccalaureate category, credit in dental laboratory technology on the basis of institutional evaluation (12/68).

Related Occupation Codes: 42D; 42F.

Dental Specialist (Basic)
(Dental Assistant (Basic))
(Dental Specialist)

Course Number: 330-91E10; 330-91E20; 8-R-917.1; 8-E-21.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Medical Field Service, Ft. Sam Houston, TX.

Length: 6-8 weeks (196-211 hours).

Exhibit Dates: 1/56-Present.

Objectives: To provide enlisted personnel with a working knowledge of all procedures necessary to assist the dental officer in examination, care and treatment of the oral region.

Instruction: Lectures and practical experience in the basic principles of performing dental assisting duties, learning to expose, process, and mount dental radiographs for diagnostic value, mix commonly used dental restoration and impression materials, prepare instrument setups, and sterilize and disinfect used dental instruments.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic dental science, 3 in chairside assisting, 8 in clinical training, 1 in emergencies, 3 in dental radiology (6/77).

Related Occupation Codes: 91E; 42D.

AR-0701-0008

Dental Therapy Assistant

Course Number: 330-91E30; 330-F2.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 54 weeks (1470 hours).

Exhibit Dates: 10/74-4/78.

Objectives: To provide personnel with knowledge of the basic principles and techniques of the practice of dentistry and to enable them to assist dental officers in the care and treatment of patients, including specified reversible procedures performed on patients under direct supervision of dental officer.

Instruction: Lectures and clinical exercises in the duties of the dental therapy assistant, learning to apply rubber dam, place and finish restorations in cavity preparations in patients, perform functions in the areas of preventive dentistry, utilize techniques of four-handed dentistry, make preliminary impressions, pour casts, expose radiographs and panographic x-rays, perform endodontic procedures, and provide emergency care.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in dental material, 2 in dental health, 1 in four-handed dentistry, 8 in clinical training, 2 in related dental science (6/77).

Related Occupation Codes: 91E.

AR-0701-0009

Dental Specialist Reserve Component (Nonresident/Resident)

Course Number: 330-91E10(RC).

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: Phase II—2 weeks (70 hours).

Exhibit Dates: 1/78–Present.

Objectives: To provide prior-service reserve component enlisted personnel with a working knowledge of all procedures necessary to assist the dental officer in the examination, care, and treatment of the oral region.

Instruction: Phase II, the resident portion of the course, consists of conferences and practical exercises in basic dental sciences, radiology, materials, and records and also covers the duties of the dental specialist.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic dental science, 1 in dental materials (8/79). NOTE: Phase I is nonresident in nature with no credit recommendation. Credit recommendation is based on phase II only.

Related Occupation Codes: 91E.

AR-0701-0010

Dental Laboratory Specialist (Basic)
Reserve Component
(Nonresident/Resident)

Course Number: 331-42D10(RC).

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: Phase II—2 weeks (80 hours).

Exhibit Dates: 10/77–Present.

Objectives: To provide prior-service reserve component personnel with a working knowledge of basic dental laboratory procedures.

Instruction: Phase II, the resident portion of the course, consists of demonstrations, lectures, and examinations covering the basic dental laboratory procedures for the fabrication of preliminary and final dental casts, impression trays, occlusion rims, and denture repair.

Credit Recommendation: 3 semester hours in basic dental laboratory procedures (8/79). NOTE: Phase I of this course is non-resident in nature and carries no credit. Credit recommendation is based on Phase II only, the resident portion of the course.

Related Occupation Codes: 91E.

Medical Laboratory Specialist
(Medical Laboratory Procedures (Basic))

Course Number: 311-92B10; 311-92B20; 311-92B10; 8-R-931.1; 8-E-8.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Medical Field Service School, Ft. Sam Houston, TX.

Length: 14–16 weeks (420–548 hours).

Exhibit Dates: 8/54–Present.

Objectives: To provide graduates with the necessary knowledge and techniques to perform basic procedures in a medical laboratory.

Instruction: Lectures and practical exercises in hematology, immunohematology, clinical chemistry, bacteriology, urinalysis, serology, and parasitology basic procedures.

Credit Recommendation: In the vocational certificate category, 10 semester hours in a certified laboratory assistant program (6/77); in the lower-division baccalaureate/associate degree category, 15 semester hours in basic procedures in hematology, clinical chemistry and urinalysis, medical bacteriology, parasitology, and immunohematology and serology in a Medical Laboratory Technician program (6/77).

Related Occupation Codes: 92B.

AR-0702-0003

Blood Grouping, Collecting and Processing

Course Number: 311-F1.

Location: Brooke Army Medical Center, Ft. Sam Houston, TX.

Length: 6 weeks (264 hours).

Exhibit Dates: 6/68–8/79.

Objectives: To provide enlisted personnel with the knowledge necessary to apply the principles and techniques of grouping, collecting, and processing whole blood on a large-volume basis.

Instruction: Lectures and practical exercises in selection of blood donors, collection of blood for transfusions, donor care, blood processing, and grouping and typing of blood.

Credit Recommendation: In the vocational certificate category, credit for blood banking portion of CLA course (2/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in blood banking (2/74); in the upper-division baccalaureate category, 2 semester hours in blood banking (12/68).

Related Occupation Codes: 92B.

AR-0702-0004

Blood Banking

Course Number: None.

Location: Medical Research Laboratory, Ft. Knox, KY.

Length: 52 weeks.

Exhibit Dates: 1/73–Present.

Objectives: To train medical laboratory personnel to direct and supervise blood bank centers and to assist in the training of others in blood bank techniques.

Instruction: Lectures on practical techniques, theory, administration, and management of large blood banks, including blood banking and immunohematology.

Credit Recommendation: In the vocational certificate category, credit for blood banking portion of CLA curriculum (2/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in blood banking (2/74); in the upper-division baccalaureate category, 8 semester hours in medical technology, 4 in biology (2/74).

AR-0702-0005

Dialysis Technician

Course Number: 300-F2.

Location: Walter Reed Army Medical Center, Washington, DC.

Length: *Version 1:* 20 weeks (800 hours). *Version 2:* 24 weeks (898–928 hours).

Exhibit Dates: *Version 1:* 9/77–Present. *Version 2:* 1/70–8/77.

Objectives: To provide selected personnel with knowledge and skills required to perform safe and effective hemodialysis and peritoneal dialysis.

Instruction: Lectures and practical exercises in theory and principles of hemodialysis, peritoneal dialysis, and intensive patient care.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in basic chemistry, 1 in management (8/79) in the upper-division baccalaureate category, 6 semester hours in clinical practice in renal pathology with emphasis on dialysis, 2 in renal pathology, 1 in renal physiology (8/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 22 semester hours in health sciences, renal dialysis, or circulatory system technology (6/75).

AR-0703-0001

Anesthesiology Nursing for Army
Nurse Corps Officers

Course Number: *Version 1:* 6F-66F. *Version 2:* None.

Location: *All Versions:* Army Hospitals, U.S.A.. *Version 1:* Academy of Health Sciences, Ft. Sam Houston, TX.

Length: *Version 1:* 103 weeks (3064–3082 hours). *Version 2:* 82 weeks (3064–3082 hours).

Exhibit Dates: *Version 1:* 11/77–Present. *Version 2:* 12/70–10/77.

Objectives: To train Nurse Corps officers as beginning practitioners in anesthesiology nursing.

Instruction: *All Versions:* Lectures and practical exercises in anesthesiology nursing, including anatomy, physiology, pathophysiology and implications for practice; chemistry, physics, and mathematics related to anesthesia; pharmacology; professional practices of the nurse anesthetist; fundamentals of anesthesia; clinical orientation. *Version 1:* Instruction includes psychology of crisis intervention.

Credit Recommendation: *Version 1:* In the graduate degree category, 8 semester hours in physiology and anatomy of the respiratory system, 4 in statistics, 3 in chemistry/physics, 4 in pharmacology, 8 in anesthesiology, 3 in physical assessment, 3 in administration, and 1 in psychology (8/79). *Version 2:* In the vocational certificate category, 10 semester hours in anatomy and physiology, 2 in chemistry and physics, 4 in pharmacology, 5 in fundamentals of anesthesiology, 3 in physical education, 1 in psychology, 1 in medical mathematics, 45 in clinical experience and practice in anesthesiology (8/74); in the lower-division baccalaureate/associate degree category, 10 semester hours in anatomy and physiology, 2 in chemistry and physics, 4 in pharmacology, 5 in fundamentals of anesthesiology, 3 in physical education, 1 in psychology, 1 in medical mathematics, 45 in clinical experience and practice in anesthesiology (8/74); in the upper-division baccalaureate category, 10 semester hours in anatomy and physiology, 2 in chemistry and physics, 4 in pharmacology, 5 in fundamentals of anesthesiology, 3 in physical education, 1 in psychology, 1 in medical mathematics, 45 in clinical experience and practice in anesthesiology (8/74).

AR-0703-0002

Chief Nurses' Orientation

Course Number: 6F-F2.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 2 weeks (67–73 hours).

Exhibit Dates: 8/73–Present.

Objectives: To provide nurse corps officers with the necessary knowledge and skills in resource management concepts and educational training activities to function as chief nurses in Army medical facilities.

Instruction: Lectures and seminars on utilization of resources, fundamentals of training management, staff development, parameters and standards of supervision, health care trends and concepts.

Credit Recommendation: Credit is not recommended because of the military nature of the course (6/75).

AR-0703-0003

Medical Department Officer Clinical Head Nurse

(Army Medical Department Clinical Head Nurse)

Course Number: 6F-F3.

Location: *Version 1:* Academy of Health Sciences, Ft. Sam Houston, TX. *Version 2:* Brooke Army Medical Center, Ft. Sam Houston, TX.

Length: *Version 1:* 2-3 weeks (67–116 hours). *Version 2:* 3 weeks (116 hours).

Exhibit Dates: *Version 1:* 8/74–Present. *Version 2:* 6/71–7/74.

Objectives: To provide Army Nurse Corps officers with the supervisory and administrative knowledge and skills required for assignment as clinical head nurses.

Instruction: Lectures in planning and coordination of patient care, applied communication skills, personnel management, and facilities, supplies, and equipment management.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in nursing (6/75). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in nursing (2/74).

AR-0703-0004

Health Nursing Orientation

Course Number: 6F-F1.

Location: Brooke Army Medical Center, Ft. Sam Houston, TX.

Length: 5 weeks (177 hours).

Exhibit Dates: 12/69–8/79.

Objectives: To provide nurse corps officers with a basic knowledge of health nursing and preventive medicine practices.

Instruction: Lectures and practical exercises in planning and provision for health nursing services; preventive dentistry; physical rehabilitation services; community mental health; socioeconomic implications of military family life; philosophy, principles, purpose, and evaluation of inservice education; methods and practices of preventive medicine; preventable diseases and injuries; Army veterinary service; participation in surveys, studies, and epidemiological investigations.

Credit Recommendation: In the upper-division baccalaureate category, credit in public health nursing on the basis of institutional evaluation (6/75).

AR-0703-0005

Medical Aidman (Basic)

Course Number: 8-E-24.

Location: Medical Service School, Ft. Sam Houston, TX.

Length: 12 weeks (280 hours).

Exhibit Dates: 3/56–12/68.

Objectives: To train enlisted personnel to perform as medical aidmen in field medical facilities.

Instruction: Lectures and practical exercises in field medical aid procedures, including advanced techniques and procedures in field surgery, principles of preventive medicine, dispensary and sick call procedures, basic anatomy and physiology, medical records, diagnostic and nursing procedures, and field sanitation procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in first aid and hygiene, 2 in physiology, and, on the basis of institutional evaluation, 6 in nursing (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in first aid and hygiene, 2 in physiology, and, on the basis of institutional evaluation, 6 in nursing (2/74); in the upper-division baccalaureate category, credit in first aid and hygiene on the basis of institutional evaluation (12/68).

AR-0703-0006

Army Nurse Corps Officer Orientation

(Army Nurse Corps Officer Basic)

Course Number: 8-A-C20C; 8-A-C1C.

Location: Medical Field Service School, Ft. Sam Houston, TX.

Length: 4–9 weeks (139–316 hours).

Exhibit Dates: 3/58–12/68.

Objectives: To provide newly commissioned Medical Service Corps and Army Nurse Corps officers with a basic knowledge of medical service organization and administration.

Instruction: Lectures and practical exercises in medical service organization and administration, including personnel management, medical supply procedures, medical records, mass casualties management, emergency medical treatment procedures, field medical service orientation, preventive medicine, principles of nursing administration, and duties and responsibilities of Medical Service Corps and Army Nurse Corps personnel.

Credit Recommendation: In the vocational certificate category, credit in nursing on the basis of institutional evaluation (2/74); in the lower-division baccalaureate/associate degree category, credit in nursing on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, credit in nursing on the basis of institutional evaluation (12/68).

AR-0703-0007

Basic Medical Specialist

Course Number: 300-91B10.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: *Version 1:* 6 weeks (237–247 hours). *Version 2:* 8 weeks (237–247 hours).

Exhibit Dates: *Version 1:* 6/78–Present. *Version 2:* 1/75–5/78.

Objectives: To provide enlisted personnel with the basic skills and knowledge required to perform emergency medical treatment and routine patient care.

Instruction: Lectures and practical exercises in basic medical-surgical foundations for emergency and patient care.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in emergency medical procedures-basic level (8/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to nursing procedures (6/77).

Related Occupation Codes: 91B; 91C; 91D; 91F; 91H; 91J; 91L; 91N; 91U; 91V; 91Y; 42C; 91G; 91P; 91Q.

AR-0703-0008

Neuropsychiatric Nursing

Course Number: 8-O-7.

Location: Medical Field Service School, Ft. Sam Houston, TX.

Length: 20 weeks (638–842 hours).

Exhibit Dates: 4/54–12/61.

Objectives: To train nurses to perform nursing duties in hospital psychiatric and neurological disease wards and to function as in-service training program instructors.

Instruction: Instruction in principles of neuropsychiatric nursing, with emphasis on interpersonal relationships, supervision and teaching in neuropsychiatric nursing; psychiatry; neurology; psychology; and psychiatric social work.

Credit Recommendation: In the upper-division baccalaureate category, 8 semester hours in abnormal psychology, 3 in occupational therapy, and credit in mental health or psychiatric nursing procedures on the basis of institutional evaluation (2/74).

AR-0703-0009

Military Nursing Advanced

Course Number: 8-A-C4C.

Location: Medical Service School, Ft. Sam Houston, TX.

Length: 22–23 weeks (714–734 hours).

Exhibit Dates: 3/58–12/68.

Objectives: To provide Nurse Corps officers with a working knowledge of the duties and responsibilities of nursing service personnel at all levels.

Instruction: Lectures and practical exercises in personnel administration, management of health care units, emergency medical treatment procedures, military science, neuropsychiatry, nursing science, and preventive medicine.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in nursing administration, 2 in hospital management, 2 in personnel management, and 6 in clinical practicum (6/75).

AR-0703-0010

Operating Room Nursing

Course Number: 6F-66E.

Location: *Version 6:* Academy of Health Sciences, Brooke Army Medical Center, Tacoma, WA; Madigan Army Medical Center, El Paso, TX; William Beaumont Army Medical Center, El Paso, TX. *All Versions:* Ft. Sam Houston, El Paso, TX.

Length: 16 weeks (585 hours).

Exhibit Dates: 8/78–Present.

Objectives: This course is designed to prepare junior Army Nurse Corps officers to function as entry-level nurses in the operating room.

Instruction: Classroom instruction and clinical demonstrations in principles of microbiology, sterilization, disinfection, sterilization and preparation of surgical supplies; operating oom room nursing and environmental control in hospital operating rooms; and the use of specialized equipment.

Credit Recommendation: RAD, 10 semester hours in operating room or medical/surgical nursing (8/79).

Related Occupation Codes: 66E; 66H; 66J.

AR-0703-0011

Nurse Practitioner—Pediatrics

Course Number: 6F-66D.

Location: Fitzsimmons Army Medical Center, Denver, CO.

Length: 22 weeks (504 hours).

Exhibit Dates: 11/77–Present.

Objectives: To prepare Army Nurse Corps officers to function as first-level pediatric nurse practitioners with the ability to assume increased responsibility for providing comprehensive health care for newborn infants, children, and adolescents in hospital and ambulatory care settings.

Instruction: Lectures, discussion, and clinical demonstrations in data gathering and physical assessment of the patient, health maintenance, human development, sick-childcare management and family socio-psychology.

Credit Recommendation: In the graduate degree category, 30 semester hours in graduate nurse practitioner education (8/79).

Related Occupation Codes: 66D.

AR-0703-0012

Nurse Practitioner—Obstetrics and Gynecology

Lectures and clinical demonstrations in assessment and care of the antepartum, postpartum, and selected gynecological patient, maternal and fetal monitoring and screening techniques, bio-psycho-social aspects of childbearing, childbearing family planning, sterility, abortion, patient and family counseling and education through the use of the nursing process.

Course Number: 6F-F4.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 22 weeks (820 hours).

Exhibit Dates: 8/77–Present.

Objectives: To prepare Army Nursing Corps officers to function as first-level nurse practitioners in obstetrics and gynecology.

Credit Recommendation: In the graduate degree category, 30 semester hours in nurse practitioner OB/GYN education (8/79).

AR-0703-0013

Nurse Practitioner Adult Medical-Surgical Health Care

Course Number: 6F-66H.

Location: Silas B. Hays Army Hospital, Ft. Ord, CA.

Length: 22 weeks (822 hours).

Exhibit Dates: 1/78–Present.

Objectives: To prepare Army Nurse Corps officers to work interdependently with the physician and other members of the health care team.

Instruction: Lectures, discussions and clinical experiences in the principles and practices of ambulatory health care including diagnostic, therapeutic, health maintenance and rehabilation for adult patients; pathophysiology of chronic disease.

Credit Recommendation: In the graduate degree category, 30 semester hours in nursing care for adults including 16 semester hours in gerontology for nurses, 11 in general adult nursing procedures and 3 in physical assessment (8/79).

AR-0703-0014

Intensive Care Nursing

Course Number: 6F-F5.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 22 weeks (818 hours).

Exhibit Dates: 8/77–Present.

Objectives: To prepare the Army nurse to function in an intensive care setting.

Instruction: Lectures and clinical practicum in the care of the critically ill patient with pulmonary, cardiovascular, renal, hematologic, oncologic or neurological dysfunctions.

Credit Recommendation: In the graduate degree category, 5 semester credits in each of the following specialized nursing areas: pulmonary dysfunction, cardiovascular dysfunction, renal dysfunction, hematologic and oncologic dysfunction, neurological dysfunction and 6 in specialized clinic, for a total of 31 hours (8/79).

AR-0704-0001

1. Physical Therapy Specialist
2. Physical Therapy Aide
   (Physical Therapy Procedures)
   (Physical Therapy Specialist)
   (Physical Therapy Enlisted)

Course Number: *Version 1:* 303-91J10. *Version 2:* 303-91J20; 8-R-921:1 8-E-19.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Medical Field Service School, Ft. Sam Houston, TX.

Length: *Version 1:* 27 weeks (1034 hours). *Version 2:* 4–12 weeks (176–528 hours).

Exhibit Dates: *Version 1:* 11/74–Present. *Version 2:* 12/54–10/74.

Objectives: To provide qualified medical corpsmen with knowledge and skills in physical therapy techniques and to promote continuing education in the profession.

Instruction: *Version 1:* Lectures and practical exercises in functional anatomy and physiology; human growth and development; basic principles and clinical application of physical modalities; ethical standards and proper techniques of handling and positioning patients; therapeutic exercises; development of patient therapy programs. *Version 2:* Lectures and practical exercises in anatomy; muscle functions; handling and positioning of patients; concepts of ethical standards; therapeutical exercises and routines; reconditioning exercises; and physical therapy modalities and gait training.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in anatomy and physiology, 3 in general psychology, 13 in physical therapy principles and procedures and 10 in field experience (6/77); in the upper-division baccalaureate category, credit in anatomy, physiology, and physical therapy on the basis of institutional examination (6/77). *Version 2:* In the vocational certificate category, certificate in physical therapy and physical rehabilitation (2/74); in the lower-division baccalaureate/associate degree category, 15 semester hours in physical therapy and physical rehabilitation (2/74); in the upper-division baccalaureate category, credit in anatomy, physiology, and physical therapy on the basis of institutional evaluation (12/68).

Related Occupation Codes: 91A; 91J.

AR-0704-0002

Occupational Therapy Procedures

Course Number: 8-E-23.

Location: Medical Field Service School, Ft. Sam Houston, TX.

Length: 12 weeks (352 hours).

Exhibit Dates: 10/54–12/68.

Objectives: To train enlisted personnel to assist occupational therapists, with emphasis on arts and crafts therapy techniques.

Instruction: Lectures and practical experience in the fundamentals of occupational therapy, including basic sciences, psychiatry, clinical therapy techniques, surgical conditions, social work, workshop activities, and therapy for tuberculars, the physically disabled, and neuropsychiatric and surgery patients.

Credit Recommendation: In the vocational certificate category, 15 semester hours in occupational therapy (2/74); in the lower-division baccalaureate/associate degree category, 15 semester hours in occupational therapy and additional credit on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, credit in occupational therapy on the basis of institutional evaluation (12/68).

AR-0704-0003

Physical Reconditioning Specialist

Course Number: 8-E-12.

Location: Medical Service School, Ft. Sam Houston, TX.

Length: 12 weeks (528 hours).

Exhibit Dates: 1/56–12/68.

Objectives: To train medical corpsmen as assistants in the physical reconditioning of medical, surgical, and neuropsychiatric patients.

Instruction: Lectures on anatomy and physiology; patient examinations; conditioning aquatics and exercises; functional anatomy and physical rehabilitation; medical ethics; resistive exercises and social work; medical and surgical conditions; and clinical observation.

Credit Recommendation: In the vocational certificate category, 15 semester hours in physical education instruction (2/74); in the lower-division baccalaureate/associate degree category, 15 semester hours in physical therapy or physical and mental rehabilitation (2/74); in the upper-division baccalaureate category, 3 semester hours in physical education instruction (12/68).

AR-0704-0004

Occupational Therapy Specialist

Course Number: *Version 1:* 303-91L10. *Version 2:* 303-91L20.

Location: *Version 1:* Academy of Health Sciences, Ft. Sam Houston, TX; Selected Army Hospitals, Continental United States. *Version 2:* Valley Forge General Hospital, Phoenixville, PA.

Length: *Version 1:* 25 weeks (915 hours). *Version 2:* 21 weeks (716 hours).

Exhibit Dates: *Version 1:* 4/76–Present. *Version 2:* 2/73–3/76.

Objectives: To train enlisted personnel in the knowledge of physical and behavioral sciences; principles and concepts related to implementation of remedial, health maintenance, and preventive occupational therapy procedures.

Instruction: Lectures and practical exercises in anatomy and physiology, occupational therapy processes, psychology, and pathologic conditions as related to occupational therapy.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in anatomy and physiology, 3 in general psychology, 12 in occupational therapy techniques, 9 in field experience (6/77). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in anatomy and physiology, 3 in general psychology, 12 in occupational therapy techniques, 6 in field experience (6/77).

Related Occupation Codes: 91L.

AR-0704-0005

Orthopedic Specialist

Course Number: 304-91H20.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Selected Army Hospitals, Continental United States.

Length: 12 weeks (474 hours).

Exhibit Dates: 9/75-Present.

Objectives: To prepare individuals to assist physicians and nurses in the care and treatment of orthopedic patients.

Instruction: Lectures and clinical experiences in anatomy and physiology and the principles of orthopedic surgery including the preparation of patients for major surgical procedures and assisting the physician in minor surgical procedures; care and treatment of orthopedic patients to include giving proper instruction to patients such as care of casts and splints, proper crutch walking techniques and precautions; fabricating, modifying and applying plaster casts; applying casts and splints used in surgery; performing change of dressing, sterile scrubs and suture removal observing the principles of asepsis.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in anatomy, 1 in physiology, 4 in principles of orthopedics and patient care, 4 in orthopedic methods and materials, 5 in clinical application of principles of orthopedics (6/77).

Related Occupation Codes: 91A; 91H.

AR-0704-0006

Orthotic Specialist
(Brace Specialist)

Course Number: 304-42C10; 304-42C20.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Selected Army Hospitals, Continental United States.

Length: 52 weeks (2000-2100 hours).

Exhibit Dates: 5/77-Present.

Objectives: To prepare the individual to design, construct, fit, and repair orthotic devices.

Instruction: Lectures, shop, and clinical experiences in design, construction, fitting, and repair of orthotic devices. Student is provided with a working knowledge of medical terminology and definitions, anatomy and physiology as related to orthopedics; detailed instruction in kinesiology and biomechanics; and detailed instruction to include materials and hand tools and plastics in orthotics, shoe corrections and arch supports, plaster of Paris procedures, leather techniques, orthotics for body components to include spinal, lower-extremity and upper-extremity orthotics; and professional and administrative subjects.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in anatomy, 1 in physiology, 1 in kinesiology, 24 in orthotic techniques, 6 in applied design, 2 in shop practices (6/77).

Related Occupation Codes: 42C; 91B.

AR-0704-0007

Respiratory Specialist

Course Number: 300-91V10.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 32-37 weeks (1280-1440 hours).

Exhibit Dates: 4/76-Present.

Objectives: To provide specialists with basic knowledge of aerosol/humidity therapy, ventilation therapy, pulmonary function testing; infection control; cardiopulmonary drug administration and critical patient care performed under the supervision of a physician.

Instruction: Lectures, demonstrations, and practical exercises in selected basic science courses related to respiratory care, e.g., anatomy, respiration, physiology, pharmacology and microbiology, physical therapy, clinical medicine, and medical materiel management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in anatomy and physiology, 3 in general chemistry-physics, 3 in cardiopulmonary physiology, 1 credit each for pharmocology, microbiology, and cardiopulmonary resuscitation, 3 for clinical medicine, 6 for inhalation therapy, and 9 in clinical experience, for a total of 30 hours in inhalation therapy (8/79). (6/77).

Related Occupation Codes: 91B; 91V.

AR-0705-0001

X-Ray Specialist
(Radiographic Procedures (Basic))
(X-Ray Procedures (Basic))
(X-Ray Specialist)

Course Number: *Version 1:* 313-91P10; 313-91P20; 8-R-935.1. *Version 2:* 8-E-4.

Location: *Version 1:* Academy of Health Sciences, Ft. Sam Houston, TX. *Version 2:* Medical Field Service, Ft. Sam Houston, TX.

Length: *Version 1:* 19 weeks (722-836 hours). *Version 2:* 16 weeks (704 hours).

Exhibit Dates: *Version 1:* 1/58-Present. *Version 2:* 1/56-12/57.

Objectives: To provide enlisted personnel with a working knowledge of fundamental x-ray clinic procedures.

Instruction: Lectures and practical experience in the fundamentals of x-ray clinic operations and procedures, including applied anatomy and physiology, manual and automatic x-ray film processing, equipment operation and maintenance, sterile techniques and radiation safety measures, and diagnostic radiograph production.

Credit Recommendation: *Version 1:* In the vocational certificate category, certificate in radiologic technology (6/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in anatomy and physiology, 2 in medical terminology, 3 in radiographic physics, 4 in radiographic positioning, 3 in radiographic techniques, 2 in darkroom procedures, 3 in clinical internship (6/77). *Version 2:* In the vocational certificate category, certificate in x-ray technology (2/74); in the lower-division baccalaureate/associate degree category, 30 semester hours in x-ray technology (2/74); in the upper-division baccalaureate category, 3 semester hours in elementary anatomy (12/68).

Related Occupation Codes: 91P.

AR-0705-0002

X-Ray Techniques Advanced

Course Number: 8-E-38.

Location: Medical Service School, Ft. Sam Houston, TX.

Length: 20 weeks (880 hours).

Exhibit Dates: 3/56-12/68.

Objectives: To train x-ray specialists in the advanced techniques of radiology.

Instruction: Lectures and practical exercises in advanced x-ray techniques, including personnel management and administration, anatomy and physiology, x-ray technical teaching, calibration of x-ray apparatus, principles of radiographic exposure, and x-ray supply procedures.

Credit Recommendation: In the vocational certificate category, certificate in x-ray technology (2/74); in the lower-division baccalaureate/associate degree category, 45 semester hours in x-ray technology (2/74); in the upper-division baccalaureate category, 3 semester hours in physiology (12/68).

AR-0705-0003

Radiological Safety

Course Number: 7K-F3.

Location: Ordnance School, Aberdeen Proving Ground, MD; Chemical School, Ft. McClellan, AL.

Length: 3 weeks (112-116 hours).

Exhibit Dates: 3/70-Present.

Objectives: To provide officer, enlisted, and civilian personnel with basic instruction in radiological safety.

Instruction: Lectures in nuclear warfare and radiological defense, structure of matter, radioactivity, radiation units, nature of x-ray and gamma radiation, isotopes, charged particles shielding, radium hazards and controls, radiation detection basics, radiac instruments, safe handling and storage of radioactive materiel, nuclear reactors, and medical aspects of ionizing radiation.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in radiologic safety (1/78).

Related Occupation Codes: 214E; 241F; 214G; 222B; 251B; 223B; 223D; 251D; 224B.

AR-0706-0001

Eye Specialist

Course Number: 300-91Y10; 300-91Y20.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 13 weeks (520 hours).

Exhibit Dates: 4/75-Present.

Objectives: To provide personnel with a basic knowledge of eye care.

Instruction: Lectures, demonstrations, and practical exercises in anatomy, physiology, pharmacology, ophthalmology, optometry, and administrative care. Training includes applying general principles and techniques related to the care and treatment of eye patients; assisting the physician and/or optometrist in the care and treatment of eye patients; conducting visual measurements and diagnostic tests; administering prescribed medications; and performing first aid procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in anatomy and physiology, 4 in ophthalmology subjects, 2 in optometry subjects, 8 in clinical assistance in ophthalmology and optometry (6/77).

Related Occupation Codes: 91B; 91Y.

AR-0707-0001

1. Preventive Medicine Procedures (Advanced)
2. Preventive Medicine Procedures (Advanced)

(Preventive Medicine Advanced)

Course Number: *Version 1:* 322-91S20. *Version 2:* 8-R-933;2 8-E-36.

Location: *Version 1:* Brooke Army Medical Center, Ft. Sam Houston, TX; Medical Field Service School, Ft. Sam Houston, TX. *Version 2:* Medical Service School, Ft. Sam Houston, TX.

Length: *Version 1:* 8-10 weeks (352-428 hours). *Version 2:* 16-20 weeks (704-880 hours).

Exhibit Dates: *Version 1:* 7/67-10/75. *Version 2:* 3/56-6/67.

Objectives: To provide preventive medicine specialists with advanced training in military preventive medicine.

Instruction: Study of the etiology of selected diseases and application of epidemiological principles in the control of each; planning and implementation of technical surveys and the solving of operational problems; preparation of environmental sanitation reports from raw data; bacteriological and/or chemical analyses of self-produced potable water from raw sources; assistance in surveys involving the operation and maintenance of manual and powered control equipment; planning and implementation of instructional training programs for field sanitation teams; and study and identification of the veterinary aspects of preventive medicine.

Credit Recommendation: *Version 1:* In the vocational certificate category, 30 semester hours in environmental health and sanitation (2/74); in the lower-division baccalaureate/associate degree category, 30 semester hours in environmental health and sanitation, and additional credit in environmental health and sanitation on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 2 semester hours in sanitation and disease control (12/68). *Version 2:* In the vocational certificate category, 30 semester hours in environmental health and sanitation (2/74); in the lower-division baccalaureate/associate degree category, 30 semester hours in environmental health and sanitation, and additional credit in environmental health and sanitation on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 3 semester hours in sanitation and disease control (12/68).

Related Occupation Codes: 91S.

AR-0707-0002

Preventive Medicine Procedures (Basic)

(Preventive Medicine Specialist)
(Preventive Medicine Enlisted)

Course Number: 322-91S10; 8-E-20; 322-933.1; 8-R-933.1.

Location: Brooke Army Medical Center, Ft. Sam Houston, TX.

Length: 7-12 weeks (308-528 hours).

Exhibit Dates: 3/51-10/75.

Objectives: To provide enlisted personnel with comprehensive training in sanitation, preventive medicine, and environmental health.

Instruction: Lectures and practical experience in the collection of water samples for bacteriological analysis; recognition of sanitary deficiencies in water supplies; performance of water disinfection procedures; garrison and field waste-disposal methods; recognition and correction of sanitary deficiencies in food service facilities; identification, collection, preservation, and shipment of medically important arthropods; rodent control procedures; mixing and dispersing of pesticides; operation and maintenance of control equipment; and compilation of medical statistical data.

Credit Recommendation: In the vocational certificate category, 15 semester hours in sanitation and disease control (2/74); in the lower-division baccalaureate/associate degree category, 15 semester hours in sanitation and disease control, additional credit on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 4 semester hours in sanitation and disease control (12/68).

Related Occupation Codes: 91S.

AR-0707-0003

Community Health and Environmental Science

Course Number: 6A-F5.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 9 weeks (331 hours).

Exhibit Dates: 9/74-Present.

Objectives: To provide sanitary engineers and military environmental sanitarians, Medical Corps and Veterinary Corps officers, entomologists, and Nurse Corps officers with knowledge of military community health administration, infectious disease epidemiology and environmental health and engineering practice.

Instruction: Lectures and practical exercises for the four categories of individuals in common instruction elements and selected specific instruction elements unique to each of the four personnel categories—administration, infectious disease epidemiology, environmental health, and engineering.

Credit Recommendation: Credit is not recommended because of the professional nature of the course (6/75).

AR-0707-0004

Preventive Medicine Orientation

Course Number: 6A-F3; 6-B-F1; 8-A-F11; 8-O-36.

Location: Medical Field Service School, Ft. Sam Houston, TX.

Length: 6 weeks (210-226 hours).

Exhibit Dates: 6/54-Present.

Objectives: To provide medical officers with a basic working knowledge of military preventive medicine and environmental control functions.

Instruction: Classroom and practical instruction in preventive medicine, including environmental sanitation, occupational/industrial health, medical entomology, and disease and injury prevention.

Credit Recommendation: Credit is not recommended because of the professional nature of the course (6/75).

AR-0707-0005

Environmental Health Specialist

(Preventive Medicine Specialist)

Course Number: 322-91S10; 322-91S20.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 15 weeks (557 hours).

Exhibit Dates: 8/75-Present.

Objectives: To train environmental health science specialists to identify and control specific environmental factors which affect the health of all personnel.

Instruction: Conferences, lectures, demonstrations, and practical exercises in the identification of sanitary deficiencies in water supply and waste water systems; inspection of and discrepancies in food service facilities; identification of hazards relating to the work environment in industrial, technical, and training areas; identification, collection, preservation and shipment of medically important arthropods and rodents; selection, safe handling, mixing, allocation and disposal of pesticides to include pest control procedures; performance of environmental health surveys; identification of potential health hazards in facilities producing ionizing and non-ionizing radiation; description of disease chain of transmission; and compilation of medical statistical data.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 12 semester hours in sanitation and disease control, 15 in environmental health, 4 in environmental emergency science (6/77).

Related Occupation Codes: 09B; 09E; 91S.

AR-0707-0006

Community and Environmental Health Program Management

Course Number: 6A-F6.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 2 weeks (68 hours).

Exhibit Dates: 4/74-Present.

Objectives: To provide a working knowledge of the administrative, logistical, and managerial aspects of supervising, at the local level, a comprehensive program of environmental sciences and community services.

Instruction: Lectures, conferences, and case studies in health care administration, health, and the environment, including infectious disease control, health education, environmental protection, prevention of disease, pesticide management, community health, legal issues in health and environment, radiation protection and nuclear security, the OSHA Act of 1970, and the role of the veterinarian and hospital environment.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in environmental science or environmental health (6/77).

AR-0707-0007

Environmental Health Specialist Reserve Component (Nonresident/Resident)

Course Number: 322-91S10(RC).

Location: Phase II—Academy of Health Sciences, Ft. Sam Houston, TX.

Length: Phase II—2 weeks (104 hours).

Exhibit Dates: 2/78-Present.

Objectives: To train selected reserve component enlisted personnel to perform environmental health duties in field units.

Instruction: Phase II, the resident portion of this course, consists of performance testing of critical tasks studied by correspondence during Phase I. Topics include environmental health engineering and sanitation and medical entomology.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in health and sanitary engineering, 3 in medical entomology (8/79). NOTE: Phase I of this course is nonresident in nature and carries no credit. Credit recommendation is based on only Phase II, the resident portion of the course.

Related Occupation Codes: 91S.

Medical Specialist
(Medical Technician)

Course Number: 8-E-6.

Location: Medical Service School, Ft. Sam Houston, TX.

Length: 12-14 weeks (140-219 hours).

Exhibit Dates: 4/54-12/68.

Objectives: To train medical corpsmen and aidmen as assistants in hospital, clinical, and medical patient care and treatment.

Instruction: Academic study in professional sciences; surgical nursing care procedures; functions of neuropsychiatry; medical rotation techniques and procedures.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in physiology and hygiene (12/68).

AR-0709-0004

Orthopedic Laboratory Procedures
(Orthopedic Specialist)

Course Number: 8-R-451.1; 8-E-33.

Location: *Version 1:* Medical Service School, Ft. Sam Houston, TX. *Version 2:* Walter Reed Hospital, Washington, DC.

Length: 4 weeks (88 hours).

Exhibit Dates: 1/56-12/68.

Objectives: To train enlisted personnel to assist in fabricating, repairing, and adjusting casts and orthopedic devices.

Instruction: Lectures and practical exercises in the fundamentals of orthopedic laboratory procedures, including anatomy, medical terminology, orthopedic conditions, care and handling of orthopedic patients, and methods and materials used for orthopedic appliances.

Credit Recommendation: In the vocational certificate category, credit in orthopedic assisting on the basis of institutional evaluation (2/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in orthopedic assisting (2/74).

AR-0709-0005

Pharmacy Specialist

Course Number: 312-91Q10; 8-R-932.2.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Medical Field Service School, Ft. Sam Houston, TX.

Length: 17-18 weeks (570-680 hours).

Exhibit Dates: 8/66-Present.

Objectives: To provide pharmacy auxiliary personnel with a working knowledge of drugs, their sources, preparation, uses, incompatibilities and doses; pharmaceutical symbols and terms; and storage, control procedures and dispensing procedures performed under the supervision of a pharmacist or physician.

Instruction: Lectures and practical experience in the fundamentals of pharmacy, including manufacture and labeling of pharmaceutical prescriptions, preparation of common drugs and medicines, use of pharmaceutical reference texts, and applied accounting and control procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in pharmacy assisting, additional credit (up to 15 semester hours) on the basis of institutional evaluation (6/77); in the upper-division baccalaureate category, 3 semester hours in pharmaceutical laboratory, 2 in pharmaceutical mathematics (6/77).

Related Occupation Codes: 91Q.

AR-0709-0006

Special Forces Aidman (Airborne)

Course Number: 300-F1.

Location: Medical Field Service School, Ft. Sam Houston, TX.

Length: *Version 1:* 19 weeks (572 hours). *Version 2:* 17 weeks (440 hours).

Exhibit Dates: *Version 1:* 8/72–Present. *Version 2:* 4/66–7/72.

Objectives: To provide medical corpsmen with specialized knowledge of the procedures and techniques necessary to function independently in emergency situations.

Instruction: Medical and dental diagnosis; psychiatric and dental emergency treatment; clinical laboratory techniques; emergency surgical procedures; preventive medicine techniques; field emergency medical, surgical and nursing care and treatment; principles of pharmacology.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in medical laboratory procedures, credit in nursing or physician assisting on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 2 semester hours in medical laboratory procedures, credit in nursing or physician assisting on the basis of institutional evaluation (2/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in medical laboratory procedures, credit in nursing or physician assisting on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 3 semester hours in physiology and hygiene, 2 in medical laboratory procedures (12/68).

Related Occupation Codes: 91A; 91B.

AR-0709-0007

Medical Aidman (Advanced)

Course Number: 8-E-25.

Location: Medical Field Service School, Ft. Sam Houston, TX.

Length: 20 weeks (330 hours).

Exhibit Dates: 3/56–12/68.

Objectives: To train medical aidmen in the advanced techniques and procedures of field medicine, surgery, and triage as an assistant to the medical officer.

Instruction: Lectures and practical exercises in field medicine, surgery, preventive medicine, pharmacology, dispensary and sick call procedures, field sanitation, and medical records and supply.

Credit Recommendation: In the vocational certificate category, 30 semester hours in medical assisting, physician assisting, or emergency service technology (2/74); in the lower-division baccalaureate/associate degree category, 30 semester hours in medical assisting, physician assisting, or emergency service technology, and additional credit on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 3 semester hours in physiology and hygiene (12/68).

AR-0709-0008

Electroencephalographic Procedures
(Electroencephalographic Specialist)

Course Number: 8-R-914.3; 8-E-14.

Location: Medical Service School, Ft. Sam Houston, TX.

Length: 8 weeks (352 hours).

Exhibit Dates: 1/56–12/68.

Objectives: To train medical corpsmen in electroencephalography laboratory procedures and equipment operation and maintenance.

Instruction: Lectures and practical experience in the fundamentals of electroencephalography laboratory procedures and techniques, including electroencephalographic equipment maintenance, production and interpretation of EEG readings, and the standardization of four- and six-channel EEGs.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in psychiatric assisting (2/74); in the upper-division baccalaureate category, 8 semester hours in psychiatric assisting (2/74).

AR-0709-0009

1. Clinical Specialist
2. Clinical Specialist
3. Medical Specialist (Advanced)

Course Number: *All Versions:* 6H-011A. *Version 1:* 300-91C10. *Version 2:* 300-91C20. *Version 3:* 8-R-911.3.

Location: Army Hospitals, Continental United States.

Length: 40 weeks (1372–1760 hours).

Exhibit Dates: *Version 1:* 4/76–Present. *Version 2:* 6/68–3/76. *Version 3:* 2/61–5/68.

Objectives: To provide medical specialists with the advanced skills and knowledge necessary to supervise and perform patient-care duties appropriate to hospital and field medical assistants

Instruction: *Version 1:* Study of basic principles of management and administration including personnel development; professional nursing sciences; pharmacology in patient care; basic principles of health and environment related to Army medical field service; fundamental clinical experience emphasizing medical and surgical patient care including surgical follow-through, plus immediate postoperative care as well as ambulatory patient, maternal and newborn patient, and pediatric patient care. *Version 2:* Study of the basic principles of management and administration, including personnel, equipment, and ward organization; medical management of mass disaster casualties; emergency medical and dental recognition and treatment; military preventive medicine; pharmacology in patient care; advanced principles and practice of total patient care; medical-surgical nursing; intensive care nursing; principles and procedures of prenatal, neonatal, and postnatal care; pediatric care; dispensary procedures; development of advanced medical specialist skills in operating room; general knowledge of specialized nursing, i.e., rehabilitation and cancer nursing. *Version 3:* Study of the basic principles of management and administration, including personnel, equipment, and ward organization; medical management of mass disaster casualties; emergency medical and dental recognition and treatment; military preventive medicine; pharmacology in patient care; advanced principles and practice of total patient care; medical-surgical nursing; intensive care nursing; principles and procedures of prenatal, neonatal, and postnatal care; pediatric care; dispensary procedures; development of advanced medical specialist skills in operating room; general knowledge of specialized nursing, i.e., rehabilitation and cancer nursing.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 12 semester hours in clinical nursing experience, 8 in medical-surgical nursing, 4 in anatomy amd physiology, 3 in maternal and child nursing, 2 in theory and practice of patient care, 2 in pharmacology, 1 in nutrition, 1 in preventive medicine, 1 in psychiatric medicine, 3 in environmental health (6/77). *Version 2:* In the lower-division baccalaureate/associate degree category, 30 semester hours in physician assisting (2/74); in the upper-division baccalaureate category, 3 semester hours in first aid, 2 in nursing management, and, for students enrolled in nursing programs, additional credit in medical-surgical nursing on the basis of institutional evaluation (9/71). *Version 3:* In the lower-division baccalaureate/associate degree category, 60 semester hours in physician assisting (2/74); in the upper-division baccalaureate category, 2 semester hours in first aid, 2 in nursing management, and credit in physiology on the basis of institutional evaluation (12/68).

Related Occupation Codes: 91B; 91C; 91Z.

Patient Administration

Course Number: 7M-F3; 8-A-F18.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Medical Field Service School, Ft. Sam Houston, TX.

Length: 7–8 weeks (244 ND 293 hours).

Exhibit Dates: *Version 1:* 6/78–Present. *Version 2:* 1/64–5/78.

Objectives: To train medical service officers in the principles and procedures required for administration of patients in Army medical treatment facilities.

Instruction: *Version 1:* Lectures and practical exercises in the principles and procedures required for the administration of patients in Army Medical Treatment facilities, including patient administration, health care organization and analysis, and human resources management. *Version 2:* Lectures and practical exercises in the principles and procedures required for administration of patients in Army medical treatment facilities, including patient administration, medical and military law, special aspects of medical materiel management, personnel management, resource management and operations research, introduction to dental and medical science, introduction to anatomy and physiology, neuropsychiatric services, nursing services, and military community health, and aeromedical evacuation.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 6 semester hours in administration and management procedures, 1 in health care organization, and 1 in human resources management (8/79). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in hospital administration (7/74).

AR-0709-0014

Army Dietetic Internship

Course Number: None.

Location: Brooke Army Medical Center, Ft. Sam Houston, TX; Walter Reed Army Medical Center, Washington, DC.

Length: 39 weeks (1432 hours).

Exhibit Dates: 3/74–Present.

Objectives: To provide learning experiences for dietetic internship-qualified candidates to gain competency for practice of dietetics.

Instruction: Lectures and practical exercises in hospital dietetics, equipment management, financial management, menu planning, nutritional care, personnel management, quantity food production, safety procedures, sanitation procedures, security procedures, space design, and subsistence management.

Credit Recommendation: Credit is not recommended because of the professional nature of the course (6/75).

AR-0709-0015

Optical Laboratory Specialist

Course Number: 311-42E20.

Location: Medical Equipment and Optical Shcool, Denver, CO.

Length: 21 weeks (756 hours).

Exhibit Dates: 2/74–Present.

Objectives: To provide students with a theoretical basis and working knowledge of ophthalmic optics, optical laboratory procedures, and optical equipment to fabricate prescribed eyewear.

Instruction: Lectures and practical exercises to include prescription analysis; laboratory procedures in surfacing and fabrication of eyewear; skill development; lens verification; equipment maintenance and repair; and safety precautions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in introduction to the field of ophthalmic optics, 5 in introduction to lens surfacing procedures, 3 in pre-surfacing laboratory procedures, 12 in surfacing and fabrication technology, and 5 in laboratory production experience (10/75).

AR-0709-0016

Allergy-Clinical Immunology Specialist

Course Number: 300-F4.

Location: Walter Reed Army Medical Center, Washington, DC.

Length: 8 weeks (301 hours).

Exhibit Dates: 11/75–Present.

Objectives: To train individuals to assist in the specialized field of allergy-immunology.

Instruction: Lectures, laboratory, and clinical experience to include clinical administration, allergy-clinical immunology, basic sciences, immunoglobulins and mediators of hypersensitivity, allergic manifestations and treatment, diagnostic procedures, preparation of allergen extracts and clinical rotations through allergy-immunization clinic, allergen extract laboratory, allergy-immunology research laboratory, pulmonary function laboratory, and physical medicine service.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in anatomy and physiology of allergies, 2 in allergy symptoms, 1 in allergy extracts, 3 in allergy clinic (6/77).

Related Occupation Codes: 91B; 91C.

AR-0709-0017

Pharmacy Sterile Products

Course Number: 312-F1; 6H-68H.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: *Version 1:* Selfpaced, maximum weeks (83 hours). *Version 2:* 2 weeks (70 hours).

Exhibit Dates: *Version 1:* 3/78–Present. *Version 2:* 5/75–2/78.

Objectives: To provide pharmacy personnel with a working knowledge of the techniques, procedures, and administrative functions involved in preparing sterile products.

Instruction: Lectures, demonstrations, and practical exercises relative to the work environment, the preparation, calculation, and administration of sterile products, and the management of a pharmacy sterile product section.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in specialized pharmacy or pharmaceutical chemistry (8/79). *Version 2:* In the upper-division baccalaureate category, credit on the basis of institutional evaluation (6/77).

Related Occupation Codes: 91Q.

AR-0709-0018

Automated Military Outpatient System (AMOSIST) Training

Course Number: 300-F3.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 12 weeks (468 hours).

Exhibit Dates: 1/76–Present.

Objectives: To provide training to insure quality health care for adult walk-in patients by triaging to appropriate health care provider.

Instruction: Practical exercises and lectures to include elementary diagnosis, anatomy and physiology, first aid, patient management. Course is conducted in three phases, a didactic phase followed by two phases of practical experience under close supervision of physicians and certified AMOSISTs.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in anatomy and physiology, 1 in medical care management for completion of the two-week Phase I; 2 semester hours in medical care internship for the three-week Phase II; 3 semester hours in medical care internship for the seven-week Phase III.

Related Occupation Codes: 91B; 91C.

AR-0709-0019

Clinical Specialist (Primary Technical)

Course Number: 300-91C20.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Selected Medical Centers, Continental United States.

Length: 16 weeks (592 hours).

Exhibit Dates: 6/77–Present.

Objectives: To provide medical specialists with the skills and techniques required to perform duties in therapy and preventive and emergency care.

Instruction: Study of the basic principles of ethical medic-legal responsibilities, structure, and duties of the department of nursing; principles of medical records; measurement of temperature, pulse, respirations and blood pressure; recognition of signs and symptoms and needs of the patients; demonstration of medical and surgical asepsis; pre- and post-operative care of the surgical patient; care of the immobilized patient; identification of simple disorders of the skin; nursing procedures for respiratory conditions; digestive disorders and disorders of the bowel; psychosocial acceptance of death and dying; postmortem care; assisting with physical examination; collection and storage of specimens; recognition of EENT conditions; basic cardiopulmonary resuscitation techniques; recognition of anaphylactic shock; immunization techniques and principles.

AR-0799-0003

Advanced Nursing Administration

Course Number: *Version 1:* 8-A-3430. *Version 2:* 8-O-27.

Location: Medical Service School, Ft Sam Houston, TX.

Length: *Version 1:* 27 weeks (1188 hours). *Version 2:* 23 weeks (734 hours).

Exhibit Dates: *Version 1:* 7/58–12/68. *Version 2:* 4/54–6/58.

Objectives: To provide selected nurses with advanced medical training, enabling them to qualify as hospital assistants or chief nurses.

Instruction: Lectures and practical experience in personnel and nursing management; medical, hospital, and nursing administration; nursing station and services; medical records and law; statistics; written and oral communication; human relations; supply principles and procedures; and teaching and research in nursing.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 6 semester hours in nursing administration, 2 in hospital management, 2 in personnel management, and credit in instructional methods on the basis of institutional evaluation (12/68). *Version 2:* In the lower-division baccalaureate/associate degree category, 14 semester hours in nursing administration

(2/74); in the upper-division baccalaureate category, 6 semester hours in nursing administration, 3 in hospital management, 3 in personnel management, 2 in instructional methods, and credit in speech on the basis of institutional evaluation (12/68).

AR-0799-0004

Army Medical Department (AMEDD) Reserve Component General Staff

Course Number: 7M-F1(RC); 7M-F1.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 2 weeks (74 hours).

Exhibit Dates: 5/75–Present.

Objectives: To provide information related to the performance of duties associated with command and staff positions for Army medical department reserve component officers.

Instruction: Lectures and practical exercises in health care delivery in the Army, health and environmental sciences, and health care administration.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/75).

AR-0799-0005

Army Aviation Medicine (Basic)

Course Number: 6A-3160; 1-A-3160.

Location: Aviation School, Ft. Rucker, AL.

Length: 4–7 weeks (148–261 hours).

Exhibit Dates: 4/64–Present.

Objectives: To provide Medical Corps officers with a working knowledge of aviation medicine.

Instruction: Lectures and practical exercises in administration, medical flying standards, aeromedical problems associated with flying, tactics on various aircraft, and operation of flying units.

Credit Recommendation: Credit is not recommended because of the professional nature of the course (6/75).

AR-0799-0006

Clinical Technician

Course Number: 8-E-18.

Location: Medical Field Service School, Ft. Sam Houston, TX.

Length: 48 weeks (1440 hours).

Exhibit Dates: 1/54–12/56.

Objectives: To train enlisted personnel in advanced nursing procedures and ward management functions.

Instruction: Principles and procedures of patient care; common diseases; personal and community health; body structure and function; first aid; care of neuropsychiatric patients; child care; clinical application in care of medical, surgical, neurosurgical, outpatient, and orthopedic patients; clinical application in mother and child care.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in first aid and hygiene, and additional credit in physiology on the basis of institutional evaluation (12/68).

AR-0799-0007

Essential Medical Training for Army Medical Department (AMEDD) Aviators Nonresident/Resident

(Essential Medical Training for Army Medical Department (AMEDD) Aviators Associate)

Course Number: 2C-F7(RC); 2C-F7(R).

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: In residence 2 weeks (80 hours).

Exhibit Dates: 11/74–Present.

Objectives: To provide AMEDD aviators with general knowledge about the medical problems encountered in the aeromedical evacuation of the sick and wounded.

Instruction: The course consists of a 54-hour nonresident phase of correspondence study and a 2-week resident phase of lectures and practical exercises in elementary diagnosis, emergency medical treatment procedures, and medical support in the theater of operations. Credit recommendation is based on resident phase.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in emergency medical care, 2 in anatomy and physiology (6/77).

AR-0799-0008

AMEDD Officer Advanced Nonresident/Resident

(Army Medical Department Officer Advanced Nonresident/Resident)

Course Number: 6-8-C22(RC).

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: In residence 2 weeks (75 hours).

Exhibit Dates: 11/74–Present.

Objectives: To provide selected Reserve medical officers with a knowledge of AMEDD command and staff duties.

Instruction: The course consists of an 84-hour nonresident (correspondence) phase prerequisite to 75-hour (two week) formal resident phase. Phase I includes subject matter generally unique to the Army Medical Department and some, such as preventive medicine, with wider applicability. Phase II emphasizes military application and description of military organizational function, with some wider range of content relating to matter of public health, such as geographic distribution of disease.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/77).

AR-0799-0009

Drug and Alcohol Rehabilitation

Course Number: 5H-F3.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 2 weeks (70 hours).

Exhibit Dates: 7/76–Present.

Objectives: To provide selected personnel with training related to the rehabilitation of individuals with drug and alcohol problems.

Instruction: Lectures and practical experiences in applying basic skills on individual counseling techniques and small-group leadership skills in drug and alcohol treatment settings; psychosocial and medical aspects of drug and alcohol abuse; treatment and rehabilitation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in drug/alcohol abuse overview (6/77).

AR-0799-0010

Alcohol and Drug Abuse Team

Course Number: 5H-F2.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 2 weeks (70 hours).

Exhibit Dates: 7/76–Present.

Objectives: To prepare personnel for duties on alcohol and drug abuse teams.

Instruction: Lectures and practical exercises in drug/alcohol abuse problem identification, treatment, rehabilitation, and prevention.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in drug and alcohol abuse overview (6/77).

AR-0799-0012

Army Medical Department (AMEDD) Noncommissioned Officer (NCO) Advanced

Course Number: 6-8-C42.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: *Version 1:* 10–12 weeks (414–505 hours). *Version 2:* 12 weeks (410 hours).

Exhibit Dates: *Version 1:* 5/78–Present. *Version 2:* 5/75–4/78.

Objectives: To train selected noncommissioned officers to assume responsibilities and duties required of a Army Medical Departmentment non-commissioned officer.

Instruction: *Version 1:* Lectures, conferences, and practical exercises in the behavorial sciences, preventative medicine and health care administration, military science, and management of a health care facility. The course has a common base and then splits up into four MOS speciality areas including dental science, health care administration, military science, and food service specialist. *Version 2:* Lectures and practical exercises in human relations, medical effects of radiation from nuclear accidents or incidents, occupational safety and health, management and administration of medical facilities and organizations, and military medical support operations.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 4 semester hours in heaith care management and preventative medicine, 3 in military science, and 1 in behavioral science. For those students completing 91E or 42D, an additional 3 semester hours in dental administration; for those completing 76J, an additional 7 credits in business management; for those completing 91B, an additional 3 credits in military science, and for those completing 94F, and additional 4 credits in food service administration (8/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in radiation hazard control, 2 in principles of management, 2 in oral communication, 1 in health care management (6/77).

Related Occupation Codes: 35G; 71G; 76J; 94F; 92B; 42D; 42E; 35S; 35T; 01H.

AR-0799-0013

Army Medical Department (AMEDD) Executive Management Program

Course Number: 7M-F5.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Brooke Army Medical Center, Ft. Sam Houston, TX.

Length: 2 weeks (83 hours).

Exhibit Dates: 7/70–Present.

Objectives: To prepare officers to perform as commanders and administrators of hospitals and medical departments.

Instruction: Lectures and classroom discussion on health care administration, resource management and patient management. Students also review case studies in management of a hospital facility.

Credit Recommendation: In the graduate degree category, 6 semester hours in hospital administration (8/79).

AR-0799-0014

Army Medical Department (AMEDD) Graduate Medical Education (GME) Program Command and Staff

Course Number: 6-8-C24.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 2 weeks (72 hours).

Exhibit Dates: 6/77–Present.

Objectives: To provide Army medical specialists with a general knowledge of command and staff principles.

Instruction: Lectures conferences and practical exercises in command and staff management functions including health and environment, health care administration, resource management systems and military science.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/79).

AR-0801-0001

Essential Medical Training for AMEDS (Army Medical Service) Aviators

Course Number: 2-C-F7.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Medical Field Service School, Ft. Sam Houston, TX.

Length: 4 weeks (116–150 hours).

Exhibit Dates: 1/65–Present.

Objectives: To train Medical Service Corps personnel in first aid procedures for sick and wounded.

Instruction: Lectures and practical exercises in first aid procedures, including basic anatomy and physiology review, basic pharmacology, emergency treatment procedures, basic nursing care, aeromedical evacuation, transporting casualties, combat psychiatry, chemical and biological warfare casualty management, and preventive medicine and environmental sanitation.

Credit Recommendation: In the vocational certificate category, 2 semester hours in first aid (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in first aid (2/74); in the upper-division baccalaureate category, 2 semester hours in first aid (12/68).

AR-0801-0002

Hazardous Devices

Course Number: None.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 3 weeks (114–115 hours).

Exhibit Dates: 10/72–Present.

Objectives: To train civilian public safety personnel to cope with the dangers of improvised explosive and incendiary devices.

Instruction: Lectures and practical exercises in the functions of hazardous devices, demolition procedures, safety procedures, and disposal of hazardous devices, including past incidents and current trends, basic physical laws and principles, incendiary materials, incident investigation and reporting procedures, location and render-safe procedures, disposal procedures, safety and control of explosives, and removal techniques.

Credit Recommendation: In the vocational certificate category, 2 semester hours in bomb disposal or police science (5/74).

AR-0801-0003

U.S. Army Drug and Alcohol Rehabilitation Training (Advanced)

Course Number: 5H-F4.

Location: Academy of Health Sciences, Ft. Sam Houston, TX.

Length: 2 weeks (68 hours).

Exhibit Dates: 10/77–Present.

Objectives: To provide selected military personnel and civilian Army employees with a working knowledge of skills and techniques to counsel clients and to perform consultative functions within the Army alcohol and drug abuse rehabilitation program.

Instruction: Lectures, conferences and practical exercises, including individual counseling, small-group processing, and client outreach and consultation.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in substance abuse rehabilitation counseling (8/79).

AR-0801-0004

Aviation Mishap Prevention Management
(Aviation Accident Prevention Management)

Course Number: 7K-F13.

Location: Safety Center, Ft. Rucker, AL.

Length: 2 weeks (64 hours).

Exhibit Dates: 8/77–Present.

Objectives: To train selected personnel in techniques of establishing accident prevention programs; to familiarize them with the procedures of aircraft mishap investigation; and to provide a working knowledge of basic safety information concepts.

Instruction: Conferences and practical exercises in management techniques, mishap prevention, aircraft mishap investigation, aviation medicine, and aviation law.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in aviation safety and accident investigation (10/78).

Related Occupation Codes: 67A; 67B; 67F; 67G; 67H; 67N; 67U; 67V; 67W; 67Y; 67Z; 68K; 71P.

AR-0802-0001

Technical Escort

Course Number: 2E-F21, 494-F3.

Location: *Version 1:* Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Chemical School, Ft. McClellan, AL.

Length: 4 weeks (131–148 hours).

Exhibit Dates: *Version 1:* 1/76–Present. *Version 2:* 12/66–12/75.

Objectives: To train enlisted personnel as technical escorts for hazardous materials.

Instruction: Lectures and practical experience in the handling of hazardous materials. Topics include the packaging and storing of chemical, biological, and radiological agents; the effects of these agents on humans; safety precautions; and the use of instruments to measure radiation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in hazardous materials handling (8/79). *Version 2:* Credit is not recommended because of the military-specific nature of the course (5/74).

Related Occupation Codes: 55D; 54B; 54E; 54D; 411A; 4514.

AR-0802-0002

Explosive Ordnance Disposal, Phase I

Course Number: 4E-F3; 431-55D10; 431-55D20; 431-413.1.

Location: Missile and Munitions School, Redstone Arsenal, AL; Chemical School, Ft. McClellan, AL.

Length: 2 weeks (72–76 hours).

Exhibit Dates: 2/65–Present.

Objectives: To train enlisted personnel and commissioned officers in the disposal of chemical and biological agents found in unexploded ordnance.

Instruction: Lectures and practical exercises in explosive ordnance disposal. Instruction includes latest biological agents; chemical and biological defense; recognition of the chemical, physical, and physiological effects on the body; and treatment procedures for personnel exposed to chemical agents.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

Related Occupation Codes: 55D.

AR-0802-0003

Nuclear, Biological, Chemical Enlisted
(NBC Enlisted)
(Chemical, Biological, Radiological Enlisted with ARADCOM Track)
(Chemical, Biological, Radiological Enlisted)
(CBR Enlisted)

Course Number: 494-F1; 3-R-F2.

Location: Ordnance School, Aberdeen Proving Ground, MD; Chemical Corps School, Ft. McClellan, AL.

Length: 4 weeks (134–148 hours).

Exhibit Dates: 5/57–1/78.

Objectives: To train enlisted personnel in nuclear, biological, and chemical (NBC) or chemical, biological, and radiological (CBR) operations.

Instruction: Lectures in CBR or NBC operations, including organization and staff responsibilities, technical aspects of chemical and biological operations, nuclear warfare and radiological defense, and explosive ordnance.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

AR-0802-0004

Nuclear Weapons Employment and Radiological Defense
(Nuclear Weapons Employment and Radiological Warfare)
(Atomic Defense)

Course Number: 3-G-F3; 3-I-F3; 3-O-6.

Location: Chemical Corps School, Ft. McClellan, AL.

Length: 6–7 weeks (214–268 hours).

Exhibit Dates: 4/55–12/68.

Objectives: To train officers and civilian personnel in nuclear weapons employment and defense.

Instruction: Lectures and practical exercises in nuclear weapons employment and defense, including personnel and administrative procedures; nuclear weapon effects; nuclear weapons; target analysis and weapon employment; residual radiation; nuclear hazards, accidents, and incidents; radiation; radiac instruments; and radiological surveys and radiological safety.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

AR-0802-0005

Guided Missile, Nuclear Weapons and ARADCOM Safety

Course Number: 9-L-F30.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 3 weeks (94 hours).

Exhibit Dates: 10/61-12/68.

Objectives: To train enlisted personnel in guided missile and nuclear weapons safety practices, hazards and precautions at ARADCOM Nike tactical sites.

Instruction: Lectures and practical exercises in guided missiles, nuclear weapons and ARADCOM safety factors and procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

AR-0802-0006

Safety Engineering Intern Training Program

Course Number: None.

Location: DARCOM Intern Training Center, Red River Depot, Texarkana, TX.

Length: 48 weeks (1920 hours).

Exhibit Dates: 12/76-Present.

Objectives: To provide a foundation in general concepts and techniques of safety engineering.

Instruction: Lectures and practical exercises to cover safety engineering principles in industrial and commercial systems; principles of radiological safety, including basic theory of nuclear reactions, radioactivity, the sources of radiation and their interaction with matter; human relations and management psychology stressing understanding of behavior processes and patterns and including human factors engineering in systems design of hardware, personnel subsystems, and system procedures for operation and maintenance; design analysis; structural safety and failure modes analysis; safety in the occupational environment; and chemical safety in the industrial environment, to cover chemical compounds and solutions, their properties, uses, limitations, actions on the human body and practical means of safeguarding against their associated hazards.

Credit Recommendation: In the upper-division baccalaureate category, 8 semester hours in tools and methods of analysis, 6 in radiological safety, 4 in human factors, 4 in industrial hygiene, 16 in design analysis and applications (12/76); in the graduate degree category, 2 semester hours in tools and methods of analysis, 3 in radiological safety, 7 in design analysis and applications (12/76).

AR-0802-0007

Explosive Ordnance Disposal Supervisor

Course Number: 9-OE-90.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 6 weeks (210 hours).

Exhibit Dates: 5/57-12/68.

Objectives: To train officers and enlisted personnel in supervisory and managerial functions of explosive ordnance disposal operations.

Instruction: Lectures and practical exercises in disposal of ammunition, chemical fillers, and guided missile fuels and propellants; training for civil defense units and Federal civil defense organization and planning; salvage appraisal; and advanced map reading.

Credit Recommendation: Credit is not recommended because of the military nature of the course (7/74).

AR-0802-0008

Army Safety Program Management
(Army Safety Program Organization and Administration)

Course Number: 7K-F9.

Location: Safety Center, Ft. Rucker, AL; Adjutant General School, Ft. Benjamin Harrison, IN.

Length: 2 ND 4 weeks (74 ND 155 hours).

Exhibit Dates: 9/67-Present.

Objectives: To provide personnel with a working knowledge of the management duties and responsibilities of an installation safety officer.

Instruction: Conferences, practical exercises, and demonstrations in injury prevention procedures management, safety administration, and accident prevention management.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in industrial safety management (3/75).

AR-0802-0009

Atomic Demolition Munitions (Enlisted)
(Atomic Demolition Munitions)

Course Number: 431-12E20.

Location: Engineer School, Ft. Belvoir, VA.

Length: 3 weeks (93-ND 102 hours).

Exhibit Dates: 1/69-Present.

Objectives: To provide enlisted personnel with a working knowledge of atomic demolitions utilizing either a SADM or MADM system.

Instruction: Lectures and practical exercises in atomic demolition warheads, security and storage, firing device, safety and emergency procedures, personal protection, safeguarding of nuclear control orders, nuclear effects, maintenance and transportation.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (9/79).

Related Occupation Codes: 12A; 12E.

AR-0802-0010

Atomic Demolition Munitions (Officer)

Course Number: 4E-F1.

Location: Engineer School, Ft. Belvoir, VA.

Length: 2 weeks (71-75 hours).

Exhibit Dates: 10/71-Present.

Objectives: To provide commissioned officers with working knowledge of planning and executing an atomic demolition mission at the combat engineer level.

Instruction: Conferences, demonstrations, and practical exercises in staff and mission planning ordinance support, responsibilities as carrier and convoy commander, cratering, fallout prediction, and target analysis techniques, remote command equipment, nuclear accident/incident control, characteristics of nuclear explosives employment, safety rules, security and storage of devices, and emergency procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (9/79).

AR-0802-0011

CBR Officer
(CBR Officer with ARADCOM Track)

Course Number: 2E-F5; 3-A-F1; 3-O-5.

Location: Ordnance School, Aberdeen Proving Ground, MD; Chemical School, Ft. McClellan, AL.

Length: 4 weeks (138-147 hours).

Exhibit Dates: 4/55-Present.

Objectives: To provide selected officers with a general knowledge of chemical, biological, and radiological weapons systems.

Instruction: Lectures and practical exercises in management and leadership, the technical aspects of chemical, biological, and radiological operations, nuclear warfare and radiological defense, and explosive ordnance.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (7/78).

AR-0802-0012

Ammunition Technician

Course Number: 4E-411A.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 8 weeks (253 hours).

Exhibit Dates: 7/75-Present.

Objectives: To provide warrant officers—and, until 5/76, commissioned officers—with a knowledge of the organization, management, and operation of ammunition supply activities.

Instruction: Instruction includes conventional ammunition material and destruction; storage and transportation of ammunition; and ammunition service and destruction.

Credit Recommendation: In the vocational certificate category, 3 semester hours in explosives handling (8/77).

Related Occupation Codes: 55B; 55C; 55D; 55X; 55Z; 411A; 411A.

AR-0802-0014

Ammunition Inspector Correspondence/Resident (Abbreviated Version)

Course Number: 645-55X40.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 4 weeks (157 hours).

Exhibit Dates: 4/79-Present.

Objectives: To provide Army and National Guard Reserve personnel with the skills and knowledge necessary to perform as ammunition inspectors.

Instruction: Phase II presents ammunition types, storage handling, transporting, maintenance and surveillance and destruction, previously studied by correspondence. Physical experiences are then conducted in these areas, on site. Phase IV presents guided missile operation; propellants; propellant storage, shipping, handling, and disposal of chemical and hazardous chemical agents. Physical experiences are then conducted in these areas, on site. NOTE: Students will have completed phases I and III through correspondence before reporting for phases II and IV. Credit recommendation is based only on phases II and IV.

Credit Recommendation: In the vocational certificate category, 3 semester hours in explosives handling (8/79).

Related Occupation Codes: 55B; 55D; 55G.

AR-0802-0015

Aviation Mishap Prevention
(Aviation Accident Prevention)

Course Number: 7K-F14.

Location: Safety Center, Ft. Rucker, AL.

Length: 2 weeks (66 hours).

Exhibit Dates: 4/77-Present.

Objectives: To train selected Army aviation personnel in the techniques of establishing and conducting accident prevention programs; to familiarize them with conducting aircraft accident investigations; and to provide a working knowledge of basic safety information concepts.

Instruction: Lectures and study assignments in establishing and conducting safety and accident prevention programs and in investigating aircraft accidents. A considerable amount of training is provided in general safety information and concepts.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in aviation safety and accident investigation (10/78).

AR-0802-0016

Chemical Operations Specialist

Course Number: 494-54E10.

Location: Ordance and Chemical School, Aberdeen Proving Ground, MD.

Length: 10 weeks (386 hours).

Exhibit Dates: 7/77-Present.

Objectives: To train enlisted personnel in nuclear chemical and biological reconnaissance and decontamination operations.

Instruction: Lectures and practical experiences in chemical and biological defense, nuclear warfare and radiological defense, decontamination, smoke and flame operations and NBC reconnaissance.

Credit Recommendation: Credit is not recommended due to the limited specialized nature of the course (1/78).

AR-0803-0001

Special Forces Underwater Operations

Course Number: 011-ASIW71W9; 2E-F38; 011-F8.

Location: Institute for Military Assistance, Ft. Bragg, NC.

Length: 3-6 weeks (130-189 hours).

Exhibit Dates: 8/72-Present.

Objectives: To provide personnel with training in underwater operations.

Instruction: Lectures and practical exercises in surface swims, underwater swims with open- and closed-circuit diving equipment, diving physics, diving hazards, underwater demolition training, submarine training, special techniques and advanced tactics, and maintenance and use of equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in swimming and physical education (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in swimming and physical education (5/74); in the upper-division baccalaureate category, 2 semester hours in physical education (5/74).

AR-0803-0002

Basic Airborne (Women)

Course Number: 011-F1B.

Location: Infantry School, Ft. Benning, GA.

Length: 4 weeks (120 hours).

Exhibit Dates: 2/75-Present.

Objectives: To train personnel in the techniques of parachuting and in the development of leadership and self-confidence through mental and physical training.

Instruction: Practical exercise training in basic parachuting techniques including landing falls, door exits, malfunctions, jump tower training, and jumps from aircraft.

Credit Recommendation: Credit is not recommended because of the military nature of the course (6/75).

AR-0804-0001

Special Services (SS-CMF) Noncommissioned Officer (NCO) Basic

Course Number: 5-SS-C40.

Location: Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 10 weeks (307 hours).

Exhibit Dates: 11/72-Present.

Objectives: To qualify enlisted personnel as special services noncommissioned officers.

Instruction: Lectures and instruction in special services operations. Course includes military writing, effective speaking, and special service activities such as recreation, arts and crafts, and management and administration of recreational and athletic facilities.

Credit Recommendation: In the vocational certificate category, 3 semester hours in recreational leadership, and credit in sports and recreation on the basis of institutional evaluation (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in recreational leadership (5/74).

Related Occupation Codes: 03B; 03C; 03D.

AR-0804-0002

Recreation Services Officer
(Special Services Officer)

Course Number: 7N-5000; 12-A-5000.

Location: Institute of Administration, Ft. Benjamin Harrison, IN; Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 3 weeks (108-115 hours).

Exhibit Dates: 3/63-2/75.

Objectives: To train commissioned officers in the administration and operation of recreation services activities.

Instruction: Lectures and practical exercises in the administration and operation of recreation services activities, including funds and budgets, recreation services programs, organization and administration, special subjects, and special activities.

Credit Recommendation: In the vocational certificate category, 2 semester hours in methods and techniques of recreational programs (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in methods and techniques of recreational programs (8/74); in the upper-division baccalaureate category, 2 semester hours in methods and techniques of recreational programs (12/68).

AR-1108-0001

Mathematical Programming

Course Number: None.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 3 weeks (117 hours).

Exhibit Dates: 9/64-12/68.

Objectives: To train enlisted personnel in mathematical programming.

Instruction: Lectures and practical exercises in matrix algebra review, linear programming, network flows, parametric programming, integer programming, nonlinear programming, and electronic computers.

Credit Recommendation: In the vocational certificate category, 2 semester hours in operations research (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in operations research (7/74); in the upper-division baccalaureate category, 2 semester hours in operations research (12/68).

AR-1112-0001

Lacrosse Officer

Course Number: 6-A-1187; 6-A-1190C.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 4-5 weeks (176-199 hours).

Exhibit Dates: 11/57-12/68.

Objectives: To train commissioned officers to command and operate Lacrosse missiles and associated equipment.

Instruction: Lectures and practical exercises in operation of Lacrosse missile systems and associated command duties. Topics include gunnery and target procedures, missile guidance, and launcher assemblies; and use of mathematical tables for target trajectories and solutions to gunnery problems.

Credit Recommendation: In the vocational certificate category, 1 semester hour in mathematical analysis (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in mathematical analysis (6/74).

AR-1115-0001

Design and Analysis of Experiments

Course Number: None.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 3 weeks (117 hours).

Exhibit Dates: 6/64-12/68.

Objectives: To train engineers, scientists, and research analysts in statistical concepts and techniques related to research experimentation.

Instruction: Lectures and practical exercises in introduction to statistics, introductory probability and random variables, mathematical models and sampling, statistical estimation, hypotheses tests, linear regression, and design of experiments.

Credit Recommendation: In the vocational certificate category, 3 semester hours in statistics (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in statistics (7/74); in the upper-division baccalaureate category, 3 semester hours in statistics (7/74).

AR-1115-0002

Probabilistic Methods in Operations Research

Course Number: None.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 3 weeks (117 hours).

Exhibit Dates: 7/64-12/68.

Objectives: To train engineers, scientists, and operations research analysts in the theory of probability and random variables, and the development of mathematical models.

Instruction: Lectures and practical exercises in probabilistic methods in operations research, calculus review, differential equations, partial fractions, finite differences, generating functions, matrix algebra, notion of probability distribution theory, finite Markow chains and statistical inference, production and decision processes, inventories, maintenance, replacement, and competitive strategy.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in statistical probability (7/74); in the upper-division baccalaureate category, 2 semester hours in statistical probability (7/74).

AR-1115-0003

Management Statistics by Correspondence

Course Number: 7E-F15.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: Maximum of 52 weeks.

Exhibit Dates: 6/75–Present.

Objectives: To provide a basic understanding of the methods used in the collection, presentation, analysis, interpretation, and evaluation of data for management purposes.

Instruction: Methods of instruction used include programmed learning, self-testing, practical exercises, and problem solving to cover statistics and management; data presentation; descriptive statistics; normal probability distribution; sampling for estimation and control; and correlation and regression analysis. All examinations administered by enrollee's local training officer.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in applied statistics (11/76).

AR-1115-0004

Statistical Quality Control II

Course Number: 8D-F23A.

Location: Army Management Training Agency, Rock Island, IL.

Length: 2 weeks (77 hours).

Exhibit Dates: 7/64–6/73.

Objectives: To provide skills necessary to employ significance tests, sequential analysis, and life testing procedures in quality control and reliability activities.

Instruction: Provides a review of statistical quality control fundamentals; tests of significance; sequential analysis; life testing and regression analysis; and designated experiments through lecture-conferences and practical exercises.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in statistics applications—quality control (11/76).

AR-1115-0005

Reliability Engineering

Course Number: 5A-F2.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 3 weeks (117 hours).

Exhibit Dates: 7/75–Present.

Objectives: To provide knowledge of the fundamentals of reliability, availability, and maintainability (RAM) engineering and the basic policies of DoD with respect to RAM programs and management, and to teach students to apply basic RAM engineering techniques.

Instruction: Lecture-conferences and practical exercises to include the history of DoD RAM efforts, policies, and programs, probability and statistics, systems and subsystems reliability, introduction to RAM design, parameter estimation, predictions and apportionments. Description and experiences in concept-of-failure modes and effects analysis, field failure data feedback and reliability growth. RAM requirements generation and survey of testing, demonstration and verification requirements.

Credit Recommendation: In the graduate degree category, 3 semester hours in industrial and systems engineering (11/76).

AR-1115-0006

Statistical Analysis and Designed Experiments

Course Number: 8D-F33.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 3 weeks (117 hours).

Exhibit Dates: 7/73–Present.

Objectives: To provide students with a working knowledge of the concepts and techniques of experimental design and analysis.

Instruction: Use of statistical methods in data collection analysis and interpretation for a wide variety of functional areas covering research engineering management science, operations research, and testing of materials and/or products.

Credit Recommendation: In the graduate degree category, 3 semester hours in statistical design of experiments (11/76).

AR-1115-0007

Statistical Inference

Course Number: 8D-F32.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 3 weeks (117 hours).

Exhibit Dates: 7/73–Present.

Objectives: To provide students with a knowledge of the techniques of statistical inference and the facility for application of these techniques to problems in science and engineering.

Instruction: Lecture-conferences and practical exercises to cover probability, descriptive statistics, elements of distribution theory, inference under risk, Bernoulli experiments, Poisson processes and exponential distributions, distribution-free methods of statistical analysis, sequential tests of hypothesis, and Bayesian confidence intervals.

Credit Recommendation: In the graduate degree category, 3 semester hours in statistical inference (11/76).

AR-1115-0008

Statistical Quality Control

Course Number: 8D-F23.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (77 hours).

Exhibit Dates: 5/63–Present.

Objectives: To provide students with a working knowledge of basic statistical techniques and the application, interpretation, and evaluation of process controls and acceptance sampling plans.

Instruction: Lecture-conferences and practical exercises to include probability models and sampling distribution, probability and descriptive statistics; statistical process controls using variables data and attributes data; sampling procedures for inspection by variables and by attributes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in statistics applications—quality control (11/76).

AR-1115-0009

Maintainability Engineering
(Maintainability Engineering Intern Training Program)

Course Number: None.

Location: DARCOM Intern Training Center, Red River Depot, Texarkana, TX.

Length: 52 weeks (2080 hours).

Exhibit Dates: 7/75–Present.

Objectives: To provide the graduate with comprehensive engineering background in maintainability design to help influence the design of future weapons systems in such a way as to reduce their maintenance costs.

Instruction: Lectures, conferences, practical exercises, computer simulation, cases, on-the-job training and research to cover the following general areas: reliability and maintainability engineering, quantitative and statistical methods, management and computer science, operations research, design of engineering experiments, logistics support analysis, techniques of cost estimation, failure modes analysis, and management information systems.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in maintainability analysis, 1 in logistics support analysis, 3 in systems engineering, 2 in problems in maintainability engineering, 2 in failure mode analysis, 2 in human operation in complex systems, 2 in advanced engineering mathematics techniques, 6 in mathematical statistics, 3 in statistical quality control, 3 in design of engineering experiments, 2 in techniques in cost estimating, 2 in management information systems, 2 in general management, 2 in engineering applications of computer technology, 2 in computer simulation for system design, 3 in operations analysis (12/76); in the graduate degree category, 4 semester hours in reliability and maintainability engineering, 1 in computer science, 7 in quantitative and statistical methods (12/76).

AR-1205-0001

Advanced Bandsman
(Bandmaster Preparatory)

Course Number: 12-N-5241; 12-OE-25.

Location: School of Music, Washington, DC.

Length: 20 weeks (800 hours).

Exhibit Dates: 8/56–12/68.

Objectives: To train accomplished musicians in advanced techniques of band conducting, leadership, organization, administration, and instrumentation.

Instruction: Lecture series includes: exercise of authority and responsibility in chain of command; development of leadership techniques; management of music supplies and equipment; developing skills in basic tone production; reading skills; sight singing and music dictation; scale intervals; triads; four-part harmony; modulation; principles of form, phrases, and acoustics; musical instrument classification and transposition; examination, analysis, and playing of arrangements; scoring for ensembles and bands; reading and studying of scores for rehearsals; historical development of conducting; supervised preparation and rehearsal of band numbers; marching formations and parade duties; baton signals for drum majors; verbal command of marching band units, dance band techniques and styles; major types of band literature; historical development of military bands; observation and field trips, including attendance at concerts and ceremonies of various service bands; and individual practice under faculty supervision.

Credit Recommendation: In the vocational certificate category, 3 semester hours in applied music, 1 in band, 7 in music theory, 6 in music education, 2 in music literature (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in applied music, 1 in band, 7 in music theory, 6 in music education, 2 in music literature (2/74); in the upper-division baccalaureate category, 3 semester hours in applied music, 1 in band, 7 in music theory, 6 in music education, 2 in music literature (2/74).

Related Occupation Codes: 031A.

AR-1303-0001

1. Chemical Laboratory Procedures
2. Chemical Laboratory Procedures
3. Chemical Laboratory Procedures (Chemical Laboratory)

Course Number: *Version 1:* 491-92D20. *Version 2:* 491-92D20. *Version 3:* 3-R-904;1 3-E-5.

Location: *Version 1:* Ordnance School, Aberdeen Proving Ground, MD. *Version 2:* Chemical School, Ft. McClellan, AL. *Version 3:* Chemical School, Ft. McClellan, AL.

Length: *Version 1:* 13 weeks (438–440 hours). *Version 2:* 10 weeks (392–399 hours). *Version 3:* 8 weeks (280–306 hours).

Exhibit Dates: *Version 1:* 6/74–Present. *Version 2:* 11/66–5/74. *Version 3:* 4/54–10/66.

Objectives: To train personnel in chemical laboratory procedures.

Instruction: Lectures and practical exercises in chemical laboratory procedures, including standard laboratory procedures using chemicals and special equipment to analyze, identify, or synthesize a variety of organic and inorganic compounds, basic radiological physics, radiac instruments, radiological techniques, microbiological laboratory techniques, biological, chemical, atomic, and radiological warfare.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in chemistry, 1 in microbiology, and 3 in nuclear physics (1/78). *Version 2:* In the vocational certificate category, 3 semester hours in introduction to nuclear instrumentation, and 5 in general chemistry (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to nuclear instrumentation, and 5 in general chemistry (5/74); in the upper-division baccalaureate category, 5 semester hours in general chemistry (12/68). *Version 3:* In the vocational certificate category, 5 semester hours in general chemistry (5/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in general chemistry (5/74); in the upper-division baccalaureate category, 5 semester hours in general chemistry (12/68).

Related Occupation Codes: 92D.

AR-1303-0002

NUCLEAR WEAPONS EFFECTS OFFICER

Course Number: 3-A-7330.

Location: Chemical Corps School, Ft. McClellan, AL.

Length: 12 weeks (431–439 hours).

Exhibit Dates: 1/59–12/68.

Objectives: To train Army officers possessing degrees in Math, Engineering, or the Physical Sciences to function as nuclear warfare effects specialists.

Instruction: Course covers meteorology, radiation effects and monitoring methods, and a thorough study of modern physics, including types of electronic instrumentation.

Credit Recommendation: In the vocational certificate category, 7 semester hours in physics, 2 in mathematics, and 1 in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in physics, 1 in mathematics, and 1 in electronics laboratory (6/74); in the upper-division baccalaureate category, 6 semester hours in general physics and 2 in general mathematics (12/68).

Objectives: To train officers in the duties and responsibilities of Finance Corps officers.

Instruction: *All Versions:* Lectures and practical exercises in the responsibilities of Finance Corps officers, including accounting subjects, comptroller subjects, staff finance subjects, and military science and tactics, government purchasing and contracting, programming and budgeting, accounting foundations, and progress and statistical reporting and analysis. *Version 1:* Topics include command and staff actions/finance operations, and utilization of automatic data processing equipment in accounting systems. *Version 2:* Topics include management engineering and economic aspects of geopolitics. *Version 3:* Topics include analysis and managerial use of accounting data, and utilization of EAM in accounting systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in principles of accounting (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in principles of accounting (7/74); in the upper-division baccalaureate category, 2 semester hours in business administration, 3 in government accounting, 3 in finance and disbursing, 1 in computer principles (12/68). *Version 2:* In the vocational certificate category, 6 semester hours in principles of accounting (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in principles of accounting (7/74); in the upper-division baccalaureate category, 3 semester hours in business administration, 4 in government accounting, 3 in finance and disbursing, 1 in computer principles (12/68). *Version 3:* In the vocational certificate category, 6 semester hours in principles of accounting (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in principles of accounting (7/74); in the upper-division baccalaureate category, 3 semester hours in computer principles, 2 in general business administration, 3 in government accounting, 3 in finance and disbursing (12/68).

AR-1401-0019

Pay Specialist

Course Number: 12-R-716.2.

Location: Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 3-4 weeks (105-154 hours).

Exhibit Dates: 8/62-12/68.

Objectives: To train enlisted personnel to maintain and review military pay data records and to prepare and submit unit payrolls and vouchers for various pay collections and entitlements.

Instruction: Lectures and practical exercises in the military pay voucher system. Topics include pay administration, pay records, personnel records, and pay operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

AR-1401-0021

Cost Accounting Standards Workshop

Course Number: ALM-36-0217.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 2 weeks (74 hours).

Exhibit Dates: 5/77-Present.

Objectives: To instruct personnel in the utilization of cost accounting standards used in connection with defense contracts.

Instruction: Lectures/conferences and practical exercises on the latest regulations of the Cost Accounting Standards Board.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in cost accounting standards (3/78).

AR-1402-0001

1. Systems Analysis
   (Advanced ADP Systems Analysis)
2. Assistant Systems Analyst

Course Number: *All Versions:* 531-74G20. *Version 1:* 7F-F23.

Location: *All Versions:* Adjutant General's School, Ft. Benjamin Harrison, IN. *Version 1:* Institute of Administration, Ft. Benjamin Harrison, IN.

Length: *Version 1:* 4 weeks (145-150 hours). *Version 2:* 5 weeks (206 hours).

Exhibit Dates: *Version 1:* 9/71-10/75. *Version 2:* 10/66-8/71.

Objectives: To train commissioned officers, warrant officers, enlisted and civilian personnel in the techniques of system analysis, including establishment of automated systems and extension of existing systems.

Instruction: Lectures and practical exercises in data processing; systems analysis; ADP management; and statistical methods.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in business systems analysis (3/75). *Version 2:* In the vocational certificate category, 2 semester hours in systems analysis and 2 in data processing principles (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in systems analysis and 2 in data processing principles (4/74); in the upper-division baccalaureate category, 2 semester hours in systems analysis (12/68).

Related Occupation Codes: 74F; 74G; 74Z.

AR-1402-0002

Computer Systems Operator

Course Number: 531-74E20.

Location: *Version 1:* Institute of Administration, Ft. Benjamin Harrison, IN. *Version 2:* Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: *Version 1:* 5 weeks (153 hours). *Version 2 :* 5 weeks (173-181 hours).

Exhibit Dates: *Version 1:* 12/74-Present. *Version 2:* 9/70-11/74.

Objectives: To teach enlisted and civilian personnel the procedures for operating automatic data processing systems.

Instruction: *All Versions:* Following a brief introduction to data processing, instruction includes lectures and practical exercises on preparation of input/output devices; operating systems for producing, assembling, compiling, and testing in a non-multiprogramming environment; operation of computer system in multiprogramming environment; operation of computer system in teleprocessing environment. *Version 1:* Instruction does not include the operation of computer system in teleprocessing environment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in computer operations (3/75). *Version 2:* In the vocational certificate category, 4 semester hours in computer operations (2/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in computer operations (2/74); in the upper-division baccalaureate category, 2 semester hours in computer operations (2/74).

Related Occupation Codes: 74D.

AR-1402-0003

Automatic Data Processing Systems Analysis Officer

(Automatic Data Processing Systems Analysis)

Course Number: 7E-F1; 12-G-F4; 12-I-F4.

Location: Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 3–4 weeks (116–161 hours).

Exhibit Dates: 4/57–12/68.

Objectives: To train personnel in the principles and procedures of analyzing and designing automatic data processing systems.

Instruction: Introductory lectures on automatic data processing systems; COBOL programming; principles of punched-card data processing; systems and design, including program evolution and review techniques; problem definition; narrative flow techniques; record and file design; and conversion problems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in business systems analysis (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in business systems analysis (2/74); in the upper-division baccalaureate category, 2 semester hours in computer programming and data processing analysis (12/68).

AR-1402-0004

Finance (FI-CMF) Noncommissioned Officer (NCO) Basic

Course Number: 5-FI-C40.

Location: Finance School, Ft. Benjamin Harrison, IN.

Length: 12 weeks (367–395 hours).

Exhibit Dates: 2/73–Present.

Objectives: To train enlisted personnel to perform the duties of noncommissioned officers in the financial management field.

Instruction: Lectures in accounting, comptrollership, staff finance, disbursing, and management principles.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in principles of accounting, 1 in principles of management (3/75).

Related Occupation Codes: 73C; 73D.

AR-1402-0005

Information Systems Officer (ISO)

(Basic Automatic Data Processing Systems Analysis)

Course Number: 7E-F22; 531-F5.

Location: Institute of Administration, Ft. Benjamin Harrison, IN; Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 4 weeks (148–152 hours).

Exhibit Dates: 8/72–Present.

Objectives: To acquaint non-data processing personnel with general data processing principles.

Instruction: Lectures and practical exercises in punched card data-processing concepts, programming techniques, and systems analysis.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in data processing principles (3/75).

Related Occupation Codes: 290A; 341A; 721A.

AR-1402-0006

Telecommunication Automation Software Technician

Course Number: 4C-741E.

Location: Signal School, Ft. Monmouth, NJ.

Length: 10 weeks (305 hours).

Exhibit Dates: 3/72–Present.

Objectives: To train warrant officers to supervise data processing and telecommunications automation activities.

Instruction: Lectures and practical exercises in planning, operation, and programming of electronic data processing equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

Related Occupation Codes: 741E.

AR-1402-0007

AN/TSQ-51 System Maintenance

Course Number: *All Versions:* 4B-361A. *Version 1:* 4F-361A; 150-25K20. *Version 2:* 150-25K20. *Version 3:* 150-F2.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 42–47 weeks (1561–1633 hours). *Version 2:* 34–35 weeks (1314–1344 hours). *Version 3:* 33 weeks (1290 hours).

Exhibit Dates: *Version 1:* 1/75–Present. *Version 2:* 12/69–12/74. *Version 3:* 5/67–11/69.

Objectives: To train enlisted personnel and warrant officers with prior experience in electronic engineering or computer maintenance to operate and maintain fire control computer-linked radar systems.

Instruction: *All Versions:* Lectures and practical exercises in theory and operation of computer-linked fire control radar systems, with emphasis on developing diagnostic testing techniques to isolate faults and repair and maintain equipment; and a general review of computer fundamentals, including numbering systems, programming concepts, flow diagrams, logic functions and circuits, registers, counters, storage devices, and input and output devices. *Version 1:* Topics include AC/DC circuit fundamentals, basic electronics (vacuum tube and solid state), digital fundamentals, machine language programming, and systems operation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronics and 6 in digital logic and computer science (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics and 4 in digital logic and computer science (2/75); in the upper-division baccalaureate category, 3 semester hours as an elective in computer science (2/75). *Version 2:* In the vocational certificate category, 5 semester hours in digital logic or computer science (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in digital logic or computer science (4/74). *Version 3:* In the vocational certificate category, 5 semester hours in digital logic or computer science (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in digital logic or computer science (4/74); in the upper-division baccalaureate category, 2 semester hours in digital logic or computer science, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 09B; 25H; 25B; 25C; 25D; 25E; 25G; 25J; 25K; 25Z; 361A.

AR-1402-0008

PERSINSD ADP Intern Program

Course Number: None.

Location: PERSINSD, Alexandria, VA.

Length: 26 weeks.

Exhibit Dates: 1/75–Present.

Objectives: To attract, develop, and retain qualified civilian and military personnel designated as management interns to serve as programmers and systems analysts in the Personnel Systems Command, Department of the Army.

Instruction: Through lectures, laboratory periods, video-assisted instruction, practical projects, and directed study, the following areas are covered: introduction to UNIVAC 1108 hardware; principles of data processing; systems analysis and design; COBOL programming; data communication concepts and design; operations research techniques; personnel applications project; and the UNIVAC 1100 executive operating system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in COBOL programming, 3 in data processing principles, and 2 in operating systems (5/76); in the upper-division baccalaureate category, 3 semester hours in business systems analysis (5/76).

AR-1402-0009

Auditing of Automatic Data Processing Systems

Course Number: 7E-F5; 14-I-F21.

Location: Finance School, Ft. Benjamin Harrison, IN.

Length: 2–3 weeks (73–92 hours).

Exhibit Dates: 7/64–Present.

Objectives: To train commissioned officers and civilians to audit data processing systems.

Instruction: Lectures and practical exercises in automatic data processing characteristics, computer programming, controls, system flow charting, data processing systems auditing, statistical sampling, and a case study project.

Credit Recommendation: In the vocational certificate category, 2 semester hours in data processing principles (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in processing principles (4/74); in the upper-division baccalaureate category, 2 semester hours in data processing principles (4/74).

AR-1402-0010

Automatic Data Processing Systems Programming

Course Number: 12-Q-2404; 12-Q-745.1.

Location: Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/58–12/60.

Objectives: To train warrant officers, enlisted, and civilian personnel to program automatic data processing (ADP) equipment.

Instruction: Lectures and practical exercises in ADP systems basic assembler-programming techniques, including loop and address modification, scaling, and index registers usage; advanced programming techniques; and practical programming exercises.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer programming (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer programming (4/74); in the upper-division baccalaureate category, 2 semester hours in computer programming (12/68).

Related Occupation Codes: 290A; 341A; 721A.

AR-1402-0011

1. AUTODIN Switching Center Specialist
2. ADMS Traffic Service Supervisory

Course Number: *Version 1:* 580-72G30. *Version 2:* 622-F10.

Location: Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 5 weeks (160 hours). *Version 2:* 6 weeks (198 hours).

Exhibit Dates: *Version 1:* 7/70–Present. *Version 2:* 11/68–6/70.

Objectives: To train data communications switching center specialists to operate an automatic digital message switch in an overseas AUTODIN switching center.

Instruction: Lectures and practical exercises in AUTODIN switching center equipment configuration; technical control facilities operations; off-line operations, including equipment configuration, data word formats, journal and reference trace, printouts, journal balance, tape generation, recovery operations, updating security, and on-site operations.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in computer operations (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in computer operations (4/74). *Version 2:* In the vocational certificate category, 3 semester hours in computer operations (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer operations (4/74).

Related Occupation Codes: 72G.

AR-1402-0012

Advanced Machine Accounting

Course Number: 12-E-13.

Location: Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 4 weeks (140 hours).

Exhibit Dates: 12/55–12/68.

Objectives: To train experienced punch card machine operators to supervise electrical accounting equipment operation and wiring.

Instruction: Lectures and practical exercises in machine records activities, procedure development and analysis, electrical accounting machine operation, recent development in electrical accounting machines, office management, and training techniques.

Credit Recommendation: In the vocational certificate category, 2 semester hours in unit record data processing (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in unit record data processing (4/74).

AR-1402-0013

Stock Control and Accounting Specialist, Skill Development Base

Course Number: 551-76P20-L.

Location: Quartermaster School, Ft. Lee, VA.

Length: 14 weeks (480 hours).

Exhibit Dates: 2/69–Present.

Objectives: To train stock control and accounting specialists to supervise inventory control and accounting systems.

Instruction: Lectures and practical exercises in DSU and ASDA accounting procedures, automatic data processing systems, miscellaneous accounting and administrative procedures, map reading, inspection procedures, leadership training, physical conditioning, and use of data processing techniques in inventory control.

Credit Recommendation: In the vocational certificate category, 2 semester hours in data processing principles (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in data processing principles (4/74); in the upper-division baccalaureate category, 2 semester hours in data processing principles (4/74).

Related Occupation Codes: 76P.

AR-1402-0014

Data Processing (DP-CMF) NCO Basic

Course Number: 5-DP-C40.

Location: Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 10 weeks (319 hours).

Exhibit Dates: 11/72–10/75.

Objectives: To train enlisted personnel in basic data processing.

Instruction: Lectures and practical exercises in computer system operations, including advanced computer programming; basic ALC, RPG, and COBOL languages; data processing; advanced card punch machine operating techniques and punch card accounting machine operation; and personnel and leadership management and administration.

Credit Recommendation: In the vocational certificate category, 3 semester hours in unit record data processing, and 3 in computer programming (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in unit record data processing, and 3 in computer programming (4/74); in the upper-division baccalaureate category, 3 semester hours in computer programming (4/74).

Related Occupation Codes: 71U; 74D; 74E; 74F.

AR-1402-0015

Computer Programming

Course Number: 7E-F10.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 3 weeks (118 hours).

Exhibit Dates: 9/61–Present.

Objectives: To train military and civilian personnel, who have completed an introductory automatic data processing course, in digital programming languages.

Instruction: Lectures and practical exercises in automatic data processing and numbering systems introduction, program documentation, assembler language, FORTRAN and COBOL languages, writing and debugging programs in various languages, and PL/1 and Algol languages.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer concepts (11/76).

AR-1402-0016

Machine Accounting

Course Number: 12-R-753.1; 12-E-3.

Location: Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 7–8 weeks (256–290 hours).

Exhibit Dates: 12/55–12/68.

Objectives: To train enlisted personnel to wire and operate electrical accounting machines and to perform related entry-level duties in machine-accounting activities.

Instruction: Lectures and practical exercises in the wiring and operation of electrical accounting machines and in related machine-accounting activities, including principles of punched-card accounting; operation of card punch, sorter, interpreter, reproducing punch, collator, accounting machine, calculating punch, and accounting machine equipment; and automatic data processing systems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in unit record data processing (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in unit record data processing (4/74).

AR-1402-0017

1. Programmer/Analyst
2. Computer Programmer
3. Computer Programmer (ADPS Programming Specialist)
4. ADPS Fieldata Programming Course

Course Number: *Version 1:* 532-74F10; 532-74F20. *Version 2:* 532-74F20. *Version 3:* 532-74F20. *Version 4:* 11-R-745.1.

Location: *Version 1:* Institute of Administration, Ft. Benjamin Harrison, IN. *Version 2:* Adjutant General's School, Ft. Benjamin Harrison, IN. *Version 3:* Adjutant General's School, Ft. Benjamin Harrison, IN; Security Agency School, Ft. Devens, MA. *Version 4:* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 9–10 weeks (320–342 hours). *Version 2:* 8 weeks (304 hours). *Version 3:* 8–10 weeks (292–357 hours). *Version 4:* 10–11 weeks (356–396 hours).

Exhibit Dates: *Version 1:* 12/74–Present. *Version 2:* 5/73–11/74. *Version 3:* 1/66–4/73. *Version 4:* 10/59–12/65.

Objectives: To train enlisted personnel in computer programming techniques.

Instruction: *All Versions:* Lectures, demonstrations, and practical exercises in compiler-level language programming techniques, including COBOL, FORTRAN, and RPG; assembler language (SAAL) for UNIVAC 1005 system; debugging procedures; program documentation; and automatic data processing fundamentals. *Version 1:* Includes lectures and practical exercises in COBOL and BAL for the IBM 360/370 until 1979. Course then utilizes structured COBOL for an IBM 4331 and IBM 360/40.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 6 semester hours in computer programming (3/75). *Version 2:* In the vocational certificate category, 5 semester hours in computer programming (4/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in computer programming (4/74); in the upper-division baccalaureate category, 5 semester hours in computer programming (4/74). *Version 3:* In the vocational certificate category, 5 semester hours in computer programming (4/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in computer programming (4/74); in the upper-division baccalaureate category, 3 semester hours in computing science (12/68). *Version 4:* In the vocational certificate category, 5 semester hours in computer programming (4/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in computer programming (4/74); in the upper-division baccalaureate category, 5 semester hours in computing science (12/68).

Related Occupation Codes: 74F; 74G; 74Z.

AR-1402-0018

1005 Card Processor Programmer

Course Number: 532-F1.

Location: Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 3 weeks (104 hours).

Exhibit Dates: 4/67-12/68.

Objectives: To train enlisted personnel to program and operate a Univac 1005 in assembler language.

Instruction: Lectures and practical exercises in Univac 1005 assembler language, including instruction set; looping techniques; hardware characteristics; program organization; input/output and transfer instructions; edit, multiply, divide, shift, jump return, jump exit, auxiliary read, read paper tape and punch paper tape instructions; stored program concept; and block-diagram analysis.

Credit Recommendation: In the vocational certificate category, 2 semester hours in computer programming (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in computer programming (4/74); in the upper-division baccalaureate category, credit in computer programming on the basis of institutional examination (12/68).

AR-1402-0019

Automated Communications Systems Staff Officer

Course Number: 4C-F14.

Location: Signal School, Ft. Monmouth, NJ.

Length: 3 weeks (104 hours).

Exhibit Dates: 8/69-Present.

Objectives: To train military and civilian personnel in automated communications systems management.

Instruction: Lectures in computer components, number systems, input and output devices, real-time and time sharing, computer programming, data transmission and communications control, and AUTODIN and automated command systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in data processing principles (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in data processing principles (4/74); in the upper-division baccalaureate category, 2 semester hours in data processing principles (4/74).

AR-1402-0020

ADMSC Operation Supervisory (Automatic Digital Message Switching Center Operation Supervisory)

Course Number: 4C-F10; 580-72G40; 4C-F10; 622-F3.

Location: Signal School, Ft. Monmouth, NJ.

Length: 7-8 weeks (242-288 hours).

Exhibit Dates: 4/68-Present.

Objectives: To train enlisted data communications specialists and communication center officers to supervise the operation of an overseas AUTODIN automatic digital message switching center.

Instruction: Lectures and practical exercises in supervision of the operation of an overseas AUTODIN automatic digital message switching center, including computer numbering systems, block diagrams, and programming; and AUTODIN tributaries, equipment configuration and subsystems, programming, operations, and off-line operating procedures.

Credit Recommendation: No credit because of the limited technical nature of the course (2/74).

Related Occupation Codes: 72B.

AR-1402-0021

ADMS Programmer

Course Number: *All Versions:* 622-F9. *Version 1:* 4C-F15.

Location: Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 10 weeks (342-362 hours). *Version 2:* 7 weeks (248 hours).

Exhibit Dates: *Version 1:* 4/70-Present. *Version 2:* 4/68-3/70.

Objectives: To train enlisted automatic data processing programming specialists and automatic data processing plans and operations officers to write, document, and implement changes in assembly languages associated with AUTODIN automatic digital message switching centers.

Instruction: Lectures and practical exercises in writing, documentation, and change implementation in assembly languages associated with AUTODIN automatic digital message switching centers, including information flow, arithmetic and logic; shifting and branching instructions; processor configuration, programming, and console operations; and operational programming.

Credit Recommendation: *Version 1:* In the vocational certificate category, 7 semester hours in computer programming (4/74); in the lower-division baccalaureate/associate degree category, 7 semester hours in computer programming (4/74); in the upper-division baccalaureate category, 7 semester hours in computer programming (4/74). *Version 2:* In the vocational certificate category, 5 semester hours in computer programming (4/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in computer programming (4/74); in the upper-division baccalaureate category, 5 semester hours in computer programming (4/74).

Related Occupation Codes: 74F.

AR-1402-0022

Data Processing (DP-CMF) NCO Advanced

Course Number: 5-741-C42; 5-DP-C42.

Location: Institute of Administration, Ft. Benjamin Harrison, IN; Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 10-12 weeks (373-444 hours).

Exhibit Dates: 12/72-Present.

Objectives: To provide enlisted personnel with training in data processing principles and data processing analysis.

Instruction: Lectures and practical exercises in automatic data processing principles, computer programming techniques, systems analysis and design, operations research techniques, data processing management techniques, creative writing, and effective speaking.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in data processing principles, 2 in business systems analysis, 1 in communication skills, and 1 in management principles (3/75).

Related Occupation Codes: 74C; 74D; 74E; 74F; 74G.

AR-1402-0023

Improved Hawk Fire Control Repair Transition

Course Number: *All Versions:* 104-24H20-T. *Version 1:* 104-24H40-T.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 29 weeks (1152 hours). *Version 2:* 19 weeks (666-672 hours).

Exhibit Dates: *Version 1:* 1/77-Present. *Version 2:* 1/72-12/76.

Objectives: To train enlisted personnel to maintain the electronic systems of the improved Hawk battery control central, the information and coordination central, and the improved radar signal simulator.

Instruction: Lectures and practical exercises in Hawk battery control central special circuits and test equipment; computer mathematics introduction; computer codes, logic circuits, memory units, input/output units, and control units; data processing; power unit distribution systems; radar signal simulator and associated test equipment operation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 12 semester hours in computer fundamentals, 6 in electronics laboratory (8/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer fundamentals, 1 in electronics laboratory (8/77). *Version 2:* In the vocational certificate category, 3 semester hours in data processing principles (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in data processing principles (4/74); in the upper-division baccalaureate category, 3 semester hours in data processing principles (4/74).

Related Occupation Codes: 23Q; 24H.

AR-1402-0024

Personnel Data Analyst Specialist

Course Number: 531-74C20.

Location: *Version 1:* Institute of Administration, Ft. Benjamin Harrison, IN. *Version 2:* Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: *Version 1:* 7 weeks (220 hours). *Version 2:* 6 weeks (202 hours).

Exhibit Dates: *Version 1:* 6/74-Present. *Version 2:* 4/72-5/74.

Objectives: To train enlisted personnel to analyze and code personnel data and source documents for automated processing.

Instruction: *All Versions:* Lectures and practical exercises in the duties of personnel data analysts and specialists. *Version 2:* Course work includes principles of punched card accounting and personnel accounting systems principles and procedures.

Credit Recommendation: *Version 1:* No credit because of the military nature of the course (3/75). *Version 2:* In the vocational certificate category, 1 semester hour in punch card processing (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in punch card processing (2/74).

Related Occupation Codes: 71H; 74C.

AR-1402-0025

Supply and Service Officer

Course Number: 8A-4200; 8B-4200.

Location: Quartermaster School, Ft. Lee, VA

Length: 9–10 weeks (320–346 hours).

Exhibit Dates: 1/68–Present.

Objectives: To train commissioned officers to manage supply activities.

Instruction: Lectures and practical exercises in supply operations in a theater of operations, including supply organization, supply accounting procedures, automatic data processing, procurement and property disposal, financial management, storage operations, maintenance services, military management, and mechanized stock accounting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in automatic data processing, 2 in purchasing or procurement (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in automatic data processing, 2 in purchasing or procurement (6/74); in the upper-division baccalaureate category, 1 semester hour in automatic data processing, 1 in purchasing or procurement (6/74).

AR-1402-0026

Field Artillery Ballistic Missile Officer

Course Number: 2E-1190.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 9 weeks (319–328 hours).

Exhibit Dates: 3/68–Present.

Objectives: To train commissioned officers to supervise tactical deployment, system maintenance, and operation of Pershing and Sergeant missile systems.

Instruction: Lectures and practical exercises in Pershing and Sergeant missile systems operations supervision. Course includes communications and electronics (equipment, procedures, and systems); digital computers; guided missiles, including warheads, launchers, and organizational and preventive maintenance; and tactical subjects.

Credit Recommendation: In the vocational certificate category, 1 semester hour in digital computer familiarization (6/74).

AR-1402-0027

Improved Hawk Maintenance Technician/Chief Transition

Course Number: 4F-251D-T; 121-24V50-T.

Location: Missile and Munitions School, Redstone Arsenal, . L.

Length: *Version 1:* 20 weeks (670 hours). *Version 2:* 19 weeks (664–670 hours).

Exhibit Dates: *Version 1:* 8/75–11/78. *Version 2:* 1/72–7/75.

Objectives: To train warrant officers and enlisted personnel to supervise the maintenance and logistics activities for the Improved Hawk system and associated test equipment.

Instruction: *All Versions:* Lectures and practical exercises in the supervision of maintenance activities on the Improved Hawk missile system. Course includes all aspects of the missile system and digital computer fundamentals. *Version 1:* Includes significant coverage of computer architecture and programming.

Credit Recommendation: *Version 1:* In the vocational certificate category, 9 semester hours in computer fundamentals, 3 in electronics laboratory (8/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer fundamentals (8/77). *Version 2:* In the vocational certificate category, 3 semester hours in digital computer fundamentals (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital computer fundamentals (6/74).

Related Occupation Codes: 251D; 24V; 251C; 23V.

AR-1402-0028

Associate Adjutant General Officer Career

Course Number: 7-12-C23; 12-A-C23.

Location: Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 16 weeks (589–620 hours).

Exhibit Dates: 6/62–12/68.

Objectives: To train commissioned officers, who have completed the AG officer basic course or its equivalent, in the duties and responsibilities of Adjutant General Corps officers.

Instruction: Lectures and practical exercises in the duties and responsibilities of Adjutant General Corps officers, including fundamental military subjects, general education subjects, administrative services, personnel actions, personnel management, postal services, special services, data processing, fundamentals of division operations, combat and combat service support, and command and staff operations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in data processing (7/74); in the upper-division baccalaureate category, 3 semester hours in personnel management (12/68).

AR-1402-0029

Special Purpose Equipment Repair Parts Specialist, Skill Development Base

Course Number: 551-76Q20-I.

Location: Quartermaster School, Ft. Lee, VA.

Length: 12 weeks (427 hours).

Exhibit Dates: 12/68–Present.

Objectives: To train enlisted special purpose equipment repair parts specialists to perform as seasoned supervisors and technicians.

Instruction: Lectures and practical exercises in the duties of special purpose equipment repair parts specialist supervisors, including exercise of command, inspections, map reading, internal defense/development, field training, administration, instructor training, DSU accounting procedures, ASDA accounting procedures, automatic data processing systems, storage operations, and special purpose equipment repair parts supply.

Credit Recommendation: In the vocational certificate category, 1 semester hour in data processing (7/74).

Related Occupation Codes: 76Q.

AR-1402-0030

Computer Machine Operator

(Automatic Data Processing (ADP) Machine Operation Specialist)

(Data Processing Equipment Operator)

Course Number: *Version 1:* 531-74D10. *Version 2:* 531-74D20. *Version 3:* 531-74D20; 531-74A10; 12-R-740;0 531-740.0.

Location: *Version 1:* Institute of Administration, Ft. Benjamin Harrison, IN. *Version 2:* Institute of Administration, Ft. Benjamin Harrison, IN. *Version 3:* Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: *Version 1:* 5 weeks (184 hours). *Version 2:* 5 weeks (168 hours). *Version 3:* 5–8 weeks (152–302 hours).

Exhibit Dates: *Version 1:* 8/79–Present. *Version 2:* 12/74–7/79. *Version 3:* 3/59–11/74.

Objectives: To train enlisted personnel to operate automatic data processing systems.

Instruction: *Version 1:* Instruction includes communication with the IBM 360 computer system while operating with a disc operating system and a Disc operating system enhanced. *All Versions:* Lectures and practical exercises in the operation of automatic data processing systems. Course includes principles of punched card accounting; introduction to automatic data processing systems; preparation of i/o devices; operating systems for production, compiling, and testing in a non-multiprogramming environment; and operation of a computer system in a multiprogramming environment; Includes communication with the IBM 360 computer system while operating with a Disc Operating System and a Disc Operating System Enhanced. *Version 2:* Includes instruction in unit-record equipment, including the 129 data recorder, the 083 sorter, the 557 interpreter, the 188 collator, and the Univac 1005 card processor.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in unit record data processing (2/80). *Version 2:* In the vocational certificate category, 3 semester hours in unit record data processing (3/75). *Version 3:* In the vocational certificate category, 2 semester hours in unit record and computer operation (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in unit record and computer operation (7/74); in the upper-division baccalaureate category, 2 semester hours in unit record and computer operation (12/68).

Related Occupation Codes: 74E.

AR-1402-0031

Automatic Data Processing Systems for Staff Officers

Course Number: FE-F2; 11-G-F3; 11-G-F1; 11-O-33.

Location: Signal School, Ft. Monmouth, NJ.

Length: 3-5 weeks (110-159 hours).

Exhibit Dates: 3/57–12/68.

Objectives: To train commissioned officers and civilians in the fundamentals, applications, and systems engineering techniques of military automatic data processing systems.

Instruction: Lectures and practical exercises in military automatic data processing systems, including computer programming, ADP systems analysis, command control systems, instruction and coding, Common Business Oriented Language (COBOL), detailed flow charting; tactical automated command control systems; and trends in computer and auxiliary equipment development.

Credit Recommendation: In the vocational certificate category, 3 semester hours in introduction to data processing (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing (7/74).

AR-1402-0032

COBOL Programming

Course Number: 7E-F11.

Location: Management Engineering Training Agency, Rock Island, IL.
Length: 2 weeks (78 hours).
Exhibit Dates: 10/63–Present.
Objectives: To provide the student with an introduction to COBOL programming and the necessary elements—language structure, compiler functions, and COBOL standards—to write programs of significant complexity.
Instruction: Course provides an introduction to ANSI COBOL including formulations of divisions, language structure, program logic and design and analysis techniques of compiled programs. Completion of several COBOL programs involving increasingly more difficult programming concepts is required.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in COBOL programming (11/76).

AR-1402-0033

1. Financial Management Systems Automated Applications
2. Financial Management Systems—Automatic Data Processing

Course Number: *Version 1:* 7E-F20; 531-F4. *Version 2:* 7E-F3; 531-F3; 14-K-F20.
Location: Finance School, Ft. Benjamin Harrison, IN.
Length: *Version 1:* 4 weeks (151–160 hours). *Version 2:* 3–4 weeks (113 hours).
Exhibit Dates: *Version 1:* 7/67–12/68. *Version 2:* 5/64–6/67.
Objectives: To train officer, enlisted, and civilian personnel in financial management and supply accounting.
Instruction: Lectures in data processing, machine language and components, orientation to COBOL, accounting systems, financial management and supply accounting.
Credit Recommendation: *All Versions:* In the vocational certificate category, 3 semester hours in introduction to data processing (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing (7/74); in the upper-division baccalaureate category, 2 semester hours in computer programming and analysis in the field of data processing (12/68). *Version 2:* In the vocational certificate category, 3 semester hours in introduction to data processing (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing (7/74); in the upper-division baccalaureate category, 2 semester hours in data processing in financial operations (12/68).

AR-1402-0034

1. Financial Management—Machine Accounting Systems
2. Financial Management—Machine Accounting

Course Number: *Version 1:* 14-K-F14. *Version 2:* 14-L-F14.
Location: Finance School, Ft. Benjamin Harrison, IN.
Length: *Version 1:* 5 weeks (189 hours). *Version 2:* 3 weeks (112–114 hours).
Exhibit Dates: *Version 1:* 7/63–12/68. *Version 2:* 5/60–6/63.
Objectives: To train officers and enlisted personnel to operate punched-card equipment and the automatic data processing for supply accounting systems.
Instruction: Lectures and practical exercises in punched-card machine operation, automatic data processing procedures and equipment operation, computer languages, and flow-charting techniques.
Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in data processing or financial operations (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in data processing or financial operations (7/74); in the upper-division baccalaureate category, 2 semester hours in data processing or financial operations (12/68). *Version 2:* In the vocational certificate category, 2 semester hours in unit record equipment (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in unit record equipment (7/74).

AR-1402-0035

Automatic Data Processing (ADP) Officer
(ADPS Plans and Operations Officer)
(ADPS (Fieldata) Plans and Operations Officer)

Course Number: *All Versions:* 7E-53C; 7E-2402; 7E-741C. *Version 1:* 7E-741A. *Version 3:* 7E-2402; 11-A-2402.
Location: *Version 1:* Institute of Administration, Ft. Benjamin Harrison, IN. *Version 2:* Institute of Administration, Ft. Benjamin Harrison, IN. *Version 3:* Adjutant General's School, Ft. Benjamin Harrison, IN; Signal School, Ft. Monmouth, NJ.
Length: *Version 1:* 13 weeks (486 hours). *Version 2:* 13 weeks (462 hours). *Version 3:* 11 weeks (385–414 hours).
Exhibit Dates: *Version 1:* 5/76–Present. *Version 2:* 7/74–4/76. *Version 3:* 7/61–6/74.
Objectives: To train commissioned and warrant officers to plan for and operate automatic data processing systems and equipment.
Instruction: *All Versions:* Lectures and practical exercises in principles of automatic data processing systems, communications in automatic data processing systems, techniques in computer programming, and systems analysis. *Version 1:* Includes principles and techniques of automatic data processing, computer programming, quantitative analysis, systems analysis and design , and management of ADP systems. *Version 2:* Includes programming techniques in COBOL and BAL, installation management, quantitative analysis, systems analysis, and general principles of data processing.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in quantitative analysis and decision theory, 1 in CIS language (assembler), 2 in CIS language (COBOL), 2 in CIS language (operating systems) (1/78); in the upper-division baccalaureate category, 3 semester hours in operations research and planning, 3 in management of ADP systems(1/78). Credit is to be granted in either the lower division baccalaureate/associate degree category or the upper division category but not in both. *Version 2:* In the upper-division baccalaureate category, 2 semester hours in data processing management, 1 in data processing principles, 4 in computer programming, and 3 in systems analysis (3/75). *Version 3:* In the vocational certificate category, 3 semester hours in principles of data processing, 3 in assembler language programming, and 3 in systems analysis (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in principles of data processing, 3 in assembler language programming, and 3 in systems analysis (7/74); in the upper-division baccalaureate category, 3 semester hours in principles of data processing (12/68).

AR-1402-0036

1. Automatic Data Processing Systems (ADPS) Console Operator
2. ADPS Console Operation
3. ADPS (Fieldata) Console Operation

Course Number: *Version 1:* 531-74E20. *Version 2:* 531-744.1. *Version 3:* 11-R-744.1.
Location: *Version 1:* Security Agency School, Ft. Devens, MA. *Version 2:* Signal School, Ft. Monmouth, NJ. *Version 3:* Signal School, Ft. Monmouth, NJ.
Length: *Version 1:* 10–11 weeks (363–395 hours). *Version 2:* 9 weeks (326 hours). *Version 3:* 9 weeks (318 hours).
Exhibit Dates: *Version 1:* 6/67–9/70. *Version 2:* 7/65–5/67. *Version 3:* 5/59–6/65.
Objectives: To train enlisted personnel to operate a computer console (IBM 1401).
Instruction: Lectures and practical exercises in the operation of a computer console (IBM 1401). Course includes electrical accounting machines; operation of tape units; coding instructions for components; production of reports using reports program generator (RPG) and general file operators (GFO).
Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in principles of data processing, 3 in computer operations (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in principles of data processing (7/74); in the upper-division baccalaureate category, 3 semester hours in principles of data processing (7/74). *Version 2:* In the vocational certificate category, 3 semester hours in principles of data processing, 3 in computer operations (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in principles of data processing (7/74); in the upper-division baccalaureate category, 5 semester hours in computer operation in the field of data processing (12/68). *Version 3:* In the vocational certificate category, 3 semester hours in principles of data processing, 3 in computer operations (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in principles of data processing (7/74); in the upper-division baccalaureate category, 3 semester hours in computer operation in the field of data processing (12/68).
Related Occupation Codes: 74E; 74F.

AR-1402-0037

Automatic Data Processing for Auditors (ADPAC)

Course Number: None.
Location: Logistics Management Center, Ft. Lee, VA.
Length: *Version 1:* 2 weeks (78 hours). *Version 2:* 3 weeks (117 hours).
Exhibit Dates: *Version 1:* 3/75–Present. *Version 2:* 1/73–2/75.
Objectives: To train auditors and internal review personnel in ADP systems concepts and controls.
Instruction: Lectures and practical exercises in automatic data processing, including ADP systems input, output, and processing characteristics and controls; organizational controls, preinstallation controls; documentation controls; computer operations controls; and tools for developing and evaluating controls.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 se-

mester hours in introduction to data processing (12/75). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in automatic data processing (12/68).

AR-1402-0038

Army Security Agency Card and Tape Writer

Course Number: 531-74B20.

Location: Security Agency School, Ft. Devens, MA.

Length: 6-8 weeks (274 hours).

Exhibit Dates: 1/65-Present.

Objectives: To train enlisted personnel to be key punch operators.

Instruction: Lectures in communications fundamentals, cryptanalysis, basic data processing, automatic data processing, electrical accounting machine use, and key punch operations.

Credit Recommendation: In the vocational certificate category, 6 semester hours in data processing (2/74).

Related Occupation Codes. 74B; 74D; 74E; 74F.

AR-1402-0039

Automatic Data Processing Intern Program

Course Number: AMETA-22.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 15 weeks (587 hours).

Exhibit Dates: 7/71-Present.

Objectives: Course is designed for new programmers to provide them with in-depth knowledge and practice in several programming languages, including COBOL, S360 Assembler, and Job Control Language, and in debugging techniques and systems analysis and design concepts.

Instruction: This course covers the fundamentals of computer programming; S360 Assembler Language; JCL for COBOL programmers; COBOL programming, special features, and debugging; JCL and utilities workshop; ADP systems analysis and design; COBOL access methods; and DARCOM orientation. The intern program provides a continuing environment of computing exercises and interaction with the instructors and peers.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in COBOL, 3 semester hours in advanced COBOL (11/76); in the upper-division baccalaureate category, 4 semester hours in S360 Assembler Language, 3 in systems analysis (11/76).

AR-1402-0040

S360 Assembler Language

Course Number: AMETA-28.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (78 hours).

Exhibit Dates: 10/73-Present.

Objectives: To provide an introduction to IBM S360 Assembler language and to provide the details of the language so that the student can write, test, and debug programs on an S360.

Instruction: This course provides the instruction to write programs using the S360 Assembler Language. Topics covered and practiced include instruction formats of arithmetic logic, data movement and branching instructions. Also covered are the input/output MACROS, data types and formats, including binary, character, and packed. Progressively more difficult programs are assigned to apply newly acquired programming instructions and techniques.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in S360 Assembler Language (11/76).

AR-1402-0041

ADP Systems Analysis and Design

Course Number: 7E-F18.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 2 weeks (78 hours).

Exhibit Dates: 9/64-Present.

Objectives: To provide a study of the overall computer-based systems analysis and design process and to prepare the student to assist in the development of a system which will be consistent with the potential of the computer and management needs.

Instruction: Course provides an overview of computer systems, detailed explanation and use of systems analysis techniques, including flowcharting, grid charting document relationships, constructing decision tables, designing records and files for computer processing and case studies for application of the techniques.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in computer systems analysis (11/76).

AR-1402-0042

Defense Numerical Control (APT) Part Programming

(Computer-Aided Manufacturing Part Programming (APT))

(Numerical Control Part Programming)

Course Number: AMETA-17; 7A-F46.

Location: Management Engineering Training Agency, Rock Island, IL.

Length: 3 weeks (117 hours).

Exhibit Dates: 1/71-Present.

Objectives: To provide students with a working knowledge of the Automatically Programmed Tools (APT) language. Primary emphasis is placed on qualifying students to write part programs for numerically controlled machine tools.

Instruction: Technique training in the use of the APT part-programming language. Increasingly difficult programming exercises in writing part programs are presented and tested on appropriate computers. An actual worksite project is completed. Because of similarity of APT, UNIAPT, ADAPT, and EXAPT part-programming languages, most of the training in this course is directly applicable to those using computer languages other than APT.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in numerical control programming (11/76).

AR-1402-0043

Assembler Programming

Course Number: None.

Location: Army Computer Systems Command, Ft. Belvoir, VA; Army Computer Systems Command, Support Group, Ft. Lee, VA; Army Computer Systems Command, Support Group, Ft. McPherson, GA; Army Computer Systems Command, Support Group, Ft. Shafter, HI; Army Computer Systems Command, Zweibruken, Germany.

Length: 4-5 weeks (140 hours).

Exhibit Dates: 6/70-Present.

Objectives: To provide students with a thorough understanding of Basic Assembler Language for the IBM 360/370.

Instruction: Program consists of two modules: Assembly Language Coding and Assembly Language Coding Workshop. Subject matter includes standard instruction set, decimal instruction set, branching, logic, Boolean instructions, editing, and translation. Subroutine linkage, I/O macros, debugging, indexing, and necessary job control language are included. Objectives can be accomplished through self-study or formal classroom.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in assembler programming (5/77).

AR-1402-0044

Data Processing Principles

Course Number: None.

Location: Army Computer Systems Command, Ft. Belvoir, VA; Army Computer Systems Command, Support Group, Ft. Lee, VA; Army Computer Systems Command, Support Group, Ft. McPherson, GA; Army Computer Systems Command, Support Group, Ft. Shafter, HI; Army Computer Systems Command, Zweibruken, Germany.

Length: 4 weeks (126 hours).

Exhibit Dates: 6/70-Present.

Objectives: To provide students with an understanding of how a computer works and its major components.

Instruction: Program consists of three modules: Computer Systems Fundamentals, Fundamentals of Programming, and Introduction to System 360/370. Subject matter includes programming concepts, problem analysis, flow charting, decision tables, coding, number systems, and punched-card principles. Additional problem solution techniques, such as program loops, subroutines, counters and switches, and tables, are covered. The architecture and organization of the IBM 360/370 are included.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in data processing principles (5/77).

AR-1402-0045

Operating Systems

Course Number: None.

Location: Army Computer Systems Command, Ft. Belvoir, VA; Army Computer Systems Command, Support Group, Ft. Lee, VA; Army Computer Systems Command, Support Group, Ft. McPherson, GA; Army Computer Systems Command, Support Group, Ft. Shafter, HI; Army Computer Systems Command, Zweibruken, Germany.

Length: 5 weeks (140 hours).

Exhibit Dates: 6/70-Present.

Objectives: To provide students with a general overview of operating systems, with emphasis on the IBM Operating System (OS) and the Disk Operating System (DOS).

Instruction: Program consists of six modules: Disk Operating System Job Control Language (DOS JCL), Introduction to Disk Operating Systems (DOS), Operating Systems (OS), Concepts and Facilities, Operating Systems Job Control Language (OS JCL), Operating Systems (OS) Utilities, and File Organization and Access Methods (FOAM). Course covers concepts, facilities, vocabulary and characteristics of operating systems. Topics include Disk Operating Systems (DOS), DOS Job Control Language (DOS JCL), Operating Systems (OS) Concepts and Facilities, OS Utilities, OS

Job Control Language (JCL), and File Organization and Access Methods (FOAM). The course objectives can be accomplished by self-study or by formal classroom.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in operating systems (5/77).

AR-1402-0046

COBOL Programming Advanced

Course Number: None.

Location: Army Computer Systems Command, Ft. Belvoir, VA; Army Computer Systems Command, Support Group, Ft. Lee, VA; Army Computer Systems Command, Support Group, Ft. McPherson, GA; Army Computer Systems Command, Support Group, Ft. Shafter, HI; Army Computer Systems Command, Zweibruken, Germany.

Length: 4–5 weeks (168 hours).

Exhibit Dates: 6/70–Present.

Objectives: To provide a realistic work environment where the student can practice COBOL programming skills.

Instruction: Program consists of three modules: Structured Coding Workshop, Structured Programming Technologies Overview, and Practical Workshop in Advanced COBOL. The program involves modification of an Indexed Sequential Access Method (ISAM) program to conform to radically changed specifications. The student must also modify a program to run under a different operating system. Structured coding and ISAM applications are emphasized. Objectives may be accomplished through self-study or formal classroom.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in advanced COBOL programming (5/77).

AR-1402-0047

COBOL Programming

Course Number: None.

Location: Army Computer Systems Command, Ft. Belvoir, VA; Army Computer Systems Command, Support Group, Ft. Lee, VA; Army Computer Systems Command, Support Group, Ft. McPherson, GA; Army Computer Systems Command, Support Group, Ft. Shafter, HI; Army Computer Systems Command, Zweibruken, Germany.

Length: 4 weeks (140 hours).

Exhibit Dates: 6/70–Present.

Objectives: To provide extensive coverage of the fundamentals of COBOL programming.

Instruction: Program consists of two modules: ANS COBOL and ANS COBOL Workshop. Provides training in all standard ANS COBOL fundamentals. In addition, the SORT verb is included. Several practical programming exercises emphasize both sequential and indexed sequential file organization methods. Objectives can be accomplished through self-study or formal classroom presentation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in COBOL programming (5/77).

AR-1402-0048

Business Systems Analysis

Course Number: None.

Location: Army Computer Systems Command, Ft. Belvoir, VA; Army Computer Systems Command, Support Group, Ft. Lee, VA; Army Computer Systems Command, Support Group, Ft. McPherson, GA; Army Computer Systems Command, Support Group, Ft. Shafter, HI; Army Computer Systems Command, Zweibruken, Germany.

Length: 4 weeks (140 hours).

Exhibit Dates: 6/70–Present.

Objectives: To provide students with an understanding of systems analysis, design, and implementation for organizational problem solving.

Instruction: Program consists of two modules: System Analyst Training (SAT) and Structured Design/Documentation Workshop. Course covers principles and techniques required in the analysis and design of information processing systems. Topics include defining study objectives, interviewing and gathering information, documentation, analyzing available information, selecting and designing a solution, types of controls, quantitative techniques and structured design techniques including the top down approach, HIPO, and Program Design Language.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in business systems analysis (5/77).

AR-1402-0049

Combat Communications-Electronics Advanced

Course Number: 4C-OA25.

Location: Signal School, Ft. Gordon, GA.

Length: 14 weeks (550 hours).

Exhibit Dates: 12/76–Present.

Objectives: To prepare Signal Corps officers to command and train signal units; to serve as staff officers at batallion level; to install, maintain, and manage tactical communications systems in support of combat operations; and to advise the commander or staff on the installation and operation of communications and electronic systems.

Instruction: Lectures, demonstrations and practical exercises in antenna and wave form propagation procedures, teletype, transmission, and functional systems relevant to requirements, and effective combat communications.

Credit Recommendation: In the vocational certificate category, 3 semester hours in introduction to data processing (4/77).

AR-1402-0050

Automated High Frequency Direction Finding (HFDF) System Operation (EELPOT)

Course Number: 231-F11.

Location: Intelligence School, Ft. Devens, MA.

Length: 5 weeks (200 hours).

Exhibit Dates: 6/76–Present.

Objectives: To familiarize direction-finding operators with the EELPOT system, its configuration, equipment, and manned-operator positions.

Instruction: Operation of the net control processing unit (NCPU), the out-station processing unit (OPU), a video-display computer terminal, a line printer, and the direction-finding (DF) controller. Program is oriented to maintenance and operation of Honeywell equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer operation (9/77).

AR-1402-0051

Security in ADP Systems

Course Number: ALM-51-0297.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 2 weeks (78 hours).

Exhibit Dates: 6/76–Present.

Objectives: To provide students with an awareness of the necessity for and means of achieving a satisfactory level of security in automatic data processing facilities.

Instruction: Lectures and workshop exercises cover the design of security systems for automatic data processing facilities.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in ADP systems security (12/76).

AR-1402-0053

Digital European Backbone (DEB) Multiplex Equipment Repair

Course Number: 101-F17.

Location: Signal School, Ft. Gordon, GA.

Length: 5 weeks (183 hours).

Exhibit Dates: 5/77–8/79.

Objectives: *Version O:* Student learns to repair several specific pieces of electronic digital multiplex systems.

Instruction: The course includes a brief introduction to digital logic circuits and block diagrams and discussion of each block of the system. Emphasis is on troubleshooting the system. Actual input and output waveforms are related to system blocks.

Credit Recommendation: In the vocational certificate category, 2 semester hours in digital circuits, 2 in troubleshooting (8/79). In the lower-division baccalaureate/associate degree category, 1 semester hour in digital circuitry, 1 in troubleshooting (8/79).

Related Occupation Codes: 26V, 32E.

AR-1402-0054

Programmer Analyst

Course Number: 531-74F10.

Location: Institute of Administration, Ft. Benjamin Harrison, IN.

Length: *Version 6:* 6 weeks (311 hours).

Exhibit Dates: 10/75–Present.

Objectives: To provide a knowledge of techniques of compiler-level language programming, using ANS COBOL and the principles and techniques of compiler programming, and to teach students to write, analyze, interpret, and debug COBOL programs and read assembler language programs.

Instruction: Through lectures, demonstrations, and laboratory exercises using the IBM 360 and supported software, students acquire knowledge of and competencies for programming functions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in automatic data processing, 5 in CIS COBOL (2/78).

Related Occupation Codes: 74F.

AR-1402-0055

Computer/Machine Operator

Course Number: 531-74D10.

Location: Institute of Administration, Ft. Benjamin Harrison, IN.

Length: 5 weeks (212 hours).

Exhibit Dates: 11/75–Present.

Objectives: To provide a knowledge of the principles of punched card data processing, to introduce automatic data processing, and to prepare the student for disk operating systems and the operation of a computer system in a multiprogramming environment.

Instruction: Lectures and demonstrations emphasizing hands-on experience with the computer and peripheral equipment.

Credit Recommendation: In the vocational certificate category, 5 semester hours in computer operator training (2/78).

Related Occupation Codes: 74D.

AR-1402-0056

MANAGEMENT SYSTEMS SUPPORT AGENCY (USAMSSA) ADP INTERN. PROGRAM

Course Number: None.

Location: Management Systems Support Agency, Washington, DC.

Length: 16 weeks (611 hours).

Exhibit Dates: 9/77–Present.

Objectives: To provide junior-level programmers with a basic knowledge of computer hardware and operating systems.

Instruction: Students will obtain a general knowledge of the history and scope of data processing; learn the flow of a job from submission to completion; learn to solve elementary arithmetic problems in hexadecimal and binary systems, flowchart programming problems, code basic Job Control Language statements, and code, test, and debug elementary FORTRAN and COBAL programs. Topics include fundamentals of programming, system analysis, introduction to ASKIT/CALIT/GETIT, system 370, utilities, and computer operation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in COBOL programming, 2 in data processing principles, 2 in operating systems, 2 in business systems analysis (6/78).

AR-1402-0057

INTEGRATED FACILITIES SYSTEM

Course Number: ALM-59U210; ALM-59U260; ALM-59U310.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 3 weeks (95 hours).

Exhibit Dates: 1/75–Present.

Objectives: To train functional personnel to convert to and update computer files in Real Property Maintenance, Asset Accounting, and Facilities Engineering Management Systems.

Instruction: Programmed instruction texts and practical exercises in Real Property Maintenance, Asset Accounting, and Facilities Engineering Management Systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in integrated facilities system application (3/78).

AR-1402-0058

LAND COMBAT SUPPORT SYSTEM TEST SPECIALIST/LANCE REPAIR TRANSITION

Course Number: 121-27B20-T.

Location: Missile & Munitions Center, Redstone Arsenal, AL.

Length: Phase I, 18 weeks; Phase II, 4 weeks, for a total of 22 weeks (711 hours).

Exhibit Dates: 10/77–Present.

Objectives: In Phase I qualified personnel (MOS27D) are trained in the new procedures and techniques required to repair an updated version of a Land Combat Support System. In Phase II qualified personnel (MOS27B) are trained in new procedures and techniques of repairing an updated version of a Lance Missile System.

Instruction: Phase I includes lectures and practical exercises on equipment relative to the Land Combat Support System including computer display panels, computer printers, computer processing and other computer components; Boolean algebra, logic functions, logic electronics and basic computer electronics; computer systems operation and troubleshooting including digital multimeter, programmable power supplies, waveform generators and other various test instruments. Phase II consists of lectures and practical exercises in the operation, maintenance and repair of a Lance Missile System including guidance system, rocket motor testing, storage procedure and N-C ad battery servicing.

Credit Recommendation: In the vocational certificate category, For those completing MOS27D, 6 semester hours in computer electronics repair and maintenance (8/79); in the lower-division baccalaureate/associate degree category, For those completing MOS27D, 3 semester hours in basic computer systems, 3 in computer systems operations, 3 in computer electronics maintenance and repair (8/79). NOTE: For those students completing MOS27B (Phase II) credit is not recommended because of the military-specific nature of the course (8/79).

AR-1403-0001

MEDICAL RECORDS SPECIALIST

(Medical Records and Reports (Basic))

Course Number: 513-71G10; 513-71G20; 8-R-715.1.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Medical Field Service School, Ft. Sam Houston, TX.

Length: 6–8 weeks (210–282 hours).

Exhibit Dates: 9/58–Present.

Objectives: To train enlisted personnel in basic and advanced medical records administration.

Instruction: Lectures and practical exercises in the preparation, processing, and review of medical records and reports; familiarization with medical terminology; general administrative procedures; and physical conditioning.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in medical terminology (12/68).

Related Occupation Codes: 71G.

AR-1403-0002

LEGAL CLERK

Course Number: 512-71D20.

Location: Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 8–9 weeks (257–345 hours).

Exhibit Dates: 2/73–Present.

Objectives: To provide enlisted personnel with introductory concepts of military administrative law and Army claims systems with emphasis on the practical processing skills and procedures involved.

Instruction: Lectures on Army claims system and board proceedings, e.g. investigative boards; Article 15; non-judicial punishment; identification and preparation of charges and specifications for summary court martial proceedings and special court martial proceedings; posttrial actions. Practical exercises in the use of basic forms in the above areas including drafting documents, application of rules of law to facts, digesting testimony, and preliminary legal research.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours as an elective in paralegal training programs (11/75).

Related Occupation Codes: 71B; 71D.

AR-1404-0001

POSTAL OPERATIONS

Course Number: 7A-0030; 515-71F20; 515-71F30; A-515-0018 (USN); 7A-515-0161 (USMC); 7A-515-0160 (USMC); 12-R-714.1; 12-E-14.

Location: Institute of Administration, Ft. Benjamin Harrison, IN; Adjutant General's School, Ft. Benjamin Harrison, IN.

Length: 4–5 weeks (124–187 hours).

Exhibit Dates: 8/55–Present.

Objectives: To provide officers and enlisted personnel with the fundamental techniques and procedures of military post office management.

Instruction: Lectures in postal organization, facilities, and operations; and practical experience in mail handling.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

Related Occupation Codes: 71F.

AR-1404-0002

CRYPTOGRAPHY

Course Number: 11-R-722.1; 11-E-18.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 9 weeks (318–320 hours).

Exhibit Dates: 12/55–12/68.

Objectives: To train enlisted personnel to use cryptographic systems and equipment to encrypt and decrypt classified messages.

Instruction: Lectures and practical exercises in basic communications center procedures, military cryptography, military typing, teletypewriter operation, and tape relay.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

AR-1404-0003

AMPLITUDE MODULATED RADIO TELETYPEWRITER EQUIPMENT OPERATION

Course Number: 201-F1.

Location: Signal School, Ft. Gordon, GA.

Length: 2 weeks (63 hours).

Exhibit Dates: 11/78–Present.

Objectives: To provide selected personnel with knowledge to install, operate, and perform operator maintenance on specialized radio teletypewriter and radio set.

Instruction: Provides a working knowledge of radio teletypewriter AN/GRC-46 and radio set AN/GRC 26D, including operation, installation, tuning, modes of operation, and performance testing. Student must demonstrate ability on equipment.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (2/79).

Related Occupation Codes: 05C.

AR-1404-0004

CENTRAL OFFICE SWITCHBOARD OPERATOR

(Telephone Switchboard Operation)
(Switchboard Operator)
(Central Office Telephone Switchboard Operation)

Course Number: 580-72C20; 11-R-724.1; 11-E-32.

Location: Southeastern Signal School, Ft. Gordon, GA; Signal School, Ft. Gordon, GA.

Length: 6–8 weeks (206–284 hours).

Exhibit Dates: 11/55–Present.

Objectives: To train enlisted personnel in the operation, installation, and maintenance of telephone switchboards.

Instruction: Practical experience in operation, maintenance, and installation of telephone switchboard equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

Related Occupation Codes: 72C; 31Z.

AR-1404-0005

Signal Security (SIGSEC) Specialist
(Communications Security Monitor)

Course Number: 231-05G10; 231-05G20.

Location: Security Agency School, Ft. Devens, MA; Intelligence School, Ft. Devens, MA.

Length: 17–18 weeks (519–610 hours).

Exhibit Dates: 4/77–Present.

Objectives: To train enlisted personnel to monitor electronic communications.

Instruction: Lectures in communications and security procedures of a limited technical nature. Course includes map reading, signal communications, cryptosecurity, security analysis, electronic security and warfare, and SIGSEC organization and monitoring operations.

Credit Recommendation: In the vocational certificate category, 2 semester hours in typing, PBX operation (9/77).

Related Occupation Codes: 05G.

AR-1404-0006

2. Signal Officer Basic
   (Signal Officer Orientation)
3. Signal Officer Basic
   (Signal Corps Officers Basic)
4. Signal Corps Officers Basic

Course Number: *Version 1:* 4-11-C20. *Version 2:* 4-11-C20; 11-A-C20. *Version 3:* 11-O-A. *Version 4:* 11-O-A.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ. *Version 3:* Signal School, Ft. Monmouth, NJ. *Version 4:* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 12 weeks (587 hours). *Version 2:* 8–12 weeks (341–551 hours). *Version 3:* 9–10 weeks (350–366 hours). *Version 4:* 19 weeks (780 hours).

Exhibit Dates: *Version 1:* 6/79–Present. *Version 2:* 3/60–5/79. *Version 3:* 5/54–2/60. *Version 4:* 8/53–4/54.

Objectives: To teach newly commissioned officers basic Signal Corps procedures.

Instruction: *All Versions:* Lectures and practical exercises in basic Signal Corps procedures, including unit and team tactics and battle procedures; atomic, chemical, biological, radiological, and mine warfare; intelligence procedures; map and aerial photograph reading; supply management; motor vehicle maintenance; combined arms and weapons; communications center procedures; and radio and wire communications principles and tactics. *Version 4:* Includes personnel management, military photography, and Signal Corps officer duties.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the upper-division baccalaureate category, credit in radio, wire communications, and telegraph systems on the basis of institutional examination (6/74). *Version 3:* In the upper-division baccalaureate category, credit in radio and wire communications on the basis of institutional examination (12/68). *Version 4:* In the upper-division baccalaureate category, 2 semester hours in business organization and management, and 3 in radio and electricity (12/68).

AR-1404-0007

Data Communications Switching Center Specialist
(AUTODIN Switching Center Traffic Operations)

Course Number: 580-72G10; 580-72G20.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: 9–11 weeks (253–393 hours).

Exhibit Dates: 5/70–Present.

Objectives: To train enlisted personnel in automatic digital message switching center traffic operations, and as data communication switching center specialists.

Instruction: Lectures and practical exercises on AUTODIN switching center traffic operations, including introduction to communications, teletypewriter keyboard operations, COMSEC accounting, COMSEC equipment, introduction to AUTODIN, AUTODIN tributary and peripheral equipment operations, message handling procedures, and basic communication principles.

Credit Recommendation: In the vocational certificate category, 2 semester hours in typewriting proficiency on the basis of institutional evaluation (4/77).

Related Occupation Codes: 72G; 09B.

AR-1404-0008

Radio Operator Noncommissioned Officer (NCO) Supervisor Candidate

Course Number: 201-05B42-I.

Location: Institute for Military Assistance, Ft. Bragg, NC.

Length: 26 weeks (1772 hours).

Exhibit Dates: 5/71–Present.

Objectives: To qualify enlisted personnel as noncommissioned officers and supervisors in a special forces unit. This includes a working knowledge of doctrine, tactics, techniques and field training of special forces units and operation of a field radio.

Instruction: Lectures and practical exercises in field radio operation and leadership skills of special forces noncommissioned officers and supervisors. Course includes military skills, Morse code (at 15 words per minute), and field communications procedures. Some attention is given to communication system general familiarization.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

Related Occupation Codes: 05B.

AR-1404-0009

Radio Teletype Operator
(Radio Teletypewriter Operator)
(Radio Teletype Operation)

Course Number: 201-05C10-CELT; 201-05C10; 201-05C20; 11-R-053.1; 11-E-48.

Location: Southeastern Signal School, Ft. Gordon, GA; Signal School, Ft. Gordon, GA.

Length: 10–15 weeks (72–609 hours).

Exhibit Dates: 11/55–Present.

Objectives: To train enlisted personnel to install, operate, and maintain field radio teletypewriter sets and related equipment.

Instruction: Lectures and practical exercises in teletypewriter sets installation, operation, and maintenance, including keyboard operation proficiency, Morse code, radio telegraph procedures, and equipment familiarization. After 2/79 morse code has been deleted.

Credit Recommendation: In the vocational certificate category, 1 semester hour in typing (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in typing (6/74); in the upper-division baccalaureate category, credit in typing on the basis of institutional evaluation (6/74).

Related Occupation Codes: 05C.

AR-1404-0010

High Speed Radio Operation

Course Number: 11-E-15.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 23 weeks (850 hours).

Exhibit Dates: 11/55–12/68.

Objectives: To train enlisted personnel to operate high-speed radios.

Instruction: Lectures and practical exercises in the operation of radio communications equipment, receipt of international Morse code, and transmission of code groups, including radio procedure, introduction to communications, international Morse code, typing, teletypewriter procedure and operation, tactical traffic, field radio sets, and field radio operation.

Credit Recommendation: In the vocational certificate category, 3 semester hours in typewriting, telecommunications, basic radio, or teletype operation (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in typewriting, telecommunications, basic radio, or teletype operation (7/74); in the upper-division baccalaureate category, credit in typewriting, telecommunications, basic radio, or teletype operation on the basis of institutional evaluation (12/68).

AR-1404-0011

International Morse Code

Course Number: 231-ASI A4.

Location: Signal School, Ft. Gordon, GA.

Length: 4 weeks (165 hours).

Exhibit Dates: 11/78–Present.

Objectives: Provides student with knowledge and capability to send and receive international Morse Code at a minimum speed of 15 words per minute.

Instruction: Course includes practice in sending and receiving international Morse Code, military lettering, phonetic alphabet, and radio telegraph procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in Morse Code radio operator (8/79).

Related Occupation Codes: 05B; 05C.

AR-1404-0012

1. WAC Officer Basic/WAC Officer Candidate
2. WAC Officer Basic/WAC Officer Candidate
   (WAC Officer Basic)

Course Number: *All Versions:* 7-35-C20; 7-35-F1. *Version 2:* 35-O-1.

Location: Women's Army Corps School, Ft. McClellan, AL.

Length: *Version 1:* 18 weeks (625 hours). *Version 2:* 18–20 weeks (672–740 hours).

Exhibit Dates: *Version 1:* 11/70–Present. *Version 2:* 1/55–10/70.

Objectives: To prepare newly commissioned officers for their first duty assignments and to prepare selected personnel to be commissioned Second Lieutenants in the Reserve component of the U.S. Army.

Instruction: Lectures and practical exercises covering a wide range of subjects including Army management, military leadership, and effective oral and written expression.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in communications (7/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in communications (7/74); in the upper-division baccalaureate category, 2 semester hours in business organization and management (12/68).

AR-1404-0013

COMMUNICATIONS CENTER OPERATION

Course Number: *All Versions:* 4C-209A; 4C-0221; 4C-25B; 4C-26B; 4C-721A. *Version 2:* 11-B-0221; 11-B-0224; 11-O-22.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 4 weeks (107 -117 hours). *Version 2:* 5 weeks (167-183 hours). *Version 3:* 7-8 weeks (245-285 hours).

Exhibit Dates: *Version 1:* 9/76-Present. *Version 2:* 10/70-8/76. *Version 3:* 6/55-9/70.

Objectives: To provide commissioned and warrant officers with a working knowledge of tactical and fixed telecommunications center procedures.

Instruction: Course covers logistics and personnel, electronic warfare, tactical communications centers, automatic data processing, and fixed communications centers.

Credit Recommendation: *Version 1:* Credit is not recommended because of the military-specific nature of the course (4/77). *Version 2:* In the vocational certificate category, 2 semester hours as an elective in communications (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in communications (8/74). *Version 3:* In the lower-division baccalaureate/associate degree category, 2 semester hours in communications center management (12/68).

AR-1404-0014

SIGNAL COMPANY GRADE OFFICER REFRESHER

Course Number: 11-A-C7.

Location: Signal School, Ft. Monmouth, NJ.

Length: 4 weeks (130 hours).

Exhibit Dates: 2/57-12/68.

Objectives: To provide refersher training in the duties and responsibilities of a signal corps officer at the company level.

Instruction: Conferences and practical exercises in signal supply and maintenance, wire and radio communication equipment, communication center operations, and signal corps organization and systems.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (7/74).

AR-1404-0015

TELECOMMUNICATIONS CENTER OPERATOR (Telecommunications Center Specialist)

Course Number: *Version 1:* 580-72E10; 580-72E10-CELT. *Version 2:* 580-72E20.

Location: Signal School, Ft. Gordon, GA.

Length: 10-16 weeks (393-653 hours).

Exhibit Dates: *Version 1:* 1/79-Present. *Version 2:* 1/75-12/78.

Objectives: To provide training in the basic operation of communications equipment.

Instruction: *Version 1:* Essentially Army 'basic training' acquainting the student with basic skills required to perform as a soldier in a technical environment. Includes 68 hours of typing instruction and 46 hours of teletypewriter operation. *Version 2:* Lectures and practical exercises in message processing, teletype operation, and installation and operation of specific military communications networks. teletype operation, and installation and operation of specific military communications networks.

Credit Recommendation: In the vocational certificate category, 2 semester hours in keypunch and teletype operation (8/79).

Related Occupation Codes: 72E.

AR-1404-0016

MORSE INTERCEPTOR

Course Number: 231-05H20.

Location: Security Agency School, Ft. Devens, MA.

Length: 9 weeks (315 hours).

Exhibit Dates: 9/64-3/77.

Objectives: To train enlisted personnel to intercept and record manual Morse signals.

Instruction: Lectures and practical exercises in international Morse code reception and recording; operation and maintenance of radio receivers and telegrapher type writer; and employment of intercept procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in telegraphy (7/74).

Related Occupation Codes: 05H.

AR-1404-0017

VOICE RADIO OPERATOR

Course Number: 201-05E20.

Location: Signal School, Ft. Gordon, GA.

Length: 5 weeks (164 hours).

Exhibit Dates: 2/76-Present.

Objectives: To provide students with the knowledge to install and operate AM, FM, and SSB radiotelephone sets in voice radio networks.

Instruction: Instruction in the procedures used to set up, transmit, and receive voice communications on a radio network.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/77).

Related Occupation Codes: 09B; 05E.

AR-1404-0018

VHF/UHF MULTICHANNEL INTERCEPT (Electronic Warfare (EW) Cryptologic Interceptor—Very High Frequency/Ultra High Frequency (UHF/VHF Intercept Operations)

Course Number: 231-F10.

Location: Intelligence School, Ft. Devens, MA.

Length: 3 weeks (86 hours).

Exhibit Dates: 12/76-Present.

Objectives: To train personnel in the operation of VHF/UHF intercept equipment.

Instruction: Instruction is devoted solely to operation of radio intercept equipment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (9/77).

AR-1404-0019

FIXED TELECOMMUNICATIONS SYSTEMS ADVANCED

Course Number: 4C-OA26.

Location: Signal School, Ft. Gordon, GA.

Length: 14 weeks (482 hours).

Exhibit Dates: 6/77-Present.

Objectives: To prepare Signal Corp officers for aspects of planning, installation and operation of non-tactical communications systems and facilities.

Instruction: The course covers general knowlege of radio fundamentals, radio principles, TV principles, RF transmission lines, factors influencing ground wave propogation, sky wave propogation, antenna effects, and Fresnel zone effects. Procedure for frequency planning, telecommunications center operation and organization and knowledge of specific telecommunications systems (autodin) or cable TV are also covered.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in telecommunications systems electives (8/79).

AR-1404-0020

TELECOMMUNICATIONS CENTER OPERATOR BY CORRESPONDENCE

Course Number: J11.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80-Present.

Objectives: To provide the knowledge and basic skills to operate digital subscriber terminal equipment.

Instruction: Course gives instruction in the operation and care of digital terminal equipment. Student will be able to prepare Autodin messages and operate in a tactical environment; Autodin is covered as is punched card operation. Various data communications terminals are described and the operation and maintenance is provided for.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic data communication systems (6/79).

AR-1404-0021

TACTICAL COMMUNICATIONS CHIEF BY CORRESPONDENCE

Course Number: J05.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80-Present.

Objectives: To develop technical depth and system orientation in the installation, operation and management of tactical communications systems and networks.

Instruction: Course covers basic communications theory and operation, electromechanical studies to include tactical radio teletypewriter equipment, operation, and maintenance, and military management practices including effective management of resources and techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in basic communications systems, 2 in electromechanics (technical) (6/79).

Related Occupation Codes: 31V.

AR-1404-0022

TACTICAL WIRE OPERATIONS SPECIALIST BY CORRESPONDENCE

Course Number: J10.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80-Present.

Objectives: To provide the knowledge necessary to install, maintain and recover field wire lines. Course also provides teaching of installation and operation of tactical switchboards and radio systems.

Instruction: Course provides instruction in the installation, maintenance and recovery of field wire and field cable line. Included is instruction in the installation, operation and maintenance of telephone local battery switchboards, and tactical FM radio sets.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics (6/79).

Related Occupation Codes: 36K.

AR-1404-0023

Cryptographic Technician by Correspondence

Course Number: 118.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide a working knowledge of COMSEC accounting and management levels as well as the procedural principles in the operation of both tactical and fixed station telecommunication equipment and basic automatic data processing technique.

Instruction: Course provides instruction in basic communications at the operation and management levels and in basic data processing principles and operational techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic communication, 2 in basic data processing techniques (6/79).

AR-1404-0024

Telecommunications Technician by Correspondence

Course Number: 186.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1011LK Present.

Objectives: To provide a working knowledge of COMSEC accounting and management levels as well as the procedural principles in the operation of both tactical and fixed station telecommunication equipment and basic automatic data processing technique.

Instruction: Course provides instruction in basic communications at the operation and management levels and in basic data processing principles and operational techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic communication, 2 in basic data processing techniques (6/79).

AR-1404-0025

Radio Teletypewriter Operator by Correspondence

Course Number: J48.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide basic skills and knowledge necessary for operation of single-channel radio and radio teletypewriter systems.

Instruction: This correspondence course gives instruction in the hook-up, brief checkout, and operation procedures of numerous single channel radio systems and radio teletypewriter systems. The operator is expected to perform basic maintenance such as tightening nuts and screws, inspecting for loose knobs, replacing fuses and frayed cables. The student should also be able to perform such basic preventive type maintenance as cleaning and basic type operator adjustments.

Credit Recommendation: Credit is not recommended due to the limited scope and level of the course (5/79).

Related Occupation Codes: 05C.

AR-1404-0026

Communications Center Officer by Correspondence

Course Number: J18.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide commissioned and warrant officers with a working knowledge in tactical and fixed telecommunications center procedures.

Instruction: Course provides instruction in tactical and fixed telecommunications center procedures.

Credit Recommendation: Credit is not recommended because of the limited nature of the course (6/79).

Related Occupation Codes: 0221.

AR-1404-0027

Pershing Communication Specialist

Course Number: 101-31D20.

Location: Field Artillery School, Fort Sill, OK.

Length: 10 weeks (319 hours).

Exhibit Dates: 11/74–10/79.

Objectives: To train qualified students to select location, install, tune, operate and perform general maintenance on a radio telephone terminal associated with a Pershing missile communication system.

Instruction: The course covers the principles of operation and signal flow for a portable radio telephone terminal associated with a Pershing missile communication system including the telephone typewriter, switchboard, portable motor generator, power amplifier, antenna set-up and other related equipment. The student learns to set-up, operate, tune, and perform general maintenance of the system. The course also includes map reading, topographic analysis and map coordinates and measurements for the purpose of selecting suitable installation sites.

Credit Recommendation: In the vocational certificate category, Credit is recommended on the basis of institutional evaluation (1/80).

Related Occupation Codes: 31D.

AR-1405-0001

Ordnance Officer Orientation

Course Number: 4-9-C21.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 4 weeks (139 hours).

Exhibit Dates: 7/70–12/73.

Objectives: To provide commissioned officers assigned to the Ordnance Corps with initial branch training and orientation in ordnance familiarization and organizational supply and maintenance.

Instruction: Lectures and practical exercises in supply management and maintenance, and military procedures and publications relating to Army ordnance.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in supply management (12/68).

AR-1405-0002

Quartermaster Supply Procedures

Course Number: 10-G-F10.

Location: Quartermaster School, Ft. Lee, VA.

Length: 4 weeks (144 hours).

Exhibit Dates: 5/61–12/68.

Objectives: To provide commissioned officers and civilian personnel with a working knowledge of quartermaster supply, stock control, and related procedures.

Instruction: Lectures and practical exercises in installation supply procedures, supply and distribution procedures, and the Army command management system.

Defense Advanced Disposal
Management Correspondence
Course

Course Number: 8B-F17.

Location: Sponsored by Logistics Management Center, Ft. Lee, VA.

Length: 184 "credit"* hours.

Exhibit Dates: 9/76-Present.

Objectives: To train personnel in the management of property disposal activities.

Instruction: *A "credit" hour is a measured unit of correspondence work. The number of credit hours assigned to a course is the estimated time required for an average student to read assignments and solve the exercises. The term 'credit' does not refer to academic credit hours. Correspondence lessons cover management techniques and skills, Department of Defense disposal program, and management of disposal operations; marketing by and administration of holding activities, property control, materiel processing, and contracting procedures.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in general management (12/76).

AR-1405-0079

Defense Inventory Management Correspondence Course

Course Number: 8B-F11.

Location: Sponsored by Logistics Management Center, Ft. Lee, VA.

Length: 198 "credit"* hours.

Exhibit Dates: 7/76-Present.

Objectives: To provide students with an understanding of the principles and techniques involved in the management of Defense Department materiel inventories.

Instruction: *A "credit" hour is a measured unit of correspondence work. The number of credit hours assigned to a course is the estimated time required for an average student to read assignments and solve the exercises. The term 'credit' does not refer to academic credit hours. Topics include inventory theory, materiel requirements determination, priority determination, procurement cataloging, and inventory management at wholesale and retail levels.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in inventory management (12/76).

AR-1405-0080

Defense Property Disposal Operations Correspondence Course

Course Number: 8G-F1.

Location: Sponsored by Logistics Management Center, Ft. Lee, VA.

Length: 142 "credit"* hours.

Exhibit Dates: 9/76-Present.

Objectives: To train students to perform property disposal activities.

Instruction: *A "credit" hour is a measured unit of correspondence work. The number of credit hours assigned to a course is the estimated time required for an average student to read assignments and solve the exercises. The term 'credit' does not refer to academic credit hours. Correspondence lessons cover disposal responsibilities and processing property for disposal, property disposition, presale action at holding offices and sales offices, sale and contracting procedures, and management controls and operations.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in property disposal management (12/76).

AR-1405-0081

Logistics Executive Development Correspondence Course

Course Number: 8A-F17.

Location: Sponsored by Logistics Management Center, Ft. Lee, VA.

Length: 450 "credit"* hours.

Exhibit Dates: 6/75-Present.

Objectives: To train officers in logistics management.

Instruction: *A "credit" hour is a measured unit of correspondence work. The number of credit hours assigned to a course is the estimated time required for an average student to read assignments and to solve the exercises. The term 'credit' does not refer to academic credit hours. Correspondence lessons cover management principles, financial management, the acquisition process, assets management, economic and statistical principles, and logistics management.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hours in general management, 4 in economic principles and decision making, and 6 in logistics management (12/76); in the graduate degree category, 3 semester hours in general management (12/76).

AR-1405-0082

Army Cataloging
(AMC Cataloging)

Course Number: ALM-58R900.

Location: Logistics Management Center, Ft. Lee, VA.

Length: Self-paced 3 weeks (Averaging about 92 hours).

Exhibit Dates: 7/75-Present.

Objectives: To provide the knowledge and skill necessary to perform supply parts cataloging functions.

Instruction: Programmed instruction and practical exercises covering the Federal Cataloging System, the Defense Integrated Data System, and the Commodity Command Standard System. Initial, intermediate, and final surveys are used to examine the students throughout the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in supply cataloging (12/76).

AR-1405-0083

Commodity Command Standard System (CCSS) Supply Management

Course Number: ALM-54E099.

Location: Logistics Management Center, Ft. Lee, VA.

Length: Self-paced 3 weeks (Averaging about 96 hours).

Exhibit Dates: 4/76-Present.

Objectives: To provide commodity managers with the knowledge required for job performance in the functional field of supply management under a Commodity Command Standard System operating environment.

Instruction: Programmed instruction texts and video taped lectures cover report analysis and problem identification, input preparation, and interface considerations. Lecture conferences and workshops are used for orientations and critiques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in supply management (12/76).

AR-1405-0084

Commodity Command Standard System (CCSS) Stock Control

Course Number: ALM-54429.

Location: Logistics Management Center, Ft. Lee, VA.

Length: Self-paced 2 weeks (Averaging about 76 hours).

Exhibit Dates: 4/76-Present.

Objectives: To provide commodity managers with the knowledge to perform stock control managerial functions within a Commodity Command Standard System operation environment.

Instruction: Programmed instruction and video taped lectures covering related files, input transactions, processing requisition and management reports on a variety of subjects, including inventory and accounting procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in inventory control (12/76).

AR-1405-0085

Commodity Command Standard System (CCSS) Procurement and Production

Course Number: ALM-55110.

Location: Logistics Management Center, Ft. Lee, VA.

Length: Self-paced 3 weeks (Averaging about 96 hours).

Exhibit Dates: 4/76-Present.

Objectives: To enable Commodity Command personnel to acquire the detailed knowledge necessary to employ the automated integrated procurement and production system successfully.

Instruction: Programmed instruction, video taped lectures, and surveys covering the procurement and interface factors of the Commodity Command Standard System.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in procurement procedures (12/76).

AR-1405-0086

Commodity Command Standard System (CCSS) Army Stock Fund

Course Number: ALM-55-H210.

Location: Logistics Management Center, Ft. Lee, VA.

Length: Self-paced 2 weeks (Averaging about 60 hours).

Exhibit Dates: 4/76-Present.

Objectives: To enable the student to acquire the knowledge and skills necessary to perform Army stock fund accounting functions within the Commodity Command Standard ADP System.

Instruction: Lectures, video tapes, programmed instruction, simulations and practical exercises covering the maintenance of automated accounting files, to include preparation of input and evaluation of output. File structure and processes are explained, as well as functional interfaces with supply management, procurement, and inventory control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in stock fund automated accounting procedures (12/76).

AR-1405-0087

DARCOM Depot Physical Inventory Management

Course Number: ALM-58R700.

Location: Logistics Management Center, Ft. Lee, VA.

Length: Self-paced 2 weeks (Averaging about 75 hours).

Exhibit Dates: 12/75-Present.

Objectives: To enable Commodity Command personnel to acquire the detailed knowledge necessary to employ the automated integrated depot physical inventory system.

Instruction: Programmed instruction and practical exercises covering location survey, record audit/matches, materiel release denials, reports and quality control; reinforcement of knowledge gained in a complete physical inventory action is depicted in a computerized simulation; video tape lectures introduce each block of instruction; initial, intermediate, and final surveys are used to examine the students throughout the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in inventory management (12/76).

AR-1405-0088

DARCOM COMMODITY COMMAND PHYSICAL INVENTORY MANAGEMENT

Course Number: ALM-58R00.

Location: Logistics Management Center, Ft. Lee, VA.

Length: Self-paced 2 weeks (Averaging about 53 hours).

Exhibit Dates: 12/75–Present.

Objectives: To enable Commodity Command personnel to acquire the detailed knowledge necessary to employ the automated integrated physical inventory program.

Instruction: Programmed instruction and practical exercises covering requesting/reconciling inventories, receipt processing/control procedures, materiel release denials/zero balance flasher, and quality control. Reinforcement of knowledge gained in the location record audit/match is depicted in an audio tape case; video tape lectures are utilized to introduce each block of instruction; initial, intermediate, and final surveys are used to examine students throughout the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in inventory management (12/76).

AR-1405-0089

ORDNANCE OFFICER (OBC) BASIC MISSILE MATERIEL MANAGEMENT

Course Number: 4-9-C20-71A.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD; Missile and Munitions School, Redstone Arsenal, AL.

Length: 18-22 weeks (809 hours).

Exhibit Dates: 6/77–Present.

Objectives: To prepare newly commissioned officers for duty assignment in missile material maintenance specialty.

Instruction: Phase I training at Aberdeen Proving Ground includes logistical subjects such as support shop operations, direct support supply/maintenance exercises, and logistical assistance, and military subjects such as unit and organizational management, combined arms operation and tactical field training exercises. Phase II at Redstone Arsenal covers missile material and maintenance personnel management. Subjects to include calibration and load testing, unit safety, basic electronics, guided missile fundamentals, nuclear weapons storage and safety, introduction to radar and introduction to various military missile subjects.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (6/79); in the upper-division baccalaureate category, 3 semester hours in management (1/78).

AR-1405-0090

ORDNANCE OFFICER BASIC CHEMICAL

Course Number: 4-9-C20-74A.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD.

Length: 17 weeks (631 hours).

Exhibit Dates: 6/77–Present.

Objectives: To prepare newly commissioned officers for duty assignment in chemical specialty.

Instruction: Topics include logistical subjects such as support shop operations, direct support supply/maintenance exercises and logistical assistance, and military subjects such as unit and organizational management, combined arms operation and tactical field training exercises. Chemical specialty subjects include technical aspects of chemical operations and defense, biological defense, chemical weapons employment, nuclear warfare, radiological defense, NBC material and maintenance and defense operations, and smoke and flame operations.

Credit Recommendation: Pending evaluation.

AR-1405-0091

ORDNANCE OFFICER BASIC MUNITIONS MATERIEL MANAGEMENT

Course Number: 4-9-C20-75A; 4-9-C20-75B.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD; Missile and Munitions School, Redstone Arsenal, AL.

Length: 11 weeks (688 hours).

Exhibit Dates: 6/77–Present.

Objectives: To prepare newly commissioned officers for duty assignment in munitions materiel management.

Instruction: Phase I training at Aberdeen Proving Ground includes logistical subjects such as support shop operations, direct support supply/maintenance exercises, and logistical assistance, and military subjects such as unit and organizational management, combined arms operation and tactical field training exercises. Phase II at Redstone Arsenal covers ammunition identification, functioning, use, safety precautions associated with firing and procedures for destruction.

Credit Recommendation: Pending evaluation.

AR-1405-0092

ORDNANCE OFFICER BASIC ARMAMENT MATERIEL MANAGEMENT

Course Number: 4-9-C20-76A.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD.

Length: 13 weeks (660 hours).

Exhibit Dates: 6/77–Present.

Objective: To prepare newly commissioned officers for duty assignment in armament materiel management.

Instruction: Topics include logistical subjects such as support shop operations, direct support supply/maintenance exercises and logistical assistance, and military subjects such as unit and organizational management, combined arms operation and tactical field training exercises. Armament materiel management specialty provides student with a working knowledge of small arms materiel in the current inventory to include description, characteristics, and principles of operation and functioning of major components and assemblies associated with small arms weapons; of equipment maintenance procedures and maintenance problems, their causes, and solutions; and of test and diagnostic equipment.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in management (1/78).

AR-1405-0093

ORDNANCE OFFICER BASIC TANK AND GROUND MOBILITY MATERIEL MANAGEMENT

Course Number: 4-9-C20-77A; 4-9-C20-77B; 4-9-C20-77C; 4-9-C20-77D.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD.

Length: 16 weeks (603 hours).

Exhibit Dates: 6/77–Present.

Objectives: To prepare newly commissioned officers for duty assignment in tank and ground mobility materiel management specialty.

Instruction: Topics include logistical subjects such as support shop operations, direct support supply/maintenance exercises and logistical assistance, and military subjects such as unit and organizational management, combined arms operation and tactical field training exercises. Tank and ground mobility materiel management subjects include topics to provide the student with general knowledge of the basic principles of design and operation of mechanical, electrical and hydraulic devices and components which are common to major items of military equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in automotive (1/78); in the upper-division baccalaureate category, 3 semester hours in management (1/78).

AR-1405-0094

ORDNANCE OFFICER ADVANCED MISSILE MATERIEL MANAGEMENT, PHASE II

Course Number: 4-9-C22-E.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 14 weeks (444-467 hours).

Exhibit Dates: 7/78–Present.

Objectives: To provide students with knowledge of missile management concepts, including nuclear munitions, research and development, test and evaluation, production and procurement, distribution, maintenance and supply, storage and disposal.

Instruction: Discussion of overall management perspective of missile systems, including introduction to weapon systems, stockpiling, and accountibility of nuclear weapons; missile support systems, including radar logistics, maintenance, and emergency procedures. Support organizations are discussed, including computer assisted maintenance simulation.

Credit Recommendation: No credit is recommended because of the limited, specialized nature of the course (8/79).

AR-1405-0095

COMBAT MISSILE MAINTENANCE (27-CMF) NONCOMMISSIONED OFFICER (NCO) ADVANCED (USMMCS)

Course Number: 1-27-C42.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 10 weeks (324-334 hours).

Exhibit Dates: *Version 1:* 3/78–Present. *Version 2:* 5/75–2/78.

Objectives: To provide enlisted personnel with knowledge of duties and supervisory skills required of a senior NCO in combat missile maintenance.

Instruction: *Version 1:* Provide knowledge of basic missile guidance, control, propulsion, radar, and support systems for various missile systems. Discussion of material management and maintenance of these systems. *Version 2:* Lectures and practical exercises in military subjects to include effective writing, effective speaking, administrative exercises, and management.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in communications arts, 3 in maintenance management, and 2 in materials/supply handling and control (8/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in communication skills (6/79).

Related Occupation Codes: 27B; 27D; 27E; 27F; 27G; 27H.

AR-1405-0096

STANDARD ARMY INTERMEDIATE LEVEL SUPPLY SUBSYSTEM (SAILS) MATERIEL MANAGEMENT CORPS SUPPORT COMMAND (COSCOM)
(SAILS Materiel Management COSCOM)

Course Number: ALM-62W200.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/77–Present.

Objectives: To develop the operational skills of personnel assigned to positions at installations and Corps Support Commands (COSCOMs) within the automated environment of SAILS. Specific emphasis will be devoted to the day-to-day operations in the functional field of supply.

Instruction: This course covers the managerial and operational aspects of SAILS Level A/B operations at the installation materiel management activity. It includes multimedia and individualized instruction in card format I/O controls, requirements and excess determination, file description, ADP techniques, supply related financial reports and systems interface.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in inventory managerial (3/78).

AR-1405-0099

ELECTRICAL/ELECTRONIC DEVICES MAINTENANCE (35-CMF) NONCOMMISSIONED (NCO) BASIC

Course Number: 1-352-C40.

Location: Engineer School, Ft. Belvoir, VA.

Length: 5 weeks (174 hours).

Exhibit Dates: 8/75–Present.

Objectives: To train electrical/electronic device maintenance personnel to supervise the management of repair and maintenance of electrical/electronic devices operations.

Instruction: Conferences and practical exercises in the management and supervision of maintenance and repair operations.

Length: 26 weeks (812–844 hours).

Exhibit Dates: 2/76–Present.

Objectives: To train commissioned officers in advanced ordnance operations.

Instruction: Lectures and practical exercises in advanced ordnance operations including organization for logistics; administration and operations; tactics and staff procedures; management functions and techniques, logistics management, and tank ground mobility track, including electrical materials.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in automotive or heavy equipment repair (1/78); in the upper-division baccalaureate category, 3 semester hours in business organization and management, 3 in supply management, 3 in human relations (1/78).

AR-1408-0079

Project Manager Development

Course Number: ALM-31-0319.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 6 weeks (235 hours).

Exhibit Dates: 11/77–Present.

Objectives: To familiarize personnel with the principal functions associated with Army project management office responsibilities.

Instruction: Lectures and practical exercises in Army acquisition management, systems engineering/logistics management, contract management, financial management and property management.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in systems management orientation (3/78).

AR-1408-0080

Electric Power Production (52-CMF) Noncommissioned Officer (NCO) Basic.

Course Number: 7-521-C40.

Location: Engineer School, Ft. Belvoir, VA.

Length: 5 weeks (174 hours).

Exhibit Dates: 8/75–Present.

Objectives: To train electric power production maintenance personnel to supervise the management of maintenance and repair of electric power production equipment.

Instruction: Conferences and practical exercises in the management and supervision of maintenance and repair operations.

Credit Recommendation: In the vocational certificate category, 1 semester hour in personnel management (9/79); in the lower-division baccalaureate/associate degree category, 1 semester hour in personnel management, 2 in introduction to industrial management (9/79).

AR-1408-0081

Engineer Equipment Maintenance (63-CMF) Noncommissioned Officer (NCO) Basic.

Course Number: 6-634-C40.

Location: Engineer School, Ft. Belvoir, VA.

Length: 6–7 weeks (174–207 hours).

Exhibit Dates: 8/75–Present.

Objectives: To train engineer equipment personnel to supervise the management of repair and maintenance of engineer equipment operations.

Instruction: Conferences and practical exercises in the management and supervision of maintenance and repair operations.

Credit Recommendation: In the vocational certificate category, 1 semester hour in personnel management for both Track A (62B) and Track B(62C) (9/79); in the lower-division baccalaureate/associate degree category, 1 semester hour in personnel management 2 in industrial management, 1 in industrial engineering for Track A(62B), 1 in personnel management, 2 in industrial management for Track B(62C) (9/79).

AR-1408-0082

Communications Electronics Materiel Management Advanced

Course Number: 4B-0A72.

Location: Signal School, Ft. Gordon, GA.

Length: *Version 1:* 26 weeks (473 hours). *Version 2:* 14 weeks (1024 hours).

Exhibit Dates: *Version 1:* 8/78–Present. *Version 2:* 5/77–7/78.

Objectives: To prepare signal officers to administer and train units in providing reliability, maintainability and support of the communications-electronics equipment and develop plans for over hauling or replacement of systems.

Instruction: *All Versions:* Lectures and practical exercises in materiel and procurement planning, supply and inventory management, logistics and maintenance management accounting and records procedures. *Version 1:* Instruction includes areas of organizational effectiveness and training management.

Credit Recommendation: Pending evaluation.

AR-1408-0083

Advanced Investigative Management (Reserve Component)

Course Number: 7H-F12; 830-F9-RC.

Location: Military Police School, Ft. McClellan, AL.

Length: 2 weeks (78 hours).

Exhibit Dates: 4/78–Present.

Objectives: To provide the skills necessary to manage CID activities.

Instruction: Subjects include management of human resources in the investigative process.

Credit Recommendation: Pending evaluation.

AR-1408-0084

Initial Materiel Support Computation

Course Number: ALM-43-0323; ALM-31-0323.

Location: Logistics Management Center, Ft. Lee, VA.

Length: 2 weeks (71–73 hours).

Exhibit Dates: 6/77–Present.

Objectives: To train in the application of the Standard Initial Provisioning (SIP) Model as approved by the Department of the Army.

Instruction: Major emphasis of lectures, conferences, demonstrations and practical exercises is placed on elements of the Standard Initial Provisioning (SIP) Model which are fundamental to the calaculation of provisioned items.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/78).

AR-1408-0085

Advanced Controllership Symposium

Course Number: None.

Location: Army Institute of Administration, Ft. Benjamin Harrison, IN.

Length: 2 weeks (65 hours).

Exhibit Dates: 5/79–Present.

Objectives: To broaden the professional development of commissioned officers and civilian personnel who are qualified comptrollers.

Instruction: Lectures and small group discussions of relevant military comptrollership policies and procedures including current issues, manpower management, budget, financial management and cost analysis.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in comptrollership (2/80).

AR-1409-0001

Clerk-Typist
(Typing and Clerical Procedures—WAC)
(Clerical Procedures and Typing—WAC)

Course Number: 510-71B30; 510-71B20; 510-71B20B; 35-E-3.

Location: Training Center, Ft. Knox, KY; Training Center, Ft. Leonard Wood, MO; Training Center, Ft. Dix, NJ; Training Center, Ft. Jackson, SC; Training Center, Ft. Ord CA; Training Center, Ft. Polk, LA; Training Center, Ft. McClellan, AL.

Length: Self-paced 4–8 weeks (84–287 hours).

Exhibit Dates: 9/55–Present.

Objectives: To train enlisted personnel in the performance of administrative and clerical duties and to increase their typing proficiency to 30 w.p.m.

Instruction: Lectures and practical exercises in typing, clerical procedures, and English grammar.

Credit Recommendation: In the vocational certificate category, 3 semester hours in typing, 3 in clerical practice (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 3 in clerical practice (3/74).

Related Occupation Codes: 70A; 71B.

AR-1409-0002

Basic Army Administration

Course Number: None.

Location: Army Training Centers, Continental U.S..

Length: 8 weeks (280 hours).
Exhibit Dates: 9/62-12/68.
Objectives: To train enlisted personnel as clerk typists.
Instruction: Lectures and practical application of typing, character guidance, troop information, counterinsurgency training, military correspondence, and duplicating machine operation.
Credit Recommendation: In the vocational certificate category, 3 semester hours in office procedures, 3 in typing (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in office procedures, 3 in typing (3/74); in the upper-division baccalaureate category, credit in typing on the basis of institutional evaluation (12/68).

AR-1409-0003

BASIC MORSE CODE

Course Number: 231-F2.
Location: Security Agency School, Ft. Devens, MA.
Length: 13 weeks (456 hours).
Exhibit Dates: 5/70-Present.
Objectives: To train enlisted personnel in the manual operation of international Morse code typewriters.
Instruction: Lectures and practical exercises in administrative processing, security briefing, touch typing, international Morse code receiving, magnetic tape-recorder-reproducer, cut numbers receiving, transmission, modulation, and cryptanalysis.
Credit Recommendation: In the vocational certificate category, 3 semester hours in typing (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in typing (3/74); in the upper-division baccalaureate category, credit in typing on the basis of institutional evaluation (12/68).
Related Occupation Codes: 05D; 05H; 05K.

AR-1409-0004

PROXY APPRENTICESHIP TRAINING

Course Number: 231-F4.
Location: Security Agency School, Ft. Devens, MA.
Length: 7 weeks (275 hours).
Exhibit Dates: 12/67-Present.
Objectives: To qualify personnel as proxy apprentices.
Instruction: Lectures and practical exercises in proxy apprenticeship, including preoperation functions, operator maintenance, review of intercept position tasking, search for and identification of designated signals, receiver operation, identification of activity, reaction, postoperative operator maintenance, position update, and performance of postoperational activities.
Credit Recommendation: In the vocational certificate category, 1 semester hour in typing (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in typing (6/74); in the upper-division baccalaureate category, credit in typing on the basis of institutional evaluation (6/74).
Related Occupation Codes: 05H.

AR-1409-0005

RADIO TELETYPEWRITER OPERATOR (NON MORSE)

Course Number: 201-05F20.
Location: Southeastern Signal School, Ft. Gordon, GA; Signal School, Ft. Gordon, GA.
Length: 10 weeks (353-359 hours).
Exhibit Dates: 11/72-Present.
Objectives: To train enlisted personnel to install, operate, and maintain field radio teletypewriter equipment.
Instruction: Lectures and practical exercises in the operation of a radio teletypewriter. Course includes instruction in general communications, key board operations, radio telephone and teletypewriter procedures, and cryptographic devices.
Credit Recommendation: In the vocational certificate category, 2 semester hours in typing (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in typing (6/74); in the upper-division baccalaureate category, credit in typing on the basis of institutional evaluation (6/74).
Related Occupation Codes: 05F.

AR-1409-0006

COMMUNICATION CENTER SPECIALIST
(Teletype Operation)
(Teletypwriter Operation)

Course Number: 580-72B20; 580-72B10; 11-R-723.1; 11-E-25.
Location: Southeastern Signal School, Ft. Gordon, GA.
Length: 8-12 weeks (280-437 hours).
Exhibit Dates: 1/54-12/74.
Objectives: To train enlisted personnel to operate tactical communication centers and to use cryptographic systems and equipment.
Instruction: Lectures and practical exercises in tactical communication center operations, and in the use of crytographic systems and equipment, including teletypewriting, message handling procedures, communications accounting, cryptographic security and procedures, tape relay procedures, AUTODIN and COMSEC equipment, and basic communications and communications center operations.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in typing (6/74).
Related Occupation Codes: 72B.

AR-1409-0007

MORSE DATA PREPARATION OPERATOR'S TRAINING (AN/GGC-15)

Course Number: 231-F5.
Location: Security Agency School, Ft. Devens, MA.
Length: 3 weeks (105 hours).
Exhibit Dates: 3/64-Present.
Objectives: To train enlisted personnel in the interception and recording of manual Morse signals under critical conditions.
Instruction: Lectures and practical exercises in the interpretation of Morse data. Course includes preoperation readiness, identification of and search for Morse signals; recording; scanning; informing designated recipients; postoperation field update; maintenance and operator handoff; and essential typing training.
Credit Recommendation: In the vocational certificate category, 1 semester hour in typewriting (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in typewriting (6/74).
Related Occupation Codes: 05H.

AR-1409-0008

1. ELECTRONIC WARFARE (EW) SIGNAL INTELLIGENCE INTERCEPTOR, MORSE
2. ELECTRONIC WARFARE (EW) AND CRYPTOLOGIC INTERCEPTOR—MORSE

Course Number: 231-05H10.
Location: Intelligence School, Ft. Devens, MA.
Length: 23-24 weeks (686 hours).
Exhibit Dates: *Version 1:* 4/78-Present. *Version 2:* 10/76-3/78.
Objectives: To train enlisted personnel in the procedures and techniques of copying manual Morse code signals.
Instruction: Topics include Morse code, touch typing, mission awareness, message format, and assorted operational information concerning receivers, antennas, and direction-finding equipment.
Credit Recommendation: *Version 1:* Pending Evaluation. *Version 2:* In the vocational certificate category, 2 semester hours in basic typing (9/77).
Related Occupation Codes: 05H.

AR-1409-0009

1. ELECTRONIC WARFARE (EW) SIGNAL INTELLIGENCE EMITTER IDENTIFIER/LOCATOR
2. ELECTRONIC WARFARE (EW) CRYPTOLOGIC SPECIAL IDENTIFICATION TECHNIQUES OPERATOR

Course Number: 231-05D10.
Location: Intelligence School, Ft. Devens, MA.
Length: *Version 1:* 25 weeks (823 hours). *Version 2:* 31 weeks (972 hours).
Exhibit Dates: *Version 1:* 4/78-Present. *Version 2:* 10/74-3/78.
Objectives: To train enlisted personnel to become special-identification-techniques operators.
Instruction: Instruction in Morse code receiving and sending (20 groups/minute), message format, military science, intelligence and security, and basic typing (20 words/minute).
Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 2 semester hours in basic typing (9/77).
Related Occupation Codes: 05D.

AR-1409-0010

INTERNATIONAL MORSE CODE (IMC) BY CORRESPONDENCE

Course Number: J46.
Location: Institute for Professional Development, Ft. Eustis, VA.
Length: Maximum 104 weeks (Ft. Eustis, VA hours).
Exhibit Dates: 1/80-Present.
Objectives: To provide the necessary knowledge and skills to become proficient in copying International Morse Code (IMC).
Instruction: Teaches the student to copy Morse code through the use of audio-visual and written material.
Credit Recommendation: Credit is not recommended due to the limited scope of the course (6/79).

AR-1511-0001

FOREIGN AREA OFFICER RESERVE COMPONENT

Course Number: 7B-F6.
Location: Institute for Military Assistance, Ft. Bragg, NC.
Length: 4 weeks (117 hours).
Exhibit Dates: 10/77-Present.
Objectives: To prepare reserve officers for foreign area officer assignments.
Instruction: Lectures and practical exercises in area orientation methodolgy; political development; public administration, comparative government; internal conflict

theory and practice; political theory and methodology and comparative foreign policy.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in international relations (2/80).

AR-1511-0002

CIVIL AFFAIRS
(Civil Affairs Officer)

Course Number: *All Versions:* 5D-8105. *Version 2:* 5D-2920; 41-G-F5.

Location: *Version 1:* Institute for Military Assistance, Ft. Bragg, NC. *Version 2:* Civil Affairs School, Ft. Gordon, GA.

Length: *Version 1:* 7 weeks (361-377 hours). *Version 2:* 8 weeks (282-308 hours).

Exhibit Dates: *Version 1:* 3/73-Present. *Version 2:* 7/62-2/73.

Objectives: To train commissioned officers as civil affairs unit commanders and staff officers.

Instruction: *All Versions:* Lectures and practical exercises in civil affairs principles, policies, activities, organization, and procedures for the purpose of operational planning and execution of the civil affairs mission in support of cold, limited, and general war requirements, including civil affairs support of tactical operations and internal defense, and internal development at lower, intermediate, and higher echelons; and civil affairs operations in support of national strategic objectives. *Version 2:* Topics include civil affairs area study in support of U.S. internal defense/development objectives.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in public administration or political science (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in public administration or political science (7/74); in the upper-division baccalaureate category, 6 semester hours in general social science—political science, public administration, economics and sociology (12/68). *Version 2:* In the vocational certificate category, 6 semester hours in public administration or political science (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in public administration or political science (7/74); in the upper-division baccalaureate category, 3 semester hours in military government (12/68).

AR-1511-0003

FOREIGN AREA OFFICER
(Military Assistance Officer Command and Staff)

Course Number: 7B-F3.

Location: Institute for Military Assistance, Ft. Bragg, NC.

Length: 20-22 weeks (662-685 hours).

Exhibit Dates: 5/72-Present.

Objectives: To train officers in the objectives, concepts, procedures, and techniques applicable to security assistance, stability operations, and politico-military activities throughout the conflict spectrum in the international field.

Instruction: Lectures, seminars, and practical exercises in objectives, concepts, procedures, and techniques applicable to security assistance, stability operations, and politico-military activities throughout the conflict spectrum in the international field, divided into 5 course blocks as follows: (1) Conflict and Social Change, including physical geography and population; social change and personality; culture and institutions; theories of growth and development; industrialization; area orientations for Sub-Saharan Africa, Asia, Latin America, and the Middle East; internal conflict; comparative communism; and political development and legal traditions. (2) National Planning Considerations, including developmental agriculture; strategies; human resources and economic development; community development; development planning and administration; participation in the developmental process by the military, host countries, and organized labor; intelligence and concepts of internal defense; subversive insurgent methodology; population protection and resources management; military estimations for defense; counterguerrilla tactical operations; and analysis of U.S. presence in selected countries during stability operations. (3) Security Assistance and Foreign Policy, including international law; security and intelligence agencies; special forces operations; Indochina case study; status of forces; cultural considerations and communication; press relationships; law in security assistance; assistance cycles and planning; fundamentals of programming; cooperative logistics; assistance from service branches; humanitarian assistance operations; U.S. involvement in international organizations; and Chinese People's Republic and Soviet foreign policy. (4) Civil Military Operations, including PSYOP planning, doctrine, and resources; civil affairs; contingency planning; and civil war military operations applications. (5) Specialized Subjects, including security and foreign policy perspectives; ideology conflicts; progress in the nonindustrialized world; modernization; development planning; policy analysis and resource allocation; congressional perspectives on U.S. foreign policy; urban insurgency movements and countermeasures; relation of various departments and agencies to foreign policy; international law in policy decisions; and national security assistance and the media. NOTE: Students select one of the following electives: graduate college subjects, in-house subjects, independent research, or language.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in international relations, 4 in developmental economics, 6 in political science, 6 in interdisciplinary social science (8/74); in the graduate degree category, a total of 6 semester hours to be selected from the following areas of study: international relations (3 semester hours), developmental economics (3 semester hours), political science (3 semester hours), and interdisciplinary social science (3 semester hours) (8/74). Recommendations of credit are maximum figures. The amount actually accepted for transfer depends upon the applicant's future goals and regulations of the admitting institution on transfer credit.

AR-1511-0004

ARMY WAR COLLEGE NONRESIDENT PROGRAM

Course Number: None.

Location: Army War College, Carlisle Barracks, PA.

Length: 104 weeks.

Exhibit Dates: 7/73-Present.

Objectives: To train officers in the social sciences (with emphasis on international relations), in international policy and major world areas, and in military history, strategy, and management.

Instruction: Seminars and individualized reading and student research in the social sciences (with emphasis on international relations), in international policy and major world areas, and in military history, strategy, and management. The program spans two years, with a two-week seminar at the War College at the end of each year of correspondence study. The first year covers the domestic base and the international frame of reference of U.S. politico-military relationships and the cultural, political, and strategic factors which have significance for U.S. politico-military policy, including economics of national security, the bases of Soviet power and its international applications, and the Americas, the People's Republic of China, the states of Asia, and the Pacific area. The second year includes the history and concepts of military strategy and the application of such concepts to present and future problems of military policy and planning; management principles and theory, with applications to defense management; and extensive research on proposed topics.

Credit Recommendation: In the upper-division baccalaureate category, for the first year course work, 15 semester hours in multidisciplinary social science or international relations; for the second year course work, 3 semester hours in management, 9 in advanced military history (8/74); in the graduate degree category, for the first year course work, 9 semester hours in multidisciplinary social science or international relations; for the second year course work, 3 semester hours in management, 6 in advanced military history; for the research paper, 0-3 semester hours based upon the admitting institution's review of the applicant's paper (8/74). It is recommended that the receiving institution delay awarding credit until the student has successfully completed one semester of graduate work. Credit granted for thesis should be contingent upon the graduate school's evaluation of the research paper. Recommendations of credit are maximum figures. The amount actually accepted for transfer depends upon the applicant's future academic goals and the regulations of the admitting institution on transfer credit. No credit, undergraduate or graduate, should be given if the entire course is not successfully completed.

AR-1511-0005

U.S. ARMY WAR COLLEGE

Course Number: None.

Location: U.S. Army War College, Carlisle Barracks, PA.

Length: *Version 1:* 45-46 weeks. *Version 2:* 45-46 weeks. *Version 3:* 45 weeks. *Version 4:* 42-45 weeks.

Exhibit Dates: *Version 1:* 8/75-Present. *Version 2:* 8/68-7/75. *Version 3:* 8/67-7/68. *Version 4:* 5/57-7/67.

Objectives: To train officers in the international and domestic factors influencing national security and the achievement of national objectives, and in military contributions and strategy development.

Instruction: Lectures, seminars, readings, and student research in the international and domestic factors influencing national security and the achievement of national objectives, and in military contributions and strategy development.

Credit Recommendation: *Version 1:* In the graduate degree category, for the four courses of the common overview, 6 semester hours in American political, social, and economic issues, 6 in advanced military history and strategy, 6 in American foreign and military policy, 6 in public and business administration and management; 2 semester hours for each elective course completed based on the receiving institution's review of the student's course materials; 3 semester hours for participation in the oral history project; 0-6 semester hours for the research project based on the receiving institution's review of the project paper (1/76). Recommendations of credit are maximum figures. The amount actually accepted for transfer depends upon the applicant's future academic goals and the regulations of the admitting institution on transfer credit. *Version 2:* In the upper-division baccalaureate category, 30 semester hours, with a suggested division as follows: 9 semester hours in U.S. government, 3 in international relations, 9 in U.S. foreign relations, 3 in communist states, 3 in [illegible]eseminar, 3 in management (8/74); in the graduate degree category, 3-12 semester hours in international or public affairs, with the maximum credit to be apportioned as follows: 6 semester hours for the Core Curriculum plus the Military Strategy and Command and Management seminars, 3 in research and thesis; 3 for any combination of two of the following elective courses: Political Systems and National Security (government or political science curriculum), Economics of National Security (economics curriculum), Social Factors and National Security (sociology curriculum), International Law and National Security (international law curriculum), Management Information Systems (business curriculum), Analytical Techniques of Management (business curriculum), and Resource Management and Control (business curriculum) (8/74). Credit granted for thesis should be contingent upon the graduate school's evaluation of the research paper. *Version 3:* In the upper-division baccalaureate category, 6 semester hours in social science survey, 3 in recent history, 3 in economics, 3 in business administration, 3 in political science (including international relations), and credit for the following electives on the basis of institutional examination (NOTE: Maximum credit for each course is 3 semester hours, and credit granted for electives should not exceed 6 semester hours): Communicative Arts (speech curriculum), Political Systems and National Security (government or political science curriculum), Economics of National Security (economics curriculum), Social Factors and National Security (sociology curriculum), International Law and National Security (international law curriculum), Management Information Systems (business curriculum), Analytical Techniques of Management (business curriculum), and Resource Management and Control (business curriculum) (12/68). *Version 4:* In the upper-division baccalaureate category, 6 semester hours in social science survey, 3 in recent history, 3 in economics, 3 in business administration, 6 in political science (including international relations), and credit for the following electives on the basis of institutional examination (NOTE: Maximum credit for each course is 3 semester hours, and credit granted for electives should not exceed 6 semester hours): Communicative arts (speech curriculum), Political Systems and National Security (government or political science curriculum), Economics of National Security (economics curriculum), Social Factors and National Security (sociology curriculum), International Law and National Security (international law curriculum), Management Information System (business curriculum), Analytical Techniques of Management (business curriculum), and Resource Management and Control (business curriculum) (12/68).

   (Psychological Operations Officer)

Course Number: *Version 1:* 3A-48B. *Version 2:* 3A-9305-A; 3A-9305. *Version 3:* 3A-9305-A; 3A-9305.

Location: *Version 1:* Institute for Military Assistance, Ft. Bragg, NC. *Version 2:* Institute for Military Assistance, Ft. Bragg, NC. *Version 3:* Special Warfare School, Ft. Bragg, NC.

Length: *Version 1:* 10-12 weeks (338-401 hours). *Version 2:* 12 weeks (555-585 hours). *Version 3:* 10-12 weeks (500-591 hours).

Exhibit Dates: *Version 1:* 10/77-Present. *Version 2:* 8/72-9/77. *Version 3:* 2/64-7/72.

Objectives: To train officers for command and staff positions in psychological operations teams in foreign countries.

Instruction: Lectures and practical exercises in psychological operations doctrine, concepts, procedures, organization, capabilities, and employment in support of military operations; analysis of foreign audiences; propaganda media development, production, and employment; and psychological operations effectiveness evaluation.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 6 semester hours in cross-cultural communications, including sociology (2/80). *Version 2:* In the upper-division baccalaureate category, 9 semester hours in cross-cultural communications, including anthropology, social psychology, and sociology (5/74). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in social psychology, and credit in communications on the basis of institutional evaluation (12/68).

AR-1512-0002

Psychological Operations Enlisted

Course Number: *All Versions:* 244-F6. *Version 2:* 33-R-F11.

Location: *Version 1:* Institute for Military Assistance, Ft. Bragg, NC. *Version 2:* Special Warfare School, Ft. Bragg, NC.

Length: *Version 1:* 2 weeks (70-72 hours). *Version 2:* 3-4 weeks (108-140 hours).

Exhibit Dates: *Version 1:* 9/71-Present. *Version 2:* 5/64-8/71.

Objectives: To train enlisted personnel to assist in the development and dissemination of propaganda information.

Instruction: Lectures and practical exercises in propaganda information development and dissemination, including psychological operations introduction, factors of human behavior and social organization, propaganda theory, intelligence for psychological operations, and planning and media use.

Credit Recommendation: *All Versions:* Credit is not recommended because of the limited technical nature of the course (5/74). *Version 2:* In the upper-division baccalaureate category, credit in social psychology on the basis of institutional evaluation (12/68).

Related Occupation Codes: 11F; 32H; 35B; 71B; 71Q; 71R; 71L; 81E; 83D; 83F; 83Z; 84D; 84F; 96B; 04B; 04C; 00Z; 96C.

AR-1512-0003

Psychological Operations Staff Officer

Course Number: *Version 1:* 3A-F28. *Version 2:* 3A-9305-B.

Location: *Version 1:* Institute for Military Assistance, Ft. Bragg, NC; Special Warfare School, Ft. Bragg, NC.

Length: *Version 1:* 10 weeks (340 hours). *Version 2:* 15 weeks (532 hours).

Exhibit Dates: *Version 1:* 9/71-Present. *Version 2:* 5/68-8/71.

Objectives: To train commissioned officers with baccalaureate degrees to be psychological operations staff officers in major units and headquarters.

Instruction: Lectures and practical exercises in psychological operations concepts, propaganda media, social science, US policy and US agencies supporting psychological operations, foreign propaganda, and internal defense development doctrine and techniques.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in political science (5/74). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in social psychology, and credit in political science on the basis of institutional evaluation (12/68).

AR-1512-0004

Clinical Psychology Procedures
(Clinical Psychology Enlisted)

Course Number: 302-91G20; 8-R-915.1; 8-E-16.

Location: Medical Field Service School, Ft. Sam Houston, TX.

Length: 7-8 weeks (280-352 hours).

Exhibit Dates: 11/55-12/68.

Objectives: To train enlisted personnel in clinical psychology procedures.

Instruction: Lectures and practical exercises in neuropsychiatric nursing, neuropsychiatry, personality development, psychology, and social work.

Credit Recommendation: In the vocational certificate category, 3 semester hours in psychology, 3 in tests and measurement, and additional credit in psychology on the basis of institutional examination for social worker or occupational therapy students (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in psychology, 3 in tests and measurement, and additional credit in psychology on the basis of institutional examination for social worker or occupational therapy students (7/74); in the upper-division baccalaureate category, 3 semester hours in abnormal psychology (12/68).

AR-1512-0005

Military Assistance Training Advisor Psychological Operations Orientation

Course Number: None.

Location: Special Warfare School, Ft. Bragg, NC.

Length: 6 weeks (206-225 hours).

Exhibit Dates: 2/66-12/68.

Objectives: To train commissioned officers as psychological operations advisors in the Republic of Vietnam.

Instruction: Lectures and practical exercises in the performance of psychological operations in the Republic of Vietnam, including area study, psychological operations, counterinsurgency operations, civil affairs, analysis of current propaganda, psychological operations planning, and the theory and practice of communism.

Credit Recommendation: In the vocational certificate category, 2 semester hours in social psychology on the basis of institutional evaluation (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in social psychology on the basis of institutional evaluation (7/74); in the upper-division baccalaureate category, 2 semester hours in social psychology (12/68).

AR-1512-0006

Behavioral Science Specialist
(Social Work/Psychology Procedures)

Course Number: 302-91G10; 302-91G20.

Location: Academy of Health Sciences, Ft. Sam Houston, TX; Medical Field Service School, Ft. Sam Houston, TX.

Length: *Version 1:* 10 weeks (369 hours). *Version 2:* 10 weeks (440 hours). *Version 3:* 8 weeks (352 hours). *Version 4:* 10 weeks (440 hours).

Exhibit Dates: *Version 1:* 2/76-Present. *Version 2:* 8/72-1/76. *Version 3:* 4/72-7/72. *Version 4:* 2/67-3/72.

Objectives: To train enlisted personnel in social, psychological, and psychiatric principles applicable to military problems.

Instruction: *All Versions:* Lectures and practical exercises in social, psychological, and psychiatric principles, including organization and ethics of medicine; childhood, adolescent, and adult behavior development; basic sociology and group concepts; culture and society; personality disorders and mental illness; psychological, physiological, and social factors influencing behavior; expressions of mental illness; observation and interviewing techniques, personality and intelligence tests and testing, and administrative procedures. *Version 1:* Includes drug abuse treatment, skill mastery, human development. *Version 2:* Includes behavioral problem areas (race relations, drug abuse, clinical problems) and corrections, crisis intervention, behavior modification, training group participation, and psychological theories. *Version 3:* Includes behavioral problem areas (race relations, drug abuse, clinical problems) and corrections, crisis intervention, behavior modification, and training group participation. *Version 4:* Includes military law and additional administrative procedures, and principles of research.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in sociology, 3 in psychology, 4 in psychological testing, 6 in clinical psychology and counseling (6/77). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in human development, 3 in counseling and testing, 3 in interviewing skills and techniques, 3 in social or abnormal psychology, and 1 in methods of clinical intervention (8/74). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in human development, 3 in counseling and testing, 3 in interviewing skills and techniques, 3 in social or abnormal psychology, 1 in methods of clinical intervention, and 2 in supervised clinical experience (8/74). *Version 4:* In the lower-division baccalaureate/associate degree category, 3 semester hours in human development, 3 in counseling and testing, 3 in interviewing skills and techniques, and 3 in social or abnormal psychology (8/74); in the upper-division baccalaureate category, 3 semester hours in abnormal psychology (12/68).

Related Occupation Codes: 91G.

AR-1512-0007

Reserve Component Psychological Operations
(Nonresident/Resident)

Course Number: 3A-48BB.

Location: Institute for Military Assistance, Ft. Bragg, NC.
Length: 4 weeks (144 hours).
Exhibit Dates: 1/77–Present.
Objectives: To train reserve officers for command and staff positions in psychological operations teams in foreign countries.
Instruction: Lectures and practical exercises in psychological operations doctrine, concepts, procedures, organization, capabilities and employment in support of military operations; analysis of foreign audiences; propaganda media development, production and employment and psychological operations effectiveness evaluation.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in cross cultural communications (2/80).

AR-1513-0001

ASSOCIATE CHAPLAIN OFFICER CAREER
Course Number: *Version 1:* 5-16-C23. *Version 2:* 16-A-C23.
Location: Chaplain School, Ft. Hamilton, NY; Chaplain School, Ft. Slocum, NY.
Length: 10 weeks (350–358 hours).
Exhibit Dates: 2/62–12/68.
Objectives: To train commissioned officers and civilians in the administration and operation of special services activities.
Instruction: Lectures and practical exercises in the administration and operation of special services activities, including special subjects, organization and administration, funds and budgets, special services programs, and special activities at major command, army, and theater levels.
Credit Recommendation: In the vocational certificate category, 2 semester hours in guidance and counseling, 3 in contemporary Western religions (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in guidance and counseling, 3 in contemporary Western religions (8/74); in the upper-division baccalaureate category, 2 semester hours in guidance and counseling, 3 in contemporary Western religions (8/74).

AR-1513-0002

PSYCHIATRIC SOCIAL WORK ENLISTED
(Social Work Enlisted)
(Social Work Procedures)
Course Number: 8-R-916.1; 8-E-15.
Location: Medical Service School, Ft. Sam Houston, TX.
Length: 8–16 weeks (352–704 hours).
Exhibit Dates: 1/53–1/67.
Objectives: To train enlisted personnel to assist social workers in obtaining information for individual social histories and to assist in treatments.
Instruction: Lectures and practical exercises in methods of obtaining information for individual social histories and in treatment procedures, including administration and personnel management; orientation to medical terminology; structure and function of the human body; growth and development; diseases; fundamental principles of nursing and observation, with emphasis on neuropsychiatric disorders and behavior abnormalities; case conferences; anxiety and mechanisms of defense; biological, social, cultural, and psychological effects on personality; differentiation between normal and abnormal behavior; and social work orientation, interviewing and data recording, methods of research, and clinical applications involving patient situations.
Credit Recommendation: In the vocational certificate category, 3 semester hours in abnormal psychology, 3 in neuropsychiatric nursing, and 9 in social work (8/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in abnormal psychology, 3 in neuropsychiatric nursing, and 9 in social work (8/74); in the upper-division baccalaureate category, 3 semester hours in abnormal psychology (12/68).

AR-1513-0003

CIVIC ACTION
Course Number: 5D-F2; 41-I-F7.
Location: Civil Affairs School, Ft. Gordon, GA.
Length: 6 weeks (203 hours).
Exhibit Dates: 7/64–Present.
Objectives: To provide personnel with a working knowledge in planning, developing, programming, and administering military civic action programs and activities.
Instruction: Lectures and practical exercises in internal defense and development; relationship of civil affairs to the functions of government; civil affairs operations; organizations and activities involved in internal defense and development; and military civic action in support of internal defense and development operations.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours as an elective in social studies (7/74).

AR-1513-0004

DISTRICT AND CIVIL AFFAIRS ADVISOR (VIETNAM)
(Civil Affairs Advisor, Vietnam)
Course Number: None.
Location: Civil Affairs School, Ft. Gordon, GA.
Length: 6 weeks (210–216 hours).
Exhibit Dates: 10/65–Present.
Objectives: To prepare personnel to serve as advisors and civil affairs officers in the Republic of Vietnam.
Instruction: Lectures and practical exercises to include fundamentals of insurgency; Republic of Vietnam, United States, and Free World organizations; advisor-counterpart relations and internal defense and development operations.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours as an elective in social science (7/74).

AR-1513-0005

COMMUNITY SERVICE
Course Number: 5H-F1.
Location: *Version 1:* Institute of Administration, Ft. Benjamin Harrison, IN. *Version 2:* Academy of Health Sciences, Ft. Sam Houston, TX.
Length: 2 weeks (72–81 hours).
Exhibit Dates: *Version 1:* 3/78–7/79. *Version 2:* 7/76–2/78.
Objectives: To provide personnel with a working knowledge of concepts, mission, and goals of an Army community service program.
Instruction: *Version 1:* Lectures and practical exercises to orient military and civilian personnel with need for and availability of community human services. *Version 2:* Lectures and practical exercises in program planning and development, program management principles and techniques, and the delivery of human services in response to community needs.
Credit Recommendation: *Version 1:* Credit is not recommended because of the limited, specialized nature of the course (2/80). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in principles and techniques of management, 1 in introduction to sociology (6/77).

AR-1601-0001

MAINTENANCE ENGINEERING ANALYSIS FOR INTEGRATED LOGISTICS SUPPORT
Course Number: None.
Location: Logistics Management Center, Ft. Lee, VA.
Length: 4 weeks (139 hours).
Exhibit Dates: 4/71–Present.
Objectives: To provide maintenance engineers with training in integrated logistics support and system engineering techniques as applied to weapon systems life-cycle management.
Instruction: Lectures and practical exercises in applied integrated logistics support and system engineering, including development, use, and dangers of mathematical simulation support models; maintenance support planning effectiveness; and the purpose and role of maintenance engineering in accomplishing total integrated logistics support.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in industrial engineering (2/74).

AR-1601-0002

DEFENSE SPECTROMETRIC OIL ANALYSIS OPERATOR/EVALUATOR
Course Number: 8B-F28; 491-F2.
Location: Quartermaster School, Ft. Lee, VA.
Length: *Version 1:* 2–5 weeks (87–195 hours). *Version 2:* 1–4 weeks (44-136 hours).
Exhibit Dates: *Version 1:* 7/73–Present. *Version 2:* 6/72–6/73.
Objectives: To train personnel in spectrometric oil analysis.
Instruction: Lectures and practical exercises in the principles, procedures, and operation of fluid analysis spectrometers, and in the techniques used in spectrometric analysis of used oils for wear-metal content, including general concepts and evaluation of spectrometric results, functional groups familiarization and operation of the A/E 35U-3 fluid analysis spectrometer, and operation and component functions of the atomic absorption spectrometer.
Credit Recommendation: *Version 1:* In the vocational certificate category, certificate in chemical or petroleum technology (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in chemical or petroleum technology (6/74). *Version 2:* In the vocational certificate category, certificate in chemical or petroleum technology (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in chemical or petroleum technology (6/74).
Related Occupation Codes: 92C.

AR-1601-0003

PETROLEUM DISTRIBUTION SUPERVISION
Course Number: 821-F1.
Location: Quartermaster School, Ft. Lee, VA.
Length: 6 weeks (210 hours).
Exhibit Dates: 7/67–Present.
Objectives: To train enlisted personnel to supervise the receipt, storage, and issue of petroleum products and the operation of cross-country pipelines.
Instruction: Lectures and practical exercises in the supervision and operation of pe-

troleum pipelines, including general petroleum subjects, pipeline and terminal operations, fuel system supply point, tank vehicles, supervisory performance exercise, gaging and sampling, pump station operation, general laboratory subjects and basic laboratory tests, petroleum supply in the combat zone, and quality surveillance and laboratory operations.

Credit Recommendation: In the vocational certificate category, 4 semester hours as an elective in industrial technology (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in industrial technology (6/74).

AR-1601-0004

Forensic Chemist
(Chemical Analyst)

Course Number: None.
Location: Criminal Investigation Laboratory, Ft. Gordon, GA.
Length: 27 weeks (996 hours).
Exhibit Dates: 11/71–12/76.
Objectives: To qualify selected warrant officers and enlisted personnel as forensic chemists accepted as expert witnesses in forensic chemical analysis before judicial proceedings.
Instruction: Subjects include orientation and theory of the spectrum, optical system of spectograph, double and single path prisms, gratings and recording devices, theory and use of absorption spectrum tables, specimen preparation techniques, x-ray diffraction techniques gas ,liquid chromatography including qualitative and quantitative analysis, photomicroscopy, theory of microscopy, light sources, specimen preparations, examinations utilizing flurometry, polarimetry and refractometry, qualitative analysis of enzymes and hemoglobins, study and comparison of hairs, fibers and minerals.
Credit Recommendation: In the upper-division baccalaureate category, 9 semester hours in forensic chemistry or forensic science (4/78).
Related Occupation Codes: 951G; 951C.

AR-1601-0005

Petroleum Storage Specialist, Skill Development Base

Course Number: 821-76W20-I.
Location: Quartermaster School, Ft. Lee, VA.
Length: 12 weeks (427 hours).
Exhibit Dates: 12/68–Present.
Objectives: To train personnel to perform as petroleum storage supervisors.
Instruction: Lectures and practical exercises in petroleum operations, including exercise of command; leadership; internal defense and development; field training; general petroleum subjects; supply point operations; pipeline and terminal operations; chemical, biological, radiological operations; small-unit ambush and counterambush tactics; squad battle drill; petroleum handling equipment and procedures exercise; and pump station operations.
Credit Recommendation: In the vocational certificate category, certificate in mechanical and petroleum technology (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in mechanical and petroleum technology (6/74).
Related Occupation Codes: 76W.

AR-1601-0006

Advanced Geodetic Surveyor

Course Number: 4M-F1; 412-F2.
Location: Engineer School, Ft. Belvoir, VA.
Length: 20 weeks (783 hours).
Exhibit Dates: 1/67–11/73.
Objectives: To train warrant officers and senior noncommissioned officers in advanced geodetic survey techniques.
Instruction: Lectures and practical exercises in advanced geodetic surveying techniques, including map compiling, vertical and horizontal control surveys, gravity, astronomic observations, and mathematics.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 15 semester hours in geodesy or geodetic astronomy (5/74); in the upper-division baccalaureate category, 6 semester hours in geodesy, 4 in geodetic astronomy (12/68).
Related Occupation Codes: 821A.

AR-1601-0007

Topographic Engineer Officer

Course Number: 4M-7915; 5-A-7915.
Location: Engineer School, Ft. Belvoir, VA.
Length: 12 weeks (409–458 hours).
Exhibit Dates: 1/68–12/73.
Objectives: To provide officers with advanced training in surveying, photogrammetry, and cartography.
Instruction: Lectures and practical exercises in geodetic surveying, triangulation and astronomic observations, gravity surveying, map compilation and reproduction, color separation, care and operation of camera and equipment, and layout and offset press.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 12 semester hours in geodetic surveying, photogammetry, or cartography (5/74); in the upper-division baccalaureate category, 3 semester hours in geodetic surveying, 3 in cartography (12/68).

AR-1601-0008

Soils Analysis
(Soils Technician)

Course Number: 491-51G20; 5-R-517.1; 5-E-54.
Location: Engineer School, Ft. Belvoir, VA.
Length: 8–9 weeks (266–396 hours).
Exhibit Dates: 1/53–Present.
Objectives: To train enlisted personnel in analysis of soils, aggregates, concrete and allied construction materials for use in design, control, and evaluation of roads and airfields.
Instruction: Conferences and practical exercises in geology, unified soil classification system, California bearing ratio, various soil tests, horizontal construction emphasizing drainage systems, concrete and bituminous materials properties and testing, and the Marshall stability method of mix design.
Credit Recommendation: In the vocational certificate category, 4 semester hours as an elective in general science or credit in soil testing laboratory (9/79); in the lower-division baccalaureate/associate degree category, 4 semester hours as an elective in general science or credit in soil testing laboratory (9/79); in the upper-division baccalaureate category, 4 semester hours as an elective in general science or credit in soil testing laboratory (9/79).
Related Occupation Codes: 51G; 51Q.

AR-1601-0009

Soils Analyst Skill Development Base
(Soils Analyst Noncommissioned Officer (NCO) Candidate)

Course Number: 491-51G20-I.
Location: Engineer School, Ft. Belvoir, VA.
Length: 12 weeks (466–468 hours).
Exhibit Dates: 1/68–Present.
Objectives: To train enlisted personnel in soil analysis.
Instruction: Lectures and laboratory in soil analysis and conditions and construction procedures for concrete. Topics include hydrologic features of the earth; soil exploration; soils compaction; earthwork analysis as it pertains to roads and airfields; and soil engineering problems, including management of flexible pavements and methods for determining runoff. Laboratory and field experiences include performance of soil exploration, inspection techniques, and quality control testing.
Credit Recommendation: In the vocational certificate category, 4 semester hours in soils analysis laboratory (5/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in soils analysis laboratory (5/74); in the upper-division baccalaureate category, credit in soils analysis laboratory on the basis of institutional examination (12/68).
Related Occupation Codes: 51G.

AR-1601-0010

Construction Surveyor Noncommissioned Officer (NCO)/Supervisor Candidate
(Construction Surveyor Skill Development Base)
(Construction Surveyor Noncommissioned Officer (NCO) Candidate)

Course Number: 412-82B40-I.
Location: Engineer School, Ft. Belvoir, VA.
Length: 14 weeks (559–566 hours).
Exhibit Dates: 1/68–Present.
Objectives: To train personnel to perform as construction surveying supervisors.
Instruction: Lectures and practical exercises in principles and procedures of surveying, including construction layout; supply and administration; combat operations, leadership, and counterinsurgency; combat support operations; protective mine warfare, booby trapping, and field fortifications, command indoctrination; methods of instruction; map reading and land navigation; and instrument adjustment.
Credit Recommendation: In the vocational certificate category, 6 semester hours in construction surveying (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in construction surveying (5/74); in the upper-division baccalaureate category, 3 semester hours in construction surveying (12/68).
Related Occupation Codes: 82B; 82C.

AR-1601-0011

Engineer Graphics Warrant Officer Intermediate

Course Number: 4-5-C30.
Location: Engineer School, Ft. Belvoir, VA.
Length: 6 weeks (213 hours).
Exhibit Dates: 12/70–Present.
Objectives: To train engineer warrant officers who are qualified as photomapping, survey, or map reproduction technicians to manage graphics operations.

Instruction: Lectures and practical exercises in management and its application to graphics operations, including maintenance management, geodetic surveying, photogrammetry, reproduction, topographic management, automatic data processing, signal communications, and weapons training and mine warfare.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in geodetic surveying and photogrammetry (5/74); in the upper-division baccalaureate category, 2 semester hours in geodetic surveying and photogrammetry (5/74).

Related Occupation Codes: 811A.

AR-1601-0012

Terrain Analyst Skill Development Base

(Terrain Analyst Noncommissioned Officer (NCO) Candidate)

Course Number: 491-51Q20-I.

Location: Engineer School, Ft. Belvoir, VA.

Length: 14 weeks (523 hours).

Exhibit Dates: 4/68–Present.

Objectives: To train enlisted personnel who are qualified as soils analysts to perform as terrain analysis supervisors and technicians.

Instruction: Lectures and practical exercises in the duties of terrain analysis supervisors and technicians, including map reading, aerial photograph interpretation (soil and land form identification), preparation of slope maps, amphibious operations, leadership and counterinsurgency, combat operations, and analysis of various terrains.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in air photographic soil interpretation (5/74); in the upper-division baccalaureate category, 6 semester hours in air photographic soil interpretation (5/74).

Related Occupation Codes: 51G; 51Q.

AR-1601-0013

1. Combat Engineering (12-CMF) Noncommissioned Officer (NCO) Advanced
2. Combat Engineering (CE-CMF) Noncommissioned Officer (NCO) Advanced

Course Number: *Version 1:* 0-12-C42. *Version 2:* 0-CE-C42.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 10 weeks (325–326 hours). *Version 2:* 12 weeks (379 hours).

Exhibit Dates: *Version 1:* 4/77–Present. *Version 2:* 6/72–3/77.

Objectives: To train selected enlisted personnel in construction engineering to support combat operations.

Instruction: *Version 1:* Conferences, seminars, and demonstrations in construction engineering to support combat operations including general duties, field engineering, combat operations, tactical engineering such as camouflage, bunkering, demolitions, bridging, barrier and denial operations, combat construction management employing CPM for projects utilizing bituminous surface treatment equipment, earthworming equipment, lifting and trading equipment, soil properties, horizontal and vertical construction for Track A programs. Track B program is similar to Track A except ADM operations are substituted for soils and vertical construction projects. *Version 2:* Lectures and practical exercises in construction engineering, including management, map reading, soils engineering, concrete mixes, reinforcement and form work, bridges and bridge classification, building structures, critical path methods, construction equipment utilization, demolition, and combat engineering.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in basic (general) construction for Track A or Track B (9/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in general construction management for Track A or Track B (9/79); in the upper-division baccalaureate category, 4 semester hours in construction management for Track A; 3 semester hours in construction management for Track B (9/79). *Version 2:* In the vocational certificate category, 2 semester hours in general construction (5/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in general construction (5/74); in the upper-division baccalaureate category, 3 semester hours in general construction (5/74).

Related Occupation Codes: 12B; 12C; 12D; 12E; 12F.

AR-1601-0014

Engineer Noncommissioned Officer (NCO)

Course Number: 710-F1.

Location: Engineer School, Ft. Belvoir, VA.

Length: 14–16 weeks (551–586 hours).

Exhibit Dates: 5/66–Present.

Objectives: To train noncommissioned officers to supervise general construction.

Instruction: Lectures and practical exercises in construction surveys, sketching and drawings; rigging; explosives and demolition; floating equipage; soils and geology; roads and airfields; flexible pavements, concrete mix design and framework; bridges and bridge classification; buildings and construction; and construction management.

Credit Recommendation: In the vocational certificate category, 3 semester hours in engineering construction (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in engineering construction (5/74); in the upper-division baccalaureate category, 3 semester hours in engineering construction (12/68).

Related Occupation Codes: 12B; 12C; 12D; 12E; 12F; 12Z; 00Z; 81B; 82B; 51B; 51C; 51D; 51E; 51G; 51F; 51H; 51J; 51K; 51L; 51N; 51P; 51R; 53B; 53C; 62D; 62E; 62F; 62G; 62H; 62J; 62K; 62L; 62M; 62N; 52B; 52C; 52D; 52E.

AR-1601-0015

Multiplex Map Compiling

Course Number: 5-E-21.

Location: Engineer School, Ft. Belvoir, VA.

Length: 10 weeks (370–400 hours).

Exhibit Dates: 1/54–12/68.

Objectives: To train enlisted personnel in the theory and techniques of map compiling.

Instruction: Lectures and practical exercises in map preparation using multiplex equipment, including introduction to multiplex mapping, principles of multiplex, operation of multiplex, extension of control, multiplex mapping problem, aerial cameras, aerial photos, photogrammetry and stereoscopy, reduction printing, multiplex equipment, optical principles, logical contouring, control, projections and girds, and interior orientation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in aerial mapping (5/74); in the upper-division baccalaureate category, 4 semester hours in aerial mapping (12/68).

AR-1601-0016

Artillery Survey Noncommissioned Officer (NCO)

Course Number: 412-F1; 6-R-F34.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 4 weeks (148–157 hours).

Exhibit Dates: 4/64–12/68.

Objectives: To train personnel to supervise, coordinate, and participate in the operations of an artillery survey party, battery detail, or survey information center.

Instruction: Lectures and practical exercises in artillery survey, including mathematics, survey computations with the MSR, maps, use of UTM grid reference and grid coordinates, restitution, map and aerial photograph reading, equipment, traverse methods and computations, traverse adjustment, triangulation, astronomy, artillery battalion survey, division artillery survey, corps artillery survey, and demonstrations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in general surveying (5/74); in the upper-division baccalaureate category, 2 semester hours in general surveying (12/68).

1. Engineer Officer Advanced
2. Engineer Officer Advanced
3. Engineer Officer Career
4. Engineer Officer Advanced

Course Number: *Version 1:* 4-5-C22. *Version 2:* 4-5-C22. *Version 3:* 4-5-C22; 5-A-C22. *Version 4:* 5-A-C4; 5-O-3.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 26 weeks (796–797 hours). *Version 2:* 32 weeks (1003–1077 hours). *Version 3:* 23–29 weeks (809–830 hours). *Version 4:* 39 weeks (1306–1313 hours).

Exhibit Dates: *Version 1:* 8/75–Present. *Version 2:* 6/67–7/75. *Version 3:* 6/61–5/67. *Version 4:* 7/56–5/61.

Objectives: To train commissioned officers in training management and selected topics of a general nature.

Instruction: and practical exercises in civil engineering, including geology, soils, roads, airfields, drainage, flexible and rigid pavements, construction management, bridges, utilities, mapping, automatic data processing, and electives program.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in introductory civil engineering (9/79); in the upper-division baccalaureate category, 3 semester hours in business organization and management (9/79) *Version 2:* In the lower-division baccalaureate/associate degree category, 15 semester hours in civil engineering (5/74); in the upper-division baccalaureate category, 3 semester hours in business organization and management, 3 in engineering (12/68). *Version 3:* In the lower-division baccalaureate/associate degree category, 12 semester hours in civil engineering (5/74); in the upper-division baccalaureate category, 3 semester hours in business organization and management, 3 in engineering construction (12/68). *Version 4:* In the vocational certificate category, 3 semester hours in administrative management (8/74); in the lower-division baccalaureate/associate degree category, 27 semester hours in civil engineering and 3 in administrative management (8/74); in the upper-division baccalaureate category, 6 semester hours in business organization and management and 3 in engineering construction (12/68).

AR-1601-0018

Combat Engineering, Bridging, and Construction Supervision

Course Number: 5-E-65.

Location: Engineer School, Ft. Belvoir, VA.

Length: 15 weeks (537 hours).

Exhibit Dates: 4/56–12/68.

Objectives: To train enlisted personnel who are qualified as combat engineers, bridge or structure specialists, or masons to plan, control, and supervise combat construction and demolition operations.

Instruction: Lectures and practical exercises in the planning, control, and supervision of combat construction and demolition operations, including assembly, maintenance, and dismantling of fixed bridges, floating bridges, rafts, and ferries; construction and repair of structures and routes of communication; demolition; mine warfare activities; concrete and bituminous construction; rigging maintenance; electrical construction; drawings and aerial photographs reading; and construction tools and equipment.

Credit Recommendation: In the vocational certificate category, 8 semester hours in construction technology (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in construction technology (5/74); in the upper-division baccalaureate category, credit in engineering or construction on the basis of institutional evaluation (12/68).

AR-1601-0019

Special Forces Engineer Training

Course Number: 030-F1.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 5 weeks (158 hours). *Version 2:* 6 weeks (215–223 hours). *Version 3:* 7 weeks (265 hours).

Exhibit Dates: *Version 1:* 1/70–Present. *Version 2:* 8/67–12/69. *Version 3:* 10/66–7/67.

Objectives: To train Special Forces engineers in engineering tactics, techniques, equipment, and materials.

Instruction: *All Versions:* Lectures and practical exercises in Special Forces engineer training, including floating equipage, geology and soils, engineer construction, construction surveys, and utilization and maintenance of engineer equipment. *Version 1:* Topics include construction management and concrete design. *Version 2:* Topics include flexible pavements. *Version 3:* Topics include flexible pavements, sketchings and drawings, and fundamentals of combat operations.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in engineering construction (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in engineering construction (5/74); in the upper-division baccalaureate category, 2 semester hours in engineering construction (5/74). *Version 2:* In the vocational certificate category, 1 semester hour in engineering construction (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in engineering construction (5/74); in the upper-division baccalaureate category, 2 semester hours in engineering construction (12/68). *Version 3:* In the vocational certificate category, 2 semester hours in engineering construction (5/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in engineering construction (5/74); in the upper-division baccalaureate category, 2 semester hours in engineering construction (12/68).

Related Occupation Codes: 12B.

AR-1601-0020

Topography and Printing (TP-CMP) Noncommissioned Officer (NCO) Advanced

Course Number: 4-TP-C42.

Location: Engineer School, Ft. Belvoir, VA.

Length: 12 weeks (379 hours).

Exhibit Dates: 7/72–Present.

Objectives: To train enlisted personnel who have a working knowledge of topography and printing to perform as cartographic draftsmen, map compilers, model makers, topographic computers, and surveyors, offset pressmen, or photolithographic chiefs.

Instruction: Lectures and practical exercises in advanced topography, printing, and management, including mathematics, leadership principles, field engineering, combat and combat support operations, topographic engineering, geodetic surveying, map reproduction and distribution, and production supervision. Electives offered in psychology, data processing, economics, constitutional government, military equipment, refrigeration, electrical physics, and electro-hydraulics.

Credit Recommendation: In the vocational certificate category, 4 semester hours in civil technology (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in civil technology (5/74); in the upper-division baccalaureate category, 6 semester hours as an elective in engineering (5/74).

Related Occupation Codes: 51Q; 81C; 81D; 81E; 81F; 82D; 82E; 83F.

AR-1601-0021

Topography and Printing (TP-CMF) Noncommissioned Officer(NCO) Basic

(Topographic Engineering and Map Reproduction(81-CMF) NCO Basic)

Course Number: 4-81-C40; 4-TP-C40.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 7–8 weeks (210–243 hours). *Version 2:* 12 weeks (379 hours).

Exhibit Dates: *Version 1:* 8/75–5/78. *Version 2:* 6/72–7/75.

Objectives: To qualify enlisted personnel who have basic training in topography and printing as noncommissioned officers with duties in the following areas: cartographic draftsman, map compiler, model maker, topographic surveyor, topographic computer, offset pressman and photolithography chief.

Instruction: Lectures and practical exercises in topography and printing, including mathematics, leadership and management, field engineering, combat and combat support, topographic engineering and computing, map reproduction and distribution, cartography and photogrammetry. Electives in psychology, data processing, economics and U.S. constitutional government, and military equipment, refrigeration, electrical physics, electro-hydraulics, slide rule construction, blueprint reading, and field adjustments of survey instruments.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in topographic shop supervision (12/78). *Version 2:* In the vocational certificate category, 4 semester hours in civil technology (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in civil technology (5/74); in the upper-division baccalaureate category, 3 semester hours as an elective in engineering (5/74).

Related Occupation Codes: 81A; 81C; 81E; 82D; 82E; 41B; 83D; 83E; 83F; 41K.

AR-1601-0022

Topographic Surveying

Course Number: 412-82D20; 5-E-9.

Location: Engineer School, Ft. Belvoir, VA.

Length: 10 weeks (368–400 hours).

Exhibit Dates: 3/53–11/73.

Objectives: To train enlisted personnel in topographic surveying.

Instruction: Lectures and practical exercises in all methods of surveying, production of topographic maps and establishment of ground control data, including mathematics, theodolites, leveling, traverses, triangulation, taping, notebook keeping, symbols, photographic interpretation, elevation and relief, and equipment maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in general or topographic surveying (5/74); in the upper-division baccalaureate category, 6 semester hours in general surveying, 3 in topographic surveying (12/68).

Related Occupation Codes: 82D.

AR-1601-0023

Topographic Computing

Course Number: 412-82E20; 5-E-10.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 11 weeks (395 hours). *Version 2:* 16 weeks (602–616 hours).

Exhibit Dates: *Version 1:* 7/70–11/72. *Version 2:* 2/56–6/70.

Objectives: To train enlisted personnel in topographic mapping.

Instruction: Lectures and practical exercises in topographic mapping, including declination, dimensions of map sheets, coordinates, horizontal taping, electronic distance measurements, grid azimuth and triangulations, resections, geographic traverses, astronomic azimuths, and latitudes and longitudes.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 8 semester hours in geodetic surveying and computations (5/74); in the upper-division baccalaureate category, 6 semester hours in geodetic surveying and computations (5/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 12 semester hours in geodetic surveying and computations (5/74); in the upper-division baccalaureate category, 6 semester hours in geodetic computations, and credit in mathematics and field astronomy on the basis of institutional evaluation (12/68).

Related Occupation Codes: 82E.

AR-1601-0024

Construction Surveying

Course Number: *All Versions:* 412-82B20. *Version 2:* 5-E-8.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 11 weeks (414 hours). *Version 2:* 10 weeks (368–376 hours).

Exhibit Dates: *Version 1:* 7/71–6/72. *Version 2:* 2/56–6/71.

Objectives: To train enlisted personnel in plane surveying fundamentals.

Instruction: Lectures and practical exercises in plane surveying fundamentals, including surveying equipment use and adjustment, taping, planetable mapping, road surveys, earthwork estimations, and airfield construction.

Credit Recommendation: *Version 1:* In the vocational certificate category, 11 semester hours in general surveying (5/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in general surveying (5/74); in the upper-division baccalaureate category, 4 semester hours in general surveying, 2 in construction surveying (5/74). *Version 2:* In the vocational certificate category, 10 semester hours in general surveying (5/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in general surveying (5/74); in the upper-division baccalaureate category, 6 semester hours in general surveying, 3 in construction surveying (12/68).

Related Occupation Codes: 82B.

AR-1601-0025

ARTILLERY FLASH RANGING ADVANCED

Course Number: 6-R-154.1; 6-R-101.1; 6-E-11.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 6 weeks (224–229 hours).

Exhibit Dates: 3/56–12/68.

Objectives: To train enlisted personnel to install and to operate a field artillery flash-ranging unit and be able to determine precise positions by observing smoke, flash, or gunfire.

Instruction: Lectures and practical exercises in the operation of an artillery flash-ranging unit at the advanced level. Topics include the maintenance, installation, and operation of flash-ranging equipment; use of slide rules, basic trigonometry; and gunnery.

Credit Recommendation: In the upper-division baccalaureate category, credit in surveying on the basis of institutional examination (12/68).

AR-1601-0026

AIR BASE CONSTRUCTION

Course Number: 5-O-11.

Location: Engineer School, Ft. Belvoir, VA.

Length: 6 weeks (226 hours).

Exhibit Dates: 7/55–12/68.

Objectives: To train commissioned officers in the technical aspects of military airfield construction.

Instruction: Lectures and practical exercises in the technical aspects of military airfield construction. Course includes layout, drainage, construction survey, earthwork calculations, mass diagram, portable surfaces, construction scheduling, soil mechanics, asphalt and portland cement concretes, structures and utilities layout, pit and quarry operations, and maintenance and supervision of construction equipment and procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in construction engineering (7/74); in the upper-division baccalaureate category, 3 semester hours in engineering construction (12/68).

AR-1601-0027

FIELD ARTILLERY TARGET ACQUISITION OFFICER

(Artillery Target Acquisition Officer)
(Artillery Observation)

Course Number: 2G-1183; 2E-13D; 2E-1154; 6-A-1154; 6-O-12.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 9–12 weeks (325–482 hours).

Exhibit Dates: 12/55–5/75.

Objectives: To train officers in sound-ranging, flash-ranging, and observation battalion survey techniques.

Instruction: Lectures and practical exercises in field artillery radar, ballistic meteorology, surveying, care and use of surveying instruments, traverse computations, triangulations, grid systems, taping, and astronomy.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in surveying (7/74).

AR-1601-0028

ENGINEER CONSTRUCTION OFFICER

(Construction Planning and Operations)
(Construction Planning and Management)

Course Number: 4A-F1.

Location: Engineer School, Ft. Belvoir, VA.

Length: 3 weeks (105–119 hours).

Exhibit Dates: 12/65–Present.

Objectives: To train commissioned officers in construction supervision.

Instruction: Lectures and practical exercises in construction supervision, including structures and utilities, roads and airfields, management techniques, and construction equipment utilization.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in construction (management) (9/79).

AR-1601-0029

ENGINEER OFFICER CANDIDATE

Course Number: 4-5-F1.

Location: Engineer School, Ft. Belvoir, VA.

Length: 23 weeks (920–1021 hours).

Exhibit Dates: 3/66–Present.

Objectives: To train officers for duty in the Corps of Engineers.

Instruction: Lectures and practical exercises in the functions of officers in the Corps of Engineers, including camouflage, engineer reconnaissance, roads and airfields, fixed bridges and bridge classification, maintenance management and equipment utilization, weapons training, combat operations, field fortifications, floating equipage, tools and rigging, map reading and land navigation, and combat engineer practical exercise.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 11 semester hours in civil engineering (7/74); in the upper-division baccalaureate category, 7 semester hours in civil engineering (7/74), and additional credit in advanced military science at institutions which regularly offer such credit (12/68).

AR-1601-0030

PETROLEUM PRODUCTS ANALYSIS

(Petroleum Products Analysis, Enlisted)

Course Number: 491-92C20; 10-R-903.1; 10-E-22.

Location: Quartermaster School, Ft. Lee, VA.

Length: 11–14 weeks (382–490 hours).

Exhibit Dates: 9/54–Present.

Objectives: To train enlisted personnel in the principles and procedures of laboratory testing and analysis of petroleum products, and in the operation and maintenance of CFR test engines.

Instruction: Lectures and practical exercises in petroleum products analysis, including general petroleum subjects and basic laboratory tests, physical test of light and heavy distillates and greases, standardization of chemical solutions and titration techniques, CFR test engine orientation, chemical laboratory test, identification laboratory tests, military quality surveillance facilities, calibration and maintenance of laboratory equipment, identification of unknowns, and petroleum storage and supply.

Credit Recommendation: In the vocational certificate category, 6 semester hours in laboratory testing of petroleum products (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in laboratory testing of petroleum products, 3 in physical science (7/74); in the upper-division baccalaureate category, 4 semester hours in laboratory testing of petroleum products, 3 in physical science (7/74).

Related Occupation Codes: 92C.

AR-1601-0031

PETROLEUM PRODUCTS ANALYSIS, OFFICER

Course Number: *Version 1:* 10-A-7381. *Version 2:* 10-OE-22.

Location: Quartermaster School, Ft. Lee, VA.

Length: *Version 1:* 8 weeks (283 hours). *Version 2:* 14 weeks (490 hours).

Exhibit Dates: *Version 1:* 8/57–12/68. *Version 2:* 7/55–7/57.

Objectives: To train officers in the principles and procedures used in the laboratory testing and analysis of petroleum products.

Instruction: Lectures and practical exercises in petroleum products analysis, including general petroleum subjects, physical and chemical tests of petroleum products, CFR orientation, petroleum testing program, and laboratory management.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in laboratory testing of petroleum products (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in laboratory testing of petroleum products (7/74); in the upper-division baccalaureate category, 3 semester hours in petroleum products (12/68). *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in laboratory testing of petroleum products (6/74); in the upper-division baccalaureate category, 4 semester hours in laboratory testing of petroleum products (12/68).

AR-1601-0032

1. ARMY AIR DEFENSE BATTERY OFFICER
2. AAA AND SURFACE-TO-AIR MISSILE BATTERY OFFICER

Course Number: *Version 1:* 44-A-C2. *Version 2:* 44-O-1.

Location: *Version 1:* Air Defense School, Ft. Bliss, TX. *Version 2:* Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: *Version 1:* 23–27 weeks (897–1017 hours). *Version 2:* 30 weeks (1158 hours).

Exhibit Dates: *Version 1:* 7/57–12/68. *Version 2:* 5/56–6/57.

Objectives: To qualify officers as artillery officers.

Instruction: Lectures and practical exercises in map reading and surveying, introduction to electronics, air defense artillery and missile systems, and tactics and operations.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in introduction to surveying (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to surveying (7/74). *Version 2:* In the vocational certificate category, 3 semester hours in electrical theory, 2 in introduction to surveying (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical theory, 1 in introduction to surveying (7/74).

AR-1601-0033

Artillery Survey Officer

Course Number: *All Versions:* 2G-1183. *Version 2:* 6-A-1183; 6-O-11.

Location: *Version 1:* Field Artillery School, Ft. Sill, OK. *Version 2:* Artillery and Missile School, Ft. Sill, OK.

Length: *Version 1:* 7 weeks (253 hours). *Version 2:* 7–8 weeks (275–308 hours).

Exhibit Dates: *Version 1:* 6/73–7/75. *Version 2:* 12/55–5/73.

Objectives: To train commissioned officers in reconnaissance and survey procedures.

Instruction: Lectures and practical exercises in reconnaissance and survey procedures, including target acquisition, mathematics, maps, survey equipment, traverse, triangulation, astronomy, field artillery battalion and division artillery survey, and corps artillery survey.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in surveying (7/74); in the upper-division baccalaureate category, 4 semester hours in surveying (7/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in surveying (7/74); in the upper-division baccalaureate category, 5 semester hours in general surveying (12/68).

AR-1601-0034

1. Artillery Survey Specialist
2. Artillery Survey Specialist
3. Artillery Survey Advanced

Course Number: *Version 1:* 412-82C10; 412-82C20; 412-153.1. *Version 2:* 6-R-153.1. *Version 3:* 6-E-16; 6-R-153;1 6-R-145.2.

Location: *Version 1:* Field Artillery School, Ft. Sill, OK. *Version 2:* Artillery and Missile School, Ft. Sill, OK. *Version 3:* Artillery and Missile School, Ft. Sill, OK.

Length: *Version 1:* 6–9 weeks (162–348 hours). *Version 2:* 5 weeks (205 hours). *Version 3:* 8–9 weeks (295–322 hours).

Exhibit Dates: *Version 1:* 1/66–Present. *Version 2:* 7/64–12/65. *Version 3:* 3/56–6/64.

Objectives: To train enlisted personnel as artillery surveyors or artillery surveyor specialists.

Instruction: *All Versions:* Lectures and practical exercises in surveying, including mathematics, maps, equipment, traverse, triangulation, astronomy, military applications, artillery battalion survey. *Version 1:* Topics include higher-echelon survey. *Version 2:* Topics include corps artillery survey. *Version 3:* Topics include division and corps artillery survey.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in surveying (7/74); in the upper-division baccalaureate category, 5 semester hours in surveying (12/68). *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in surveying (7/74); in the upper-division baccalaureate category, 3 semester hours in surveying (12/68). *Version 3:* In the lower-division baccalaureate/associate degree category, 6 semester hours in surveying (7/74); in the upper-division baccalaureate category, 5 semester hours in surveying (12/68).

Related Occupation Codes: 82C.

AR-1601-0035

Engineer Officer Advanced

Course Number: 5-A-C4; 5-O-3.

Location: Engineer School, Ft. Belvoir, VA.

Length: 39 weeks (1306–1313 hours).

Exhibit Dates: 7/56–6/60.

Objectives: To train officers to perform as engineering officers.

Instruction: Lectures and practical exercises in the duties of an engineering officer. Course includes military subjects, engineering project planning; scheduling; management and construction of bridges and bridge components, roads, airfields, and other public works facilities; equipment utilization; soil classification; pavement design; construction material and terrain evaluation; effective writing; organization; facilities; and supply management.

Credit Recommendation: In the vocational certificate category, 3 semester hours in administrative management (8/74); in the lower-division baccalaureate/associate degree category, 27 semester hours in civil engineering, 3 in administrative management (8/74); in the upper-division baccalaureate category, 6 semester hours in business organization and management, 3 in engineering construction (12/68).

AR-1601-0036

Associate Engineer Officer Advanced

Course Number: 5-O-4.

Location: Engineer School, Ft. Belvoir, VA.

Length: 15–16 weeks (571–594 hours).

Exhibit Dates: 6/55–6/60.

Objectives: To train commissioned officers as commanders and staff officers of engineering battalions.

Instruction: Lectures and practical exercises on the responsibilities of field grade officers in the Corps of Engineers, including fundamentals of combat operations, combined-arms operations, special weapons officer training, logistics, protective construction, camouflage, soils engineering and geology, troop construction management, public works, maintenance and effective utilization of engineer equipment, CBR water contamination removal, fixed bridges, staff functions, troop construction management, mapping and map supply, map and aerial photograph reading, and floating stream-crossing equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in civil engineering (7/74); in the upper-division baccalaureate category, 3 semester hours in engineering construction, 2 in business organization and management (12/68).

AR-1601-0037

Artillery Calibration

Course Number: 9-R-422.2.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 8 weeks (280 hours).

Exhibit Dates: 4/57–12/68.

Objectives: To train enlisted personnel to perform artillery callibrations.

Instruction: Lectures and practical exercises in artillery calibration, including ballistics fundamentals, artillery ammunition, geometric considerations in placement, air density problems, and transit operation.

Credit Recommendation: In the vocational certificate category, 2 semester hours as an elective in civil technology (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in civil technology (8/74).

AR-1601-0038

Skysweeper Maintenance

Course Number: 44-E-17.

Location: Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: 4 weeks (138 hours).

Exhibit Dates: 10/56–12/68.

Objectives: To train enlisted personnel to maintain small arms and Skysweeper guns.

Instruction: Lectures and practical exercises in maintenance of small arms and Skysweeper guns. Course includes light antiaircraft artillery weapons, including .50 cal. machine gun, AAA generator sets, 15-mm gun and mount, loader-rammer M17, and inspection and fire control of weapons.

Credit Recommendation: In the vocational certificate category, 2 semester hours as an elective in industrial or mechanical technology (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in industrial or mechanical technology (8/74).

AR-1601-0039

Automatic Weapons Maintenance (Light Antiaircraft Artillery Maintenance)

Course Number: 44-E-18.

Location: Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: 4–7 weeks (140–229 hours).

Exhibit Dates: 10/55–12/68.

Objectives: To train enlisted personnel to maintain unit small arms and twin 40-mm guns (M42).

Instruction: Lectures and practical exercises in the maintenance of small arms and twin 40-mm guns (M42). Course includes fundamentals of AAA weapons, multiple .50 caliber machine guns, M45 mounts, self-propelled twin 40-mm guns, small arms (.30 cal. carbines, .30 cal. rifles, 3.5 inch rocket launchers), and inspection and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours as an elective in industrial or mechanical technology (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in industrial or mechanical technology (8/74).

AR-1601-0040

Smoke Generation Supervision

Course Number: 3-R-532.7.

Location: Chemical Corps School, Ft. McClellan, AL.

Length: 4 weeks (148 hours).

Exhibit Dates: 6/57–12/68.

Objectives: To train enlisted personnel to supervise the maintenance and operation of chemical smoke generators.

Instruction: Lectures and practical exercises in maintenance and operation of flame throwers and chemical generators; identification and detection of toxic chemical agents; and principles of supply and maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours as an elective in chemical technology (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in chemical technology (5/74).

AR-1601-0041

Mechanized Flame Thrower Surveillance

Course Number: None.

Location: Chemical Corps School, Ft. McClellan, AL.

Length: 4 weeks (155 hours).

Exhibit Dates: 3/56–12/68.

Objectives: To train personnel in the maintenance and repair of flame throwers.

Instruction: Lectures and practical exercises in the operation, troubleshooting, minor repair, and maintenance of various types of vehicle-mounted flame throwers; basic troubleshooting of the electrical, mechanical, and chemical systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours as an elective in chemical/mechanical technology (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in chemical/mechanical technology (5/74).

AR-1601-0042

Chemical Equipment Repair

Course Number: 690-54D20; 3-R-533.1.

Location: *Version 1:* Ordnance and Chemical School, Aberdeen Proving Ground, MD. *Version 2:* Chemical School, Ft. McClellan, AL.

Length: *Version 1:* 8 weeks (232 hours). *Version 2:* 10–11 weeks (321–396 hours).

Exhibit Dates: *Version 1:* 4/77–Present. *Version 2:* 6/64–3/77.

Objectives: To train personnel to perform basic repairs on chemical equipment.

Instruction: *Version 1:* Lectures and practical exercises to include operation and maintenance of gas masks, flame throwers, smoke generators and decontamination equipment. *Version 2:* Lectures and practical exercises to include operation and minor maintenance of gas masks, flame throwers, smoke generators, and decontamination equipment; introduction to basic repair shop operations including welding, use of power and hand tools and painting and machine tools, and supply and maintenance procedures.

Credit Recommendation: *All Versions:* Credit is not recommended because of the military-specific nature of the course (1/78). *Version 2:* In the vocational certificate category, 3 semester hours in mechanical technology (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in mechanical technology (5/74).

Related Occupation Codes: 54D.

AR-1601-0043

Petroleum Storage Specialist

Course Number: 821-76W20; 821-56C2; 10-R-552.1; 10-E-25.

Location: Quartermaster School, Ft. Lee, VA.

Length: 8 weeks (274–280 hours).

Exhibit Dates: 9/54–Present.

Objectives: To provide enlisted personnel with knowledge in receiving, storing, issuing, dispensing, and shipping of petroleum products.

Instruction: Lectures and practical exercises in packing operations, supply point operations, terminal operations, and pipeline operations.

Credit Recommendation: In the vocational certificate category, 3 semester hours in petroleum storage procedures (6/75).

AR-1601-0044

Engineer Officer Basic

(Regular Army Engineer Officer Basic)

Course Number: 4-5-C20; 4-5-C20 (RA); 5-A-C1; 5-O-A.

Location: Engineer School, Ft. Belvoir, VA.

Length: 6–14 weeks (217–574 hours).

Exhibit Dates: 12/54–Present.

Objectives: To prepare newly commissioned Engineer Corps officers for their first duty assignments.

Instruction: Instruction includes combat engineer operations and individual combat training, construction management and equipment operation, and general military subjects.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in civil engineering and additional credit in advanced military science at institutions which normally offer such credit (9/79)

AR-1601-0045

Artillery Surveyor Noncommissioned Officer (NCO) Basic

Course Number: 412-82C40-EC.

Location: Field Artillery School, Ft. Sill, OK.

Length: 15 weeks (552 hours).

Exhibit Dates: 7/71–3/73.

Objectives: To provide enlisted personnel with a working knowledge of the duties required to perform as artillery surveyors.

Instruction: Lectures and practical exercises in general military subjects; artillery transport; communications; gunnery; tactics and combined arms; and target acquisition.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/76).

AR-1601-0046

Petroleum Quality Assurance Representative

Course Number: 8B-F33; 821-F2.

Location: Quartermaster School, Ft. Lee, VA.

Length: 4 weeks (142 hours).

Exhibit Dates: 2/75–Present.

Objectives: To provide personnel with knowledge of the functions, duties, and responsibilities required to perform as petroleum quality assurance representatives.

Instruction: Programmed instruction, audio-visual presentation, lectures, and practical exercises in laboratory tests of light distillates, physical and chemical laboratory tests of light and heavy distillates, and petroleum supply operations.

Credit Recommendation: In the vocational certificate category, 2 semester hours in petroleum laboratory techniques (6/75).

Related Occupation Codes: 761A.

AR-1601-0047

Forensic Chemistry—Trace Evidence

Course Number: None.

Location: Criminal Investigation Laboratory, Ft. Gordon, GA; Criminal Investigation Laboratory, Frankfurt, Germany; Criminal Investigation Laboratory, Tokyo,Japan.

Length: 23 weeks (866 hours).

Exhibit Dates: *Version 1:* 2/77–Present. *Version 2:* 11/71–1/77.

Objectives: To train personnel in the trace evidence aspect of forensic chemistry by preparing the analyst to properly and competently perform examinations and comparisons on known and questioned samples of evidence assisting the analyst in determining the forensic significance of the various types of trace evidence and assisting the analyst in reporting findings and presenting them in judicial proceedings.

Instruction: *Version 1:* Subjects include rules of evidence; courtroom procedures and the expert witness; handling and packaging of trace evidence; crime scene processing; safety, detection and analysis of flammable accelerants, paint, glass, soil, ink, wood, and paper and explosive residues examinations and microscopy. *Version 2:* Includes skeletal reconstruction, photography, chemical and physical properties, chemial tests, infrared and ultraviolet procedures, gas chromatograph separation and identification, microscopic examinations, thin-layer chromatography, neutron activation analysis, and botanical characteristics.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 9 semester hours in forensic chemistry or forensic science (4/78); in the graduate degree category, 0–9 semester hours, based on the student's research project, as assigned by the receiving institution. Credit is expressed as a range because of the highly individualized study and practical applied experience required (4/78). *Version 2:* In the upper-division baccalaureate category, 9 semester hours in forensic science or forensic chemistry (4/78).

AR-1601-0048

Forensic Drug Chemist

Course Number: None.

Location: Criminal Investigation Laboratory, Ft. Gordon, GA; Criminal Investigation Laboratory, Frankfurt,Germany; Criminal Investigation Laboratory, Tokyo,Japan.

Length: 30 weeks (1170 hours).

Exhibit Dates: 1/77–Present.

Objectives: To train personnel in forensic drug chemistry to qualify as expert witnesses before other judicial proceedings.

Instruction: Subjects include drug reference material; screening tests; ultraviolet-visible spectrophotometry, flurometry, microscopy, gas chromatography, GC-, MS-; TLC; LC; XRD; emission spectroscopy; NMR; separating techniques; amphetamines, barbituates, LSD and other hallucinogens; opium alkaloids and derivatives; cocaine; and other controlled non-controlled drugs; clandestine laboratories; drug syntheses; legal aspects of court and related topics. testimony; drug analysis internship.

Credit Recommendation: In the upper-division baccalaureate category, 9 semester hours in forensic chemistry or forensic science (4/78); in the graduate degree category, 0-9 semester hours based on the student's research project as assigned by the receiving institution. Credit is expressed as a range because of the highly individualized study and practical applied experience required (4/78).

AR-1601-0049

MARIJUANA EXAMINER
(Marijuana Examiner)

Course Number: None.
Location: Criminal Investigation Laboratory, Ft. Gordon, GA.
Length: 8 weeks (312 hours).
Exhibit Dates: 1/77-Present.
Objectives: To qualify individuals as expert witnesses before judicial proceedings.
Instruction: Topics include marijuana in general, marijuana analysis procedures and legal aspects of forensic analysis.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in forensic chemistry or forensic science (4/78).

AR-1601-0050

ENGINEER OFFICER ADVANCED RESERVE COMPONENT

Course Number: 4-5-C26.
Location: Engineer School, Ft. Belvoir, VA.
Length: 12 weeks (443 hours).
Exhibit Dates: 5/76-Present.
Objectives: To prepare engineer officers to be competent company commanders and batallion staff officers; emphasis is placed on the management of training.
Instruction: Conferences, demonstrations, practical exercises, computer assisted instruction, and case studies in construction management and equipment operation, combat construction management employing CPM, organization for ground combat, engineer support of defensive and offensive operations, horizontal and vertical construction.
Credit Recommendation: In the vocational certificate category, 3 semester hours in basic construction (9/79); in the lower-division baccalaureate/associate degree category, 6 semester hours in general construction management (9/79); in the upper-division baccalaureate category, 3 semester hours in general civil engineering elective (9/79).

AR-1601-0051

ENGINEER OFFICER BASIC RESERVE COMPONENT

Course Number: 4-5-C25.
Location: Engineer School, Ft. Belvoir, VA.
Length: 4 weeks (167 hours).
Exhibit Dates: 1/76-Present.
Objectives: To teach newly commissioned second lieutenants in the Army National Guard (ARNG) and selected Army Reserve (USAR) officers in the same grade to perform the duties of a platoon leader in the corps of engineers, MOS for which trained.
Instruction: Conference, demonstration, practical exercise and case study in construction management and equipment operation, combat construction management employing CPM, organization for ground combat, engineer support of defensive and offensive operations, horizontal and vertical construction.
Credit Recommendation: In the vocational certificate category, 3 semester hours in basic construction (9/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in general construction management (9/79).

AR-1601-0052

GENERAL ENGINEERING (CFM-51) NONCOMMISSIONED OFFICER (NCO) ADVANCED.

Course Number: 7-51-C42.
Location: Engineer School, Ft. Belvoir, VA.
Length: 10 weeks (334-337 hours).
Exhibit Dates: 4/76-Present.
Objectives: To provide noncommissioned officers with advanced training in utilities and construction.
Instruction: Course emphasizes conferences, seminars, practical exercises, demonstrations, and case studies relating to military discipline and justice, leadership and management, maintenance management, field engineering, engineering support operations, foundations and materials, bituminous material, bridging, T/O structures, utilities and engineering construction management.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in construction management, 1 in bituminous materials, 1 in electricity for those students completing Track A (9/79); 2 semester hours in construction management, 1 in bituminous materials for those students completing Track B (9/79).

AR-1601-0053

FORENSIC SEROLOGY

Course Number: None.
Location: Criminal Investigation Laboratory, Ft. Gordon, GA; Criminal Investigation Laboratory, Frankfurt, Germany; Criminal Investigation Laboratory, Tokyo, Japan.
Length: 32 weeks (1240 hours).
Exhibit Dates: *Version 1:* 1/77-Present. *Version 2:* 5/74-12/76.
Objectives: To train personnel in forensic serology to qualify them as expert witnesses in the examination, identification, and interpretation of blood stains and stains of other body fluids and comparisons of hairs, before judicial proceedings.
Instruction: *Version 1:* History of forensic serology, handling of physical evidence, identification of blood, semen, saliva, and other biological samples; determination of species origin; interpretation of bloodstain patterns; ABO system; MN system; Rh system; polymorphic serum proteins and isoenzymes; ABO typing of hair; investigative techniques; legal aspects and court testimony. *Version 2:* Fundamentals of blood serology; microscopic examinations; photography; determination of blood; agglutinins of fresh blood; agglutinogens and agglutinins of dried blood; isoenzymes and hemoglobins; semenil and other body substances; study and comparison of hairs, fibers, and minerals.
Credit Recommendation: *All Versions:* In the upper-division baccalaureate category, 9 semester hours in forensic biology (4/78); In the graduate degree category, 0-9 semester hours (based on the student's research project) to be assigned by the receiving institution. Credit is expressed as a range because of the highly individualized study and the practical applied experience required (4/78). *Version 2:* In the upper-division baccalaureate category, 9 semester hours in forensic chemistry or forensic sciences (4/78).

AR-1601-0054

FIELD ARTILLERY TARGET ACQUISITION AND FIELD ARTILLERY SURVEY

Course Number: 2E-1154; 2G-1183.
Location: Field Artillery School, Ft. Sill, OK.
Length: 9-10 weeks (325-345 hours).
Exhibit Dates: 8/75-7/79.
Objectives: To train field artillery officers in the field of target acquisition/reconnaissance and survey.
Instruction: Lectures, demonstrations and field work in surveying, map reading and plotting, celestial navigation principles and cannon fire direction. Mathematics including logarithms and trigonometry is also covered.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in surveying and celestial navigation (1/80). in the upper-division baccalaureate category, 4 semester hours in surveying and celestial navigation (1/80). Credit is to be granted at either the lower or upper division category.

AR-1601-0055

MARINE FIELD ARTILLERY FIRE CONTROLMAN

Course Number: 250-0844.
Location: Field Artillery School, Ft. Sill, OK.
Length: 5-6 weeks (182-241 hours).
Exhibit Dates: 10/75-Present.
Objectives: To train Marine Corps enlisted personnel in map reading, artillery surveying and cannon fire direction.
Instruction: Lectures, demonstrations and field exercises in map reading and ploting as well as surveying principles. Student is taught basic mathematics including logarithms and right triangle trigonometry.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in surveying (1/80); in the upper-division baccalaureate category, 3 semester hours in surveying (1/80); Credit is to be granted in either the upper or lower division, but not in both categories.

AR-1601-0056

LANCE OPERATIONS/FIRE DIRECTION ASSISTANT

Course Number: 250-15J10.
Location: Field Artillery School, Ft. Sill, OK.
Length: 6 weeks (214 hours).
Exhibit Dates: 4/78-Present.
Objectives: To qualify enlisted personnel to become fire direction assistants in a Lance missile unit.
Instruction: Lectures and practical exercises in map reading, zone-to-zone grid transformation, basic mathematics including logarithms, computations both manually and with a FADAC computer; computes parameters for nuclear fire missions such as azimuth, orienting angle, time to fire and correction data; using FADAC student computes survey problems including altitude, declination, horizontal and vertical angles and horizontal distances for a minimum of fair traverse stations.
Credit Recommendation: In the vocational certificate category, 1 semester hour in basic mathematics (1/80); in the lower-division baccalaureate/associate degree category, 1 semester hour in map reading and 1 in introduction to computers (1/80).
Related Occupation Codes: 15J.

AR-1606-0001

Intelligence Analyst Noncommissioned Officer (NCO) Basic

Course Number: 243-96B40-EC.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: 10 weeks (307 hours).

Exhibit Dates: 1/72–Present.

Objectives: To provide noncommissioned officers with a working knowledge of the duties of intelligence analysts.

Instruction: Lectures in intermediate-level supervisory skills in intelligence and security operations, communicative arts, personnel management, general intelligence subjects, ground and aerial surveillance, electronic surveillance devices, advanced photogrammetry, Soviet defense policy, Soviet/East European/Chinese communist armed forces, interrogation, and a military campaign case study.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in business administration, 3 in industrial security, 3 in political science (1/74); in the upper-division baccalaureate category, 3 semester hours in business administration, 3 in industrial security, 3 in political science (1/74).

Related Occupation Codes: 96B.

AR-1606-0002

Image Interpreter NCO Basic

Course Number: 242-96D40-EC.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: 12 weeks (367 hours).

Exhibit Dates: 1/72–Present.

Objectives: To provide noncommissioned officers with a working knowledge of image interpretation.

Instruction: Lectures in intermediate-level supervisory skills in intelligence and security operations, communicative arts, personnel management, general intelligence subjects, tactical intelligence, interrogation, advanced photogrammetry, mosaics, terrain analysis, imagery interpretation management, target folders, and target analysis.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in business administration, 3 in industrial security, 3 in political science (1/74); in the upper-division baccalaureate category, 3 semester hours in business administration, 3 in industrial security, 3 in political science (1/74).

Related Occupation Codes: 96C.

AR-1606-0003

Petroleum Distribution Supervision

Course Number: 821-F1.

Location: Quartermaster School, Ft. Lee, VA.

Length: 6 weeks (210 hours).

Exhibit Dates: 7/67–Present.

Objectives: To train enlisted personnel to supervise the receipt, storage, and issue of petroleum products and the operation of cross-country pipelines.

Instruction: Lectures and practical exercises in the supervision and operation of petroleum pipelines, including general petroleum subjects, pipeline and terminal operations, fuel system supply point, tank vehicles, supervisory performance exercise, gaging and sampling, pump station operation, general laboratory subjects and basic laboratory tests, petroleum supply in the combat zone, quality surveillance and laboratory operations.

Credit Recommendation: In the vocational certificate category, 4 semester hours as an elective in industrial technology (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in industrial technology (6/74).

Related Occupation Codes: 96D.

AR-1606-0004

1. Counterintelligence Agent
2. Counterintelligence Agent (Military Intelligence Specialist)

Course Number: 244-97B40.

Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ. *Version 2:* Intelligence School, Ft. Holabird, MD.

Length: *Version 1:* 15 weeks (455 hours). *Version 2 :* 15 weeks (526–566 hours).

Exhibit Dates: *Version 1:* 2/72–5/75. *Version 2:* 4/67–1/72.

Objectives: To provide enlisted personnel with investigative skills and with a basic knowledge of installation security procedures.

Instruction: Lectures and practical experience in administration, human relations, interviews and interrogations, basic investigative techniques, report writing, and oral briefing techniques.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in public administration, investigative methods, or industrial security (1/74); in the upper-division baccalaureate category, 3 semester hours in public administration, investigative methods, or industrial security (1/74). *Version 2:* In the upper-division baccalaureate category, 5 semester hours in intelligence methods (12/68).

Related Occupation Codes: 97B.

AR-1606-0005

Technical Intelligence

Course Number: 3A-F18; 243-F4.

Location: Intelligence School, Ft. Holabird, MD.

Length: 3 weeks (110 hours).

Exhibit Dates: 2/67–12/68.

Objectives: To provide officers and enlisted personnel with a working knowledge of technical intelligence.

Instruction: Lectures in basic intelligence methods, including gathering and processing intelligence information, geography and politics of foreign areas, characteristics of foreign military personnel, and map reading.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in political science (1/74); in the upper-division baccalaureate category, credit in intelligence methods on the basis of institutional evaluation (12/68).

AR-1606-0006

Flight Simulator (UH1FS) Specialist (Flight Simulator (2B24) Specialist)

Course Number: 191-F1.

Location: Aviation Center, Ft. Rucker, AL.

Length: 2–3 weeks (91 hours).

Exhibit Dates: 6/75–Present.

Objectives: To provide enlisted personnel with the knowledge to perform as synthetic flight training system (2B24 or UH1FS) console operators in order to provide instruction in instrument flight techniques to rotary wing rated Army aviators.

Instruction: Practical exercises and programmed instruction in the synthetic flight training system, UH1FS or 2B24.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/78)

Related Occupation Codes: 93D; 93J.

AR-1606-0007

Installation Intelligence

Course Number: 3C-F4; 243-F1.

Location: Intelligence School, Ft. Holabird, MD.

Length: 3 weeks (90–109 hours).

Exhibit Dates: *Version 1:* 5/69–Present. *Version 2:* 5/67–4/69.

Objectives: To provide commissioned officers, enlisted personnel, and civilian personnel with a basic understanding of installation intelligence and physical security functions.

Instruction: Lectures in the basic principles of intelligence, including an analysis of domestic intelligence agencies and their functions, counterintelligence procedures, physical security of installations, and personnel screening methods.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in industrial security (1/74); in the upper-division baccalaureate category, 2 semester hours in industrial security (1/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in intelligence methods (12/68).

Related Occupation Codes: 11F; 11D; 13E; 15J; 16H; 96B.

AR-1606-0008

Order of Battle Intelligence Enlisted

Course Number: 30-E-6.

Location: Intelligence School, Ft. Holabird, MD.

Length: 13 weeks (455 hours).

Exhibit Dates: 5/57–12/68.

Objectives: To train enlisted personnel to perform administrative and clerical duties in the intelligence field.

Instruction: Lectures in political science, topography, administrative procedures, order of battle procedures, and organization and tactics of intelligence units.

Credit Recommendation: In the vocational certificate category, 3 semester hours in business or public administration (1/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in business or public administration (1/74); in the upper-division baccalaureate category, 3 semester hours in intelligence methods (12/68).

AR-1606-0009

Military Intelligence

Course Number: 30-R-971.1.

Location: Intelligence School, Ft. Holabird, MD.

Length: 10 weeks (315 hours).

Exhibit Dates: 12/57–12/68.

Objectives: To train enlisted personnel to perform clerical and administrative duties in the intelligence field.

Instruction: Lectures in the basic principles of processing intelligence reports, clerical administration, filing systems, and the use of office equipment.

Credit Recommendation: Insufficient data for evaluation (1/74).

AR-1606-0010

Intelligence Enlisted

Course Number: 30-E-3; 30-R-962.2.

Location: Intelligence School, Ft. Holabird, MD.

Length: 13 weeks (455 hours).

Exhibit Dates: 3/57–12/68.

Objectives: To train enlisted personnel in intelligence procedures.

Instruction: Lectures in basic intelligence methods, administrative procedures, political science, topography, and collection, processing, and dissemination of intelligence materials.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in political science or public administration (1/74); in the upper-division baccalaureate category, 3 semester hours in intelligence methods (12/68).

AR-1606-0011

Non-Morse Communications Analyst
(Non-Morse Search and Development)

Course Number: 231-F1.

Location: Security Agency School, Ft. Devens, MA.

Length: 11 weeks (395 hours).

Exhibit Dates: 12/67–Present.

Objectives: To provide enlisted personnel with a working knowledge of basic communications theory and the use of communications equipment.

Instruction: Lectures and practical experience in basic telecommunications theory, circuit analysis, and the use of electronic diagnostic equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (1/74); in the upper-division baccalaureate category, 3 semester hours in electronics (1/74).

Related Occupation Codes: 05K.

AR-1606-0012

Radio Traffic Analyst
(Traffic Analysis)

Course Number: 232-98C20.

Location: Security Agency School, Ft. Devens, MA.

Length: 9 weeks (310 hours).

Exhibit Dates: 12/51–Present.

Objectives: To provide enlisted personnel with a working knowledge of basic radio traffic analysis.

Instruction: Lectures and practical experience in the theory and operation of telecommunication equipment, informational analysis, radio program and technical report writing, and monitoring of radio transmissions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in telecommunications or credit in learning resources and media on the basis of institutional evaluation (1/74); in the upper-division baccalaureate category, 3 semester hours in telecommunications or credit in learning resources and media on the basis of institutional evaluation (1/74).

Related Occupation Codes: 98C.

AR-1606-0013

Operations and Intelligence Specialist
(Infantry Intelligence and Operations Specialist)

Course Number: None.

Location: Institute for Military Assistance, Ft. Bragg, NC; Special Forces Training Group, Ft. Bragg, NC.

Length: 8 weeks (320 hours).

Exhibit Dates: 1/65–2/73.

Objectives: To provide enlisted personnel with the knowledge and skills necessary to perform as intelligence specialists.

Instruction: Lectures in the basic principles of intelligence gathering, including map reading, photography, authentication systems, and collecting, processing, and disseminating political and sociological information.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in industrial security (1/74); in the upper-division baccalaureate category, 3 semester hours in intelligence methods (12/68).

AR-1606-0014

Senior Officer EW-Cryptologist

Course Number: 2G-F10.

Location: Security Agency School, Ft. Devens, MA.

Length: 4 weeks (172 hours).

Exhibit Dates: 4/68–Present.

Objectives: To train officers to perform the duties of a cryptologic officer.

Instruction: Lectures in the fundamentals of security procedures, including electronic countermeasures, cryptological operations, and collection of political, sociological, and geographical data about foreign countries.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in international relations or public administration on the basis of institutional evaluation (1/74); in the upper-division baccalaureate category, credit in international relations or public administration on the basis of institutional evaluation (1/74).

AR-1606-0015

EW-Cryptologic Officer Specialist

Course Number: 2G-F11.

Location: Security Agency School, Ft. Devens, MA.

Length: 3 weeks (102 hours).

Exhibit Dates: 1/68–Present.

Objectives: To provide officers with a basic knowledge of the fields of intelligence and electronic countermeasures.

Instruction: Lectures in the fundamentals of intelligence operations, including electromagnetic theory, electronic countermeasures, human relations, and collection of political and geographical data on foreign countries.

Credit Recommendation: In the vocational certificate category, credit in basic electronics on the basis of institutional evaluation (1/74); in the lower-division baccalaureate/associate degree category, credit in basic electronics on the basis of institutional evaluation (1/74); in the upper-division baccalaureate category, credit in basic electronics on the basis of institutional evaluation (1/74).

AR-1606-0016

Radio Teletypewriter Analysis

Course Number: 232-F1.

Location: Security Agency School, Ft. Devens, MA.

Length: 7 weeks (316 hours).

Exhibit Dates: 11/66–Present.

Objectives: To provide enlisted personnel with a working knowledge of telecommunications.

Instruction: Lectures and practical experience in various types of teletypewriter systems equipment, radio-teletypewriter operations, transmission and receipt of communications, and English.

Credit Recommendation: In the vocational certificate category, 3 semester hours in business communications (1/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in business communications (1/74).

Related Occupation Codes: 98C.

AR-1606-0017

Cryptologic EW Officer Basic Specialist

Course Number: 2G-F12.

Location: Security Agency School, Ft. Devens, MA.

Length: 14 weeks (616 hours).

Exhibit Dates: 9/71–Present.

Objectives: To provide officers with a basic knowledge of cryptology.

Instruction: Lectures in basic electronics, the principles of organization and management, collection of political and economic data, and human relations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in telecommunications, 4 in political science, public administration, or business administration (1/74); in the upper-division baccalaureate category, 2 semester hours in telecommunications, 4 in political science, public administration, or business administration (1/74).

AR-1606-0018

Intelligence Officer Basic
(Military Intelligence Officer Basic) Basic

Course Number: 3-30-C20.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: 9 weeks (291–333 hours).

Exhibit Dates: *Version 1:* 8/79–Present. *Version 2:* 7/78–7/79. *Version 3:* 3/73–6/78.

Objectives: To provide officers with the skills necessary to perform as management personnel in the field of intelligence.

Instruction: *All Versions:* Lectures in intelligence operations, personnel management and supervision, military equipment and resources. *Version 2:* Course includes tactical operations and organizational effectiveness. *Version 3:* Course includes military legal system.

Credit Recommendation: *Version 1:* Pending evaluation *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in principles of administration/ management (5/79). *Version 3:* In the lower-division baccalaureate/associate degree category, 3 semester hours in management, business administration, or public administration (1/74); in the upper-division baccalaureate category, 3 semester hours in management, business administration, or public administration (1/74).

AR-1606-0019

Basic Industrial Security

Course Number: 3C-F7.

Location: Intelligence School, Ft. Holabird, MD.

Length: 3 weeks (119 hours).

Exhibit Dates: 4/67–Present.

Objectives: To train civilian and military personnel to perform the duties of an industrial security specialist.

Instruction: Lectures in the basic principles of physical security, mechanical and electronic protective devices, and principles of industrial security organization.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in police administration or industrial security (1/74); in the upper-division baccalaureate category, 1 semester hour in management, 1 in political science (12/68).

AR-1606-0020

USASA Basic Cryptologic Supervisor

Course Number: 230-F3.
Location: Security Agency School, Ft. Devens, MA.
Length: 10 weeks (472 hours).
Exhibit Dates: 12/71–Present.
Objectives: To train enlisted personnel to become supervisors in the field of cryptology.
Instruction: Lectures in the basic operation of a telecommunications organization, personnel management and supervision, human relations, and the functions and applied use of electronic telecommunications equipment.
Credit Recommendation: In the vocational certificate category, 1 semester hour in public administration, 1 in electronics (1/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in public administration, 1 in electronics (1/74).
Related Occupation Codes: 98B; 98C; 98G; 98J; 05D; 05G; 05H; 05K.

AR-1606-0021

Security Assistance Management Orientation Seminar

Course Number: 7B/F5.
Location: Institute For Military Assistance, Ft. Bragg, NC.
Length: 2 weeks (76–83 hours).
Exhibit Dates: 6/73–8/77.
Objectives: To provide officers with the knowledge necessary to qualify them for positions in military assistance programs with foreign governments.
Instruction: Lectures in security assistance resources and management, U.S. policies and foreign assistance programs, and national security objectives and responsibilities.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (1/74).

AR-1606-0022

National Senior Intelligence

Course Number: None.
Location: Defense Intelligence School, Washington, DC.
Length: 14 weeks (560 hours).
Exhibit Dates: 6/72–Present.
Objectives: To provide officers and civilian personnel with the knowledge necessary to hold management positions in the field of national and international intelligence.
Instruction: Lectures in the processing and management of intelligence information, development and implementation of U.S. foreign policy, the national intelligence structure, and government agencies involved in foreign policy.
Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in international relations, public administration, or political science (1/74).

AR-1606-0023

Command and Staff Officer Cover and Deception

Course Number: 2G-F14.
Location: Electronic Warfare School, Ft. Huachuca, AZ.
Length: 3 weeks (120 hours).
Exhibit Dates: 8/72–Present.
Objectives: To provide commissioned officers and civilian personnel with a working knowledge of cover and deception intelligence measures.
Instruction: Lectures in tactics and strategies in the deployment of combat forces, electronic countermeasures, electronic surveillance equipment, and case studies of cover and deception operations in World War II and the Vietnamese War.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/74).

AR-1606-0024

Security Assistance Management (Military Assistance Programmer/Advisor)

Course Number: 7B-F2; 012-F1.
Location: Institute for Military Assistance, Ft. Bragg, NC.
Length: 3–4 weeks (124–145 hours).
Exhibit Dates: 9/71–8/77.
Objectives: To provide officers and noncommissioned officers with a basic knowledge of U.S. foreign policy and international assistance programs.
Instruction: Lectures in tbe basic principles of security assistance resource management, including U.S. foreign policy, communicating in foreign cultures, foreign internal defense planning, and case studies of foreign assistance programs.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in comparative economics, international relations, or political science (1/74); in the upper-division baccalaureate category, 2 semester hours in comparative economics, international relations, or political science (1/74).

AR-1606-0025

Defense Against Methods of Entry

Course Number: 3C-F2; 244-F2.
Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ. *Version 2:* Intelligence School, Ft. Holabird, MD.
Length: *Version 1:* 9 weeks (272 hours). *Version 2:* 6–9 weeks (213–324 hours).
Exhibit Dates: *Version 1:* 6/72–Present. *Version 2:* 4/65–5/72.
Objectives: To provide military personnel with a working knowledge of protective security measures and devices.
Instruction: Lectures and practical experience in the use and repair of mechanical and electronic locking devices and alarm systems.
Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in physical security or police administration (1/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in physical security or police administration (1/74). *Version 2:* In the vocational certificate category, 1 semester hour in physical security or police administration (1/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in physical security or police administration (1/74).
Related Occupation Codes: 97B; 97C.

AR-1606-0026

Special Forces Operations and Intelligence

Course Number: *Version 1:* 244-AS1F 1. *Version 2:* 244-F5.
Location: *Version 2:* Intelligence School, Ft. Huachuca, AZ. *All Versions:* Institute for Military Assistance, Ft. Bragg, NC.
Length: *Version 1:* 16 weeks (671–680 hours). *Version 2:* 15 weeks (537–540 hours).
Exhibit Dates: *Version 1:* 2/79–Present. *Version 2:* 3/73–1/79.
Objectives: To provide enlisted personnel with the knowledge necessary to perform as supervisors in the intelligence field.
Instruction: *Version 1:* Lectures and practical exercises intelligence gathering and techniques of information analysis, including mapreading, counterintelligence techniques, basic photography and public administration. *Version 2:* Lectures in interrogation methods and techniques, information gathering and analysis, photograph and map reading, political and civil affairs operations in foreign nations, U.S. foreign policy, and counterintelligence techniques.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in basic photography, 2 in public administration or political administration or physical security and 3 in physical education (2/80). *Version 2:* In the vocational certificate category, 2 semester hours in political science, public administration, or police administration/physical security (1/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in political science, public administration, or police administration/physical security (1/74).
Related Occupation Codes: 11B; 11C; 11F; 12B; 76Y; 91B; 96B; 00Z; 05B.

1. Special Forces Intelligence
2. Intelligence Analyst (Special Forces)

Course Number: 244-F5.
Location: Intelligence School, Ft. Holabird, MD; Intelligence School, Ft. Huachuca, AZ.
Length: 7 weeks (247 hours).
Exhibit Dates: *Version 1:* 8/70–2/73. *Version 2:* 5/66–7/70.
Objectives: To provide enlisted personnel with the skills necessary to conduct interrogations and other intelligence activities.
Instruction: *All Versions:* Lectures in basic intelligence methods including personnel interviewing, report writing, and counterintelligence operations. *Version 1:* Topics include aerial and audio surveillance techniques, physical security, and foreign armies orientation. *Version 2:* Topics include interviews and interrogations, map reading, human relations, and the development of sources of information.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in political science, public administration, or police administration (1/74); in the upper-division baccalaureate category, 3 semester hours in political science, public administration, or police administration (1/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in political science or industrial security (1/74); in the upper-division baccalaureate category, 2 semester hours in intelligence methods (12/68).
Related Occupation Codes: 96B.

AR-1606-0028

Fixed Wing Qualification

Course Number: 2B-1980-B; 2B-101B-B; 2B-101C-B; 2B-061B-A; 2B-061C-F; 1B-1980-B; 1B-061B.

Location: Aviation School, Ft. Rucker, AL; Aviation School, Ft. Stewart, GA.

Length: 8-16 weeks (280-576 hours).

Exhibit Dates: 6/59-Present.

Objectives: To train helicopter pilots to fly fixed-wing aircraft.

Instruction: Lectures and flight training in fixed-wing aircraft operation, including aircraft maintenance, navigation, meteorology, and air assault tactics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in fixed-wing flight training, 2 in navigation or meteorology (2/74); in the upper-division baccalaureate category, credit in navigation or meteorology on the basis of institutional evaluation (12/68).

Related Occupation Codes: 100B; 100C; 100D; 100E; 100Q; 100R; 160A; 103A.

AR-1606-0029

Special Identification Techniques Analyst

Course Number: 231-05D30.

Location: Security Agency School, Ft. Devens, MA.

Length: 9 weeks (381 hours).

Exhibit Dates: 9/64-3/77.

Objectives: To thoroughly train personnel operators in analytical techniques and to provide the skills and knowledge necessary to identify and report information by selected special identification techniques.

Instruction: Theories and principles of identification techniques analysis; administrative operational tasks; introduction to intelligence; preparation and maintenance of mission logs; mission processing and analysis from raw data; evaluation and validation of activity reports; accuracy studies; on-the-job training programs in military radio reconnaissance activities.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (2/74).

Related Occupation Codes: 05D.

AR-1606-0030

Special Identification Techniques Operator

Course Number: 231-05D20.

Location: Security Agency School, Ft. Devens, MA.

Length: 14 weeks (599 hours).

Exhibit Dates: 2/66-Present.

Objectives: To train selected personnel in the operational procedures and techniques of telecommunication employing international codes at the intermediate speed classification level.

Instruction: Telecommunication theory and operational studies; radiotelegraph and teletypewriter procedures and operation; special identification techniques; cryptographic and communications security; signal recognition; radio direction finding.

Credit Recommendation: In the vocational certificate category, 2 semester hours in telecommunications, 1 in electronic theory (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in telecommunications, 1 in electronic theory (2/74); in the upper-division baccalaureate category, 2 semester hours in telecommunications, 1 in electronic theory (2/74).

Related Occupation Codes: 05D.

AR-1606-0031

Area Intelligence Specialist
(Area Intelligence Officer)

Course Number: 244-97C40; 3A-9668; 3A-972A.

Location: Intelligence School, Ft. Huachuca, AZ; Intelligence School, Ft. Holabird, MD.

Length: 20 weeks (600 hours).

Exhibit Dates: 2/71-Present.

Objectives: To provide selected intelligence officers with in-depth study in the political, historical, and geographical background of specific countries or areas, and to insure, through extensive study, a cultural understanding and language proficiency which will enable them to function as intelligence specialists.

Instruction: Historical, political, economic, and sociological aspects of national groups; strategic intelligence; U.S. intelligence structure; mission and employment of counterintelligence units; foreign intelligence organizations and techniques; use of automatic data processing in intelligence; intelligence collection by air reconnaissance; writing techniques and methods; map reading and cartographic materials; security-safeguarding military information; advanced operation of electronic and photographic equipment; radio communication; interviewing methods and written and oral interpersonal communications, including language interpretation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in political science or credit in public administration on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 9 semester hours in political science or credit in public administration on the basis of institutional evaluation (2/74).

AR-1606-0032

Intelligence Analyst, Specialist Candidate

Course Number: 243-96B20-I.

Location: Intelligence School, Ft. Holabird, MD.

Length: 12 weeks (425 hours).

Exhibit Dates: 8/70-Present.

Objectives: To train intelligence analysts as senior technicians in the analysis of the political, economic, and military capability of selected foreign governments and/or entities.

Instruction: Organizational and managerial theory; administrative and interrogational procedures; public speaking; political, social, and military history and composition of Southeast Asia.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in international relations, 2 in political science, 2 in business administration (2/74); in the upper-division baccalaureate category, 2 semester hours in intelligence methods (2/72).

Related Occupation Codes: 96B.

AR-1606-0033

1. Tactical Intelligence Staff Officer
2. Combat Intelligence Staff Officer

Course Number: 3A-9301.

Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ. *Version 2 :* Intelligence School, Ft. Holabird, Md.

Length: *Version 1:* 6 weeks (181 hours). *Version 2 :* 6 weeks (209 hours).

Exhibit Dates: *Version 1:* 3/72-Present. *Version 2:* 3/68-2/72.

Objectives: To provide selected commissioned officers with the knowledge and techniques of combat intelligence at battalion, brigade, and division level.

Instruction: Staff organization and procedures; area and counterintelligence; tactical imagery interpretation facility and terrain models; functions and duties of combat intelligence officer.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in political science or credit in public administration on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 2 semester hours in political science or credit in public administration on the basis of institutional evaluation (2/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in intelligence methods (3/70).

AR-1606-0034

Intelligence Analyst

Course Number: 243-96B20A.

Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ. *Version 2 :* Intelligence School, Ft. Holabird, MD.

Length: *Version 1:* 9 weeks (270 hours). *Version 2 :* 9 weeks (316 hours).

Exhibit Dates: *Version 1:* 2/72-1/79. *Version 2:* 3/67-1/72.

Objectives: To prepare selected enlisted personnel to assist intelligence staff officers in intelligence operations by providing them with the necessary skills and knowledge of military intelligence training.

Instruction: Military organizational functions; counterintelligence; interrogation; aerial surveillance; psychological operations; civil affairs orientation; preparation of intelligence reports; preparation and supervision of intelligence training programs; collection and processing of military information; production and dissemination of military intelligence; typewriting; map reading.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in public administration, 3 in political science (2/74); in the upper-division baccalaureate category, 3 semester hours in public administration, 3 in political science (2/74). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in intelligence methods (12/68).

Related Occupation Codes: 96B.

Location: Aviation School, Ft. Rucker, AL.

Length: 7–10 weeks (238–385 hours).

Exhibit Dates: 6/6[illegible] Present.

Objectives: To train National Guard pilots to fly CH-37 helicopters.

Instruction: Flight training and practical exercises in maintenance, instruments, and tactical subjects.

Credit Recommendation: In the upper-division baccalaureate category, credit in helicopter flight training on the basis of institutional evaluation (12/68).

Related Occupation Codes: 100B; 100C.

AR-1606-0057

1. AH-1G Instructor Pilot
2. AH-1G (Hueycobra) Instructor Pilot (Transition/Gunnery) Qualification

Course Number: 2C-F14.

Location: Aviation Center, Ft. Rucker, AL; Aviation Center, Ft. Stewart, GA.

Length: *Version 1:* 4–5 weeks (160–168 hours). *Version 2:* 6 weeks (229–238 hours).

Exhibit Dates: *Version 1:* 3/72–Present. *Version 2:* 2/67–2/72.

Objectives: To train selected and qualified pilots as instructor pilots in the AH-1G helicopter.

Instruction: Flight experience as instructor pilot and related academic subject matter, including principles and methods of instruction.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in principles and methods of instruction (10/78) *Version 2:* In the upper-division baccalaureate category, credit in instructional methods on the basis of institutional evaluation (12/68).

Related Occupation Codes: 100E; 062B; 062C; 062D.

AR-1606-0058

AH-1G Aviator Qualification

Course Number: 2C-100E.

Location: Aviation Center, Ft. Rucker, AL.

Length: 4–7 weeks (158–256 hours).

Exhibit Dates: 4/72–Present.

Objectives: To qualify rated pilots with transition training on AH-2G (Cobra) type helicopters.

Instruction: Lectures and practical exercises in transition flight training on AH-1G (Cobra) type helicopters, including preflight inspections, ground procedures, night operations, instrument flying, regulations, flight planning, and maintenance procedures.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in advanced helicopter flight training (10/78).

Related Occupation Codes: 100A; 102A; 100E.

AR-1606-0059

AH-1G (Hueycobra) Pilot Transition/Gunnery

Course Number: 2C-F15.

Location: Aviation School, Ft. Rucker, AL.

Length: 4–5 weeks (121–162 hours).

Exhibit Dates: 2/67–Present.

Objectives: To qualify commissioned and warrant officer aviators in the operation of AH-1G Hueycobra helicopters.

Instruction: AH-1G transition and advanced tactical flight training, and lectures and practical experience in aircraft maintenance, gunnery, rotary-wing preflight briefing, and night and instrument operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

Related Occupation Codes: 100B; 100C; 100D.

AR-1606-0060

UH-1 Aviator Qualification (Navy)
(UH-1 Pilot Transition (Navy))

Course Number: 2C-F19.

Location: Aviation School, Ft. Rucker, AL.

Length: 4 weeks (139–148 hours).

Exhibit Dates: 9/68–Present.

Objectives: To train pilots in the safe operation of UH-1 helicopters and the techniques of air-to-ground helicopter gunnery operations.

Instruction: Lectures and practical experience in transition and tactical flight training, maintenance, precautionary measures, critical conditions, and emergency procedures.

Credit Recommendation: Credit is not recommended because of the military nature of the course (2/74).

AR-1606-0061

U-21 Instructor Pilot
(U-21 Standardization Instructor Pilot Qualification)

Course Number: 2B-F11.

Location: Aviation Center, Ft. Rucker, AL.

Length: Self-paced 6 weeks (196–233 hours).

Exhibit Dates: 3/68–Present.

Objectives: To train selected and qualified pilots as instructor pilots in the U-21 airplane.

Instruction: *Version 1:* Course is self-paced beginning in 1976. Flight experience as instructor pilot and related academic subject matter including principles and methods of instruction.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in principles and methods of instruction (10/78).

Related Occupation Codes: 101C; 061C.

AR-1606-0062

HU-1 Instructor Pilot Transition
(HU-1 Instructor Pilot Transition)
(HU-1A Instructor Pilot Transition)

Course Number: 1-B-F22.

Location: Aviation School, Ft. Rucker, AL.

Length: 4–5 weeks (132–177 hours).

Exhibit Dates: 2/59–12/68.

Objectives: To qualify aviators as instructor pilots.

Instruction: Flight experience and lectures on principles and methods of instruction.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in principles and methods of instruction (2/74); in the upper-division baccalaureate category, credit in instructional methods on the basis of institutional evaluation (12/68).

Related Occupation Codes: 100B; 100C; 100D.

AR-1606-0063

CH-34 Instructor Pilot Qualification

Course Number: 2C-F20.

Location: Aviation School, Ft. Rucker, AL.

Length: 6 weeks (223 hours).

Exhibit Dates: 10/68–Present.

Objectives: To train aviators as instructor pilots.

Instruction: Flight experience and lectures on aircraft principles and methods of instruction.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in principles and methods of instruction (2/74).

Related Occupation Codes: 100B; 100C; 100D.

AR-1606-0064

CH-47 Aviator Qualification
(CH-47(Chinook)Pilot Transition)

Course Number: 2C-AST-1G; 2C-100C-B; 2C-062D-B; 1-B-F37.

Location: Aviation Center, Ft. Rucker, AL.

Length: 6–8 weeks (219–268 hours).

Exhibit Dates: 8/63–Present.

Objectives: To qualify rated pilots with transition training on CH-47 (Chinook) type helicopters.

Instruction: Lectures and practical exercises in transition flight training on CH-47 aircraft, including preflight inspection, ground procedures, night operations, instrument flying, regulations, flight planning and maintenance procedures.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in advanced helicopter flight training (10/78).

Related Occupation Codes: 100B; 102A; 100C.

(Officer Fixed Wing Aviator—Instruments Phase)

Course Number: 1-H-1980A; 1-H-061B-B; 1-R-061B-B; 1-A-1980A.

Location: Aviation School, Ft. Rucker, AL.

Length: 9–10 weeks (335–363 hours).

Exhibit Dates: 8/60–4/65.

Objectives: To train commissioned officers in basic flying techniques and tactical employment of observation and utility fixed-wing aircraft.

Instruction: Lectures and practical exercises in utility fixed-wing and observation aircraft instrument flying techniques and instrument flight theory.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in instrument flight or instrument flight theory (2/74).

Related Occupation Codes: 100B; 100C.

AR-1606-0068

Officer/Warrant Officer Fixed Wing Aviator

Course Number: *All Versions:* 2B-1980-A; 2B-061B-B; 2B-061C-B. *Version 1:* 2B-101B-A; 2B-101C-A; 2B-101B-B; 2B-101C-B.

Location: Aviation School, Ft. Rucker, AL.

Length: *Version 1:* 33 weeks (1203–1244 hours). *Version 2:* 36 weeks (1301–1339 hours).

Exhibit Dates: *Version 1:* 1/67–Present. *Version 2:* 5/65–12/66.

Objectives: To provide commissioned officers with the knowledge and skills necessary to qualify as fully rated instrument pilots.

Instruction: Lectures and practical exercises in utility fixed-wing aircraft instrument flying techniques, basic flight training, meteorology, navigation, flight theory, aircraft maintenance, and aerodynamics.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 23 semester hours in flight experience and instruction, meteorology, navigation, maintenance, aerodynamics, or flight theory (2/74); in the upper-division baccalaureate category, 3 semester hours in primary meteorology or navigation (12/68). *Version 2:* In the lower-division baccalaureate/associate degree category, 21 semester hours in flight experience and instruction, meteorology, navigation, maintenance, aerodynamics, or flight theory (2/74); in the upper-division baccalaureate category, 3 semester hours in primary meteorology or navigation (12/68).

Related Occupation Codes: 100B; 100C.

AR-1606-0069

1. Flight Simulator Specialist
   (Flight Simulator Operations and Maintenance)
2. Flight Simulator Operations and Maintenance

Course Number: 191-93D20, 1-R-902.1.

Location: Aviation School, Ft. Rucker, AL.

Length: *Version 1:* 11–16 weeks (398–547 hours). *Version 2:* 8 weeks (300 hours).

Exhibit Dates: *Version 1:* 4/61–Present. *Version 2:* 2/57–3/61.

Objectives: To qualify enlisted personnel as operators and instructors in simulated-flight training.

Instruction: Lectures and practical experience in radio navigation, aircraft control and simulated instrument flight, and principles of instruction.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in radio navigation, 3 in principles of instruction (2/74). *Version 2:* In the vocational certificate category, 6 semester hours in flight simulator operation/maintenance (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in flight simulator operation/ maintenance (2/74).

Related Occupation Codes: 93D.

Officer/Warrant Officer Rotary Wing Qualification (Reserve Component/Allied)
(Officer/Warrant Officer Rotary Wing Qualification)

Course Number: 2C-1981-A; 2C-100B-A; 2C-062B-A.

Location: Aviation School, Ft. Rucker, AL.

Length: 8 weeks (277–286 hours).

Exhibit Dates: 2/66–Present.

Objectives: To qualify fixed-wing aircraft pilots as helicopter pilots.

Instruction: Flight experience and lectures on helicopter theory of flight and aerodynamics, and maintenance of helicopters.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in flight experience (2/74); in the upper-division baccalaureate category, credit in helicopter flight training on the basis of institutional evaluation (12/68).

Related Occupation Codes: 100B.

AR-1606-0071

AH-1S (TOW) Cobra Aviator Qualification
(Tow Cobra Aviator Qualification)

Course Number: 2C-F29.

Location: Aviation Center, Ft. Rucker, AL.

Length: 2–3 weeks (61–90 hours).

Exhibit Dates: 11/75–Present.

Objectives: To qualify selected AH-1G pilots and instructor pilots in the AH-1Q (TOW) Cobra.

Instruction: Lectures and practical exercises in AH-1Q academic subjects and AH-1Q flight subjects.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (10/78).

Related Occupation Codes: 100E; 102A.

AR-1606-0072

General Officer Rotary Wing Qualification

Course Number: None.

Location: Aviation School, Ft. Rucker, AL.

Length: 5 weeks (206 hours).

Exhibit Dates: 1/67–12/68.

Objectives: To qualify aviators as helicopter pilots.

Instruction: Flight experience, and lectures on helicopter theory of flight, meteorology, navigation, and aircraft maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in flight experience, flight theory, meteorology, navigation, or aircraft maintenance (2/74); in the upper-division baccalaureate category, credit in helicopter flight training on the basis of institutional evaluation (12/68).

AR-1606-0073

General Officer Rotary Wing Flight Training

Course Number: 1-A-1981G.

Location: Aviation School, Ft. Rucker, AL.

Length: 16 weeks (548 hours).

Exhibit Dates: 4/59–12/68.

Objectives: To qualify aviators as helicopter pilots.

Instruction: Flight experience, and lectures and practical application of navigational techniques, meteorology, aircraft maintenance, flight physiology, and instrument flight theory.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 12 semester hours in flight experience, navigation, meteorology, aircraft maintenance, or flight physiology (2/74); in the upper-division baccalaureate category, credit in meteorology and navigation on the basis of institutional evaluation (12/68).

Course Number: *Version 1:* 3-30-C22. *Version 2:* 3-30-C22. *Version 3:* 3-30-C22. *Version 4:* 30-A-C4.

Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ. *Version 2 :* Intelligence School, Ft. Huachuca, AZ. *Version 3 :* Intelligence School, Ft. Holabird, MD. *Version 4 :* Intelligence School, Ft. Holabird, MD.

Length: *Version 1:* 26 weeks (834 hours). *Version 2:* 26–33 weeks (26–1013 hours). *Version 3:* 36 weeks (1094–1151 hours). *Version 4:* 38 weeks (1140 hours).

Exhibit Dates: *Version 1:* 10/79–Present. *Version 2:* 10/73–9/79. *Version 3:* 7/67–9/73. *Version 4:* 12/57–6/67.

Objectives: To train commissioned officers to perform as intelligence officers at command and staff levels.

Instruction: *All Versions:* Lectures and practical exercises in intelligence functions, including command and staff procedures, organization and tactics of foreign armies, tactics and combined arms, and domestic emergencies. *Version 3:* Includes comparative government and foreign policies, legal principles, effective speaking and writing, national defense structure, air defense and civil affairs, communications, map reading, Army management, intelligence and security procedures and agencies, counterintelligence, and electives in communication, government and politics, management, and military arts.

Credit Recommendation: *Version 1:* Pending evaluation *Version 2:* In the upper-division baccalaureate category, 6 semester hours in personnel administration/management, 3 in oral and written communication, and 3 in world area studies (U.S.S.R.) (6/79) *Version 3:* In the upper-division baccalaureate category, 6 semester hours in intelligence methods, 3 in business organization and management, and, on the basis of institutional evaluation credit in political science (12/68). *Version 4:* In the upper-division baccalaureate category, 6 semester hours in intelligence methods, 3 in business organization and management, 6 in political science (12/68).

AR-1606-0077

Associate Military Intelligence Officer Advanced

Course Number: 30-A-C5.

Location: Intelligence School, Ft. Holabird, MD.

Length: 14 weeks (496 hours).

Exhibit Dates: 12/57–12/68.

Objectives: To provide commissioned officers with advanced intelligence training.

Instruction: Lectures and practical exercises in staff types and organization principles, staff officer functions, records and reports, personnel morale and services, information programs, Congressional relations, personnel educational development, management medical services, methods of instruction, military justice, and leadership and problems of command.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in business organization and management, 3 in intelligence methods, and credit in political science on the basis of institutional evaluation (12/68).

AR-1606-0078

Military Intelligence (Analysis) Enlisted

Course Number: 30-R-971.7.

Location: Intelligence School, Ft. Holabird, MD.

Length: 14 weeks (490 hours).

Exhibit Dates: 12/57–12/68.

Objectives: To train enlisted personnel to collect, evaluate, and disseminate information pertaining to espionage, treason, and subversive activities, and to conduct background investigations of military and civilian personnel.

Instruction: Lectures in military science, general intelligence methods and counterintelligence methods, national military establishment organization, intelligence units administration, investigative reports, expository writing and oral expression, combat operations, investigative legal principles, map reading, and physical conditioning.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in intelligence methods (12/68).

AR-1606-0079

Communications Security Analyst

(Communications Security Analysis)

Course Number: 231-05G30; 232-98D20.

Location: Security Agency School, Ft. Devens, MA.

Length: 8–9 weeks (283 hours).

Exhibit Dates: 6/64–3/77.

Objectives: To train enlisted personnel to advise and assist the commander in communications security matters.

Instruction: Lectures and practical exercises in national defense organization, Army organizations and commands, intelligence organizations and functions, map reading introduction, message drafting and signal communications procedures, cryptologic material security requirements, crypto-security administration, and communication cover and deception.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (5/74).

Related Occupation Codes: 05G.

Counterintelligence Officer Transition

(Intelligence Research Officer Transition)

Course Number: 3C-9666-B.

Location: Intelligence School, Ft. Huachuca, AZ; Intelligence School, Ft. Holabird, MD.

Length: 7 weeks (234–264 hours).

Exhibit Dates: 8/66–Present.

Objectives: To train intelligence officers and technicians in the security, operational, and legal aspects of counterintelligence operations.

Instruction: Lectures and practical exercises in the security, operational, and legal aspects of counterintelligence operations, including security investigations, review of criminal law, evidence, guarantees and rights of the individual, self-incrimination, interrogation procedures, personnel security investigations, countersabotage, counterespionage, and search and seizure.

Credit Recommendation: In the vocational certificate category, 2 semester hours in intelligence methods (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in intelligence methods (4/74); in the upper-division baccalaureate category, 2 semester hours in intelligence methods (12/68).

Related Occupation Codes: 971A; 972A.

AR-1606-0081

ORDER OF BATTLE INTELLIGENCE OFFICER

Course Number: 30-A-9318.

Location: Intelligence School, Ft. Holabird, MD.

Length: 10 weeks (350 hours).

Exhibit Dates: 11/57–12/68.

Objectives: To train commissioned officers in intelligence, counterintelligence, and special intelligence operations.

Instruction: Lectures and practical exercises in military organization, tactics, and operations, including atomic warfare, guided missiles, defensive and offensive combat, tactical air operations, and map and photograph reading; general intelligence orientation, interrogation, technical intelligence, and weather and terrain; organization and tactics of selected foreign armies; and order-of-battle organization, principles, procedures, and techniques.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in intelligence methods (12/68).

AR-1606-0082

MILITARY INTELLIGENCE OFFICER ORIENTATION

Course Number: 3-30-C21; 3A-F1.

Location: Intelligence School, Ft. Holabird, MD.

Length: 4–6 weeks (142–211 hours).

Exhibit Dates: 7/65–12/68.

Objectives: To teach commissioned officers the principles of intelligence organization, doctrine, techniques, and operations.

Instruction: Lectures and practical exercises in the principles of intelligence organization, doctrine, techniques, and operations, including order of battle; interrogation; imagery interpretation; intelligence collection, production, and dissemination; counterintelligence; and security.

Credit Recommendation: In the vocational certificate category, 2 semester hours in intelligence methods (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in intelligence methods (4/74); in the upper-division baccalaureate category, 2 semester hours in intelligence methods (12/68).

AR-1606-0083

SPECIAL FORCES OFFICER INTELLIGENCE

Course Number: 3C-F11.

Location: Intelligence School, Ft. Holabird, MD.

Length: 6 weeks (217 hours).

Exhibit Dates: 2/67–12/68.

Objectives: To teach basic intelligence and counterintelligence techniques to intelligence staff or special forces commissioned officers.

Instruction: Lectures and practical exercises in basic intelligence and counterintelligence techniques, including functions of intelligence staff officers, combat intelligence organization, interrogation and aerial surveillance and reconnaissance, nuclear warfare, communication security, and order of battle.

Credit Recommendation: In the vocational certificate category, 2 semester hours in intelligence methods (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in intelligence methods (5/74); in the upper-division baccalaureate category, 2 semester hours in intelligence methods (12/68).

   (Photointerpretation Enlisted)

Course Number: *Version 1:* 242-96D20. *Version 2:* 242-96D20. *Version 3:* 30-R-969.1.

Location: Intelligence School, Ft. Holabird, MD; Intelligence School, Ft. Huachuca, AZ.

Length: *Version 1:* Self-paced 3–17 weeks (100–550 hours). *Version 2:* 13 weeks (390–465 hours). *Version 3:* 17–19 weeks (595–655 hours).

Exhibit Dates: *Version 1:* 1/74–3/79. *Version 2:* 4/67–12/73. *Version 3:* 8/57–3/67.

Objectives: To train enlisted personnel to perform as tactical image and photo interpreters.

Instruction: *All Versions:* Lectures and practical exercises in the interpretation of tactical images or photos; in aerial surveillance and military organization, planning, and operations; operation of intelligence teams; map reading and terrain analysis techniques; intelligence procedures; photo reading fundamentals and interpretation; photogrammetry; and tactics and military information. *Version 1:* Course has lectures, laboratories and self-paced instruction in the interpretation of aerial photographs and images.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in general college mathematics to include algebra and trigonometry, 3 in introduction to maps and air photos (6/79); in the upper-division baccalaureate category, 3 semester hours in aerial photo and image interpretation, 3 in photogrammetry (6/79) *Version 2:* In the upper-division baccalaureate category, 3 semester hours in imagery interpretation (12/68). *Version 3:* In the upper-division baccalaureate category, 5 semester hours in photographic interpretation (12/68).

Related Occupation Codes: 96D.

AR-1606-0085

INTELLIGENCE STAFF OFFICER

Course Number: 30-A-9301.

Location: Intelligence School, Ft. Holabird, MD.

Length: 10 weeks (350 hours).

Exhibit Dates: 9/57–12/68.

Objectives: To train commissioned officers to perform as intelligence staff officers.

Instruction: Lectures and practical exercises in the duties of intelligence staff officers, including tactics and operations, map and photo reading, atomic warfare, organization and tactics of selected foreign armies, planning and briefings, communications reconnaissance, counterintelligence, security, interrogation, and order of battle.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in intelligence methods (12/68).

AR-1606-0086

ELECTRONIC WARFARE (EW) CRYPTOLOGIC TACTICAL OPERATIONS OFFICER

Course Number: 3-30-37A.

Location: Intelligence School, Ft. Devens, MA.

Length: 11 weeks (377 hours).

Exhibit Dates: 8/76–Present.

Objectives: To prepare company-grade officers for assignment to tactical electronic warfare cryptologic units.

Instruction: Course covers a review of basic electrical circuits, receivers, transmitters, and electron devices. Specific topics include signal intelligence, tactical communications, and electronic countermeasures.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (9/77).

AR-1606-0087

OH-6 AVIATOR QUALIFICATION

Course Number: 2C-F26.

Location: Aviation School, Ft. Rucker, AL.

Length: 2 weeks (79 hours).

Exhibit Dates: 3/72–Present.

Objectives: To qualify commissioned and warrant officers to fly OH-6 aircraft.

Instruction: Lectures and practical exercises on the OH-6 aircraft, including transition flight training; briefing for night operation; maintenance subjects; power plant; fuel and oil systems; transmission systems; vibrations and tracking; weight and balance; test flight requirements; tactical subjects; XM27E1 introduction; and M134 disassembly, assembly, and troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/74).

Related Occupation Codes: 100B.

AR-1606-0088

AIR OBSERVER

Course Number: 1-A-F7.

Location: Aviation School, Ft. Rucker, AL.

Length: 8 weeks (303 hours).

Exhibit Dates: 5/57–12/68.

Objectives: To train commissioned officers to perform as air observers.

Instruction: Lectures and practical exercises in the functions of air observers, including general tactical subjects; engineer reconnaissance techniques and FEX; organization and equipment of aggressor-type units; combat intelligence; photo interpretation; intelligence FEX; joint air-ground operations; fire support; signal tactical subjects; flight subjects; general subjects; and tactical maps and photos.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

AR-1606-0089

U-8 INSTRUCTOR PILOT
(U-8 Instructor Pilot Qualification)

Course Number: 2B-F14.

Location: Aviation Center, Ft. Rucker, AL.

Length: 4 weeks (155–159 hours).

Exhibit Dates: 2/69–2/77.

Objectives: To train aviators to perform as U-8 instructor pilots.

Instruction: Lectures and practical exercises in the functions of instructor pilots for the conduct of U-8 aircraft standardization and transition training, including MOI flight training (U-8); review of normal flight procedures and introduction to MOI techniques; emergency procedures; MOI for instrument flight procedures; aircraft systems familiarization; utility; electrical, propeller, landing gear, and brake systems; power plant and related systems; MOI flight subjects; and aviation medicine and life support.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in principles and methods of instruction (10/78).

Related Occupation Codes: 100C.

AR-1606-0090

Helicopter Door Gunner Qualification

Course Number: 600-67A1F.

Location: Aviation School, Ft. Rucker, AL.

Length: 3 weeks (112-118 hours).

Exhibit Dates: 4/68-Present.

Objectives: To qualify aircraft maintenance crewmen to perform as helicopter door gunners.

Instruction: Lectures and practical exercises in providing suppressive light automatic weapons fire and general armed security for assault- and cargo-class helicopters conducting tactical operations, and on the maintenance of the aircraft, including environmental training; attack helicopter orientation flight; duties of door gunners; visual search and target detection; M21 and M23 armament subsystem introduction; gunnery training; M23 aerial gunnery; and UH-1 maintenance subjects.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/74).

Related Occupation Codes: 67A.

AR-1606-0091

U-21 Aviator Qualification

Course Number: 2B-F17; 2B-F10.

Location: Aviation School, Ft. Rucker, AL.

Length: 3-4 weeks (123-151 hours).

Exhibit Dates: 10/67-Present.

Objectives: To train commissioned and warrant officers who have aeronautical designation and instrument rating (fixed wing), and who are multiengine qualified, to operate U-21 airplanes.

Instruction: Lectures and practical exercises in the operation of U-21 airplanes, including flight briefing; preflight inspection and ground procedures; visual flight transition training; instrument flight transition training; hood or AI; procedures trainer; regulations and ATC; TACAN; weather flight planning and airborne weather radar; instruments and radios; landing gear and brake systems; fuel systems and performance data charts; electrical, utility, propeller, power plant and related systems; weight and balance; and test flight requirements.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/74).

Related Occupation Codes: 100C; 100D.

AR-1606-0092

OV-1 (Mohawk) Aviator Combat Surveillance Qualification

Course Number: 3A-F14.

Location: Intelligence School, Ft. Huachuca, AZ; Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ; Combat Surveillance School, Ft. Huachuca, AZ.

Length: 2-4 weeks (92-165 hours).

Exhibit Dates: 9/67-Present.

Objectives: To train OV-1 aviators in aerial radar, infrared, camera and Doppler navigation systems, and in the organization and operations of aerial surveillance units.

Instruction: Lectures and practical exercises in OV-1 (Mohawk) aviator combat surveillance, including surveillance aircraft orientation; AN/ASN-64 Doppler navigation system; specific EW and radar warning receivers and countermeasures sets; and specific photographic, camera, electronic flasher, radar, and infrared surveillance systems.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/74).

Related Occupation Codes: 100R.

AR-1606-0093

1. Fixed Wing Instrument
2. Fixed Wing Instrument Qualification

Course Number: *Version 1:* 2B-101C-E. *All Versions:* 2B-F3; 2B-101C-E. *Version 2:* 2B-061C-E; 1-B-F40.

Location: Aviation School, Ft. Rucker, AL.

Length: *Version 1:* 7-8 weeks (260-299 hours). *Version 2:* 8-10 weeks (307-359 hours).

Exhibit Dates: *Version 1:* 1/71-Present. *Version 2:* 1/65-12/70.

Objectives: To qualify pilots for instrument flight in fixed-wing aircraft.

Instruction: Lectures and practical exercises in instrument flight training, aircraft systems maintenance, aviation medicine and life support, radio navigation, airport surveillance radar, navigational computer, approach procedures, holding, instrument landing system, communications failure, pressure and winds, weather maps, teletype reports, synthetic flight training, and trainer planning.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in instrument flight qualifications (6/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in instrument flight qualifications (6/74); in the upper-division baccalaureate category, credit in instrument flying on the basis of institutional evaluation (12/68).

Related Occupation Codes: 100C.

AR-1606-0094

Strategic Signal Intelligence Officer (Strategic SIGINT Officer)

Course Number: 3-30-37B.

Location: Intelligence School, Ft. Devens, MA.

Length: 8 weeks (277 hours).

Exhibit Dates: 1/77-Present.

Objectives: To train military intelligence officers to supervise and manage activities at U.S. intelligence and security command field stations and to assume strategic cryptologic staff officer assignments.

Instruction: Course contains a review of basic electrical circuits, receivers, transmitters, and electron devices. Specific topics include message format and introduction to cryptologic analysis.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (9/77).

AR-1606-0095

Army (Aviator) Transport Pilot–Phases I, II and III (Rotary Wing)

Course Number: 1-R-F10.

Location: *Version 1:* Primary Helicopter School, Ft. Wolters, TX. *Version 2:* Aviation School, Ft. Rucker, AL.

Length: 34 weeks (1294 hours).

Exhibit Dates: 2/58-12/68.

Objectives: To train enlisted personnel to pilot transport helicopters.

Instruction: Lectures and practical exercises in the duties of transport helicopter pilots, including basic officer orientation, primary and basic rotary-wing training, light helicopter transition, basic instrument flight familiarization and training, light transport helicopter day-and-night cross-country training, and maintenance, and tactical subjects.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in commercial pilot training (6/74); in the upper-division baccalaureate category, 3 semester hours in primary meteorology and navigation, and credit in helicopter flight training on the basis of demonstrated skills and/or institutional (12/68).

Related Occupation Codes: 100B; 100C; 100D.

AR-1606-0096

CV-2 (Caribou) Instructor Pilot Qualification

Course Number: 2B-F6.

Location: Aviation School, Ft. Rucker, AL.

Length: 6 weeks (238 hours).

Exhibit Dates: 6/65-12/68.

Objectives: To train aviators as instructor pilots in CV-2 aircraft.

Instruction: Lectures and practical exercises in instructing enlisted personnel in the operation of CV-2 aircraft. Topics include flight training, tactical flight operations, and aircraft systems and maintenance.

Credit Recommendation: In the upper-division baccalaureate category, credit in instructional methods on the basis of institutional evaluation (12/68).

Related Occupation Codes: 100C.

AR-1606-0097

Rotary Wing Instrument Qualification

Course Number: 2C-F12.

Location: Aviation School, Ft. Rucker, AL.

Length: 5 weeks (222 hours).

Exhibit Dates: 2/67-12/68.

Objectives: To qualify aviators for helicopter instrument flight.

Instruction: Lectures and practical exercises in helicopter instrument flight. Academic course work includes enroute and approach charts, radio navigation, flight regulations, air traffic control, dead reckoning computer, flight planning and navigation, operation of tactical and airborne radios and transponders, and tactical instrument procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in instrument rating (6/74); in the upper-division baccalaureate category, credit in instrument flying on the basis of institutional evaluation (12/68).

Related Occupation Codes: 100B; 100C; 100D.

AR-1606-0098

Warrant Officer Candidate Preflight Indoctrination—Fixed Wing

Course Number: 2B-F8.

Location: Primary Helicopter School, Ft. Wolters, TX.

Length: 4 weeks (140 hours).

Exhibit Dates: 5/66-12/68.

Objectives: To train enlisted personnel as warrant officer aviators.

Instruction: Lectures and practical exercises in the duties of warrant officer aviators. Course consists largely of leadership and military-related subjects.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

Related Occupation Codes: 100Q; 100R.

AR-1606-0099

Army Aviation Tactics Refresher

Course Number: 1-A-F4.

Location: Aviation School, Ft. Rucker, AL.

Length: 4 weeks (140 hours).

Exhibit Dates: 4/57-12/68.

Objectives: To train aviators to employ aircraft and allied equipment in tactical support of combat operations.

Instruction: Lectures and practical exercises in aircraft and allied equipment employment in support of combat operations. Course includes flight training refresher, navigation, gunnery, tactical communications, and instrument techniques.

Credit Recommendation: Credit is not recommended because of the militery specific nature of the course (12/68).

AR-1606-0100

H-13/H-34 Transition Flight Training

Course Number: 1-0-25.

Location: Aviation School, Ft. Rucker, AL.

Length: 13 weeks (483 hours).

Exhibit Dates: 2/57-12/68.

Objectives: To train fixed-wing pilots to fly and operate rotary-wing aircraft.

Instruction: Lectures and practical exercises in the operation of H-13 and H-34 helicopters.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in helicopter flight training (6/74).

AR-1606-0101

Army H-37 Helicopter Pilot's Transition Flight Training

Course Number: Not available.

Location: Aviation School, Ft. Rucker, AL.

Length: 4 weeks (143 hours).

Exhibit Dates: 7/57-12/68.

Objectives: To train selected enlisted personnel to command and pilot H-37 transport helicopters.

Instruction: Lectures and practical exercises in piloting and commanding H-37 helicopters. Course includes transition flight training, maintenance, and tactical subjects.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

Related Occupation Codes: 100C.

AR-1606-0102

Army Transport Helicopter Pilot-Phase III

Course Number: 1-H-1981B.

Location: Aviation School, Ft. Rucker, AL.

Length: 14 weeks (490 hours).

Exhibit Dates: 10/57-12/68.

Objectives: To train commissioned and warrant officers and qualified enlisted personnel to pilot transport helicopters in aviation units and ambulance detachments.

Instruction: Lectures and practical exercises in piloting a transport helicopter. Course includes light cargo helicopter flight, instrument flight, day-and-night cross-country flight, aircraft maintenance, and tactical operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

Related Occupation Codes: 100C.

AR-1606-0103

H-13/H-19 Transition Flight Training

Course Number: 1-0-23.

Location: Aviation School, Ft. Rucker, AL.

Length: 13 weeks (483 hours).

Exhibit Dates: 2/57-12/68.

Objectives: To train aviators who have had previous experience in fixed-wing aircraft to operate H-13 and H-19 helicopters.

Instruction: Lectures and practical exercises in the operation and tactical employment of H-13 and H-19 helicopters.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in helicopter flight training (6/74).

AR-1606-0104

U-8D Aviator Qualification
(U-8D (Seminole) Aviator Qualification)

Course Number: 2B-F16; 2B-F15; 2B-101C-D; 2B-061C-C.

Location: Aviation School, Ft. Rucker, AL.

Length: 3-4 weeks (128-159 hours).

Exhibit Dates: 1/69-Present.

Objectives: To train commissioned and warrant officer pilots in the operation of U-8D (Seminole) airplanes.

Instruction: Lectures and practical exercises in the operation of U-8D (Seminole) airplanes, including transition flight training; briefing, preflight inspection, and ground procedures; general flight orientation; normal take-offs and landings; night operations; engine-out procedures; flight controls; maintenance of landing gear and brakes; electrical, utility, propeller, fuel, and power systems; synthetic instrument training; and instrument proficiency.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/74).

Related Occupation Codes: 100B; 100C.

AR-1606-0105

Army Aviator Helicopter

Course Number: 1-A-1981A.

Location: Aviation School, Ft. Rucker, AL.

Length: 10 weeks (396 hours).

Exhibit Dates: 9/57-12/68.

Objectives: To train fixed-wing aviators to perform as helicopter pilots.

Instruction: Lectures and practical exercises in the duties and skills necessary to perform as helicopter pilots. Course includes preflight, basic flight techniques, advanced flight maneuvers, maintenance of rotary wing vehicles, and tactical flight maneuvers.

Credit Recommendation: In the vocational certificate category, 3 semester hours in flight training (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in flight training (6/74).

AR-1606-0106

Army Helicopter Transport Tactical

Course Number: 1-A-F12.

Location: Aviation School, Ft. Rucker, AL.

Length: 7 weeks (277 hours).

Exhibit Dates: 3/57-12/68.

Objectives: To train key aviator personnel to pilot transport helicopters.

Instruction: Lectures and practical exercises in transport helicopter operations, including helicopters in transport and utility operations; cross-country flights; and tactical operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

AR-1606-0107

Army Aviation Tactics

Course Number: 1-A-1980.

Location: Aviation School, Ft. Rucker, AL.

Length: 19 weeks (712-715 hours).

Exhibit Dates: 9/57-12/68.

Objectives: To train commissioned officers who have had primary flight training to perform as fixed-wing aviators.

Instruction: Lectures and practical exercises in Army aviation tactics, including advanced flight training, tactical subjects, general subjects, advanced hood or actual instrument flight training, general instrument flight subjects, and MOI academics seminar.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in commercial and instrument pilot training (6/74); in the upper-division baccalaureate category, 3 semester hours in weather interpretation and elementary navigation (12/68).

AR-1606-0108

Instrument Flight Examiner

Course Number: 1-A-2519.

Location: Aviation School, Ft. Rucker, AL.

Length: 4 weeks (154 hours).

Exhibit Dates: 5/57-12/68.

Objectives: To qualify instrument aviators as instrument flight examiners.

Instruction: Lectures and practical exercises in instrument flight examiner duties, including advanced hood or actual instrument flight training; flight and synthetic flight review; instrument navigation techniques and procedures; radio ranges (all types) and systems; ILS; radio compass; loop and ADF procedures; general instrument flight subjects; Jeppesen manual; regulations; flight service; ATC; E6B computer; IFR navigation; weather; instrument flying trends and equipment; and GCA.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

AR-1606-0109

U1-A Transition Flight Training

Course Number: 1-A-F9.

Location: Aviation School, Ft. Rucker, AL.

Length: 3 weeks (110 hours).

Exhibit Dates: 12/56-12/68.

Objectives: To train commissioned officers and pilots to operate U1-A aircraft.

Instruction: Lectures and practical exercises in the operation of the U1-A aircraft. Course includes basic and advanced maneuvers, and maintenance as it pertains to safe operations and tactics.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

AR-1606-0110

AVIATION OFFICER (ADVANCED)

Course Number: 1-A-F2.
Location: Aviation School, Ft. Rucker, AL.
Length: 8 weeks (280 hours).
Exhibit Dates: 6/57-12/68.
Objectives: To train qualified pilots to manage aviation training.
Instruction: Lectures and practical exercises in the management of aviation training activities at the advanced level. Course includes military organization, staff functions and responsibilities, supply and maintenance functions, and research and development testing.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

AR-1606-0111

FIXED WING MULTI-ENGINE QUALIFICATION

Course Number: 2B-15A; 2B-1980; 2B-101C-H.
Location: Aviation Center, Ft. Rucker, AL.
Length: 10-15 weeks (366-649 hours).
Exhibit Dates: 3/73-Present.
Objectives: To train commissioned or warrant officers for multiengine aircraft qualification and for an FAA instrument rating.
Instruction: Lectures and practical exercises in fixed-wing aircraft flight techniques, including contact flight training systems familiarization, principles of flight, contact transition flight training synthetic flight training, instrument academic subjects, and aviation medicine and life support.
Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in multiengine flight, 3 in instrument flight, and 3 in instrument ground training (10/78).

AR-1606-0112

ARMY AVIATOR BASIC FLIGHT TRAINING (HELICOPTER)

Course Number: 1-OE-6.
Location: Aviation School, Ft. Rucker, AL.
Length: 12 weeks (483 hours).
Exhibit Dates: 6/55-6/57.
Objectives: To train personnel for assignment to pilot positions in helicopter-equipped Army transport aviation units and medical service ambulance detachments.
Instruction: Lectures and practical exercises in helicopter flight training, including intermediate and advanced rotary-wing flight training, basic instrument flight training, cross-country flight training, general subjects, tactical subjects for warrant officer candidates and aviation maintenance subjects.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in first aid and hygiene, and credit in helicopter flight training on the basis of institutional evaluation (12/68).
Related Occupation Codes: 100C.

AR-1606-0113

SENIOR ARMY OFFICER FLIGHT TRAINING

Course Number: 1-O-14.
Location: Aviation School, Ft. Rucker, AL.
Length: 35 weeks (1217 hours).
Exhibit Dates: 8/55-12/68.
Objectives: To train senior officers as fixed-wing and helicopter pilots.
Instruction: Lectures and practical exercises in the skills necessary to perform in aviation command and staff positions and to perform as fixed-wing and helicopter pilots. Course includes basic and advanced flight training (both fixed-wing and helicopter), selected maintenance subjects, meteorology, navigation, and tactical subjects.
Credit Recommendation: In the vocational certificate category, 6 semester hours in commercial flight, 6 in helicopter flight, 4 in navigation, and 4 in meteorology (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in commercial flight, 3 in helicopter flight, 2 in navigation, and 2 in meteorology (7/74); in the upper-division baccalaureate category, 2 semester hours in elementary navigation and meteorology (12/68).

AR-1606-0114

WARRANT OFFICER INDOCTRINATION TRAINING—PREFLIGHT (FIXED WING)

Course Number: 1-R-F35.
Location: Aviation School, Ft. Rucker, AL.
Length: 4 weeks (149 hours).
Exhibit Dates: 7/63-6/66.
Objectives: To provide noncommissioned officers with preflight training.
Instruction: Lectures and practical exercises in preparation for flight training. Course is primarily an indoctrination course which reviews the overall military system and procedures.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).
Related Occupation Codes: 100R; 106A.

AR-1606-0115

IMAGE INTERPRETER ENLISTED

Course Number: 242-96D10.
Location: Intelligence School, Ft. Huachuca, AZ.
Length: Self-paced 10 weeks (428 hours).
Exhibit Dates: 4/79-Present.
Objectives: To train personnel to perform air photo interpretation and photogrammetry with application to intelligence and environmental analysis.
Instruction: Course includes lectures, laboratories, and self-paced instruction in the interpretation of aerial photos and images; map reading and the identification and anaylsis of physical and cultural features of the earth's surface, and limited photogrammetry.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory college mathematics, 3 in introduction to maps and air photos (6/79); In the upper-division baccalaureate category, 3 seemester hours in aerial photo and image interpretation, 2 in photogrammetry (6/79).
Related Occupation Codes: 96D.

AR-1606-0116

CV-2 (CARIBOU) PILOT TRANSITION

(AC-1 (Caribou) Aviator Transition)

Course Number: 2B-061C; 1-B-061C; 1-B-F29.
Location: Aviation School, Ft. Rucker, AL.
Length: 6-7 weeks (190-233 hours).
Exhibit Dates: 12/61-12/68.
Objectives: To train fixed-wing aviators to operate multiengine short-takeoff-and-landing (STOL) aircraft.
Instruction: Lectures and practical exercises in the operation of multiengine short-takeoff-and-landing (STOL) aircraft. Course includes transition flight training, CV-2 specific maintenance subjects, medical subjects, and tactical aircraft usage.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).
Related Occupation Codes: 100C.

AR-1606-0117

GENERAL OFFICER FIXED WING FLIGHT TRAINING

Course Number: 1-A-1980G.
Location: Aviation School, Ft. Rucker, AL.
Length: 18 weeks (612 hours).
Exhibit Dates: 5/59-12/68.
Objectives: To train general officers to pilot fixed-wing aircraft.
Instruction: Lectures and practical exercises in piloting fixed-wing aircraft. Course includes flight training, instrument training, tactical subjects, aviation maintenance, aviation regulations and procedures, and meteorology.
Credit Recommendation: In the upper-division baccalaureate category, credit in elementary navigation and meteorology on the basis of institutional evaluation (12/68).

AR-1606-0118

H-37 HELICOPTER PILOT TRANSITION TRAINING

Course Number: 1-B-F11.
Location: Aviation School, Ft. Rucker, AL.
Length: 6 weeks (224-228 hours).
Exhibit Dates: 2/59-12/68.
Objectives: To train selected commissioned officers and warrant officers in transition flight training in the H-37 helicopter.
Instruction: Lectures and practical exercises in the operation of the H-37 helicopter. Course includes transitional flight training, systems operation, and maintenance of the H-37 helicopter.
Credit Recommendation: In the upper-division baccalaureate category, credit in helicopter flight training on the basis of institutional evaluation (12/68).
Related Occupation Codes: 100C.

AR-1606-0119

ARMY HELICOPTER TRANSPORT TACTICAL (H-21)(H-34)

(Army Helicopter Transport Tactical (H-21))
(Army Helicopter Transport Tactical (H-34))
(Army Helicopter Transport Tactical (H-19))

Course Number: 1-B-F12.
Location: Aviation School, Ft. Rucker, AL.
Length: 8 weeks (300-307 hours).
Exhibit Dates: 1/59-12/68.
Objectives: To train aviators to operate H-21 or H-34 light transport helicopters.
Instruction: Lectures and practical exercises in the operation of H-21 or H-34 helicopters. Course includes maintenance of light transport craft, physical fitness, and transition training in transport helicopters.
Credit Recommendation: In the upper-division baccalaureate category, credit in helicopter flight training (12/68).
Related Occupation Codes: 100B; 100C.

AR-1606-0120

ARMY AVIATION PRIMARY AND TACTICAL FLIGHT TRAINING

Course Number: 1-O-ZZ.
Location: Aviation School, Ft. Rucker, AL.
Length: 24 weeks (840 hours).
Exhibit Dates: 1/57–12/68.
Objectives: To train commissioned officers to employ fixed-wing observation aircraft in support of military operations.
Instruction: Lectures and practical exercises in the employment of fixed-wing observation aircraft in support of military operations. Course includes tactical subjects, flight training (both primary and advanced), instrument flight training, and related aeronautical subjects.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology (7/74); in the upper-division baccalaureate category, 3 semester hours in weather interpretation and elementary navigation (12/68).

AR-1606-0121

AVIATION WARRANT OFFICER ADVANCED
(Aviation Warrant Officer Intermediate)

Course Number: 2-1-C32; 2-1-C30.
Location: Aviation School, Ft. Rucker, AL.
Length: *Version 1:* 22 weeks (644–667 hours). *Version 2:* 23 weeks (684–726 hours).
Exhibit Dates: *Version 1:* 5/72–Present. *Version 2:* 7/69–4/72.
Objectives: To qualify rated aviators or aviation repair technicians for aviation unit staff duties.
Instruction: *All Versions:* Lectures and practical exercises in principles of management, resources management, personnel management, supply management, effective writing and speaking, defensive and offensive operations, combat support, command and staff procedures, aviation medicine and life support, and physical conditioning. *Version 1:* Instruction includes aircraft accident investigation.
Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in principles of management, 3 in aviation administration (safety) (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in principles of management, 2 in aviation administration (safety) (7/74); in the upper-division baccalaureate category, 2 semester hours in principles of management (7/74). *Version 2:* In the vocational certificate category, 2 semester hours in business organization and management (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in business organization and management (7/74); in the upper-division baccalaureate category, 2 semester hours in maintenance management, 2 in business organization and management, and credit in aeronautics on the basis of institutional evaluation (12/68).
Related Occupation Codes: 100B; 100C; 100D; 100E.

AR-1606-0122

OV-1 AVIATOR QUALIFICATION
(OV-1 (Mohawk) Aviator Transition)
(AO-1 (Mohawk) Aviator Transition)

Course Number: 2B-F2; 2B-101D; 2B-061C-D; 2B-F2.
Location: Aviation Center, Ft. Rucker, AL.
Length: 6–8 weeks (222–301 hours).
Exhibit Dates: 2/64–Present.
Objectives: To qualify rated pilots with transition training on OV-1 (Mohawk) type aircraft.
Instruction: Lectures and practical exercises in transition flight training on the OV-1 aircraft, including preflight inspection, ground procedures, night operations, instrument flying, regulations, flight planning; and maintenance procedures.
Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in advanced multiengine turbine powered aircraft flight training (10/78).
Related Occupation Codes: 101B; 100Q; 100R.

AR-1606-0123

1. ROTARY WING INSTRUMENT
(Helicopter Instrument Flying)
2. HELICOPTER INSTRUMENT FLYING

Course Number: *All Versions:* 2C-F2. *Version 2:* 1-B-F18.
Location: Aviation Center, Ft. Rucker, AL.
Length: *Version 1:* 6–8 weeks (192–261 hours). *Version 2:* 10–11 weeks (372–440 hours).
Exhibit Dates: *Version 1:* 3/68–Present. *Version 2:* 2/58–2/68.
Objectives: To train helicopter pilots as instrument pilots.
Instruction: Course is self-paced beginning 1964. Lectures and practical exercises in helicopter instrument flying, including flight instruments, radio navigation, airport surveillance radar, navigational computer, approach and enroute procedures, instrument landing system, hazards to flight, weather maps, instrument preflight, and synthetic flight trainer planning.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in instrument ground school and 2 in instrument flight training (10/78). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in elementary meteorology and navigation (12/68).
Related Occupation Codes: 100B; 100C; 100D; 100E.

AR-1606-0124

ROTARY WING INSTRUMENT FLIGHT EXAMINER
(Helicopter Instrument Flight Examiner)

Course Number: 2C-F27; 2C-1985; 1-B-1985.
Location: Aviation Center, Ft. Rucker, AL.
Length: 4–6 weeks (140–234 hours).
Exhibit Dates: 4/58–Present.
Objectives: To train selected and qualified pilots as instrument flight instructors and instrument flight examiners in rotorcraft.
Instruction: Lectures and practical exercises in helicopter instrument flight training, flight instructor and examiner techniques, flight evaluation, regulations, air traffic control, radio navigation, and weather flight planning, and methods of instruction.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in principles and methods of instruction and 3 instrument flight instructor (10/78).

AR-1606-0125

FIXED WING INSTRUMENT FLIGHT EXAMINER

Course Number: 2B-1984; 2B-101C-C; 2B-061C; 1-B-1984.
Location: Aviation School, Ft. Rucker, AL.
Length: 4–7 weeks (154–261 hours).
Exhibit Dates: 4/59–Present.
Objectives: To train aviators to be fixed-wing instrument flight examiners.
Instruction: Lectures and practical exercises in instrument instructor flight techniques, air traffic control, and T-42 aircraft maintenance.
Credit Recommendation: In the vocational certificate category, 4 semester hours in fixed-wing instrument flight (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in fixed-wing instrument flight (7/74).
Related Occupation Codes: 100Q; 100R.

AR-1606-0126

1. OH-6 INSTRUCTOR PILOT
(OH-6 Transition/Gunnery Instructor Pilot (IP) Qualification)
2. OH-6 TRANSITION/GUNNERY IP QUALIFICATION
(LOH Transition/Gunnery IP Qualification)

Course Number: 2C-F13.
Location: Aviation Center, Ft. Rucker, AL.
Length: *Version 1:* 4–6 weeks (127–197 hours). *Version 2:* 6–7 weeks (197–229 hours).
Exhibit Dates: *Version 1:* 3/68–2/77. *Version 2:* 9/66–2/68.
Objectives: To provide commissioned and warrant officer aviators with OH-6 transition training, and to qualify OH-6 instructor pilots to conduct transition training in gunnery systems associated with OH-6 helicopters, including flight maneuvers and day and night range firing.
Instruction: *All Versions:* Lectures and practical exercises in OH-6 transition training and instructor training in gunnery systems associated with OH-6 helicopters, including flight training and OH-6 maintenance subjects. *Version 1:* Topics include LOH gunnery instructor pilot qualification. *Version 2:* Topics include OH-6 gunnery instructor pilot qualification.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in principles and methods of instruction (10/78). *Version 2:* In the upper-division baccalaureate category, credit in instructional methods on the basis of institutional evaluation (12/68).
Related Occupation Codes: 100C.

AR-1606-0127

1. ROTARY WING QUALIFICATION (ARMY AND AIR FORCE)
(Officer/Warrant Officer Rotary Wing Qualification (Active Army))
2. OFFICER/WARRANT OFFICER ROTARY WING QUALIFICATION (ACTIVE ARMY)

Course Number: *All Versions:* 2C-1981-D; 2C-062B-D; 2C-15A-AF. *Version 1:* 2C-15AD-X; 2C-15AD-AF; 2C-100B-D.
Location: Aviation Center, Ft. Rucker, AL.
Length: *Version 1:* 11 ND 13 weeks (330 ND 440 hours). *Version 2:* 13 weeks (438–476 hours).
Exhibit Dates: *Version 1:* 10/68–Present. *Version 2:* 11/66–9/68.
Objectives: To train commissioned and warrant officer aviators in the primary flying techniques of rotary wing aircraft.
Instruction: Lectures and practical exercises in officer/warrant officer rotary wing qualification, including flight training, basic

flight subjects, maintenance subjects, transition flight training, tactical flight training, tactical subjects, and instrument training.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in helicopter pilot rating (10/78). *Version 2:* In the vocational certificate category, 6 semester hours in helicopter pilot rating (7/74); in the lower-division baccalaureate/associate degree category, credit in helicopter flight training on the basis of institutional evaluation (12/68).

Related Occupation Codes: 100B; 100C; 100D; 100L, 100Q; 100R.

AR-1606-0128

1. Image Interpreter, Skill Development Base
2. Image Interpreter Noncommissioned Officer (NCO) Candidate

Course Number: *Version 1:* 242-96D20-I. *Version 2:* 242-96D40-I.

Location: Intelligence School, Ft. Holabird, MD.

Length: *Version 1:* 16 weeks (606 hours). *Version 2:* 12 weeks (526 hours).

Exhibit Dates: *Version 1:* 4/69–Present. *Version 2:* 1/68–3/69.

Objectives: To train image interpreters to perform as supervisors/technicians in image interpretation.

Instruction: *All Versions:* Lectures and practical exercises in image interpretation, including map reading, counterintelligence, order of battle, aerial surveillance operations and organization, high-altitude image interpretation, mathematics, oblique metrics, terrain analysis techniques, and leadership development. *Version 1:* Includes nuclear warfare, intelligence collection, and aerial surveillance tactics.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in imagery interpretation (12/68). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in imagery interpretation (12/68).

Related Occupation Codes: 96D.

AR-1606-0129

Military Intelligence (MI-CMF) Noncommissioned Officer (NCO) Basic

Course Number: 2-MI-C40.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: 11 weeks (351–372 hours).

Exhibit Dates: 5/73–Present.

Objectives: To provide enlisted personnel with a general knowledge and understanding of the function of a military intelligence operator.

Instruction: Lectures and practical exercises in command and staff procedures, interrogation techniques, oral and written expression, military leadership, Army management and resources, automatic data processing, electronic warfare, signal intelligence, counterintelligence, military justice, map and aerial photograph reading, and field engineering.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

AR-1606-0130

Signal Security Officer
(SIGSEC Officer)

Course Number: 3-30-37C.

Location: Intelligence School, Ft. Devens, MA.

Length: 6–10 weeks (239–280 hours).

Exhibit Dates: 8/76–Present.

Objectives: To prepare company-grade officers for assignment to signal security units and activities.

Instruction: Course contains a review of basic electrical circuits, receivers, transmitters, and electron devices. Specific topics include tactical doctrine, combat communications, and signal security.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (9/77).

AR-1606-0132

Intelligence Analyst Basic Level

Course Number: 243-96B30.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: 3 weeks (100 hours).

Exhibit Dates: 7/75–Present.

Objectives: To prepare personnel in the operations of an intelligence unit.

Instruction: Course teaches students to determine needs, supervise the collection, analyze and evaluate intelligence information. They will prepare and present reports in written and oral form, and learn to supervise personnel.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in management planning, administration, and personnel supervision (6/79).

Related Occupation Codes: 96B.

AR-1606-0133

UH-60 Aviator Qualification
(UH-60 (Blackhawk) Aviator Qualification)

Course Number: Not available.

Location: Aviation Center, Ft. Rucker, AL.

Length: 4 weeks (159 hours).

Exhibit Dates: 3/78–Present.

Objectives: To qualify rated pilots with transition training on UH-60 (Blackhawk) type helicopters.

Instruction: Lectures and practical exercises in transition flight training on the UH-60 helicopter, including preflight inspection, ground procedures, night operations, instrument flying, regulations, and flight planning and maintenance procedures.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in advanced helicopter flight training (10/78).

Related Occupation Codes: 100B.

AR-1606-0134

Intelligence Analyst Entry Level

Course Number: 243-96B10.

Location: Intelligence School, Ft. Huachuca AZ.

Length: 8 weeks (250 hours).

Exhibit Dates: 7/75–Present.

Objectives: To prepare enlisted personnel in intelligence operation by providing them with basic necessary skills and knowledge of military intelligence training.

Instruction: Course includes military organizations, map reading, terrain analysis, collection and interpretation of information, and the preparation of reports.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 3 in introduction to the elements of geography, 3 in introduction to administration and management (6/79)

Related Occupation Codes: 96B.

AR-1606-0135

T-42 Instructor Pilot

Course Number: Not available.

Location: Aviation Center, Ft. Rucker, AL.

Length: 4 (self-paced) weeks (126 hours).

Exhibit Dates: 4/75–Present.

Objectives: To train selected and qualified pilots as instructors in the multi-engine airplane (T-42).

Instruction: Flight experience as instructor pilot and related academic subject matter including principles and methods of instruction.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in principles and methods of instruction (10/78).

Related Occupation Codes: 101C.

AR-1606-0136

Military Intelligence Warrant Officer Advanced

Course Number: 3-30-C32.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: 15–16 weeks (464–513 hours).

Exhibit Dates: 4/76–Present.

Objectives: To prepare intelligence warrant officers for various levels of command and broaden their understanding of intelligence disciplines.

Instruction: Course includes lectures, seminars and practical exercises in effective communications, operations research, systems analysis and internal defense and development.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in communication skills, 3 in area studies (political science), 3 in management techniques (6/79)

AR-1606-0137

1. Tactical Intelligence Officer
2. Intelligence Officer Basic Tactical

Course Number: *Version 1:* 3-30-0B-35A. *Version 2:* 3-30-C20-35A.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: *Version 1:* 9 weeks (344 hours). *Version 2:* 18 weeks (554 hours).

Exhibit Dates: *Version 1:* 5/79–Present. *Version 2:* 5/78–4/79.

Objectives: To provide newly commissioned officers with knowledge of a tactical intelligence nature.

Instruction: *Version 1:* Lectures, exercises, and seminars in intelligence usage, world threats, world forces, and tactical concepts, including surveillance. *Version 2:* Lectures and practical exercises in world threats, intelligence usage, tactical concepts, intelligence, reconnaisance, and surveillance; analysis of area operations and introduction to threat forces organizations.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in advanced political science (world area threats), 3 in information management (6/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in principles of administration/management (6/79); In the upper-division baccalaureate category, 3 semester hours in advanced political science (world threat areas) 3 in information management (6/79).

AR-1606-0138

Night Hawk (Unaided)/Night Vision Goggle (NVG) M01

Course Number: None.

Location: Aviation Center, Ft. Rucker, AL.

Length: 4 weeks (118–119 hours).

Exhibit Dates: 3/78–Present.

Objectives: To qualify helicopter instructer pilots as night hawk/night vision goggle instructor pilots.

Instruction: Course is devoted primarily to flight training to include night hawk flight maneuvers.

Credit Recommendation: Pending evaluation.

AR-1606-0139

Night Vision Goggle (NVG) AN/PVS5

Course Number: None.

Location: Aviation Center, Ft. Rucker, AL.

Length: 2–3 weeks (77–78 hours).

Exhibit Dates: 4/77–Present.

Objectives: To train helicopter instructor pilots as night vision goggle instructor pilots.

Instruction: Course includes introduction to AN/PVS5, flight training subjects and aviation medicine and life support.

Credit Recommendation: Pending evaluation.

AR-1606-0140

Intelligence Officer Basic
CI/HUMINT
(Counterintelligence
Officer/Technician/Agent)

Course Number: *Version 1:* 3-30-0B-36A. *Version 2:* 3-30-C20-36A. *Version 3:* 3C-9666; 244-97B40; 3C-971A.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: *Version 1:* 16 weeks (541 hours). *Version 2:* 25 weeks (862 hours). *Version 3:* 16 weeks (527 hours).

Exhibit Dates: *Version 1:* 5/79–Present. *Version 2:* 7/77–4/79. *Version 3:* 5/75–6/77.

Objectives: To provide personnel with knowledge of security investigations and security practices needed to protect the national interests.

Instruction: Lectures and discussions including mediated instruction and field exercises in physical security, human relations, investigative techniques, report writing, and legal principles.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing, 2 in introduction to maps/air photos, 3 in legal principles, 6 in industrial security techniques, 3 in loss prevention, 3 in principles of investigation, 3 in human/interpersonal relations (6/79); in the upper-division baccalaureate category, 3 semester hours in political science (major foreign powers/world tension areas), 3–6 practicum/field training in physical security (6/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing, 2 in introduction to maps/air photos, 3 in legal principles, 6 in industrial security techniques, 3 in loss prevention, 3 in principles of investigation, 3 in human/interpersonal relations, 6 in principles of administration/management (6/79); in the upper-division baccalaureate category, 3 in political science (major foreign powers/world tension areas) 3–6 in practicum/field training in physical security (6/79). *Version 3:* In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing, 2 in introduction to maps/air photos, 3 in legal principles, 6 in industrial security techniques, 3 in loss prevention, 3 in principles of investigation, 3 in human/interpersonal relations (6/79); in the upper-division baccalaureate category, 3 in political science (major foreign powers/world tension areas), 3–6 in practicum/field training in physical security (6/79).

Related Occupation Codes: 97B.

AR-1606-0141

Intelligence Agent
(Counterintelligence Agent)

Course Number: 244-97B20.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: *Version 1:* 13 weeks (390–520 hours). *Version 2:* 16 weeks (480–640 hours).

Exhibit Dates: *Version 1:* 9/79–Present. *Version 2:* 10/78–8/79.

Objectives: To provide selected enlisted personnel with counterintelligence skills needed to protect the Army from hostile intelligence threats.

Instruction: Lectures, seminars, and practical exercises in physical security, human relations, investigative techniques, report writing, and legal practices.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in office management, 6 in industrial security techniques, 3 in loss prevention, 3 in legal principles, 3 in investigative principles (6/79); in the upper-division baccalaureate category, 3 semester hours in political science (major foreign powers), 3–6 in physical security practicum (6/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in office management, 3 in industrial security techniques, 3 in loss prevention, 3 in legal principles, 3 in investigative principles (6/79); in the upper-division baccalaureate category, 3 semester hours in political science (major foreign powers), 3–6 in physical security practicum (6/79).

Related Occupation Codes: 97B.

AR-1606-0142

1. Intelligence Officer Tactical Surveillance
2. Intelligence Officer Basic Tactical Surveillance

Course Number: *Version 1:* 3-30-0B-35C. *Version 2:* 3-30-35C.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: 18 weeks (589 hours).

Exhibit Dates: *Version 1:* 9/79–Present. *Version 2:* 4/79–8/79.

Objectives: To provide selected officers with a working knowledge of tactical surveillance and its use by intelligence agencies.

Instruction: Lectures and practical application of photo interpretation, photogrammetry, tactical surveillance, leadership, and management of technical services.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in college mathematics, 3 in introduction to maps/air photos (6/79); in the upper-division baccalaureate category, 3 semester hours in photogrammetry, 3 in leadership/management, 3 in image interpretation/aerial photo (6/79).

AR-1701-0001

Heating and Ventilating

Course Number: 5-E-49.

Location: Engineer School, Ft. Belvoir, VA.

Length: 8 weeks (284 hours).

Exhibit Dates: 10/56–12/68.

Objectives: To train enlisted personnel to install, maintain, and repair heating and ventilating units and associated control devices.

Instruction: Lectures and practical exercises in the installation and maintenance of heating and ventilation systems. Course includes heat transfer, insulation, combustion principles, automatic controls, pipe fittings, gas burners, oil burners, combustion chambers, oil pumps, duct systems, furnace installation, steam and hot water heating, and natural and mechanical ventilation.

Credit Recommendation: In the vocational certificate category, 6 semester hours in combustion (oil, gas, and coal furnaces), and additional credit on the basis of institutional evaluation (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in combustion (oil, gas, and coal furnaces), and additional credit on the basis of institutional evaluation (6/74).

AR-1701-0002

Utilities Equipment Repairer

Course Number: 662-52C20.

Location: Engineer School, Ft. Belvoir, VA.

Length: 11 weeks (323 hours).

Exhibit Dates: 4/79–Present.

Objectives: To train the individual to diagnose, maintain and repair gas-turbine engines, refrigeration, high PSI air-compressors, air-conditioning and heater equipment.

Instruction: Conferences and practical exercises to teach the individual to diagnose, maintain, and repair gas-turbine engines, refrigeration equipment, high PSI air-compressors, air-conditioning and heater equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in refrigeration, 2 in mechanical power technology, 1 in air-conditioning (9/79); in the lower-division baccalaureate/associate degree category, 1 semester hour in refrigeration, 2 in mechanical power technology, 1 in air-conditioning (9/79).

AR-1702-0001

Impregnation Equipment Operation

Course Number: 3-E-8.

Location: Chemical Corps School, Ft. McClellan, AL.

Length: 8 weeks (352 hours).

Exhibit Dates: 4/54–12/68.

Objectives: To train enlisted personnel to operate, install, inspect, and maintain impregnation equipment.

Instruction: Lectures and practical exercises in the operation, installation, inspection, and maintenance of impregnation equipment, including chemical munitions, special masks and clothing, map reading, supply operation, biological and chemical warfare, detection and identification of chemical agents, and chemical detection and processing plants.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

AR-1702-0002

QUARTERMASTER LIGHT EQUIPMENT REPAIR

Course Number: 690-63J10; 690-63J20; 10-R-466.1.

Location: Ordnance School, Aberdeen Proving Ground, MD; Quartermaster School, Ft. Lee, VA.

Length: 8 weeks (237–290 hours).

Exhibit Dates: 10/59–Present.

Objectives: To train enlisted personnel to install, adjust, and repair light quartermaster machinery and equipment.

Instruction: Lectures and practical exercises in installation, maintenance, and repair of wood materials, hardware and glues, internal combustion engines, burner equipment and metal items, mobile shoe repair equipment, and clothing and textile sewing machines. Emphasis is on applied troubleshooting and repair.

Credit Recommendation: In the vocational certificate category, 7 semester hours in industrial arts technology (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in industrial arts technology (5/74).

Related Occupation Codes: 63J.

AR-1702-0003

UTILITIES EQUIPMENT REPAIRER

Course Number: 662-52C10.

Location: Engineer School, Ft. Belvoir, VA.

Length: 11 weeks (393 hours).

Exhibit Dates: 2/79–Present.

Objectives: To train enlisted personnel to operate and maintain gas turbine engines and multi-output package equipment.

Instruction: Conferences and practical exercises in diagnostic procedures, maintenance and repair of gas turbine engines, refrigeration, air-conditioning and heater equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to electricity, 2 in air-conditioning and refrigeration (9/79).

Related Occupation Codes: 52C.

AR-1703-0001

1. TRACK VEHICLE MECHANIC
2. TRACK VEHICLE MECHANIC
3. ARMOR TRACK VEHICLE MECHANIC

Course Number: *All Versions:* 7-R-632.1; 7-R-632.2; 6-R-632.1; 6-R-632.2; 17-R-632.1; 17-R-632.2. *Version 1:* 611-63C10; 611-63C20. *Version 2:* 611-63C10; 611-63C20; 7-R-632;1 7-R-632;2 6-R-632;1 6-R-632.2. *Version 3:* 7-R-632;1 7-R-632;2 6-R-632;1 6-R-632;2 17-R-632;1 17-R-632.2.

Location: *All Versions:* Armor School, Ft. Knox, KY. *Version 1:* Ordnance and Chemical School, Aberdeen Proving Ground, MD. *Version 2:* Ordnance School, Aberdeen Proving Ground, MD; Artillery and Missile School, Ft. Sill, OK; Infantry School, Ft. Benning, GA. *Version 3:* Armor School, Ft. Knox, KY.

Length: *Version 1:* 13 weeks (436 hours). *Version 2:* 7–12 weeks (264–404 hours). *Version 3:* 15 weeks (591–607 hours).

Exhibit Dates: *Version 1:* 11/76–Present. *Version 2:* 7/64–10/76. *Version 3:* 9/56–6/64.

Objectives: To provide enlisted personnel with the skills and knowledge required to perform organizational maintenance on wheeled and tracked tank-automotive vehicles.

Instruction: *All Versions:* Lectures and practical exercises in the maintenance and recovery of track vehicles or wheeled and tracked vehicles, including vehicle operations and engine and electrical subjects. *Version 1:* Includes gasoline engine subjects. *Version 2:* Includes powertrains, hull and suspension systems, hydraulic systems, and troubleshooting procedures. *Version 3:* Includes wheeled-vehicle engines, power transmission systems, chassis units, recovery operations, management, medium-gun tank and armored personnel carrier maintenance.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 10 semester hours in heavy equipment maintenance (1/78). *Version 2:* In the vocational certificate category, 8 semester hours in heavy equipment maintenance (6/75); in the lower-division baccalaureate/associate degree category, 5 semester hours in heavy equipment maintenance (6/75). *Version 3:* In the vocational certificate category, 12 semester hours in heavy equipment, 4 in automotive repair (4/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in heavy equipment, 3 in automotive repair (4/74).

Related Occupation Codes: 63C.

AR-1703-0002

ARTILLERY TRACK VEHICLE MAINTENANCE

Course Number: *Version 1:* 6-R-632.1. *Version 2:* 6-R-632.1. *Version 3:* 6-E-21.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: *Version 1:* 11–12 weeks (406–437 hours). *Version 2:* 14 weeks (589–604 hours). *Version 3:* 10 weeks (421 hours).

Exhibit Dates: *Version 1:* 1/61–12/68. *Version 2:* 6/57–12/60. *Version 3:* 7/56–5/57.

Objectives: To train enlisted personnel to troubleshoot and repair tracked-vehicle systems.

Instruction: Lectures and practical exercises in automotive engine, power train, carburetion, and ignition fundamentals; troubleshooting, diagnosis, and repair of vehicle components; motor pool tools and shop equipment; wheeled and tracked vehicles electrical systems; and maintenance management procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in internal-combustion engines, 2 in automobile electric systems, 2 in power trains, 2 in automobile mechanics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in internal-combustion engines, 2 in automobile electrical systems, 1 in power trains, 2 in automobile mechanics (4/74). *Version 2:* In the vocational certificate category, 5 semester hours in internal-combustion engines, 2 in automobile electrical systems, 1 in power trains, 2 in automobile mechanics (4/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in internal-combustion engines, 1 in automobile electrical systems, 1 in power trains, 2 in automobile mechanics (4/74). *Version 3:* In the vocational certificate category, 1 semester hour in internal-combustion engines, 3 in automobile electrical systems, 1 in power trains, 2 in automobile mechanics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in internal-combustion engines, 2 in automobile electrical systems, 1 in power trains, 2 in automobile mechanics (4/74).

AR-1703-0003

TIRE REPAIR

Course Number: *Version 1:* 9-R-543;1 9-E-4. *Version 2:* Not available.

Location: *Version 1:* Ordnance School, Aberdeen Proving Ground, MD. *Version 2:* Ordnance Automotive School, Atlanta, GA.

Length: *Version 1:* 7 weeks (245–266 hours). *Version 2:* 8 weeks (304 hours).

Exhibit Dates: *Version 1:* 4/56–12/68. *Version 2:* 7/55–3/56.

Objectives: To train enlisted personnel to repair automotive tire inner tubes, make sectional repairs, and recap automobile, truck, and earth-moving equipment.

Instruction: Lectures and practical exercises in tires and tubes fundamentals, tube repair, spot and section repair preparation and build-up, tire recapping, specialized repair equipment operation, open-steam-chamber vulcanizing, and earthmover equipment operation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in tire repair, recapping, and retreading (4/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in tire repair, recapping, and retreading (4/74). *Version 2:* In the vocational certificate category, 7 semester hours in tire repair, recapping, and retreading (4/74); in the lower-division baccalaureate/associate degree category, 7 semester hours in tire repair, recapping, and retreading (4/74).

AR-1703-0004

RECOVERY AND EVACUATION

Course Number: *Version 1:* 610-63F20. *Version 2:* 610-63F20; 611-63F20; 9-R-633;1 9-E-80. *Version 1:* 63F10.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 9–10 weeks (278–324 hours). *Version 2:* 7–11 weeks (209–385 hours).

Exhibit Dates: *Version 1:* 11/74–Present. *Version 2:* 6/56–10/74.

Objectives: To train enlisted personnel to perform recovery and evacuation operations for abandoned, damaged, disabled, or mired vehicles.

Instruction: *All Versions:* Lectures and practical exercises in the recovery and evacuation of abandoned, damaged, disabled, or mired vehicles, including oxyacetylene cutting, engines, power trains, steering, suspension components, brake and fuel systems, operation of various winches, transmission assemblies, gears and shafts, electrical systems, communication and map reading, and engine cooling systems. *Version 1:* Topics include operation of the 10 ton wrecker truck.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours as an elective in automotive technology (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in automotive technology (6/75). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in automotive technology (4/74).

Related Occupation Codes: 63F.

AR-1703-0005

JUNIOR OFFICERS MAINTENANCE (Motor Officer)

Course Number: 8C-77D; 8C-0600.

Location: Armor School, Ft. Knox, KY.

Length: 8–9 weeks (277–289 hours).
Exhibit Dates: 4/71–Present.
Objectives: To train commissioned officers to supervise the maintenance of wheeled and tracked vehicles and associated armament and communications equipment.
Instruction: Lectures and practical exercises in the maintenance management of wheeled and tracked vehicles and associated armament and communications equipment, including records, gasoline engines, fuel systems, electrical systems, diesel engines, engine troubleshooting, power train components, tracked vehicles, auxiliary equipment, and vehicle recovery operations.
Credit Recommendation: In the vocational certificate category, 3 semester hours as an elective in automotive technology (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in automotive technology (4/74).
Related Occupation Codes: 77D.

AR-1703-0006

ENGINEER EQUIPMENT REPAIRMAN— NONCOMMISSIONED OFFICER (NCO) BASIC

Course Number: 612-62B40-EC.
Location: Engineer School, Ft. Belvoir, VA.
Length: 15 weeks (667 hours).
Exhibit Dates: 5/71–Present.
Objectives: To train engineer equipment repairmen to supervise the repair of various types of engineering equipment.
Instruction: Lectures and practical exercises in the maintenance supervision of various types of engineering equipment, including instruction in basic mathematics, speech, map reading, personnel management, power generation, hydraulics, electrical systems, fuel systems, diesel engines, cylinder block assemblies, cylinder heads, ignition systems, gasoline engines, clutches, torque converters, transmissions, final drives, suspension systems, steering and lubrication systems, cooling systems, and electrical fundamentals.
Credit Recommendation: In the vocational certificate category, 5 semester hours as an elective in automotive technology (4/74); in the lower-division baccalaureate/associate degree category, 5 semester hours as an elective in automotive technology (4/74).
Related Occupation Codes: 62B.

AR-1703-0007

INFANTRY AUTOMOTIVE SUPERVISION

Course Number: 7-E-1.
Location: Infantry School, Ft. Benning, GA.
Length: 10 weeks (372 hours).
Exhibit Dates: 11/54–12/68.
Objectives: To train enlisted personnel to supervise motor pool operations.
Instruction: Lectures and practical exercises in tactical driver-training methods, internal combustion engine operation, chassis systems, track vehicle operation and maintenance, preventive maintenance procedures, field operations, map and aerial photograph reading, and logistics.
Credit Recommendation: In the vocational certificate category, 3 semester hours in automotive engines, 2 in automotive chassis systems (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automotive engines, 2 in automotive chassis systems (4/74).

AR-1703-0008

AIR BRAKE REPAIR

Course Number: 55-R-655.1; 55-E-35.
Location: Transportation School, Ft. Eustis, VA.
Length: 10 weeks (350 hours).
Exhibit Dates: 8/55–12/68.
Objectives: To train enlisted personnel to dismantle, inspect, repair, and maintain railroad air brake equipment and component parts on steam and diesel-electric locomotives, railway cars, and auxiliary railway mechanical equipment.
Instruction: Lectures and practical exercises in the inspection, repair, and maintenance of railroad air brake equipment and component parts on steam and diesel-electric locomotives, railway cars, and auxiliary railway mechanical equipment, including operation of various valves, gauges, governors and braking devices used on steam and diesel locomotives.
Credit Recommendation: In the vocational certificate category, 3 semester hours as an elective in mechanical technology (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in mechanical technology (4/74).

AR-1703-0009

SPECIAL AMPHIBIAN TRANSITION

Course Number: None.
Location: Transportation School, Ft. Eustis, VA.
Length: 5 weeks (182 hours).
Exhibit Dates: 6/62–12/64.
Objectives: To train enlisted personnel to operate and maintain amphibious lighters.
Instruction: Lectures and practical exercises in the operation and maintenance of amphibious lighters, including basic internal combustion engine maintenance, test equipment, electrical circuits, fuel system, operating controls and troubleshooting, transmission, technical inspections, and hydraulic system components.
Credit Recommendation: In the vocational certificate category, 1 semester hour in introduction to internal combustion engines (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to internal combustion engines (4/74).

AR-1703-0010

COOPERATIVE FUELS RESEARCH (CFR) TEST ENGINE

Course Number: 491-91C30; 491-F1.
Location: Quartermaster School, Ft. Lee, VA.
Length: 8 weeks (280 hours).
Exhibit Dates: 6/67–Present.
Objectives: To train petroleum laboratory specialists to install, operate, inspect, and maintain cooperative fuels research (CFR) test engines.
Instruction: Lectures and practical exercises in the inspection, operation, and maintenance of CFR test engines, including principles of internal combustion engines and combustion knock, installation of CFR test engines, maintenance and overhaul procedures for CFR test engines, maintenance of CFR electrical apparatus, determination of humidity, starting and stopping of CFR test units, motor and research methods for rating fuels, and aviation method for rating aviation fuels.
Credit Recommendation: In the vocational certificate category, 6 semester hours in automotive and mechanical technology (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automotive and mechanical technology (6/74).
Related Occupation Codes: 96C.

AR-1703-0011

AUTOMOTIVE REPAIR

Course Number: 610-63H10; 610-63H20; 610-635.10; 9-R-635.1; 9-E-81.
Location: Ordnance School, Aberdeen Proving Ground, MD.
Length: *Version 1:* 13 weeks (415 hours). *Version 2:* 14–18 weeks (486–635 hours).
Exhibit Dates: *Version 1:* 8/76–Present. *Version 2:* 3/56–7/76.
Objectives: To train enlisted personnel to maintain, inspect, repair and overhaul wheeled vehicles and their systems.
Instruction: *All Versions:* Lectures and practical exercises in vehicle engine familiarization, operation, construction, disassembly, assembly, inspection, and troubleshooting; selective gear and hydraulic transmissions, including dry disk clutch, fluid coupling, and torque converter; power train and auxiliary components; recovery operations; and construction, operation, and maintenance of materials handling equipment. *Version 1:* Includes introduction to shop management and preventive maintenance scheduling.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 12 semester hours in heavy equipment service of which 6 semester hours is specifically in automotive service (1/78). *Version 2:* In the vocational certificate category, 6 semester hours in automotive repair, and 15 in heavy equipment repair (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automotive repair, and 10 in heavy equipment repair (5/74).
Related Occupation Codes: 63H.

AR-1703-0012

METALWORKER
(Metal Body Repair)

Course Number: *Version 1:* 700-44B10. *Version 2:* 704-44B20; 225ABA47331 (USAF); 704-441.1. *Version 3:* 9-R-441.1. *Version 4:* 9-R-441;1 9-E-3.
Location: Ordnance School, Aberdeen Proving Ground, MD.
Length: *Version 1:* 8–14 weeks (266–442 hours). *Version 2:* 8–11 weeks (288–340 hours). *Version 3:* 10 weeks (336 hours). *Version 4:* 6 weeks (210–228 hours).
Exhibit Dates: *Version 1:* 1/76–Present. *Version 2:* 2/66–12/75. *Version 3:* 4/58–1/66. *Version 4:* 6/56–3/58.
Objectives: To train Army, Air Force and Marine Corps personnel to repair, repaint, and install metal body components, radiators, fuel tanks, and glasswork, and to modify other related items.
Instruction: *All Versions:* Lectures and practical exercises in the repair, repainting, and installation of metal body components, radiators, fuel tanks, and glasswork, and in the modification of other related items. Instruction includes oxyacetylene welding, inert gas welding, utilization of metal body repair tools and equipment, after-operations checks, and trim, hardware, and glasswork. *Version 1:* Army personnel study arc welding, inert gas welding and electric arc welding. *Version 3:* Includes major body repair.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in auto body repair, 1 in auto painting for all services and, for Army personnel only, 6 semes-

ter hours in welding (1/78) *Version 2:* In the vocational certificate category, 9 semester hours in automotive body repair or metal body repair (6/75); in the lower-division baccalaureate/associate degree category, 4 semester hours in automotive body repair or metal body repair (6/75). *Version 3:* In the vocational certificate category, 10 semester hours in automotive body repair or metal body repair (5/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in automotive body repair or metal body repair (5/74). *Version 4:* In the vocational certificate category, 7 semester hours in automotive body repair or metal body repair (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automotive body repair or metal body repair (5/74).

Related Occupation Codes: 44B.

AR-1703-0013

AUTOMOTIVE REBUILD

Course Number: 9-E-83.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 12 weeks (456 hours).

Exhibit Dates: 3/56–12/68.

Objectives: To train automotive repairmen to rebuild engines, power train units, and chassis components of wheel and track vehicles.

Instruction: Lectures and practical exercises in the rebuilding of engines, power train units, and chassis components of wheeled and tracked vehicles, including removal and inspection of engine accessories, assembly and disassembly of water pump, air compressor, intake and exhaust manifolds, valve operating mechanism, cylinder head and valves, oil pan and cover, oil pump, connecting rods and pistons, flywheel, crankshaft, and camshaft; boring, grinding, and aligning procedures; and installation and assembly of engine and components.

Credit Recommendation: In the vocational certificate category, 15 semester hours in automotive or heavy equipment (5/74); in the lower-division baccalaureate/associate degree category, 10 semester hours in automotive or heavy equipment (5/74).

AR-1703-0014

AUTOMOTIVE MAINTENANCE AND REPAIR

Course Number: 9-B-4805.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 7–8 weeks (245–280 hours).

Exhibit Dates: 11/56–12/68.

Objectives: To train officers to direct and supervise personnel in the repair of automotive vehicles.

Instruction: Lectures and practical exercises in automotive maintenance management and automotive engines, power trains, chassis components, and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in automotive maintenance (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in automotive maintenance (7/74); in the upper-division baccalaureate category, 2 semester hours in maintenance management (12/68).

Related Occupation Codes: 630A; 631A; 632A.

AR-1703-0015

INFANTRY MOTOR TRANSPORTATION

Course Number: 7-O-8.

Location: Infantry School, Ft. Benning, GA.

Length: 10 weeks (417 hours).

Exhibit Dates: 1/55–12/68.

Objectives: To train officers to maintain motor transport equipment.

Instruction: Lectures and practical exercises in motor transport maintenance, including tactical driver training methods, engine, chassis, full-track vehicle familiarization, preventive maintenance, and operating procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours as an elective in automotive programs (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in automotive programs (7/74).

AR-1703-0016

AUTOMOTIVE REPAIR

Course Number: 610-63H10.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD.

Length: Self-paced 10 weeks (299 hours).

Exhibit Dates: 7/76–Present.

Objectives: To train enlisted personnel in the construction, operation, and servicing of automotive equipment by troubleshooting, replacing components, and minor repair of wheeled and tracked vehicles.

Instruction: Lectures and practical exercises in vehicle engine familiarization, operation, construction, inspection, replacement, and troubleshooting; selective gear and hydraulic transmissions, including dry disk clutch, fluid coupling, and torque converter; power train and auxiliary components; recovery operations; and construction, operation, and maintenance of materials-handling equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 10 semester hours in heavy equipment repair of which 5 semester hours is specifically in automative repair (1/78).

AR-1703-0017

ARMOR VEHICLE MAINTENANCE SUPERVISION

(Armor Automotive Supervision)

Course Number: 17-R-632.6; 17-R-632.7; 17-E-7.

Location: Armor School, Ft. Knox, KY.

Length: 8 weeks (286–307 hours).

Exhibit Dates: 12/55–12/68.

Objectives: To train enlisted personnel in the supervision of organizational maintenance and motor activities in armor units.

Instruction: Lectures and practical exercises in the supervision of organizational maintenance and motor activities in armor units, including engine electricity, basic engines, wheeled-vehicle engines, tracked-vehicle engines, wheeled-vehicle power transmission systems and chassis units, tracked-vehicle power transmission systems and chassis units, automotive general, maintenance management, driving and driving principles, and preventive maintenance services.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive shop management (7/74); in the upper-division baccalaureate category, credit in automotive shop management on the basis of institutional evaluation (12/68).

AR-1703-0018

WARRANT OFFICER AUTOMOTIVE REPAIR

Course Number: 4L-631A; 4L-632A.

Location: Ordnance Center and School, Aberdeen Proving Ground, MD.

Length: 19 weeks (646 hours).

Exhibit Dates: 3/72–Present.

Objectives: To train enlisted personnel to perform as warrant officers and to repair and maintain automotive vehicles.

Instruction: Lectures and practical exercises in the repair and maintenance of automotive vehicles. Course includes military subjects, military management, automotive electricity and electronics, power plant maintenance and support systems, chassis and drive trains, and heavy equipment familiarization.

Credit Recommendation: In the vocational certificate category, 3 semester hours in automotive technology, 3 in introduction to heavy equipment technology (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automotive technology, 3 in introduction to heavy equipment technology (7/74); in the upper-division baccalaureate category, 3 semester hours in introduction to automotive technology, 3 in introduction to heavy equipment technology (7/74).

Related Occupation Codes: 630A; 631A; 632A.

AR-1703-0019

FUEL AND ELECTRICAL SYSTEMS REPAIR

Course Number: *Version 1:* 610-63G10. *Version 2:* 610-63G20. *Version 3:* 610-63G20; 9-R-634.1. *Version 4:* 9-R-634;1 9-E-30.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 12 weeks (384 hours). *Version 2:* 13 weeks (398 hours). *Version 3:* 12 weeks (420–472 hours). *Version 4:* 10 weeks (350–380 hours).

Exhibit Dates: *Version 1:* 7/76–Present. *Version 2:* 11/72–6/76. *Version 3:* 6/58–10/72. *Version 4:* 3/56–5/58.

Objectives: To train enlisted personnel to inspect, diagnose malfunctions, adjust, and repair fuel and electrical systems components, using diagnostic test equipment and procedures, and to service hydraulic brake system components.

Instruction: Lectures and laboratories in inspection and repair of fuel and electrical systems. Course includes applied electricity; ignition, starting, and charging systems; gasoline and diesel fuel systems; and hydraulic brake system component repair.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in gasoline fuel systems, 3 in diesel fuel systems, 5 in automotive electrical systems, and 1 in basic hydraulic brakes (1/78). *Version 2:* In the vocational certificate category, 3 semester hours in automotive fuel systems, 3 in diesel fuel systems, and 4 in automotive electronics (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automotive fuel systems, 3 in diesel engine fuel systems, and 4 in automotive electronics (7/74); in the upper-division baccalaureate category, 2 semester hours in automotive fuel systems, 2 semester hours in diesel fuel systems, and 3 in automotive electronics (7/74). *Version 3:* In the vocational certificate category, 3 semester hours in automotive fuel systems and 6 in automotive electrical systems (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automotive fuel systems and 6 in automotive electrical systems (7/74). *Version 4:* In the vocational certificate category, 2 semester hours in automotive fuel systems and 4 in automotive electrical systems (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in automotive fuel systems and 4 in automotive electrical systems (7/74).

Related Occupation Codes: 63G.

AR-1703-0020

ARTILLERY MOTOR TRANSPORT

Course Number: 6-B-0600; 6-B-631A; 6-B-0606; 6-O-15.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 8-14 weeks (301-492 hours).

Exhibit Dates: 8/55-12/68.

Objectives: To provide the student with a working knowledge of artillery wheeled and track vehicle maintenance and management.

Instruction: Lectures and practical exercises in power plants, chassis and systems, shop organization and maintenance, electrical systems, and turret systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in automotive electricity and 3 in automotive power plants (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in transportation management, 3 in automotive electricity, and 3 in automotive power plants (7/74); in the upper-division baccalaureate category, 3 semester hours in transportation management (7/74).

Related Occupation Codes: 630A; 631A; 632A.

AR-1704-0001

AIR TRAFFIC CONTROL OPERATOR
(Air Traffic Control Tower Operator)

Course Number: 222-93H10; 222-93H20.

Location: Aviation Center, Ft. Rucker, AL.

Length: 13-14 weeks (411-481 hours).

Exhibit Dates: 1/70-Present.

Objectives: To provide enlisted personnel with a basic knowledge of air traffic control operations, with emphasis on control tower operation.

Instruction: Lectures and practical experience in basic air traffic control and control tower operations, including aviation weather, federal aviation regulations, and air traffic control procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in air traffic control (10/78).

Related Occupation Codes: 93H.

AR-1704-0002

AIR TRAFFIC CONTROL APPROACH CONTROL ENROUTE SPECIALIST

Course Number: 222-93K20.

Location: Aviation School, Ft. Rucker, AL.

Length: 16-19 weeks (553-656 hours).

Exhibit Dates: 2/70-Present.

Objectives: To provide enlisted personnel with a basic knowledge of air traffic control, with emphasis on enroute procedures.

Instruction: Lectures and practical experience in air traffic control and enroute procedures, aviation weather, navigational aids, and federal aviation regulations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in air traffic management or control (6/75).

Related Occupation Codes: 93K.

AR-1704-0003

1. AIR TRAFFIC CONTROL RADAR CONTROLLER
(Air Traffic Control Ground Control Approach Specialist)
2. AIR TRAFFIC CONTROL GROUND CONTROL APPROACH SPECIALIST

Course Number: *Version 1:* 222-93J10; 222-93J20. *Version 2:* 222-93J20.

Location: Aviation Center, Ft. Rucker, AL.

Length: *Version 1:* 16-17 weeks (527-553 hours). *Version 2:* 15 weeks (514-612 hours).

Exhibit Dates: *Version 1:* 5/73-Present. *Version 2:* 1/70-4/73.

Objectives: To train enlisted personnel in air traffic control UFR/IFR operations.

Instruction: Practical exercises and lectures in aviation weather, navigational aids, Federal Aviation Administration regulations, and air traffic control procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in air traffic control (10/78). *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in air traffic control (2/74); in the upper-division baccalaureate category, credit in air navigation or meteorology on the basis of institutional evaluation (12/68).

Related Occupation Codes: 93J.

AR-1704-0004

AIR TRAFFIC CONTROL (AC-CMF) NONCOMMISSIONED OFFICER (NCO) BASIC

Course Number: 2-AC-C40.

Location: Aviation School, Ft. Rucker, AL.

Length: 8-12 weeks (252-364 hours).

Exhibit Dates: 11/72-Present.

Objectives: To provide enlisted personnel with entry-level training in air traffic control.

Instruction: Practical exercises in ground control and airport surveillance and approach procedures, equipment utilization, radar operations, and precision approach techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in air traffic control approach radar techniques (2/74).

Related Occupation Codes: 71P; 93D; 93H; 93J; 93K.

AR-1704-0005

AIR TRAFFIC CONTROL (AC-CMF) NONCOMMISSIONED OFFICER (NCO) ADVANCED

Course Number: 2-AC-C42.

Location: Aviation Center, Ft. Rucker, AL.

Length: *Version 1:* 7-10 weeks (227-338 hours). *Version 2:* 8-11 weeks (239-346 hours).

Exhibit Dates: *Version 1:* 8/76-Present. *Version 2:* 8/72-7/76.

Objectives: To provide noncommissioned officers with advanced supervisory training.

Instruction: Lectures and practical exercises in unit training and administration, supply, communications and security management, preventive medicine and survival, civil operations, and air traffic control procedures. Topics also include personnel management and training, facility management, and advanced air traffic control procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in air traffic management management for students holding MOS 93H or 93J (10/78); in the upper-division baccalaureate category, 3 semester hours in business or personnel management for all students (10/78). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in air traffic management for students holding MOS 93H, 93J or 93K (10/78); in the upper-division baccalaureate category, 3 semester hours in business or personnel management for all students (10/78).

Related Occupation Codes: 71P; 93D; 93H; 93J; 93K.

AR-1704-0006

OFFICER/WO AIR TRAFFIC CONTROL OFFICER
(Officer/Warrant Officer Air Traffic Control)

Course Number: 2G-F35; 2G-F13.

Location: Aviation Center, Ft. Rucker, AL.

Length: 6-7 weeks (200-234 hours).

Exhibit Dates: 2/70-Present.

Objectives: To train enlisted personnel in air traffic control operations and procedures.

Instruction: Lectures and practical experience in air traffic control, terminal and enroute procedures, FAA control tower operator certification, aviation weather, and navigation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in air traffic control (10/78).

Related Occupation Codes: 982A; 100B; 101B; 101C.

AR-1704-0007

FLIGHT OPERATIONS COORDINATOR
(Flight Operations Specialist)

Course Number: 517-71P10; 517-71P20; 517-907.1; 1-R-907.1.

Location: Aviation Center, Ft. Rucker, AL.

Length: 5-7 weeks (168-229 hours).

Exhibit Dates: 5/61-Present.

Objectives: To train enlisted personnel to schedule and coordinate aircraft flights and perform related support functions.

Instruction: Lectures and practical exercises in airfield operations, including operations administration, meteorology, navigation, regulations, tactical operations, and flight information publications familiarization.

Credit Recommendation: In the vocational certificate category, 3 semester hours in introduction to aviation operations (10/78).

Related Occupation Codes: 71P; 09B.

AR-1704-0009

AVIONICS MECHANIC, SKILL DEVELOPMENT BASE

Course Number: 102-35K20-I.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 12 weeks (479 hours).

Exhibit Dates: 11/68-Present.

Objectives: To train enlisted personnel as avionics mechanics and maintenance supervisors.

Instruction: Practical experience in maintenance management, and supervision and administration of aircraft systems and avionics configurations.

Credit Recommendation: In the vocational certificate category, 1 semester hour in maintenance management, 1 in aircraft systems, 2 in flight line operations, 2 in supervision of maintenance (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in maintenance management, 1 in aircraft systems (3/74); in the upper-division baccalaureate category, 3 semester hours in advanced military science (12/68).

Related Occupation Codes: 35K.

AR-1704-0010

Airplane Repair

Course Number: 55-R-671.2; 55-E-46.

Location: Transportation School, Ft. Eustis, VA.

Length: 11–14 weeks (394–500 hours).

Exhibit Dates: 7/56–12/68.

Objectives: To train enlisted personnel to maintain and repair fixed-wing aircraft.

Instruction: Practical experience in servicing and maintenance of hydraulics, propellers, flight-line, and electrical systems; inspection of aircraft engines and structures; and rigging.

Credit Recommendation: In the vocational certificate category, 4 semester hours in aircraft repair (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft repair (3/74).

AR-1704-0011

O-1/U-6 Airplane Repair, Skill Development Base

Course Number: 600-67B20-I.

Location: Aviation School, Ft. Rucker, AL.

Length: 13 weeks (521 hours).

Exhibit Dates: 10/68–Present.

Objectives: To train enlisted personnel to perform as O-1/U-6 aircraft repairmen and maintenance supervisors.

Instruction: Practical experience in maintenance management, aircraft systems and inspection, and life support system equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in maintenance management, 3 in aircraft systems (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in maintenance management, 1 in aircraft systems (3/74).

Related Occupation Codes: 67B; 67F.

AR-1704-0012

Aircraft Powertrain Repair

Course Number: *All Versions:* 55-R-683.1. *Version 1:* 602-68D20. *Version 2:* 55-E-52.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 7–11 weeks (272–378 hours). *Version 2:* 15–16 weeks (525–575 hours).

Exhibit Dates: *Version 1:* 5/63–Present. *Version 2:* 7/56–4/63.

Objectives: To train enlisted personnel to maintain and repair aircraft power trains and allied equipment.

Instruction: Practical experience in power train systems maintenance and repair.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in aviation power train maintenance and records (3/74); in the lower-division baccalaureate/associate degree category, credit in aviation power train maintenance and records on the basis of institutional examination (3/74). *Version 2:* In the vocational certificate category, 12 semester hours in aviation power train maintenance, records, and repair (3/74); in the lower-division baccalaureate/associate degree category, credit in aviation power train maintenance, records, and repair (3/74).

Related Occupation Codes: 68D.

AR-1704-0013

OV-1D (Mohawk) Airborne Sensor Specialist

Course Number: 221-F4.

Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ. *Version 2:* Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ.

Length: *Version 1:* 4 weeks (132 hours). *Version 2:* 9 weeks (300 hours).

Exhibit Dates: *Version 1:* 10/74–Present. *Version 2:* 6/72–9/74.

Objectives: To train enlisted personnel in the operation and maintenance of the surveillance and navigation systems of the OV-1D aircraft.

Instruction: *All Versions:* Lectures and practical exercises in the operation and trouble diagnosis of OV-1D aircraft systems. *Version 1:* Instruction covers troubleshooting, and limited use of test equipment in the maintenance of inertial navigation units, infrared detection units, and side-looking radar system. *Version 2:* Topics include practical experience in AN/ASM-86 inertial navigation, data annotation systems and electronic countermeasures, operating procedures, infrared surveillance, electronic warfare, and jamming.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electronics laboratory (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (6/75). *Version 2:* In the vocational certificate category, 6 semester hours in airborne sensor repair (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in airborne sensor repair (3/74).

Related Occupation Codes: 17L.

AR-1704-0014

Aircraft Carburetor Repair

Course Number: 55-R-682.1; 55-E-55.

Location: Transportation School, Ft. Eustis, VA.

Length: 8–11 weeks (280–380 hours).

Exhibit Dates: 7/56–12/68.

Objectives: To train aircraft component repair helpers in aircraft carburetion, repair, maintenance, and overhaul techniques.

Instruction: Lectures and practical exercises in aircraft carburetion systems repair; aircraft engine and power train shop maintenance; and aircraft fuel systems components, theory, operation, maintenance, installation, and repair procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft appliance maintenance (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft appliance maintenance (3/74).

AR-1704-0015

Aircraft Component Repair (Entry)

(Aircraft Component Repair Helper (Entry))

Course Number: 55-R-680.0; 55-E-54.

Location: Transportation School, Ft. Eustis, VA.

Length: 8–9 weeks (284–317 hours).

Exhibit Dates: 7/56–12/68.

Objectives: To train enlisted personnel to assist in aircraft components and systems repair.

Instruction: Lectures and practical exercises in general aircraft maintenance, aircraft structures and rigging, hydraulics, propeller and rotor, instrument and electrical systems, and engine and power train maintenance and repair.

Credit Recommendation: In the vocational certificate category, 5 semester hours in aircraft maintenance and repair (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in aircraft main tenance and repair (3/74).

AR-1704-0016

Aircraft Hydraulic Repair

Course Number: *Version 1:* 602-68H20. *Version 2:* 602-68H20; 602-687;1 55-R-687.1. *Version 3:* 55-R-687.1. *Version 4:* 55-R-687;1 55-E-53.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 8–9 weeks (257–324 hours). *Version 2:* 7 weeks (254–259 hours). *Version 3:* 11–12 weeks (385–420 hours). *Version 4:* 9 weeks (315 hours).

Exhibit Dates: *Version 1:* 6/68–Present. *Version 2:* 12/63–5/68. *Version 3:* 9/58–11/63. *Version 4:* 7/56–8/58.

Objectives: To train enlisted personnel in support maintenance of aircraft hydraulic and pneumatic systems and components.

Instruction: Lectures and practical exercises in general aircraft maintenance, basic aircraft maintenance, and aircraft hydraulic system and pneumatic system component maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in aircraft hydraulics systems and component maintenance and repair (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft hydraulics systems and component maintenance and repair (3/74). *Version 2:* In the vocational certificate category, 3 semester hours in aircraft hydraulics systems and component repair (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft hydraulics systems and component repair (3/74). *Version 3:* In the vocational certificate category, 4 semester hours in aircraft hydraulics systems and component maintenance and repair (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft hydraulics systems and component maintenance and repair (3/74). *Version 4:* In the vocational certificate category, 4 semester hours in aircraft hydraulics systems and component maintenance and repair (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft hydraulics systems and component maintenance and repair (3/74).

Related Occupation Codes: 68H.

AR-1704-0020

Aircraft Powertrain Repair Specialist Candidate

(Aircraft Powertrain Repair Skill Development Base)

Course Number: 602-68D20-I.

Location: Transportation School, Ft. Eustis, VA.

Length: 12 weeks (475–495 hours).

Exhibit Dates: 10/68–Present.

Objectives: To train aircraft power train repairmen as mechanic team leaders and repair specialists.

Instruction: Lectures and practical exercises in leadership, maintenance management, quality control, helicopter power train systems, ground supply records, and nondestructive inspections.

Credit Recommendation: In the vocational certificate category, 6 semester hours in aircraft power train repair (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft power train repair (3/74).

Related Occupation Codes: 68D.

AR-1704-0021

Aircraft Hydraulics Repair Specialist Candidate

Course Number: 602-68H20-I.

Location: Transportation School, Ft. Eustis, VA.

Length: 12-13 weeks (478-520 hours).

Exhibit Dates: 10/68-Present.

Objectives: To train aircraft hydraulics repairmen to perform hydraulic maintenance and repair at the management level.

Instruction: Lectures and practical exercises in maintenance management, personnel management, aircraft hydraulic components and test equipment maintenance, and aircraft hydraulic systems inspection and troubleshooting.

Credit Recommendation: In the vocational certificate category, 1 semester hour in aircraft hydraulics repair (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft hydraulics repair (3/74); in the upper-division baccalaureate category, 2 semester hours in aircraft hydraulics repair (3/74).

Related Occupation Codes: 68H.

AR-1704-0022

U-8/U-21 Airplane Repair Skill Development Base

Course Number: 600-67G20-I.

Location: Transportation School, Ft. Eustis, VA.

Length: 14 weeks (554 hours).

Exhibit Dates: 10/68-Present.

Objectives: To train aircraft repairmen to perform as technicians and supervisors.

Instruction: Lectures and practical exercises in personnel management, unit administration, communication procedures and equipment, maintenance management, quality control, aircraft inspection and troubleshooting procedures, weight and balance, fuels and lubrication, propeller and electrical system maintenance, and aircraft engine run-up, taxi procedures, and damage evaluation.

Credit Recommendation: In the vocational certificate category, 7 semester hours in aircraft repair (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft repair (3/74).

Related Occupation Codes: 67G.

AR-1704-0023

Aircraft Rotor and Propeller Repair Skill Development Base

Course Number: 602-68E20-I.

Location: Transportation School, Ft. Eustis, VA.

Length: 12 weeks (494 hours).

Exhibit Dates: 10/68-Present.

Objectives: To train aircraft rotor and propeller repairmen to be supervisors and technicians.

Instruction: Lectures and practical exercises in maintenance management, including quality control, publications and records, supply procedures, damage evaluation, and aircraft rotor blade and propeller inspection and repair procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft rotor and propeller repair, and credit in maintenance management on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance management, 1 in aircraft rotor and propeller repair (3/74).

Related Occupation Codes: 68E.

AR-1704-0024

Modular Engine Test Stand (METS) Operator

(Aircraft Turbine Engine Test Cell Operator)

Course Number: 601-F2; 601-68B2T.

Location: Transportation School, Ft. Eustis, VA.

Length: 7-8 weeks (247-265 hours).

Exhibit Dates: 5/72-Present.

Objectives: To train enlisted personnel to test gas turbine engines and to repair test equipment.

Instruction: Lectures and practical exercises in test equipment operation and repair, including fuel systems, performance calculations, and engine testing and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in turbine engine testing and test equipment repair (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in turbine engine testing and test equipment repair (6/75).

Related Occupation Codes: 68B.

AR-1704-0025

Single-Engine Airplane Repair

Course Number: 55-R-671.4.

Location: Transportation School, Ft. Eustis, VA.

Length: 13 weeks (452-466 hours).

Exhibit Dates: 5/60-12/68.

Objectives: To train enlisted personnel to repair single-engine, fixed-wing aircraft.

Instruction: Lectures and practical exercises in single-engine, fixed-wing aircraft field maintenance procedures, including safety procedures; technical data interpretation; electrical, hydraulic, and fuel systems inspection; and engine and landing gear inspection, maintenance, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in single-engine aircraft repair (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in single-engine aircraft repair (3/74).

AR-1704-0026

Aircraft Reciprocating Engine Repair

Course Number: 601-68C20.

Location: Transportation School, Ft. Eustis, VA.

Length: 8 weeks (269-281 hours).

Exhibit Dates: 4/68-Present.

Objectives: To train enlisted personnel in direct and general support maintenance of aircraft reciprocating engines and allied equipment used on Army aircraft.

Instruction: Lectures and practical exercises in general aircraft maintenance, including maintenance management, precision tools, safety devices, oil analysis, and nondestructive testing; fundamentals of reciprocating engines; and troubleshooting.

Credit Recommendation: In the vocational certificate category, 5 semester hours in aircraft reciprocating-engine repair (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft reciprocating-engine repair (3/74).

Related Occupation Codes: 68C; 68B.

AR-1704-0027

Multi-Engine Utility Airplane Repair

Course Number: 600-67G2T; 600-67K2T.

Location: Transportation School, Ft. Eustis, VA.

Length: 5 weeks (162 hours).

Exhibit Dates: 7/67-12/68.

Objectives: To train airplane mechanics in support maintenance of multiengine utility aircraft, with emphasis on U-21A aircraft.

Instruction: Lectures and practical exercises in ground handling, ground operational checks, utility systems, landing gear, fuel systems, inspections, flight controls, engine and propeller, and electrical systems of the U-21A aircraft.

Credit Recommendation: In the vocational certificate category, 3 semester hours in aircraft field maintenance (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft field maintenance (3/74).

Related Occupation Codes: 67G; 67H; 67J; 67K; 67F.

AR-1704-0028

CH-47 Helicopter Repair Specialist Candidate

(CH-47 Helicopter Repair Skill Development Base)

Course Number: 600-67U20-1.

Location: Transportation School, Ft. Eustis, VA.

Length: 12-13 weeks (465-507 hours).

Exhibit Dates: 8/68-Present.

Objectives: To train helicopter repairmen to maintain and repair CH-47 helicopters.

Instruction: Lectures and practical exercises in military leadership, maintenance management, technical subjects, CH-47 systems, and life support equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in helicopter maintenance (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in helicopter maintenance (3/74); in the upper-division baccalaureate category, 2 semester hours in helicopter maintenance (3/74).

Related Occupation Codes: 67U.

MULTI-ENGINE AIRPLANE REPAIR

Course Number: *Version 1:* 600-67K20. *Version 2:* 600-672;4 55-R-672.4.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 16 weeks (561 hours). *Version 2:* 19 weeks (669–680 hours).

Exhibit Dates: *Version 1:* 9/66–12/68. *Version 2:* 8/63–8/66.

Objectives: To train enlisted personnel in field maintenance of multiengine, fixed-wing aircraft.

Instruction: Lectures and practical experience in basic aircraft structures, systems, and power plants; operation, inspection, maintenance, and troubleshooting of propellers, power plants, and power plant systems; instrument, electrical, and hydraulic systems repair; and engine structural repair.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in multiengine aircraft repair (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in multiengine aircraft repair (2/74). *Version 2:* In the vocational certificate category, 6 semester hours in multiengine aircraft repair (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in multiengine aircraft repair (2/74).

Related Occupation Codes: 67K; 67F.

AR-1704-0045

AIRCRAFT ENGINE REPAIR

Course Number: *All Versions:* 55-R-681.1. *Version 4:* 55-E-49.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 8–9 weeks (305–317 hours). *Version 2:* 13 weeks (459 hours). *Version 3:* 11 weeks (385 hours). *Version 4:* 8 weeks (280 hours).

Exhibit Dates: *Version 1:* 5/63–12/68. *Version 2:* 1/60–4/63. *Version 3:* 6/58–12/59. *Version 4:* 7/56–5/58.

Objectives: To train enlisted personnel to repair aircraft engines and allied equipment.

Instruction: Practical experience in maintenance procedures for aircraft power plants, hydraulic systems, instruments, and propellers.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in aircraft power plant repair (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft power plant repair (2/74). *Version 2:* In the vocational certificate category, 8 semester hours in aircraft power plant repair (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft power plant repair (2/74). *Version 3:* In the vocational certificate category, 7 semester hours in aircraft power plant repair (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft power plant repair (2/74). *Version 4:* In the vocational certificate category, 6 semester hours in aircraft power plant repair (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft power plant repair (2/74).

AR-1704-0047

AIRFRAME REPAIR

Course Number: *Version 1:* 603-68G20; 603-686.1. *Version 2:* 55-R-686.1. *Version 3:* 55-R-686.1. *Version 4:* 55-R-686;1 55-E-42.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 11 weeks (381–405 hours). *Version 2:* 8–9 weeks (309–315 hours). *Version 3:* 13 weeks (455–465 hours). *Version 4:* 10 weeks (350–356 hours).

Exhibit Dates: *Version 1:* 3/66–Present. *Version 2:* [illegible]63–2/66. *Version 3:* 5/59–7/63. *Version 4:* 7/56–4/59.

Objectives: To train enlisted personnel to inspect and repair aircraft structural members, sheet metal surfaces, fiberglass, and plastics.

Instruction: Lectures and practical exercises in general aircraft maintenance; structural repair, including metals, plastics, and fiberglass; sheet metal shop tools and procedures; forming processes; fasteners; and painting.

Credit Recommendation: *Version 1:* In the vocational certificate category, 7 semester hours in airframe repair shop (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in airframe repair shop (2/74). *Version 2:* In the vocational certificate category, 5 semester hours in airframe repair shop (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in airframe repair shop (2/74). *Version 3:* In the vocational certificate category, 8 semester hours in airframe repair shop (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in airframe repair shop (2/74). *Version 4:* In the vocational certificate category, 7 semester hours in airframe repair shop (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in airframe repair shop (2/74).

Related Occupation Codes: 68G.

SINGLE-ROTOR TURBINE UTILITY HELICOPTER MAINTENANCE

Course Number: 1-R-675.2.

Location: Aviation School, Ft. Rucker, AL.

Length: 3 weeks (101 hours).

Exhibit Dates: 12/63–12/68.

Objectives: To train enlisted personnel in the organizational maintenance of single-engine turbine helicopters.

Instruction: Lectures and technical experience in airframe, power plant, weight and balance, instruments, electrical, transmission flight control, inspection, troubleshooting, adverse weather operations, and armament.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter maintenance (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in helicopter maintenance (2/74).

AR-1704-0049

1. CH-37 HELICOPTER REPAIR
2. MULTI-ENGINE MEDIUM TRANSPORT HELICOPTER MAINTENANCE

Course Number: *All Versions:* 600-67T20. *Version 2:* 1-R-677.1.

Location: *Version 1:* Transportation School, Ft. Eustis, VA. *Version 2:* Aviation School, Ft. Rucker, AL.

Length: *Version 1:* 12 weeks (412 hours). *Version 2:* 5–6 weeks (175–193 hours).

Exhibit Dates: *Version 1:* 1/67–Present. *Version 2:* 6/60–12/66.

Objectives: To provide enlisted personnel with training in organizational, direct, and general support maintenance of CH-37 or multiengine, medium transport helicopters.

Instruction: Lectures and practical exercises in multiengine transport helicopter repair procedures; weight and balance; and airframe, reciprocating-engine, and rotor-blade maintenance and repair.

Credit Recommendation: *Version 1:* In the vocational certificate category, 9 semester hours in multiengine helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, credit in multiengine helicopter repair on the basis of institutional evaluation (2/74). *Version 2:* In the vocational certificate category, 4 semester hours in multiengine helicopter maintenance (2/74); in the lower-division baccalaureate/associate degree category, credit in multiengine helicopter maintenance on the basis of institutional evaluation (2/74).

Related Occupation Codes: 67A; 67T.

SINGLE-ROTOR LIGHT TRANSPORT HELICOPTER MAINTENANCE

(Single-Rotor Utility and Light Transport Helicopter Maintenance)

Course Number: 600-67P20; 1-R-675.3.

Location: Aviation School, Ft. Rucker, AL.

Length: 4–5 weeks (140–184 hours).

Exhibit Dates: 6/60–12/68.

Objectives: To train enlisted personnel to repair single-rotor, single-engine helicopters.

Instruction: Lectures and practical exercises in servicing, inspecting, and maintaining single-rotor, single-engine helicopters; fuel, lubrication, electrical, and ignition systems operation and maintenance; and power plant, transmission and drive systems, rotor and hydraulic systems, and automatic stabilization equipment maintenance procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in single-rotor, single-engine helicopter maintenance (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in single-rotor, single-engine helicopter maintenance (2/74).

Related Occupation Codes: 67A; 67P; 67W.

TANDEM-ROTOR HELICOPTER MAINTENANCE

(Utility and Cargo, Tandem-Rotor Helicopter Maintenance)

Course Number: 1-R-674.1.

Location: Aviation School, Ft. Rucker, AL.

Length: 4–6 weeks (140–210 hours).

Exhibit Dates: 3/57–12/68.

Objectives: To train enlisted personnel to repair tandem-rotor helicopters.

Instruction: Practical experience in maintenance systems, electronics, flight control, loading gear and brakes, rigging, and forms and records.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter maintenance (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in helicopter maintenance (2/74).

AR-1704-0053

UTILITY AND CARGO SINGLE-ROTOR HELICOPTER REPAIR

Course Number: *All Versions:* 55-R-673.2. *Version 2:* 55-E-58.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 17–18 weeks (600–647 hours). *Version 2:* 14 weeks (506–508 hours).

Exhibit Dates: *Version 1:* 7/58–12/68. *Version 2:* 7/56–6/58.

Objectives: To train enlisted personnel to repair single-rotor helicopters.

Instruction: Practical experience in inspection, adjustment, removal, repair, and replacement of power trains, hydraulic and electrical systems, and rotor blade assemblies and components of single-rotor utility cargo helicopters.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in single-rotor helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in single-rotor helicopter repair (2/74). *Version 2:* In the vocational certificate category, 5 semester hours in single-rotor helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in single-rotor helicopter repair (2/74).

AR-1704-0054

AIRCRAFT ROTOR AND PROPELLER REPAIR

Course Number: *Version 1:* 602-68E20; 602-684;1 55-R-684.1. *Version 2:* 55-E-50.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 14–15 weeks (509–544 hours). *Version 2:* 12 weeks (421 hours).

Exhibit Dates: *Version 1:* 6/58–Present. *Version 2:* 7/56–5/58.

Objectives: To train enlisted personnel to repair aircraft propellers, rotor blades, and allied equipment.

Instruction: *All Versions:* Lectures and practical experience in shop procedures, repair, blueprint reading, wood and metal rotor and propeller repair. *Version 1:* Flight theory.

Credit Recommendation: *Version 1:* In the vocational certificate category, 11 semester hours in rotor and propeller repair (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in rotor and propeller repair (2/74). *Version 2:* In the vocational certificate category, 9 semester hours in rotor and propeller repair (2/74); in the lower-division baccalaureate/associate degree category, credit in rotor and propeller repair on the basis of institutional evaluation (2/74).

HU-1A Helicopter Repair

Course Number: 55-R-F14.

Location: Transportation School, Ft. Eustis, VA.

Length: 3 weeks (105-109 hours).

Exhibit Dates: 9/59-12/68.

Objectives: To train enlisted personnel to repair helicopters.

Instruction: Lectures and practical experience in inspection, adjustment, removal, and replacement of assemblies and subassemblies of HU-1A helicopters.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter repair (2/74).

AR-1704-0057

Twin-Engine Helicopter Repair

Course Number: 55-R-F12.

Location: Transportation School, Ft. Eustis, VA.

Length: 12 weeks (430 hours).

Exhibit Dates: 2/59-12/68.

Objectives: To train enlisted personnel in helicopter inspection techniques, and the adjustment, removal, and replacement of assemblies.

Instruction: Lectures and practical experience in engines, power trains, structures, rigging, electronics, rotor blades, hydraulics, and reciprocator servicing.

Credit Recommendation: In the vocational certificate category, 1 semester hour in helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in helicopter repair (2/74).

AR-1704-0058

1. Single-Engine Tandem-Rotor Helicopter Repair
2. Tandem-Rotor Helicopter Repair (Utility and Cargo Tandem Rotor Helicopter Repair)

Course Number: *Version 1:* 600-676.4. *All Versions:* 55-R-676.4. *Version 2:* 55-R-674;2 55-E-59.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 13 weeks (465-466 hours). *Version 2:* 13-15 weeks (470-564 hours).

Exhibit Dates: *Version 1:* 12/63-12/68. *Version 2:* 7/56-11/63.

Objectives: To train personnel in field maintenance of single-engine, tandem-rotor helicopters.

Instruction: Lectures and practical exercises in fuel systems, structures, power plant theory and operation, lubrication, fuel carburetion hydraulics and plumbing, flight theory, records and publications, ground handling, weight and balance, instruments, and troubleshooting.

Credit Recommendation: *Version 1:* In the vocational certificate category, 9 semester hours in helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in helicopter repair (2/74). *Version 2:* In the vocational certificate category, 10 semester hours in helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in helicopter repair (2/74).

AR-1704-0059

Reconnaissance Helicopter Repair

Course Number: *All Versions:* 55-R-672.2. *Version 3:* 55-E-57.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 15 weeks (533 hours). *Version 2:* 17 weeks (595 hours). *Version 3:* 13 weeks (455-466 hours).

Exhibit Dates: *Version 1:* 5/59-12/68. *Version 2:* 7/58-4/59. *Version 3:* 7/56-6/58.

Objectives: To train enlisted personnel in the repair of reconnaissance helicopters.

Instruction: Practical experience in inspection, adjustment, removal, repair, and replacement of reconnaissance helicopter engines, power trains, structure, hydraulic and electrical systems, and rotor blade assemblies, subassemblies, and components.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in reconnaissance helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in reconnaissance helicopter repair (2/74). *Version 2:* In the vocational certificate category, 6 semester hours in reconnaissance helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in reconnaissance helicopter repair (2/74). *Version 3:* In the vocational certificate category, 4 semester hours in reconnaissance helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in reconnaissance helicopter repair (2/74).

AR-1704-0060

AH-1G (Hueycobra) Helicopter Repair Transition

Course Number: 600-67N30.

Location: Transportation School, Ft. Eustis, VA.

Length: 3 weeks (102 hours).

Exhibit Dates: 7/67-12/68.

Objectives: To train helicopter repairmen to repair AH-1G high-performance helicopters.

Instruction: Lectures and practical exercises in AH-1G high-performance helicopter support and organizational maintenance, including weight and balance principles; tools and equipment operation; and rotor, electrical, and flight control systems operation and repair.

Credit Recommendation: In the vocational certificate category, 3 semester hours in helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in helicopter repair (2/74).

Related Occupation Codes: 67N; 67W.

AR-1704-0061

CH-54 Helicopter Repair Specialist Candidate
(CH-54 Helicopter Repair Skill Development Base)

Course Number: 600-67X20-I.

Location: Transportation School, Ft. Eustis, VA.

Length: 12 weeks (484-500 hours).

Exhibit Dates: 7/69-Present.

Objectives: To train enlisted personnel to repair multiengine, single-rotor helicopters.

Instruction: Lectures and practical exercises in Army maintenance management, including quality control, maintenance planning and control, publications, and supply procedures; operation, maintenance, troubleshooting, and repair of multiengine, single-rotor helicopters.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter maintenance, credit in maintenance management on the basis of institutional evaluation (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance management, 1 in helicopter maintenance (2/74); in the upper-division baccalaureate category, 1 semester hour in maintenance management (2/74).

Related Occupation Codes: 67X.

AR-1704-0062

Aircraft Armament Maintenance Supervisor

Course Number: 4D-F3.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 5 weeks (156-169 hours).

Exhibit Dates: 4/72-Present.

Objectives: To train commissioned and warrant officers to supervise aircraft armament maintenance personnel.

Instruction: Conferences and practical exercises in utility and observation helicopter armament subsystems, attack helicopter armament subsystems, publications, maintenance, ammunition, and safety procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

Related Occupation Codes: 100B; 100E.

AR-1704-0063

OH-6 Helicopter Repair

Course Number: 600-67V20.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 7 weeks (220 hours). *Version 2:* 7-8 weeks (246-262 hours). *Version 3:* 4 weeks (133 hours).

Exhibit Dates: *Version 1:* 9/74-Present. *Version 2:* 11/72-8/74. *Version 3:* 12/68-10/72.

Objectives: To train enlisted personnel in the maintenance and repair of single-rotor, turbine-powered helicopters.

Instruction: Lectures and practical exercises in Army aircraft maintenance, including hydraulics, fuel and lubrication systems, flight controls, instruments, and electrical and rotary-wing systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in helicopter maintenance (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in helicopter maintenance (6/75). *Version 2:* In the vocational certificate category, 5 semester hours in single-rotor, turbine-powered helicopter maintenance (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in single-rotor, turbine-powered helicopter maintenance (2/74). *Version 3:* In the vocational certificate category, 2 semester hours in single-rotor, turbine-powered helicopter maintenance (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in single-rotor, turbine-powered helicopter maintenance (2/74).

Related Occupation Codes: 67V; 67W; 67Z.

1. UH-1 Helicopter Repair Specialist Candidate
2. UH-1 Helicopter Repair Skill Development Base

Course Number: 600-67N20-I.

Location: *All Versions:* Transportation School, Ft. Eustis, VA. *Version 2:* Aviation School, Ft. Rucker, AL.

Length: *Version 1:* 12 weeks (467 hours). *Version 2:* 13 weeks (526 hours).

Exhibit Dates: *Version 1:* 11/70-Present. *Version 2:* 10/68-10/70.

Objectives: To train enlisted personnel in the maintenance and repair of UH-1 helicopters.

Instruction: Lectures and practical exercises in leadership, maintenance management, maintenance and repair of UH-1 helicopter systems and components, and life support equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in UH-1 helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in UH-1 helicopter repair (2/74). *Version 2:* In the vocational certificate category, 2 semester hours in UH-1 helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in UH-1 helicopter repair (2/74).

Related Occupation Codes: 67N.

AR-1704-0065

H-37 Helicopter Crew Training

Course Number: 1-H-F17.

Location: Aviation School, Ft. Rucker, AL.

Length: 6 weeks (215 hours).

Exhibit Dates: 4/58-12/68.

Objectives: To train officer aviators, and enlisted personnel and mechanics who have completed the transport helicopter mechanics course, in transition flight training and maintenance of H-37 helicopters.

Instruction: Lectures and practical exercises in helicopter flight training and maintenance, including general information and description; preflight inspection; airframe group; power plants and accessories; rotor head actuating mechanisms; hydraulic systems; utility and electrical systems; transition flight training; and practical line maintenance.

Credit Recommendation: In the vocational certificate category, 1 semester hour (for aviators) or 3 semester hours (for enlisted men) in multiengine, single-rotor helicopter maintenance (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour (for aviators) or 2 semester hours (for enlisted men) in multiengine single-rotor helicopter maintenance (5/74).

Related Occupation Codes: 100C.

Course Number: *Version 1:* 600-67A10; 600-670;0 1-R-670.0. *Version 2:* 1-R-670;0 1-E-18.

Location: *Version 1:* Transportation School, Ft. Eustis, VA. *All Versions:* Aviation School, Ft. Rucker, AL.

Length: *Version 1:* 5-6 weeks (178-272 hours). *Version 2:* 8 weeks (288-308 hours).

Exhibit Dates: *Version 1;* 6/60-Present. *Version 2:* 8/56-5/60.

Objectives: To train enlisted personnel in airfield servicing and maintenance of fixed- and rotary-wing aircraft.

Instruction: Lectures and practical experience in basic aircraft maintenance, systems maintenance, fundamentals of internal defense and development, safetying procedures, theory of flight, basic hydraulics, and airfield operations.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in basic aircraft maintenance (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic aircraft maintenance (2/74). *Version 2:* In the vocational certificate category, 4 semester hours in basic aircraft maintenance (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic aircraft maintenance (3/74).

Related Occupation Codes: 67A; 67B; 67C; 67G; 67H; 67U; 67V; 67W; 67X; 67Y.

AR-1704-0071

CH-54 HELICOPTER REPAIR

Course Number: 600-67X20.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 14 weeks (485 hours). *Version 2:* 14 weeks (501 hours). *Version 3:* 11 weeks (395 hours).

Exhibit Dates: *Version 1:* 10/74-Present. *Version 2:* 5/72-9/74. *Version 3:* 7/68-4/72.

Objectives: To train enlisted personnel in organizational, direct, and general support maintenance of multiengine, single-rotor helicopters.

Instruction: Lectures and practical experience in aviation maintenance, basic aerodynamics, hydraulics, safetying techniques, publications, aircraft inspections, and inflight maintenance duties.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in aircraft maintenance (6/75). *Version 2:* In the vocational certificate category, 11 semester hours in multiengine helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in multiengine helicopter repair (2/74). *Version 3:* In the vocational certificate category, 6 semester hours in multiengine helicopter repair (2/74); in the lower-division baccalaureate/associate degree category, credit in multiengine helicopter repair on the basis of institutional evaluation (2/74).

Related Occupation Codes: 67X.

AR-1704-0072

AIRCRAFT TURBINE ENGINE REPAIR SPECIALIST CANDIDATE
(Aircraft Turbine Engine Repair, Development Base)

Course Number: 601-68B20-I.

Location: Transportation School, Ft. Eustis, VA.

Length: 12-13 weeks (477-537 hours).

Exhibit Dates: 10/68-Present.

Objectives: To train enlisted personnel to function as senior technicians in aircraft turbine engine repair.

Instruction: Lectures and practical exercises in leadership, maintenance management, and gas turbine engine inspection, testing, and removal.

Credit Recommendation: In the vocational certificate category, 5 semester hours in turbine maintenance management (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in turbine maintenance management (2/74).

Related Occupation Codes: 68B.

AR-1704-0074

MULTI-ENGINE MEDIUM TRANSPORT AIRPLANE MAINTENANCE

Course Number: 600-672.3; 1-R-672.3.

Location: Aviation School, Ft. Rucker, AL.

Length: 4 weeks (140-144 hours).

Exhibit Dates: 3/62-12/68.

Objectives: To provide mechanics of single-engine aircraft with training in multiengine, fixed-wing, medium transport aircraft organizational maintenance.

Instruction: Lectures and practical exercises in multiengine, fixed-wing, medium transport aircraft organizational maintenance, including fuel, induction, ignition, oil, electrical, and hydraulic systems maintenance; instrument system, flight controls, and ground handling operations; and inspections, management procedures, and record keeping methods.

Credit Recommendation: In the vocational certificate category, 3 semester hours in aircraft maintenance and repair (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft maintenance and repair (3/74).

AR-1704-0075

1. AIRCRAFT ELECTRICIAN REPAIR (Aircraft Electrician)
2. AIRCRAFT ELECTRICIAN
3. AIRCRAFT ELECTRICIAN

Course Number: *Version 1:* 602-68F20. *All Versions:* 55-R-685.1. *Version 3:* 55-R-655;1 55-E-48.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 13-15 weeks (505-648 hours). *Version 2:* 13-16 weeks (560-748 hours). *Version 3:* 16-19 weeks (704-836 hours).

Exhibit Dates: *Version 1:* 11/64-Present. *Version 2:* 2/60-10/64. *Version 3:* 7/56-1/60.

Objectives: To train enlisted personnel to perform direct and general support maintenance of aircraft electrical systems and components.

Instruction: Lectures and laboratories in aircraft electrical systems, including DC and AC electrical fundamentals, batteries, DC and AC generation systems, power distribution, ignition systems, AC and DC motors, and general aircraft maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 16 semester hours in electricity, 8 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in electricity, 4 in electrical laboratory (3/74). *Version 2:* In the vocational certificate category, 12 semester hours in electricity, 4 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity, 4 in electrical laboratory (3/74). *Version 3:* In the vocational certificate category, 6 semester hours in electricity, 2 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity, 1 in electrical laboratory (3/74).

Related Occupation Codes: 68F.

AR-1704-0076

FLIGHT OPERATIONS COORDINATOR, SKILL DEVELOPMENT BASE

Course Number: 517-71P20-I.

Location: Aviation School, Ft. Rucker, AL.

Length: 13 weeks (496 hours).

Exhibit Dates: 1/69-Present.

Objectives: To train flight operations coordinators to perform as supervisors and technicians.

Instruction: Lectures and practical exercises in the coordination of flight operations, including leadership; administration; Army functional files; individual flight record file; navigation and weather review; air traffic control; criteria for site selection; maintenance management; life support equipment; fire fighting and crash rescue subjects; and airmobile operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

Related Occupation Codes: 71P.

AR-1704-0077

LIGHT TARGET MISSILE LAUNCHER OPERATION AND AIRFRAME AND ENGINE MAINTENANCE
(RCAT Airframe and Engine Maintenance)

Course Number: 600-17J20; 44-R-105.1; 44-R-209.1; 44-E-24.

Location: *Version 1:* Combat Surveillance School, Ft. Huachuca, AZ; Air Defense School, Ft. Huachuca, AZ. *Version 2:* Air Defense School, Ft. Bliss, TX.

Length: 7-9 weeks (180-320 hours).

Exhibit Dates: 3/57-12/68.

Objectives: To train enlisted personnel as drone and target aircraft crewmen.

Instruction: *Version 1:* Lectures and practical exercises in launch and recovery of unmanned aircraft; organizational maintenance of launchers and associated ground support equipment; and organizational and direct support maintenance of aircraft airframes and engines.

Credit Recommendation: In the vocational certificate category, 3 semester hours in airframe and engine maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in airframe and engine maintenance (6/74).

AR-1704-0078

HELICOPTER ARMAMENT SUBSYSTEM M22 AND SIMULATOR DX43 REPAIR

Course Number: 646-F2.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 6 weeks (197 hours).

Exhibit Dates: 12/69-Present.

Objectives: To train qualified aircraft armament repairmen in the repair of the helicopter armament subsystem M22 and simulator DX43.

Instruction: Lectures and practical exercises in direct and general support maintenance of helicopter anti-tank guided missile systems and simulator DX43.

Credit Recommendation: No credit because of the military nature of the course (6/74).

Related Occupation Codes: 45J.

AR-1704-0079

Single-Rotor Helicopter Maintenance
(Utility and Cargo, Single Rotor Helicopter Maintenance)

Course Number: 1-R-673.1.

Location: Aviation School, Ft. Rucker, AL.

Length: 5-6 weeks (184-223 hours).

Exhibit Dates: 2/57-12/68.

Objectives: To train qualified aircraft maintenance crewmen to perform as single-rotor helicopter mechanics.

Instruction: Lectures and practical exercises in organizational maintenance of single-rotor utility and transport helicopters, including H-34 introduction, airframe, weight and balance, power transmission, landing gear and brakes, fuel and oil systems, electrical system, hydraulic systems, main- and tail-rotor systems, tacking and vibrations, external loads, internal loads, engine run-up and organizational maintenance, inspections, and engine installation and controls.

Credit Recommendation: In the vocational certificate category, 6 semester hours in aircraft mechanics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft mechanics (6/74).

AR-1704-0080

H-37 Helicopter Organizational Maintenance

Course Number: 1-R-F25.

Location: Aviation School, Ft. Rucker, AL.

Length: 5 weeks (175 hours).

Exhibit Dates: 2/59-12/68.

Objectives: To train experienced tandem- or single-rotor helicopter maintenance personnel in the organizational maintenance of H-37 helicopters.

Instruction: Lectures and practical exercises in organizational maintenance of H-37 helicopters, including general description, airframe group, power plants and accessories, transmission system, rotor head actuating system, instruments, electrical systems, inspections, winterization, ventilating and heating systems, in-flight familiarization, landing gear servicing, wheels and brake system, and gear boxes.

Credit Recommendation: In the vocational certificate category, 4 semester hours in rotary-wing aircraft maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in rotary-wing aircraft maintenance (6/74).

AR-1704-0081

Helicopter Armament Subsystem M22 and DX43 Mechanic

Course Number: 646-F1.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 2 weeks (70 hours).

Exhibit Dates: 3/70-Present.

Objectives: To train qualified aircraft armament subsystem mechanics as helicopter armament subsystem M22 and DX43 simulator mechanics.

Instruction: Lectures and practical exercises in organizational maintenance of the M22 subsystem and DX43 flight control simulator, including supply procedures, test equipment, internal defense and development, M22 antitank guided missile subsystem introduction, launcher and supporting equipment, guidance control unit, system functioning DX43 simulator introduction, operational check-out and repair, handling procedures, and review and maintenance.

Credit Recommendation: In the vocational certificate category, 1 semester hour in systems organizational maintenance (6/74).

Related Occupation Codes: 45M.

AR-1704-0082

Rotary-Wing Technical Inspector

Course Number: 55-R-679.5.

Location: Transportation School, Ft. Eustis, VA.

Length: 5 weeks (185 hours).

Exhibit Dates: 5/63-5/65.

Objectives: To train enlisted personnel who have previous technical experience to perform as aircraft repair supervisors and inspectors.

Instruction: Lectures and practical exercises in technical inspection of rotary-wing aircraft, including inspection of reciprocating engines; controls; power trains, airframe structures; rotors and blades; instrument, electrical, and hydraulic systems; nondestructive inspections; gas turbine engine familiarization; aircraft publications; supply responsibilities; and maintenance concepts and quality control.

Credit Recommendation: In the vocational certificate category, 6 semester hours in aviation maintenance management (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance management (6/74); in the upper-division baccalaureate category, 2 semester hours in aviation maintenance management (6/74).

AR-1704-0083

Aircraft Armament Subsystem Mechanic

Course Number: 646-45M20.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 9-13 weeks (261-468 hours).

Exhibit Dates: 1/70-Present.

Objectives: To train enlisted personnel in aircraft armament subsystems organizational maintenance.

Instruction: Lectures and practical exercises in aircraft armament maintenance fundamentals, including disassembly, assembly, installation, troubleshooting, and repair of M5 machine gun, rocket, and AH-1G armament subsystems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in basic mechanics and mechanical laboratory (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic mechanics and mechanical laboratory (6/75).

Related Occupation Codes: 45M; 45Z.

AR-1704-0084

Reconnaissance Helicopter Maintenance

Course Number: 1-R-672.1.

Location: Aviation School, Ft. Rucker, AL.

Length: 5-6 weeks (177-234 hours).

Exhibit Dates: 2/57-5/60.

Objectives: To train enlisted personnel as reconnaissance helicopter mechanics.

Instruction: Lectures and practical exercises in organizational maintenance of reconnaissance helicopters, including introduction to reconnaissance helicopters, helicopter aerodynamics, engine installation and controls, fuel and oil systems, power transmission system, main rotor head and blades, anti-torque system, vibrations and control forces, stabilizer bar and damper, electrical systems, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 4 semester hours in helicopter maintenance (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in helicopter maintenance (6/74).

AR-1704-0085

Nike Hercules Missile Mechanical Materiel Maintenance Transition

Course Number: 44-R-F8.

Location: Air Defense School, Ft. Bliss, TX.

Length: 3-5 weeks (99-140 hours).

Exhibit Dates: 11/57-12/68.

Objectives: To train enlisted Nike Ajax personnel to assemble, adjust, and maintain hydraulic missile control systems and related test equipment on the Nike Hercules missile.

Instruction: Lectures and practical exercises in Nike Hercules missile system assembly, adjustment, and maintenance, including missile mechanics, launcher area equipment operation, missile preparation and depreparation, propulsion system familiarization, and hydraulic power unit and control system operation and maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in hydraulic laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in missile mechanics (3/74); in the upper-division baccalaureate category, credit in hydraulic laboratory on the basis of institutional examination (3/74).

AR-1704-0086

1. Nike Mechanical Repair
   (Nike Mechanical Systems Repair (Ajax/Hercules))
2. SAM Mechanical Systems Repair

Course Number: *Version 1:* 9-S-433.1. *Version 2:* 9-E-67.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 8-9 weeks (280-334 hours). *Version 2:* 6 weeks (190-210 hours).

Exhibit Dates: *Version 1:* 5/57-12/68. *Version 2:* 12/55-4/57.

Objectives: To train enlisted and civilian personnel as mechanical repairmen (Nike).

Instruction: Lectures and practical exercises in inspection, testing, field maintenance, and repair of Nike Hercules/Ajax missile mechanical systems, airframes, ground-handling equipment and associated test equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in missile systems maintenance shop (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in missile systems maintenance shop (6/74). *Version 2:* In the vocational certificate category, 2 semester hours in missile systems maintenance shop (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in missile systems maintenance shop (6/74).

AR-1704-0087

Martin-Baker J-5 Ejection Seat Specialist

Course Number: 600-F6.

Location: Transportation School, Ft. Eustis, VA.

Length: 4 weeks (128 hours).
Exhibit Dates: 7/67–Present.
Objectives: To train personnel with previous technical experience to perform as J-5 ejection seat specialists.
Instruction: Lectures and practical exercises on the inspection, repair, and organizational and support maintenance of Martin-Baker J-5 ejection seats, aircraft survival seat kits, and 9E2A ejection seat simulators, including introduction to Martin-Baker ejection seats; ejection seat removal, disassembly, inspection, maintenance, and reassembly; personnel parachutes; OV-1 aircraft survival seat kits; SEEK-2 life vest, physiological effects; fitting and adjusting personal equipment; introduction to the 9E2A ejection seat simulators; and function of related systems.
Credit Recommendation: Credit is not recommended because of the technical nature of the course (12/68).
Related Occupation Codes: 67K.

AR-1704-0088

HAWK MECHANICAL REPAIR

Course Number: 632-435.1; 9-S-435.1.
Location: Ordnance Guided Missile School, Redstone Arsenal, AL.
Length: 8 weeks (281–298 hours).
Exhibit Dates: 4/59–12/68.
Objectives: To train enlisted and civilian personnel to operate, repair, and troubleshoot Hawk missile systems.
Instruction: Lectures and practical exercises in repair and maintenance of Hawk Missile systems. Course includes blueprint interpretation, hydraulic and pneumatic principles, and troubleshooting of Hawk hydraulic and pneumatic systems.
Credit Recommendation: In the vocational certificate category, 4 semester hours in mechanical engineering laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in mechanical engineering laboratory (6/74).

AR-1704-0089

BALLISTIC MISSILES PROPULSION AND STRUCTURES REPAIR

Course Number: 9-S-372.1; 9-R-372.1; 9-R-372.10.
Location: Ordnance Guided Missile School, Redstone Arsenal, AL.
Length: 10–15 weeks (345–561 hours).
Exhibit Dates: 1/58–12/68.
Objectives: To train enlisted personnel to operate, inspect, test, maintain, and repair ballistic missile propulsion and structure systems and associated test equipment.
Instruction: Lectures and practical exercises in the operation, repair, and maintenance of ballistic missile propulsion and structure systems. Course includes propulsion systems, ordnance inspection procedures, missile handling and fuel equipment, electrical fundamentals, and mechanical fundamentals.
Credit Recommendation: In the vocational certificate category, 3 semester hours as a technical elective (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as a technical elective (7/74).

AR-1704-0090

AIRCRAFT TURBINE MULTI-ENGINE REPAIR

Course Number: 601-68B30.
Location: Transportation School, Ft. Eustis, VA.
Length: 5 weeks (161 hours).
Exhibit Dates: 6/74–Present.
Objectives: To train enlisted personnel in support maintenance of turbine engines installed on multi-engine aircraft.
Instruction: Lecutres and practical exercises in inspection techniques, limited allowable repairs, recognition of malfunctions, and diagnosis of remedial action.
Credit Recommendation: In the vocational certificate category, 2 semester hours in turbine engine repair (6/75).

AR-1704-0091

ORGANIZATIONAL MAINTENANCE OFFICER

Course Number: 1-A-F13.
Location: Aviation School, Ft. Rucker, AL.
Length: 10 weeks (367 hours).
Exhibit Dates: 11/56–12/68.
Objectives: To train officers to supervise all phases of aircraft maintenance.
Instruction: Conferences and practical exercises in aircraft forms and reports, technical orders, supply, fixed-wing and rotary-wing aerodynamics, instruments, special tools, ground handling, aircraft engines, propellors, organizational maintenance and repair, inspection, and aircraft accidents.
Credit Recommendation: In the vocational certificate category, 7 semester hours in organizational maintenance (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in organizational maintenance (2/74).

AR-1704-0092

ADVANCED AIR DROP EQUIPMENT MAINTENANCE

Course Number: 10-R-F16.
Location: Quartermaster School, Ft. Lee, VA.
Length: 6 weeks (210 hours).
Exhibit Dates: 7/62–12/68.
Objectives: To provide enlisted personnel with a working knowledge of the maintenance of air drop equipment at the organizational, field, and depot levels.
Instruction: Lectures and practical exercises in pattern making and blueprint reading; maintenance of sewing machines; canopy darning, patching, and section replacement; suspension line replacement and repair; air drop equipment repair techniques; hardware, slide fasteners, and platform repair.
Credit Recommendation: In the vocational certificate category, 5 semester hours in air drop equipment repair (5/74).

AR-1706-0001

REPRODUCTION EQUIPMENT REPAIR

Course Number: 690-41K20.
Location: Engineer School, Ft. Belvoir, VA.
Length: 14 weeks (514 hours).
Exhibit Dates: 4/66–5/72.
Objectives: To train enlisted personnel to repair major reproduction equipment, including copy camera, specific offset presses and bindery equipment.
Instruction: Lectures and practical exercises in the repair of reproduction equipment. Course includes parts orientation; introduction to electricity; introduction to copy camera (24 X 30); introduction to plate-making equipment; and introduction to offset press (ATF Chief 29 DP).
Credit Recommendation: In the vocational certificate category, 3 semester hours in graphic arts (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in graphic arts (7/74); in the upper-division baccalaureate category, 3 semester hours in graphic arts (7/74).
Related Occupation Codes: 41K.

AR-1706-0002

MECHANICAL MAINTENANCE (MM-CMF) NONCOMMISSIONED OFFICER (NCO) BASIC

Course Number: 6-MM-C40B.
Location: Quartermaster School, Ft. Lee, VA.
Length: 10 weeks (335 hours).
Exhibit Dates: 3/72–Present.
Objectives: To qualify enlisted personnel as noncommissioned officers, supervising the repair of office machines.
Instruction: Lectures and practical exercises in the repair of office machinery. Subject matter includes techniques of leadership, supply and maintenance procedures, and business machine repair techniques.
Credit Recommendation: In the vocational certificate category, 3 semester hours in business machine repair technology (5/74).
Related Occupation Codes: 41J.

AR-1706-0003

OFFICE MACHINE REPAIR

Course Number: *Version 1:* 670-41J20. *Version 2:* 670-41J20; 670-465.1. *Version 3:* 670-465;1 10-R-465;1 10-R-463.2. *All Versions:* 10-E-8.
Location: Quartermaster School, Ft. Lee, VA.
Length: *Version 1:* 21 weeks (664–666 hours). *Version 2:* 26 weeks (791–906 hours). *Version 3:* 26 weeks (904–910 hours).
Exhibit Dates: *Version 1:* 5/73–Present. *Version 2:* 5/65–4/73. *Version 3:* 3/56–4/65.
Objectives: To train enlisted personnel to repair and adjust typewriters, adding machines, calculators, and duplicating machines.
Instruction: Lectures and practical exercises in repair and adjustment of typewriters, adding machines, calculators, and duplicating machines, including parts analysis, maintenance and troubleshooting of specific types and makes of office equipment.
Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in typewriter repair, and 5 in calculator repair (5/74); in the lower-division baccalaureate/associate degree category, 9 semester hours in business machine technology (5/74). *Version 2:* In the vocational certificate category, 8 semester hours in typewriter repair, and 5 in calculator repair (5/74); in the lower-division baccalaureate/associate degree category, 12 semester hours in business machine technology (5/74). *Version 3:* In the vocational certificate category, 11 semester hours in typewriter repair, 6 in calculator repair, and 1 in duplicator repair (5/74); in the lower-division baccalaureate/associate degree category, 15 semester hours in business machine technology (5/74).
Related Occupation Codes: 41J.

AR-1706-0004

TABULATING EQUIPMENT REPAIR
(Electrical Accounting Machine Repair)

Course Number: 150-34B20; 11-R-302.1.
Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.
Length: 22–36 weeks (811–1352 hours).
Exhibit Dates: 6/62–Present.
Objectives: To train enlisted personnel as electrical accounting and tabulating machines and automatic data processing system auxiliary equipment repairmen.

Instruction: Lectures and practical exercises in electrical accounting machine repair, including supply procedures and catalogs; electrical fundamentals; functional units of EAM; key punching and verifying; specific transceiver system; interpreting; reproducing; specific accounting; card processor; PCM sorting; and collating equipment. Course currently emphasizes card punches and card verifiers, alphameric collator, card transmission terminal and card sorting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in basic electricity, 4 in electrical laboratory, and 10 in accounting machines (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electrical laboratory, and 2 in basic electricity on the basis of institutional evaluation (6/74); in the upper-division baccalaureate category, 4 semester hours in electrical laboratory, and 2 in basic electricity on the basis of institutional evaluation (6/74).

Related Occupation Codes: 34B.

AR-1706-0005

TABULAR EQUIPMENT REPAIR BY CORRESPONDENCE

Course Number: J29.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide a working knowledge of the techniques and skills required to inspect, test, adjust and repair tabulating equipment.

Instruction: To give instruction in fundamental electricity and electronic concepts as they apply to tabular equipment. Theory of electron tubes and their applications in basic electronic circuits as well as semiconductor devices and their applications to electronic circuits are covered. Digital electronic fundamentals and the introduction to computer programming is presented. The use and operation of various pieces of test equipment is presented.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in electronic theory and application, 1 in operation and use of test equipment (9/79). Credit recommended is based on completion of proctored end-of-course examination.

Related Occupation Codes: 34B.

AR-1708-0001

WATERCRAFT OPERATOR SPECIALIST CANDIDATE

Course Number: 062-61B30-1.

Location: Transportation School, Ft. Eustis, VA.

Length: 12 weeks (500 hours).

Exhibit Dates: 11/70–Present.

Objectives: To teach selected enlisted personnel already qualified as watercraft operators to perform as senior supervisors in watercraft operations.

Instruction: Consists of classes in leadership; personnel administration and duties; communications; ship handling; safety at sea; and care and maintenance of vessel.

Credit Recommendation: In the vocational certificate category, 6 semester hours in transportation and watercraft operations (2/74).

Related Occupation Codes: 61B.

AR-1708-0002

SEAMAN COURSE

Course Number: 062-61A10.

Location: Transportation School, Ft. Eustis, VA.

Length: 3 weeks (106–111 hours).

Exhibit Dates: 6/71–Present.

Objectives: To train enlisted personnel to perform as seamen.

Instruction: Lectures and practical exercises in the duties of a seaman, including marine terminology, rigging, emergency drills, water safety, watch standing, deck equipment, vessel deck operations, shipboard customs, U.S. Army vessels, hand and power tools, painting, fire fighting, operational maintenance, and fundamentals of internal defense and internal development training.

Credit Recommendation: In the vocational certificate category, 3 semester hours in seamanship (6/74).

Related Occupation Codes: 61A; 61B; 61C.

AR-1708-0003

POLAR NAVIGATION

Course Number: 55-B-F9.

Location: Transportation School, Ft. Eustis, VA.

Length: 9 weeks (315–332 hours).

Exhibit Dates: 4/58–12/68.

Objectives: To train commissioned and warrant officers in the fundamentals of terrestrial and celestial polar navigation.

Instruction: Lectures and practical exercises in polar navigation, including capabilities and limitations of personnel, arctic survival, navigational instruments, celestial navigation, mathematics, charts, projections and maps, communication and signals, courses and bearings, weather principles, special subjects, surveying, survival tactics, and map and aerial photograph reading.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in navigation or general science (5/74); in the upper-division baccalaureate category, 6 semester hours in navigation (12/68).

AR-1708-0004

SEAMAN

Course Number: 813-5600; 55-R-560.0; 55-E-51.

Location: Transportation School, Ft. Eustis, VA.

Length: 6–10 weeks (213–350 hours).

Exhibit Dates: 8/55–12/68.

Objectives: To train enlisted personnel to assist in the operation, maintenance, and repair of all types of harbor craft, landing craft, and floating equipment.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of all types of harbor craft, landing craft, and floating equipment, including piloting, marine engine theory, survival techniques, small boats, cargo operations, basic seamanship and crew duties, international Morse code, navigational aids and charts, and engine diagnosis and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

AR-1709-0001

STILL PHOTOGRAPHY

Course Number: 400-84B20; 11-R-841.1; 11-E-7.

Location: Signal School, Ft. Monmouth, NJ.

Length: 12–13 weeks (432–478 hours).

Exhibit Dates: 3/57–Present.

Objectives: To provide enlisted personnel with a working knowledge of the techniques required to take existing-light and flash, and black and white and color photographs of ground and aerial subjects for technical, tactical, and information purposes; and to provide basic darkroom instruction to students with limited experience.

Instruction: Lectures and appropriate practical experiences in basic photography (camera, lens, exposure meter, film processing, contact printing and composition); flash photography (bulb and electronic); military news and information photography (35mm and press-type cameras); tactical air and ground photography; 35mm camera instruction (photo copying included); color slide instruction.

Credit Recommendation: In the vocational certificate category, 3 semester hours in photography (12/73); in the lower-division baccalaureate/associate degree category, 3 semester hours in photography on the basis of portfolio review (12/73); in the upper-division baccalaureate category, 3 semester hours in photography (12/68).

Related Occupation Codes: 84B.

AR-1709-0002

PHOTOGRAPHIC LABORATORY OPERATION

Course Number: 400-84G20; 11-R-843.1; 11-R-840.0; 11-E-20.

Location: Signal School, Ft. Monmouth, NJ.

Length: 10–15 weeks (356–554 hours).

Exhibit Dates: 10/55–Present.

Objectives: To train enlisted personnel in the principles and techniques of photographic processing as required to produce negatives and prints from film shot for technical, tactical, or public relations purposes.

Instruction: Laboratory experience in processing black and white negatives, in making contact and projection prints; experience in mounting and processing projection slides; aerial and ground reconnaissance strip processing; assembly processing motion picture film; physics and chemistry of processing; quality control of color printing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in photographic laboratory (12/73); in the upper-division baccalaureate category, 5 semester hours in photographic laboratory (12/68).

Related Occupation Codes: 84G.

AR-1709-0003

PROCESS PHOTOGRAPHY

Course Number: 740-83D20; 740-833.1; 5-E-52.

Location: Engineer School, Ft. Belvoir, VA.

Length: 7–9 weeks (304–360 hours).

Exhibit Dates: 2/56–Present.

Objectives: To provide selected enlisted personnel with a working knowledge of the basic skills of copy camera operation, with emphasis on line copying and halftone screening.

Instruction: Copy camera operation; film processing; exposure determination; line copying techniques; photographic filters; continuous tone copying; halftone screening with the halftone-magenta contact screen.

Credit Recommendation: In the vocational certificate category, 3 semester hours in graphic arts (12/73).

Related Occupation Codes: 82D; 83Z.

AR-1709-0004

MOTION PICTURE PHOTOGRAPHY

Course Number: 400-84C20; 11-R-841.2; 11-E-3.

Location: Signal School, Ft. Monmouth, NJ.

Length: 14 weeks (616 hours).

Exhibit Dates: 11/55-Present.

Objectives: To train enlisted personnel in motion picture photography, including camera operation, film exposure and processing, image composition, screen direction, film editing, and basic sound techniques.

Instruction: Basic studies in the principles of camera operation, shutter and lens settings, tripod and hand-held filming, use of wide angle and telephoto lenses, framing and composition, use of filters, and film processing; controlled and uncontrolled experiences with applications of interior lighting techniques, tactical air cinematography, color filming, single/double system sound, silent and sound film editing, and television applications; operation of the Arriflex, Magnasync recording system, quarter-inch tape systems; assignments in news filming and multimedia presentations.

Credit Recommendation: In the vocational certificate category, 3 semester hours in photography (12/73); in the lower-division baccalaureate/associate degree category, 3 semester hours in photography (12/73); in the upper-division baccalaureate category, 3 semester hours in photography (12/68).

Related Occupation Codes: 84C; 84B; 84G.

AR-1709-0005

INTELLIGENCE PHOTOGRAPHY

Course Number: 3A-F3; 244-F3.

Location: Intelligence School, Ft. Huachuca, AZ; Intelligence School, Ft. Holabird, MD.

Length: 8-9 weeks (244-271 hours).

Exhibit Dates: 9/66-1/79.

Objectives: To provide selected intelligence personnel with a working knowledge of the theory, techniques, and applications of photography in the intelligence field.

Instruction: Camera lens and shutter relationships; depth of field; exposure, filters, flash, polaroid photography; the rangefinder camera; single-lens-reflex cameras; subminiature photography; photo chemicals; sheet, miniature, and subminiature film development; contact and projection printing; photographic maintenance; infrared and ultraviolet photography; composition; theory of color; color chemicals; negative and positive color processing; color printing and slide duplication.

Credit Recommendation: in the lower-division baccalaureate/associate degree category, 3 semester hours in basic photography (6/79); in the upper-division baccalaureate category, 3 semester hours in photography (6/79).

AR-1709-0006

1. PICTORIAL UNIT COMMANDER AND MOTION PICTURE AND TELEVISION DIRECTOR
2. PICTORIAL UNIT COMMANDER (Photographic Unit Commander)

Course Number: *Version 1:* 7F-8500; 7F-8511; 4C-8500; 4C-8511. *Version 2:* 11-A-8500; 11-O-39.

Location: Signal School, Ft. Monmouth, NJ.

Length: 9 weeks (356-360 hours); 10 weeks (354-360 hours).

Exhibit Dates: *Version 1:* 2/67-Present. *Version 2:* 8/55-1/67.

Objectives: To train commissioned officers to direct, administer, and supervise still and motion-picture photographic, audio-visual, and television activities.

Instruction: Lectures and practical exercises in supervision of still and motion-picture activities. Course includes still photography, and laboratory practices and supervision (camera operation, film development, contact and projection printing, photo laboratory operation, aerial photography, and color processing and printing); motion-picture photography, and laboratory practices and supervision (camera operation, exposure, editing, production techniques, operation of 16mm sound camera, evaluation); tape recorder operation; and television production techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in photography or audio-visual aids on the basis of institutional evaluation (7/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in photography or audio-visual aids on the basis of institutional evaluation (7/74); in the upper-division baccalaureate category, 12 semester hours in photography (12/68). *Version 2:* In the vocational certificate category, 2 semester hours in photography or audio-visual aids on the basis of institutional evaluation (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in photography or audio-visual aids on the basis of institutional evaluation (7/74).

AR-1709-0007

PHOTOGRAMMETRIC COMPILATION

Course Number: 411-81D30.

Location: Engineer School, Ft. Belvoir, VA.

Length: 10 weeks (370-378 hours).

Exhibit Dates: 3/67-5/71.

Objectives: To train enlisted personnel in the principles and techniques of photogrammetric map compiling.

Instruction: Lectures and practical exercises in the principles and techniques of photogrammetric map compiling. Course includes the principles, operation, and application of multiplex equipment, the high-precision stereoplotter, and photogrammetric problem solving.

Credit Recommendation: In the vocational certificate category, 3 semester hours in photogrammetry on the basis of institutional evaluation (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in photogrammetry on the basis of institutional evaluation (7/74); in the upper-division baccalaureate category, 3 semester hours in photogrammetry (12/68).

Related Occupation Codes: 81D.

AR-1709-0008

IMAGE INTERPRETATION OFFICER (Photointerpretation Officer)

Course Number: 30-A-8503.

Location: Intelligence School, Ft. Holabird, MD.

Length: 19-24 weeks (665-804 hours).

Exhibit Dates: 7/57-12/68.

Objectives: To train commissioned officers to perform tactical air photo interpretation.

Instruction: Lectures and practical exercises in the techniques and principles of air photo interpretation. Course includes relationships between intelligence and photo interpretation; specialized photo interpretation techniques and procedures, such as stereography, negative transparency interpretation, color photography, geometry of vertical photographic images, photo interpretation keys, identification of civilian and military objects and activities, small-scale photography, long-focal-length photography, and infrared and electronics interpretation; photogrammetry instruction includes basic mensuration techniques dealing with oblique images, scales, and dimensions; mechanics instruction includes flight planning, grids, stereocomparagraphs, restitution, rectification, plotting, and mosaics; terrain instruction includes recognition and analysis of ground conditions, including areas of military and civilian interest.

Credit Recommendation: In the upper-division baccalaureate category, 5 semester hours in photographic interpretation (12/68).

AR-1709-0009

FORENSIC PHOTOGRAPHER (Photographic Evidence Technician)

Course Number: None.

Location: Criminal Investigation Laboratory, Ft. Gordon, GA.

Length: 104 weeks (3528 hours).

Exhibit Dates: 3/72-Present.

Objectives: To qualify personnel as forensic photographers and as expert witnesses in forensic photography in judicial proceedings.

Instruction: Topics include history and principles of photography optics and the nature of light, cameras and related photographic equipment, sentized photographic materials, exposure and lighting techniques, flash and strobe photography, filters, photographic processing and printing, densitometry and quality control systems, color photography, police photography and the forensic science laboratory, firearms, fingerprint, document and crime scene photography, utlraviolet and infrared photography, photomacrography, photomicrography, legal considerations involving photography, detection of retouching of negatives and prints, masking and internegative procedures, production and reproduction of transparencies, advanced camera techniques, darkroom planning and management.

Credit Recommendation: In the vocational certificate category, 30 semester hours in forensic photography (4/78); in the lower-division baccalaureate/associate degree category, 6 semester hours in basic forensic science, 6 in basic photography, 6 in police photography, 3 in automated processing equipment, 3 in color photography, and 6 in criminal investigations, for a total of 30 semester hours (4/78); in the upper-division baccalaureate category, 3 semester hours in forensic science, 6 in photomacrography and photomicrography, and 0-3, for the research work based on the receiving institution's review of the student's project (4/78); in the graduate degree category, 0-9 semester hours based on the student's research project to be assigned by the receiving institution. Credit is expressed as a range because of the highly individualized study and the practical applied experience required (4/78).

Related Occupation Codes: 951A.

AR-1709-0010

Aerial Sensor Specialist Entry Level

Course Number: 221-96H10.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: 10 weeks (371–372 hours).

Exhibit Dates: 4/79–Present.

Objectives: To train enlisted military personnel in operation and maintenance of an aerial sensing system.

Instruction: Lectures and practical application in the operation and maintenance of an aerial sensing system.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in aerial navigation, 3 in aerial photography (6/79).

Related Occupation Codes: 96H.

AR-1710-0001

1. Marine Engineer
2. Marine Engine Operation and Maintenance
3. Marine Engine Operation and Maintenance

Course Number: *Version 1:* 652-61C20. *Version 2:* 652-61C20. *Version 3:* 55-R-565;1 55-E-10.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 6–7 weeks (215–245 hours). *Version 2:* 5 weeks (184 hours). *Version 3:* 7–9 weeks (245–311 hours).

Exhibit Dates: *Version 1:* 9/69–Present. *Version 2:* 11/66–8/69. *Version 3:* 8/55–10/66.

Objectives: To train enlisted personnel to maintain diesel engines, fuel injection systems, outboard motors, and marine electrical systems.

Instruction: *All Versions:* Lectures and practical experience in the operation and maintenance of internal-combustion engines, pumps, air compressors, governors, and lubricating, cooling, hydraulics, fuel injection, and electrical systems. *Version 1:* Instruction includes outboard motor maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in marine technology, diesel technology, or heavy equipment repair (4/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in marine technology, diesel technology, or heavy equipment repair (4/74). *Version 2:* In the vocational certificate category, 3 semester hours in marine technology, diesel technology, or heavy equipment repair (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in marine technology, diesel technology, or heavy equipment repair (4/74). *Version 3:* In the vocational certificate category, 4 semester hours in marine technology, diesel technology, or heavy equipment repair (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in marine technology, diesel technology, or heavy equipment repair (4/74).

Related Occupation Codes: 61A; 61C.

AR-1710-0002

Surfacing Machine Operation
(Surfacing Machine Operator)

Course Number: 5-E-55.

Location: Engineer School, Ft. Belvoir, VA.

Length: 10 weeks (359 hours).

Exhibit Dates: 9/55–12/68.

Objectives: To train enlisted personnel to operate and maintain various types of asphalt and concrete mixing and surfacing equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of various types of asphalt and concrete mixing and surfacing equipment, including principles of engines, air compressors and attachments, asphalt plant operation and attachments, preparation of bituminous surfaces, concrete construction, installation of steel permanent forms, concrete pavers, mixers, spreaders, and finishers, and supervisory duties pertaining to concrete and asphalt projects.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in civil technology, 10 in heavy equipment operation (4/74).

AR-1710-0003

Turret Maintenance
(Armor Turret Maintenance)

Course Number: 643-424.1; 17-R-424.1; 17-R-131.1.

Location: Armor School, Ft. Knox, KY.

Length: 10 weeks (371–378 hours).

Exhibit Dates: 9/58–12/68.

Objectives: To train enlisted personnel to perform, direct, and maintain armament installations and the mechanical, electrical, and hydraulic components of armament systems.

Instruction: Lectures and practical exercises in armament components repair, including disassembly, inspection, assembly, maintenance, turret familiarization, fire control systems, technical manuals and maintenance forms, tools care and usage, basic electricity, electronics, and hydraulics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in mechanical or industrial technology (4/74).

Related Occupation Codes: 45G; 45Z.

AR-1710-0004

Utilities Foreman

Course Number: 5-E-20.

Location: Engineer School, Ft. Belvoir, VA.

Length: 11 weeks (417 hours).

Exhibit Dates: 10/54–12/68.

Objectives: To train noncommissioned officers to supervise the installation and repair of utilities systems in military barracks, sheds, warehouses, mess halls, hospitals, and laboratories.

Instruction: Lectures and practical exercises in utility maintenance at the advanced level. Course includes the construction and repair of water supply and sewage disposal systems; waste collection and disposal; insect and rodent control; sheet metal work; plumbing; fire prevention; construction materials; operation of gasoline and diesel engines; maintenance and repairs of electrical systems; refrigeration equipment; use of construction drawings; construction planning; and maintenance and repair of building and structures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in building construction and supervision (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in building construction and supervision (6/74); in the upper-division baccalaureate category, 3 semester hours in building construction and supervision (6/74).

AR-1710-0005

Railway Section Foreman

Course Number: 55-E-33.

Location: Transportation School, Ft. Eustis, VA.

Length: 10 weeks (350 hours).

Exhibit Dates: 7/55–12/68.

Objectives: To train enlisted personnel to supervise section gangs in the maintenance of railway tracks, roadbeds, switches, and appurtenant structures.

Instruction: Lectures and practical exercises in the supervision of railway track, roadbed, switch, and appurtenant structure maintenance, including supervisory responsibilities, railway signals, track structures, ballast, cross and switch tie maintenance, curves, turnout construction, and maintenance of way records and reports.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

AR-1710-0006

Railway Car Repair

Course Number: 55-E-5.

Location: Transportation School, Ft. Eustis, VA.

Length: 10 weeks (350 hours).

Exhibit Dates: 8/55–3/62.

Objectives: To train enlisted personnel to repair and overhaul passenger and freight cars.

Instruction: Lectures and practical exercises in the repair and overhaul of passenger and freight cars, including arc welding, cutting, brazing, spray and brush painting, and repair of brake components, trucks, draft gears, and couplers.

Credit Recommendation: In the vocational certificate category, 1 semester hour in welding, 7 as an elective in heavy equipment repair (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in welding, 7 as an elective in heavy equipment repair (4/74).

Related Occupation Codes: 65D.

AR-1710-0007

Railway Shop Foreman

Course Number: 55-E-34.

Location: Transportation School, Ft. Eustis, VA.

Length: 10 weeks (350 hours).

Exhibit Dates: 1/56–12/68.

Objectives: To train enlisted personnel to supervise the repair, disassembly, inspection, and overhaul of railway equipment.

Instruction: Lectures and practical exercises in the supervision of railway equipment repair, disassembly, inspection, and overhaul, including shop operation procedures; mathematics; blueprint reading; steam locomotive running gear, boiler, and integral parts; special equipment; diesel and electric operation; and supervisory responsibilities.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

AR-1710-0008

Steam Locomotive Repairman

Course Number: 55-E-9.

Location: Transportation School, Ft. Eustis, VA.

Length: 10 weeks (350 hours).

Exhibit Dates: 8/55–3/62.

Objectives: To train enlisted personnel to inspect, test, repair, and maintain steam-operated locomotives, tenders, tank cars, and material constructed of heavy steel plate, and to maintain railway and similar-type boilers and railway motive-power and allied equipment.

Instruction: Lectures and practical exercises in the inspection, testing, repair, and maintenance of steam-operated locomotives, tenders, tank cars, and material constructed of heavy steel plate, and the maintenance of railway and similar-type boilers and railway motive-power and allied equipment, including welding procedures, steam engine construction, and machine shop.

Credit Recommendation: In the vocational certificate category, 1 semester hour in arc and oxyacetylene welding, 2 in introduction to machine shop, and 5 as an elective in heavy equipment repair (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in arc and oxyacetylene welding, 1 in introduction to machine shop, and 5 as an elective in heavy equipment repair (4/74).

Related Occupation Codes: 65B.

AR-1710-0009

MOBILE ELECTRIC POWER GENERATION

Course Number: 662-52B20; 662-52B30.

Location: Engineer School, Ft. Belvoir, VA.

Length: 7-10 weeks (269-351 hours).

Exhibit Dates: 5/71-Present.

Objectives: To train enlisted personnel to install, operate, and maintain portable, gasoline and diesel engine generator sets, electric arc welders, and associated equipment.

Instruction: Lectures and practical exercises in the installation, operation, and maintenance of portable, gasoline and diesel engine generator sets, electric arc welders, and associated equipment, including AC and DC power generation, basic electricity, maintenance management, various circuits, internal-combustion engine systems analysis, and mobile electric power generation systems and equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in basic electricity, 2 in industrial electrical apprenticeship, 1 in introduction to internal-combustion engines (9/79); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity, 1 in introduction to internal-combustion engines (9/79).

Related Occupation Codes: 52B; 52C; 52D.

AR-1710-0010

MOBILE ELECTRIC POWER GENERATION (PRECISE)

Course Number: 662-52B30.

Location: Engineer School, Ft. Belvoir, VA.

Length: 2-3 weeks (86 hours).

Exhibit Dates: 1/72-7/75.

Objectives: To train power generation equipment operators and mechanics to install, operate, and maintain precise-power generators, motor generators, and associated equipment.

Instruction: Lectures and practical exercises in the installation, operation, and maintenance of precise-power generators, motor generators, and associated equipment, including power performance requirements of various generators, emergency power transfer, and maintenance of facilities.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

Related Occupation Codes: 52B; 52C; 52D.

AR-1710-0011

AMPHIBIOUS TRUCKMASTER

Course Number: 55-R-641.6; 55-E-41.

Location: Transportation School, Ft. Eustis, VA.

Length: 15 weeks (525 hours).

Exhibit Dates: 7/55-12/68.

Objectives: To train enlisted personnel to supervise amphibious wheeled vehicle transport operations.

Instruction: Lectures and practical exercises in the supervision of amphibious wheeled vehicle transport operations, including function of an amphibious unit, field expedients, engine troubleshooting and maintenance, convoy organization, communications, nautical operations, vehicle recovery, cargo handling, and planning and control operations.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

AR-1710-0012

MECHANICAL MAINTENANCE WARRANT OFFICER INTERMEDIATE (421A)

Course Number: 4-9-C30-A.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 16 weeks (498 hours).

Exhibit Dates: 7/72-Present.

Objectives: To train armament repair technicians to supervise general support and depot support maintenance.

Instruction: Lectures and practical exercises in the supervision of general support and depot support maintenance, including leadership and managerial studies, information systems, maintenance management studies, machine and welding operations, hydraulic principles and system components, review of electricity, various circuits, motors and generators, semiconductors and transistors, ignition systems, and armament specialty subjects.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in mechanical or industrial technology, and 4 as an elective in business management (4/74); in the upper-division baccalaureate category, 2 semester hours as an elective in business management (4/74).

Related Occupation Codes: 421A; 441A; 630A; 631A; 632A.

AR-1710-0013

MECHANICAL MAINTENANCE WARRANT OFFICER INTERMEDIATE (441A)

Course Number: 4-9-C30-B.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 18 weeks (544 hours).

Exhibit Dates: 7/72-Present.

Objectives: To train automotive maintenance technicians to maintain and test electrical and fuel systems in automotive and support vehicles and to supervise supply maintenance functions.

Instruction: Lectures and practical exercises in leadership and management; management information systems; maintenance management; machine shop, welding, metal body works, and automotive testing equipment review; and electricity and electronics review.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours as an elective in business management, 4 in mechanical technology or industrial technology, and 2 in automotive or diesel mechanics (4/74); in the upper-division baccalaureate category, 2 semester hours as an elective in business management (4/74).

Related Occupation Codes: 441A.

AR-1710-0014

MECHANICAL MAINTENANCE WARRANT OFFICER INTERMEDIATE (631A)

Course Number: 4-9-C30-D.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 17 weeks (516 hours).

Exhibit Dates: 7/72-Present.

Objectives: To train automotive maintenance technicians to maintain and test electrical and fuel systems in automotive and support vehicles and to supervise supply maintenance functions.

Instruction: Lectures and practical exercises in leadership and management; management information systems; maintenance management; machine shop, welding, metal body works, and automotive testing equipment review; and electricity and electronics review.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours as an elective in business management, 4 in mechanical technology or industrial technology, and 2 as an elective in automotive technology (4/74); in the upper-division baccalaureate category, 2 semester hours as an elective in automotive technology (4/74).

Related Occupation Codes: 631A.

AR-1710-0015

QUARTERMASTER EQUIPMENT REPAIR SUPERVISION

Course Number: 10-E-31.

Location: Quartermaster School, Ft. Lee, VA.

Length: *Version 1:* 6 weeks (210 hours). *Version 2:* 10 weeks (347 hours).

Exhibit Dates: *Version 1:* 4/57-12/68. *Version 2:* 1155-3/57.

Objectives: To train quartermaster equipment repairmen to supervise the repair of quartermaster mechanical equipment.

Instruction: *All Versions:* Lectures and practical exercises in the supervision of the repair of quartermaster mechanical equipment, including electrical components, internal-combustion engines, materiel-handling equipment, laundry equipment, bath units, POL equipment, bakery units, burner equipment, and special-purpose vehicles. *Version 1:* Includes supervision, leadership, and speech training. *Version 2:* Emphasizes technical subject matter.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours as an elective in industrial technology (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in supervision, and 3 semester hours as an elective in industrial technology (4/74). *Version 2:* In the vocational certificate category, 5 semester hours as an elective in industrial technology (4/74); in the lower-division baccalaureate/associate degree category, 5 semester hours as an elective in industrial technology (4/74).

AR-1710-0016

ENGINEER EQUIPMENT REPAIR

Course Number: 612-62B30; 612-622.2.

Location: Engineer School, Ft. Belvoir, VA.

Length: 9 weeks (281-342 hours).

Exhibit Dates: 7/65-Present.

Objectives: To train engineer equipment mechanics to repair engineer construction, earth-moving, and support-type equipment and powered bridging equipment.

Instruction: Lectures and practical exercises in the repair of engineer construction, earth-moving, and support-type equipment and powered bridging equipment, including operation, construction, troubleshooting, and overhaul of 2- and 4-cycle diesel engines; repair of power trains, hydraulic systems, brakes, various parts of heavy construction equipment, operation of air compressors, hydraulic systems, and equipment components.

Credit Recommendation: In the vocational certificate category, 2 semester hours in diesel engine technology, 2 in heavy equipment technology, 1 in automotive power trains (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in diesel engine technology, 2 in heavy equipment technology, 1 in automotive power trains (4/74).

Related Occupation Codes: 62B.

AR-1710-0017

ANTIAIRCRAFT ARTILLERY REPAIR

Course Number: 9-R-423.1; 9-E-77.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 7 weeks (245–342 hours).

Exhibit Dates: 5/56–12/68.

Objectives: To train enlisted personnel to repair and rebuild antiaircraft artillery equipment.

Instruction: Lectures and practical exercises in the repair and rebuilding of light, medium, and heavy antiaircraft artillery weapons, including equipment maintenance and operation of specific machine gun mounts and artillery weapons.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

AR-1710-0018

TANK TURRET REPAIR

(Turret Artillery Repair)

Course Number: *Version 1:* 643-45K20. *Version 2:* 643-45K20. *Version 3:* 643-45K30; 643-45G30; 9-R-424;1 9-E-31.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 16 weeks (536 hours). *Version 2:* 15 weeks (489 hours). *Version 3:* 9–11 weeks (318–385 hours).

Exhibit Dates: *Version 1:* 7/76–Present. *Version 2:* 4/74–6/76. *Version 3:* 5/56–3/74.

Objectives: To train enlisted personnel to evaluate and repair tank turret systems.

Instruction: *Version 1:* Lectures and practical experience in the evaluation and repair of mechanical, electrical, electronic and hydraulic systems on tank turrets and cupolas including the breech mechanism and firing components. *Version 2:* Lectures and practical exercises in the maintenance of the mechanical, electrical, electronic, and hydraulic components and systems of the armament installed in tank turrets, armored reconnaissance vehicles, and cupolas mounted on armored personnel carriers, including basic electricity and electronics, hydraulics, and disassembly, inspection, and assembly procedures for armament components.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in mechanical, electrical/electronic systems (1/78). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in tools, measuring devices, and instrumentation (6/75). *Version 3:* In the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in mechanical or industrial technology (4/74).

Related Occupation Codes: 45K; 09B.

AR-1710-0019

QUARTERMASTER EQUIPMENT REPAIR

Course Number: 10-R-463.1; 10-E-32.

Location: Quartermaster School, Ft. Lee, VA.

Length: 14 weeks (490 hours).

Exhibit Dates: 3/56–12/68.

Objectives: To train enlisted personnel to install, adjust, and repair quartermaster equipment.

Instruction: Lectures and practical exercises in basic electricity, including parallel and series circuits, Ohm's law, control devices, test equipment, electrical motors, generators, and batteries; brazing, carpentry, and pipe fitting; fork lift operation and repair; laundry and bakery equipment; fuel storage and handling; and minor maintenance and troubleshooting of internal-combustion engines.

Credit Recommendation: In the vocational certificate category, 1 semester hour in introduction to internal-combustion engines (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to internal-combustion engines, and 7 as an elective in industrial or mechanical technology (4/74).

AR-1710-0020

TANK TURRET MECHANIC

Course Number: *Version 1:* 643-45N10. *Version 2:* 643-45N20.

Location: Armor School, Ft. Knox, KY.

Length: 8–9 weeks (286–288 hours).

Exhibit Dates: *Version 1:* 4/76–Present. *Version 2:* 4/73–3/76.

Objectives: To train enlisted personnel to operate and maintain the mechanical, electrical, and hydraulic components of a tank turret system.

Instruction: *All Versions:* Lectures and practical exercises in tank turret system operation and maintenance, including armament component repair, disassembly, inspection, maintenance procedures, assembly, safety procedures, basic electricity and hydraulics, and maintenance of armament for tanks. *Version 1:* Greater emphasis is placed on electrical technology.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in electrical technology, 3 as an elective in mechanical or industrial technology (2/80). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in mechanical or industrial technology (4/74).

Related Occupation Codes: 45N; 09B.

(Electric Power Production (52-CMF) NCO Basic)

(Electric/Electronic Devices Maintenance (35-CMF) NCO Basic)

Course Number: 6-634-C40; 7-521-C40; 1-352-C40; 6-MM-C40; 6-MM-C40C.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 6–7 weeks (174–207 hours). *Version 2:* 12 weeks (379–384 hours).

Exhibit Dates: *Version 1:* 8/75–5/78. *Version 2:* 6/72–7/75.

Objectives: To train power generator equipment repairmen, engineer equipment repairmen, and engineer specialists to supervise the repair and maintenance of mechanical equipment.

Instruction: Lectures and practical exercises in the supervision of mechanical equipment repair and maintenance, including hydraulics, diagnostic techniques, repair of air compressors and electrical generators, management, electricity, gasoline and diesel engines, equipment systems and component repair, and options in missiles, power generation, or construction equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in mechanical maintenance supervision (12/78). *Version 2:* In the vocational certificate category, 7 semester hours as an elective in mechanical or industrial technology (4/74); in the lower-division baccalaureate/associate degree category, 7 semester hours as an elective in mechanical or industrial technology (4/74).

Related Occupation Codes: 52B; 52C; 52D; 52E; 62B; 62C; 35E.

AR-1710-0022

QUARTERMASTER HEAVY EQUIPMENT REPAIRMAN

(Quartermaster Heavy Equipment Repair)

Course Number: 690-63K20; 690-467.1; 10-R-467.1.

Location: *Version 1:* Ordnance School, Aberdeen Proving Ground, MD. *Version 2:* Ordnance School, Aberdeen Proving Ground, MD; Quartermaster School, Ft. Lee, VA.

Length: *Version 1:* 8 weeks (242 hours). *Version 2:* 10–13 weeks (350–476 hours).

Exhibit Dates: *Version 1:* 4/74–4/77. *Version 2:* 9/59–3/74.

Objectives: To train enlisted personnel to install, adjust, and repair quartermaster materials-handling equipment and special-purpose vehicles and equipment.

Instruction: Lectures and practical exercises in the installation, adjustment, and repair of quartermaster materials-handling equipment and special-purpose vehicles and equipment, including basic industrial electricity principles, circuit tracing, troubleshooting and maintenance of electrical equipment and motors, internal-combustion engine systems and components, and mobile equipment operation and maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in heavy equipment maintenance (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in heavy equipment maintenance (6/75). *Version 2:* In the vocational certificate category, 2 semester hours in electricity, 2 in automotive engines, and 1 as an elective in technical equipment (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity, 2 in automotive engines, and 1 as an elective in technical equipment (4/74).

Related Occupation Codes: 62K.

AR-1710-0023

BOILERMAKER

Course Number: 55-E-2.

Location: Transportation School, Ft. Eustis, VA.

Length: 10 weeks (350 hours).

Exhibit Dates: 8/55–12/68.

Objectives: To train enlisted personnel to dismantle, repair and overhaul steam boilers, fireboxes, tenders, tank cars, and other containers constructed of heavy steel plate, and to maintain railway and similar-type boilers and allied equipment.

Instruction: Lectures and practical exercises in the maintenance, overhaul and repair of railway and similar-type boilers and allied equipment, including general basic technical subjects; army supply and cost consciousness; locomotive nomenclature; boiler construction, maintenance and repair; oxyacetylene and electric arc cutting and welding; tubes and flues; stay bolts and firebox; and boiler inspection.

Credit Recommendation: In the vocational certificate category, 6 semester hours in boilermaking, stationary engineer or power plant (5/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in boilermaking, stationary engineer or power plant (5/74); in the upper-division baccalaureate category, 2 semester hours in boilermaking, stationary engineer or power plant (5/74).

AR-1710-0024

Construction and Utilities (CU-CMF) Noncommissioned Officer (NCO) Basic
(General Engineering (51-CMF) NCO Basic)
(Special-Assignment (00-CMF) NCO Basic)

Course Number: 7-51-C40; 7-000 C40.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 8–9 weeks (258–307 hours). *Version 2:* 12 weeks (378–394 hours).

Exhibit Dates: *Version 1:* 10/75–5/78. *Version 2:* 9/72–9/75.

Objectives: To train noncommissioned officers and enlisted personnel in basic engineering construction.

Instruction: Lectures and practical exercises in engineering construction, including communications, maintenance management, map reading, generator operation, building construction, construction management, soil mechanics, concrete, construction equipment, electrical distribution systems, air conditioning, construction surveying, and field problems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in construction foremanship (12/78). *Version 2:* In the lower-division baccalaureate/associate degree category, 9 semester hours in construction engineering and management (5/74); in the upper-division baccalaureate category, 6 semester hours in construction engineering and management (5/74).

Related Occupation Codes: 51B; 51C; 51D; 51E; 51F; 51J; 51K; 51L; 51N; 51R; 52E; 53B; 53C; 62D; 62E; 62F; 62G; 62H; 62J; 62K; 62L; 62M; 81B; 82B; 51G; 57D.

AR-1710-0025

Construction Foreman NCO Candidate

Course Number: 710-51H40.

Location: Training Center, Ft. Leonard Wood, MO.

Length: 21 weeks (630 hours).

Exhibit Dates: 1/71–Present.

Objectives: To train noncommissioned officers to be construction foremen.

Instruction: Lectures and practical exercises in construction supervision, including map reading; methods of instruction; mathematics; carpentry, masonry, plumbing, and sheet metal work; electrical techniques; rigging; construction surveys, drawings, and management procedures; soils and geology; road and airfield construction; flexible pavements and concrete; fixed bridges and classifications; buildings and construction; engineering equipment utilization and maintenance; explosives and demolitions; and supply procedures.

Credit Recommendation: In the vocational certificate category, 10 semester hours in general construction (5/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in general construction (5/74); in the upper-division baccalaureate category, 6 semester hours in general construction (5/74).

Related Occupation Codes: 41H.

AR-1710-0026

Construction and Utilities (CU-CMF) NCO Advanced

Course Number: 7-CU-C42.

Location: Engineer School, Ft. Belvoir, VA.

Length: 12 weeks (379 hours).

Exhibit Dates: 7/72–Present.

Objectives: To provide noncommissioned officers with advanced training in construction and utilities.

Instruction: Lectures and practical exercises in construction and utilities, including military justice and discipline, mathematics, leadership and management, unit administration, maintenance management, field engineering, bivouac area, mine warfare, combat operations, combat support, electives, foundation and materials, flexible pavements, fixed bridges, engineering design, T/O structures, and construction management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 12 semester hours in construction engineering (5/74); in the upper-division baccalaureate category, 3 semester hours in construction engineering (12/68).

Related Occupation Codes: 51E; 51F; 51H; 51M; 51N; 51P; 51R; 52E; 53B; 53C; 57D; 62D; 62G; 62H; 62J; 62N; 82B.

AR-1710-0027

1. Welding
2. Welding
3. Welding
4. Welding
(Welder-Blacksmith)

Course Number: *Version 1:* 701-44C20. *Version 2:* 701-44C20. *Version 3:* 701-44C20; 9-R-442.1. *Version 4:* 9-R-442;1 9-E-5.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 11 weeks (336 hours). *Version 2:* 12 weeks (380–432 hours). *Version 3:* 11 weeks (389–434 hours). *Version 4:* 8 weeks (280–304 hours).

Exhibit Dates: *Version 1:* 3/75–12/75. *Version 2:* 3/71–2/75. *Version 3:* 4/58–2/71. *Version 4:* 6/56–3/58.

Objectives: To train enlisted personnel to weld ferrous and nonferrous metals and to perform soldering, brazing, and cutting operations for repair and maintenance of military equipment.

Instruction: *All Versions:* Lectures and practical exercises in welding, soldering, brazing, and cutting operations in various positions using several metals, including oxyacetylene welding principles and operations, properties and identification of metals, electric arc welding procedures, and interpretation of drawings and use of tools. *Version 1:* Does not include Tungsten Inert Gas (TIG) welding. *Version 2:* Includes inert-gas welding. *Version 3:* Includes inert-gas welding and mathematics. *Version 4:* Includes blacksmithing principles, techniques, and applications.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in welding technology (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in welding technology (6/75). *Version 2:* In the vocational certificate category, 6 semester hours in welding technology (5/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in welding technology (5/74); in the upper-division baccalaureate category, 2 semester hours in welding technology (5/74). *Version 3:* In the vocational certificate category, 3 semester hours in welding (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in welding (5/74). *Version 4:* In the vocational certificate category, 3 semester hours in welding or blacksmithing (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in welding or blacksmithing (5/74).

Related Occupation Codes: 44C; 44Z.

AR-1710-0028

Artillery Repair

Course Number: 642-45L20.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 8–11 weeks (252–356 hours). *Version 2:* 13 weeks (414–468 hours).

Exhibit Dates: *Version 1:* 2/75–3/77. *Version 2:* 4/71–1/75.

Objectives: To train enlisted personnel to maintain artillery.

Instruction: Lectures and practical exercises in self-propelled artillery, rocket launchers, and light air defense artillery and related materials maintenance, including assembly, disassembly, and maintenance procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours as an elective in mechanical or electrical technology (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in mechanical or electrical technology (6/75). *Version 2:* In the vocational certificate category, 4 semester hours as an elective in heavy equipment repair (7/74); in the lower-division baccalaureate/associate degree category, 4 semester hours as an elective in heavy equipment repair (7/74).

Related Occupation Codes: 45L.

AR-1710-0029

Engineer Equipment Maintenance

Course Number: 612-62B20; 612-622.1.

Location: Engineer School, Ft. Belvoir, VA.

Length: 10–11 weeks (367–432 hours).

Exhibit Dates: 12/65–Present.

Objectives: To train enlisted personnel to perform as engineer equipment repairmen.

Instruction: Lectures and practical exercises in the maintenance of engineer construction, earth-moving and support-type equipment, and powered bridging equipment; equipment operation; electrical fundamentals; internal combustion engine systems maintenance; diesel engine maintenance; power trains, systems, and components; troubleshooting and component removal; air compressors; welding; hydraulic systems; boat and bridge erection; organizational maintenance; and equipment troubleshooting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in power trains laboratory, 2 in power plants laboratory (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in power trains laboratory, 2 in power plants laboratory (7/74).

Related Occupation Codes: 62B.

AR-1710-0030

Structures Specialist

Course Number: 710-51C10.

Location: Ft. Leonard Wood, MO, 33/78.

Length: 229 weeks (33/78 hours).

Exhibit Dates: Present–7.

Objectives: To train enlisted personnel to assist in the fabrication and erection of structural assemblies.

Instruction: Conferences and practical exercises in the skills and knowledge needed to assist in the fabrication, assembly, erection, and repair of rigging devices, trusses, and other structural assemblies; installation of pipeline and sheet metal items.

Credit Recommendation: In the vocational certificate category, 1 semester hour in metal fabrication, 1 in introduction to welding (9/79).

AR-1710-0031

Medium Antiaircraft Artillery Maintenance

(Medium and Heavy Antiaircraft Artillery Maintenance)

Course Number: 44-R-162.2; 44-E-19.

Location: Air Defense School, Ft. Bliss, TX; Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX; Antiaircraft and Guided Missile School, Ft. Bliss, TX.

Length: 5–6 weeks (159–210 hours).

Exhibit Dates: 4/55–12/68.

Objectives: To train enlisted personnel to maintain small arms and medium and heavy antiaircraft artillery weapons.

Instruction: Lectures and practical exercises in the maintenance of small arms and medium and heavy antiaircraft artillery weapons, including machine guns, recoil systems, fuze setter and combination fuze setter-rammer, sighting and fire control equipment, generator set operation, machine gun mounts, ammunition, and maintenance, inspection, and lubrication procedures.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/74).

AR-1710-0032

Sheridan Turret Mechanic

Course Number: 643-45P20.

Location: Armor School, Ft. Knox, KY.

Length: 9 weeks (304 hours).

Exhibit Dates: 4/73–Present.

Objectives: To train enlisted personnel to maintain the Sheridan tank turret.

Instruction: Lectures and practical exercises in Sheridan tank turret maintenance, including electricity fundamentals, machine gun repair, turret support mechanisms, and fire control systems.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (7/74).

Related Occupation Codes: 45P.

AR-1710-0033

Engineer Equipment Officer

Course Number: 4L-0663; 5-O-13.

Location: Engineer School, Ft. Belvoir, VA.

Length: 6–8 weeks (188–308 hours).

Exhibit Dates: 8/55–Present.

Objectives: To train commissioned officers to plan, coordinate, and supervise the effective utilization and recovery of equipment.

Instruction: Lectures and practical exercises in the planning, coordination, and supervision of the effective utilization and recovery of equipment. Course includes field engineering, maintenance management, repair parts, generators, internal-combustion engines, power trains, troubleshooting and organizational maintenance, construction equipment, automotive and special subjects, welding, hand and machine tools, crane-shovels, tractors and scrappers, motorized graders, air compressors, concrete construction equipment, operation and maintenance of rock crushers, asphalt and related equipment, and earth moving.

Credit Recommendation: In the vocational certificate category, 4 semester hours in heavy equipment shop foremanship (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in heavy equipment shop foremanship (6/75).

AR-1710-0034

Engineer Equipment Repair, Enlisted

Course Number: 5-E-14.

Location: Engineer School, Ft. Belvoir, VA.

Length: 8 weeks (304 hours).

Exhibit Dates: 5/55–12/68.

Objectives: To train enlisted personnel to perform as engineer equipment repairmen.

Instruction: Lectures and practical exercises in the repair and maintenance of engineer construction equipment at the field and depot level, including crane-shovels, air compressors, tractors, motorized graders, internal-combustion engines, special subjects, miscellaneous equipment, and welding.

Credit Recommendation: In the vocational certificate category, 5 semester hours in heavy equipment repair technology (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in heavy equipment repair technology (7/74).

AR-1710-0035

Mechanical Maintenance (MM-CMF) Noncommissioned Officer (NCO) Basic

Course Number: 6-MM-C40A.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 9–12 weeks (424–480 hours).

Exhibit Dates: 2/73–Present.

Objectives: To train enlisted personnel in mechanical maintenance.

Instruction: Lectures and practical exercises in mechanical maintenance, including general career management, common technical subjects, machine shop operations, oxyacetylene welding, electric arc welding, metal inert-gas welding, tungsten inert-gas welding, and metal body repair.

Credit Recommendation: In the vocational certificate category, 3 semester hours in auto body laboratory, 3 in welding laboratory, 3 in machine tool laboratory, 3 in diesel engine laboratory (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in auto body laboratory, 3 in welding laboratory, 3 in machine tool laboratory, 3 in diesel engine laboratory (7/74).

Related Occupation Codes: 41C; 44A; 44B; 44C; 44D; 44E; 45B; 45D; 45K; 45J; 45L; 45M; 57C; 63B; 63C; 63F; 63G; 63H; 63J; 63K.

AR-1710-0036

Engineer Equipment Maintenance

Course Number: 5-E-12.

Location: Engineer School, Ft. Belvoir, VA.

Length: 8–9 weeks (310–320 hours).

Exhibit Dates: 4/55–12/68.

Objectives: To train enlisted personnel as engineer equipment mechanics.

Instruction: Lectures and practical exercises in organizational maintenance of engineer equipment and attachments, including fundamental subjects, gasoline engines, diesel engines, air compressors, tractors, motorized graders, crane-shovels, miscellaneous engineer equipment, welding, transporting engineer equipment, construction equipment operation, organizational maintenance, and facilities maintenance.

Credit Recommendation: In the vocational certificate category, 3 semester hours in heavy equipment maintenance (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in heavy equipment maintenance (7/74).

AR-1710-0037

Field Artillery Repair

Course Number: 642-422.1; 9-R-422.1; 9-E-76.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 7–8 weeks (270–304 hours).

Exhibit Dates: 5/56–12/68.

Objectives: To train enlisted personnel to repair and rebuild light, medium, and heavy field artillery, related materiel, and mounts.

Instruction: Lectures and practical exercises in field artillery repair, including introduction to field artillery maintenance; common tools; characteristics, description, removal, disassembly, assembly, maintenance, and installation of components; inspection of various cannons, guns, and rocket launchers; electrical systems and undercarriage, top carriage, and elevating and traversing mechanisms, description and removal; elevating A-frame, travelling lock, and traverse frame of specific rocket launcher; atomic warfare; bore evaluation; and gas pressure tests.

Credit Recommendation: In the vocational certificate category, 1 semester hour as an elective in mechanical or technical areas (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in mechanical or technical areas (7/74).

AR-1710-0038

Missile Tank Turret Mechanic

Course Number: 643-45R10; 643-45R20.

Location: Armor School, Ft. Knox, KY.

Length: 11–13 weeks (406–456 hours).

Exhibit Dates: 4/73–Present.

Objectives: To train enlisted personnel to maintain tank turret systems for the M60A2 tank turret systems and the 20mm gun.

Instruction: Lectures and practical exercises in the maintenance of the M60A2 tank turret system. Course includes mechanical training for MT3, M85 and .50 machine guns; turret systems for M60A2 tank, including electrical systems, controls, hydraulic systems, laser range-finder system, and other turret system functions.

Credit Recommendation: In the vocational certificate category, 4 semester hours as an elective in technical/vocational programs (7/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in vocational/technical programs (7/74).

Related Occupation Codes: 45R; 09B.

AR-1710-0039

MATERIALS HANDLING EQUIPMENT MECHANIC

Course Number: 610-F2.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 2 weeks (70 hours).

Exhibit Dates: 8/70–Present.

Objectives: To train enlisted personnel to maintain the 6,000-pound rough-terrain forklift and the 4,000-pound electric forklift.

Instruction: Lectures and practical exercises in the maintenance of a 6,000-pound rough-terrain forklift and a 4,000-pound electric forklift. Course includes operational training on the 4,000- and the 6,000-pound forklifts, battery maintenance, tire repair, and brakes and steering mechanisms.

Credit Recommendation: In the vocational certificate category, 1 semester hour as an elective in heavy equipment repair (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in heavy equipment repair (7/74).

AR-1710-0040

ENGINEER EQUIPMENT MAINTENANCE OFFICER

Course Number: 5-O-5.

Location: Engineer School, Ft. Belvoir, VA.

Length: 10 weeks (369 hours).

Exhibit Dates: 9/54–12/68.

Objectives: To train engineer officers and warrant officers to inspect, maintain, and repair engineer equipment.

Instruction: Lectures and practical exercises in the inspection, maintenance, and repair of engineer equipment. Course includes power crane shovels, air compressors, tractors, motorized graders, gasoline and diesel engines, welding, maintenance administration subjects, engineer repair parts and supply, and electrical subjects.

Credit Recommendation: In the vocational certificate category, 4 semester hours in heavy equipment repair, 2 in shop management (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in heavy equipment repair, 2 in shop management (7/74).

Related Occupation Codes: 621A.

AR-1710-0041

1. COMBAT ENGINEERING (12-CMF) NONCOMMISSIONED OFFICER (NCO) BASIC
2. COMBAT ENGINEERING (CE-CMF) NONCOMMISSIONED OFFICER (NCO) BASIC
3. COMBAT ENGINEERING NONCOMMISSIONED OFFICER (NCO) BASIC

Course Number: *Version 1:* 0-12-C40. *Version 2:* 0-CE-C40. *Version 3:* 030-12B40-EC.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 8–9 weeks (264–299 hours). *Version 2:* 12 weeks (384–390 hours). *Version 3:* 15 weeks (541 hours).

Exhibit Dates: *Version 1:* 8/75–5/78. *Version 2:* 3/73–7/75. *Version 3:* 3/71–2/73.

Objectives: To train noncommissioned officers to supervise combat engineering operations.

Instruction: Lectures and practical exercises in basic mathematics, map reading, job management and construction operations, bridges and bridge construction, structures and utilities, equipment utilization, demolition, rigging, field water supply, masonry construction, earth-moving equipment, and grading.

Credit Recommendation: *Version 1:* In the vocational certificate category, semester hours in construction foremanship (12/78). *Version 2:* In the vocational certificate category, 4 semester hours in construction foremanship (7/74). *Version 3:* In the vocational certificate category, 6 semester hours in construction foremanship (7/74).

Related Occupation Codes: 12B; 12C; 12D; 12E; 12F.

AR-1710-0042

QUARRY MACHINE OPERATION

Course Number: 5-E-57.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 5 weeks (183 hours). *Version 2:* 3 weeks (92–120 hours).

Exhibit Dates: 1/54–12/68.

Objectives: To train enlisted personnel to operate and maintain quarry machines.

Instruction: Lectures and practical exercises in internal combustion engines theory and maintenance and quarry machine operation, including rock crushers, screens, and washers.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours as an elective in heavy equipment or civil technology (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in heavy equipment or civil technology (4/74). *Version 2:* In the vocational certificate category, 2 semester hours as an elective in heavy equipment or civil technology (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in heavy equipment or civil technology (4/74).

AR-1710-0043

ELECTRIC POWER PRODUCTION (CMF-52) NONCOMMISSIONED OFFICER (NCO) ADVANCED

Course Number: 7-251-C42.

Location: Engineer School, Ft. Belvoir, VA.

Length: 10 weeks (337 hours).

Exhibit Dates: 4/76–Present.

Objectives: To provide noncommissioned officers with advanced training in utilities and construction.

Instruction: Course emphasizes, conferences, seminars, practical exercises, demonstrations, and case studies relating to military justice and discipline, leadership and management, maintenance management, field engineering, bridging, T/O structures, utilities and engineering construction management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in construction management, 1 in bituminous materials, 1 in electricity (9/79).

AR-1710-0044

MECHANICAL MAINTENANCE WARRANT OFFICER INTERMEDIATE (621A)

Course Number: 4-9-C30-C.

Location: Ordnance School (Phase I), Aberdeen Proving Ground, MD; Engineer School (Phase II), Ft. Belvoir, VA.

Length: 17 weeks (562 hours).

Exhibit Dates: 9/72–Present.

Objectives: To train warrant officer engineer equipment technicians to supervise general support and depot support maintenance.

Instruction: Lectures and practical exercises in the supervision of general support and depot support maintenance and military missions and functions; leadership and managerial studies; information systems; and malfunction diagnosis procedures for heavy construction equipment, electric test equipment, environmental equipment, gas turbine engines, and special electrical and electronic devices.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in mechanical or industrial technology, 2 in automotive or diesel mechanics, and 4 as an elective in business management (4/74); in the upper-division baccalaureate category, 2 semester hours as an elective in business management (4/74).

Related Occupation Codes: 621A.

AR-1710-0045

MECHANICAL MAINTENANCE WARRANT OFFICER INTERMEDIATE (632A)

Course Number: 4-9-C30E.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 19 weeks (583 hours).

Exhibit Dates: 7/72–Present.

Objectives: To train automotive technicians to supervise automotive maintenance personnel at the general support and depot support maintenance levels.

Instruction: Lectures and practical exercises in leadership and management, management information systems, supply management and maintenance management; machine shop, welding, metal body work; hydraulics, electricity and electronics; and wheel and track automotive equipment complete overhaul and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in automotive mechanics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in business management, 4 in mechanical or industrial technology, 2 in automotive mechanics (4/74); in the upper-division baccalaureate category, 2 semester hours in business management (4/74).

Related Occupation Codes: 632A.

AR-1710-0046

ARMAMENT MAINTENANCE (ENTRY)

Course Number: 9-R-420.0; 9-E-75.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 8 weeks (280–304 hours).

Exhibit Dates: 5/56–12/68.

Objectives: To train enlisted personnel to assist in performance of organizational, field, and depot maintenance of small arms and artillery.

Instruction: Lectures and practical exercises in operation of automotive type wrecker (crane); introduction to shop operation; supply and maintenance procedures, including disassembly and assembly of various types of small arms.

Credit Recommendation: In the vocational certificate category, 2 semester hours in mechanical technology (7/74).

AR-1710-0047

Railway Maintenance and Operations Officer

Course Number: *Version 1:* 55-A-F2. *Version 2:* 55-O-14.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 12 weeks (428 hours). *Version 2:* 20 weeks (732–772 hours).

Exhibit Dates: *Version 1:* 8/58–12/68. *Version 2:* 4/54–7/58.

Objectives: To provide personnel with knowledge of maintenance of way and structures; maintenance and repair of equipment; and main line and terminal operations.

Instruction: Lectures and practical exercises to include introduction to the transportation military railroad system; maintenance of way and structure; maintenance and repair of locomotives and rolling stock; main line and terminal operation; and transportation planning.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in railway maintenance and operation (12/68); in the upper-division baccalaureate category, 6 semester hours in railroad maintenance and management (7/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in railway maintenance and operation (12/68); in the upper-division baccalaureate category, 10 semester hours in railroad maintenance and management (7/74).

AR-1710-0048

Ordnance Shop Technician

Course Number: 4L-441A.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 19 weeks (655 hours).

Exhibit Dates: *Version 1:* 1/78–Present. *Version 2:* 3/72–12/77.

Objectives: To train personnel to perform the duties of general mechanical repair shop technicians or repair shop foremen.

Instruction: Conference and practical exercises to include command and staff subjects, management subjects, maintenance and supply management, individual- and crew-served weapons/tactical signal communications, common technical subjects, machine shop operations, canvas repair, recovery and evacuation, welder metal body repair, basic electricity, and hydraulics.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in machinist, 4 in welding (1/178); in the upper-division baccalaureate category, 2 semester hours in management (1/78). *Version 2:* In the vocational certificate category, 3 semester hours in machine tools, 3 in industrial management and technology, 2 in basic electricity, 3 in welding (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in machine tools, 3 in industrial management and technology, 2 in basic electricity, 3 in welding (5/74).

Related Occupation Codes: 441A.

AR-1710-0049

Mechanical Maintenance Noncommissioned Officer (NCO)

Course Number: 510-F1.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 14 weeks (504 hours).

Exhibit Dates: 7/70–Present.

Objectives: To train personnel in the management of maintenance support operations at the company, battalion, and brigade levels.

Instruction: Conferences and practical exercises in military leadership, communication skills, military skills, management practices, organization for combat service support, supply management procedures, stock accounting procedures, maintenance management procedures, tank-automotive material, heavy and special support equipment, armament material, weapons calibration, and transportation management procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in equipment maintenance (5/74).

Related Occupation Codes: 44E; 44Z; 63B; 63C; 63F; 63G; 63H; 57C; 62B; 62C; 63J; 63K; 45B; 45J; 45M; 45K; 45L; 45Z; 41C; 35J; 34G.

AR-1710-0050

Ordnance Service Section Officer

Course Number: 9-B-4813; 9-O-15.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 6 weeks (216 hours).

Exhibit Dates: 11/56–12/68.

Objectives: To train officers in organization and management of an ordnance service section shop.

Instruction: Lectures and practical exercises in welding, machine tools, allied trades, shop organization, and vehicle recovery operations.

Credit Recommendation: In the vocational certificate category, 4 semester hours in manufacturing processes (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in manufacturing processes (5/74).

Related Occupation Codes: 441A.

AR-1710-0051

Carpentry and Masonry Specialist

Course Number: 712-51B10.

Location: Training Center, Ft. Leonard Wood, MO.

Length: 7 weeks (229 hours).

Exhibit Dates: 3/78–Present.

Objectives: To train enlisted personnel to use and maintain hand and power tools, and the fabrication of roof trusses, wood joints, and TO structures.

Instruction: Conferences and practical exercises on the identification, use, and maintenance of hand and power tools, wood frame structures components fasterers, roof trusses, and fabrication of structural elements. The mixing, placing, and finishing of concrete is covered.

Credit Recommendation: In the vocational certificate category, 1 semester hour in introduction to carpentry (9/79).

AR-1710-0052

Tank Turret Repair

Course Number: 643-45K10.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD.

Length: 8 weeks (256 hours).

Exhibit Dates: 7/76–Present.

Objectives: To train enlisted personnel to maintain the mechanical, electrical, electronic and hydraulic components and systems of the armament installed in tank turrets, armored reconaissance vehicles, and cupolas mounted on armored personnel carriers.

Instruction: Lectures and practical exercises in the maintenance of the mechanical, electrical, electronic, and hydraulic components and systems of the armament installed in tank turrets, armored reconaissance vehicles, and cupolas mounted on armored personnel carriers.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the training (1/78).

AR-1710-0053

Quartermaster Equipment Repair

Course Number: 690-63J10.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD.

Length: 10–13 weeks (Aberdeen Proving Ground, MD hours).

Exhibit Dates: 11/76–Present.

Objectives: To train enlisted personnel to install, adjust, and repair light quartermaster machinery and equipment.

Instruction: Lectures and practical exercises in installation and maintenance of single-cylinder engines, electrical motors and control panels, generators, laundry and burner equipment, and clothing and textile equipment. Emphasis is on applied troubleshooting.

Credit Recommendation: in the lower-division baccalaureate/associate degree category, 3 semester hours in mechanical maintenance, 2 in electrical maintenance (1/78).

AR-1710-0054

M48/M60A1 Armor Crewman (BAT)
(M48/M60A1 Armor Crewman)

Course Number: 19E10-0SUT; 010-19E10.

Location: Armor School, Ft. Knox, KY.

Length: 9–13 weeks (397–568 hours).

Exhibit Dates: 12/78–Present.

Objectives: To train enlisted personnel to perform the various basic skills to become an armor crewman.

Instruction: Lectures and practical exercises in armor gunnery, support weapons and the performance of daily preventative maintenance checks and services for tanks.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in heavy equipment repair (2/80).

Related Occupation Codes: 19E.

AR-1710-0055

Tank Driver Basic Armor Training (BAT)

Course Number: 19F10-OSUT.

Location: Armor School, Ft. Knox, KY.

Length: 13 weeks (524 hours).

Exhibit Dates: 12/78–Present.

Objectives: To train enlisted personnel to operate and perform routine maintenance and service for tanks.

Instruction: Lectures and practical exercises in tank operations and driving skills, support weapons and the performance of daily preventative maintenance checks and service for tanks.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in heavy equipment repair (2/80).

Related Occupation Codes: 19F.

AR-1710-0056

Basic Armor Training (BAT)M60A2

Course Number: CMF-19J.
Location: Armor School, Ft. Knox, KY.
Length: 14 weeks (504 hours).
Exhibit Dates: 4/78-Present.

Objectives: To train enlisted personnel to perform the various basic skills to become an armor crewman.

Instruction: Lectures and practical experience in armor gunnery, fire controls, support weapons and the performance of daily preventative maintenance checks and services for tanks.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in heavy equipment repair (2/80).

Related Occupation Codes: 19J.

AR-1710-0057

Armor Officer Basic-Reserve Component

Course Number: 2-17-C25.
Location: Armor School, Ft. Knox, KY.
Length: 4 weeks (174 hours).
Exhibit Dates: 1/76-Present.

Objectives: To qualify newly commissioned reserve officers in basic armor operations.

Instruction: Practical exercises in automotive and vehicle maintenance and operations, platoon tactics, electronic communications and tank weaponry.

Credit Recommendation: Credit is not recommended due to the military-specific nature of the course (2/80).

AR-1710-0058

Field Artillery Weapons Mechanic

Course Number: 041-ASIV6.
Location: Field Artillery School, Ft. Sill, OK.
Length: 5 weeks (177 hours).
Exhibit Dates: 1/79-Present.

Objectives: To qualify enlisted personnel, already qualified in MOS 13B, as field artillery mechanics, with principle emphasis on hydraulic and hydropneumatic systems.

Instruction: Lectures and practical exercises in parts supply procedures and maintenance management, lubrication and inspection records and procedures; inspecting, adjusting and repairing hydraulic and hydropneumatic systems using common tools, micrometers, pressure gauge and service manuals.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in hydraulic systems maintenance and 1 in maintenance management (1/80).

Related Occupation Codes: 13B.

AR-1710-0059

M90A1 (ITV) Missile Tank Turret/Tank Turret Mechanic

Course Number: 643-ASIT7.
Location: Armor School, Ft. Knox, KY.
Length: 2 weeks (80-81 hours).
Exhibit Dates: 1/80-Present.

Objectives: To train for tank turret mechanic and missile tank turret mechanic at entry level.

Instruction: Course provides add-on training to Tank Turret Mechanic or Missile Tank Turret Mechanic.

Credit Recommendation: Pending evaluation.

AR-1712-0001

Armor Intelligence Specialist

Course Number: 250-11D10.
Location: Armor School, Ft. Knox, KY.
Length: 8 weeks (310 hours).
Exhibit Dates: 3/71-Present.

Objectives: To train enlisted personnel to drive and maintain armored vehicles and weapons.

Instruction: Lectures and practical exercises in the driving, maintenance and employment of armored vehicles and weapons, including field repair and maintenance of diesel engines and automatic weapons; marksmanship; combat and reconnaissance techniques; map reading; organization maintenance; and tactical and mechanical training.

Credit Recommendation: In the vocational certificate category, credit in engine mechanics on the basis of institutional evaluation (4/74).

Related Occupation Codes: 11D.

AR-1712-0002

Marine Engineer Skill Development Base

Course Number: 652-61C20-I.
Location: Transportation School, Ft. Eustis, VA.
Length: 15 weeks (589 hours).
Exhibit Dates: 10/68-Present.

Objectives: To train enlisted personnel as technicians and supervisors in the marine engineering field.

Instruction: Lectures and practical exercises in leadership principles; engine construction; internal-combustion engine principles; fuel injection, lubrication, cooling, hydraulic, diesel-cranking, and electrical systems operation and maintenance; electrical principles; refrigeration principles; hand and power tools operation; and onboard practical training.

Credit Recommendation: In the vocational certificate category, 3 semester hours in diesel engines, 3 in automotive electricity (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in diesel engines, 3 in automotive electricity (4/74); in the upper-division baccalaureate category, 3 semester hours in diesel engines (4/74).

Related Occupation Codes: 61A, 61C.

AR-1712-0003

Powerman

Course Number: 622-351.1.
Location: Engineer School, Ft. Belvoir, VA.
Length: 7 weeks (254 hours).
Exhibit Dates: 6/65-12/68.

Objectives: To train enlisted personnel to install, operate, and maintain gasoline and diesel engine portable generating equipment.

Instruction: Lectures and practical exercises in the installation, operation, and maintenance of gasoline and diesel engine portable generating equipment, including fundamental subjects, internal-combustion engine systems, diesel engine maintenance, electrical fundamentals, and conventional generator sets.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electricity, 1 in diesel mechanics (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 1 in diesel mechanics (7/74).

AR-1712-0004

Amphibian Engineer Mechanic

Course Number: 652-61E20.
Location: Transportation School, Ft. Eustis, VA.
Length: 5 weeks (161-168 hours).
Exhibit Dates: 1/67-Present.

Objectives: To train enlisted personnel to maintain the LARC V, LARC XV, and the LARC LX amphibious craft.

Instruction: Lectures and practical exercises in the maintenance of the LARC V, LARC XV, and the LARC LX amphibious craft, including electrical subjects, high-speed diesel engines, amphibian power trains and steering systems, and maintenance and repair procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in diesel mechanics, 2 as an elective in vocational/technical programs (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in diesel mechanics, 2 as an elective in vocational/technical programs (7/74).

Related Occupation Codes: 61E.

AR-1712-0005

Amphibian Engineer Repairman

Course Number: 652-61E30.
Location: Transportation School, Ft. Eustis, VA.
Length: 7 weeks (246 hours).
Exhibit Dates: 4/67-Present.

Objectives: To train enlisted personnel to maintain and repair the LARC V, the LARC XV, and the LARC LX amphibious craft.

Instruction: Lectures and practical exercises in the maintenance and repair of amphibious craft, including the LARC V, LARC XV, and the LARC LX. Course includes the operation, inspection, and troubleshooting of the electrical, fuel, hydraulic, pneumatic, steering, and power trains systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in diesel mechanics, 2 as an elective in vocational/technical programs (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in diesel mechanics, 2 as an elective in vocational/technical programs (7/74).

Related Occupation Codes: 61E.

AR-1712-0006

Engineer Equipment Repair Technician

Course Number: 4L-621A; 612-F2.
Location: Engineer School, Ft. Belvoir, VA.
Length: 11 weeks (376-427 hours).
Exhibit Dates: *Version 1:* 4/79-Present. *Version 2:* 6/66-3/79.

Objectives: To train officers to be engineer equipment and repair technicians.

Instruction: *All Versions:* Conferences and practical exercises in maintenance management, repair parts supply, gasoline engines, diesel engines, equipment components, troubleshooting, organizational maintenance, power generator equipment, precise-power generator repair, gas turbine repair, air conditioning, air compressors and Nike elevators and power packs. *Version 1:* Course does not include Nike elevators and power packs or air conditioning.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in introduction to gasoline engines, 1 in introduction to diesel engines, 1 as an elective in mechanical or industrial programs (9/79); in the lower-division baccalaureate/associate degree category, 1 semester hours in introduction to gasoline engines, 1 in introduction to diesel engines, 1 as an elective in mechanical or industrial programs (9/79); in the upper-division baccalaureate category, 1 semester hour in maintenance management, 1 in supply management (9/79). *Version 2:* In the vocational certificate category, 1 semester hour in introduction to gasoline engines, 1 in introduction to diesel engines, 1 in air conditioning, and 1 as an elective in mechanical or industrial programs (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to gasoline engines, 1 in introduction to diesel engines, 1 in air conditioning, and 1 as an elective in mechanical or industrial programs (6/75); in the upper-division baccalaureate category, 1 semester hour in maintenance management and 1 in supply management (6/75).

Related Occupation Codes: 621A.

AR-1712-0007

Harbor Craft Engineering Officer
(Harbor Craft Engine Operation (Advanced))

Course Number: 8C-0823; 4H-562D; 652-F1; 55-H-0823; 55-OE-23.

Location: Transportation School, Ft. Eustis, VA.

Length: 17-19 weeks (630-713 hours).

Exhibit Dates: 3/54–Present.

Objectives: To train personnel to operate and maintain the engines and auxiliary machinery and equipment on vessels.

Instruction: Lectures and practical exercises in vessel engines and auxiliary machinery, and equipment operation and maintenance, including logistics, engineering, shipfitting and welding, pipefitting, marine electricity, diesel engines, boilers, and leadership training.

Credit Recommendation: In the vocational certificate category, 4 semester hours as an elective in diesel repair, 3 in diesel mechanics (7/74); in the lower-division baccalaureate/associate degree category, 4 semester hours as an elective in diesel repair, 3 in diesel mechanics (7/74).

Related Occupation Codes: 61C; 500A; 561B; 561C; 561D; 561E.

AR-1712-0008

Diesel Engine Repair

Course Number: 5-E-34.

Location: Engineer School, Ft. Belvoir, VA.

Length: 11 weeks (382 hours).

Exhibit Dates: 2/56–12/68.

Objectives: To train enlisted personnel to repair diesel engines used as power units on heavy cranes, shovels, graders, air compressors, and generator sets.

Instruction: Lectures and practical exercises in the repair and safe operation of earth-moving and heavy equipment. Course includes diesel theory and repair, electrical devices, and units of instruction on specific engines.

Credit Recommendation: In the vocational certificate category, 8 semester hours as an elective in diesel engine laboratory or heavy equipment (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours as an elective in diesel engine laboratory or heavy equipment (7/74); in the upper-division baccalaureate category, 5 semester hours as an elective in diesel engine laboratory or heavy equipment (7/74).

AR-1712-0009

Amphibian Engineer Skill
Development Base

Course Number: 652-61E20-I.

Location: Transportation School, Ft. Eustis, VA.

Length: 14 weeks (571 hours).

Exhibit Dates: 10/68–Present.

Objectives: To train amphibian engineers to perform as technicians and supervisors.

Instruction: Lectures and practical exercises in amphibian engineering and supervisory techniques, including leadership, welding, general subjects, electrical subjects, fuel systems, high-speed diesel engines, hydraulic systems, amphibian power trains, and pneumatic systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in welding laboratory, 2 in diesel engine laboratory (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in welding laboratory, 2 in diesel engine laboratory (7/74).

Related Occupation Codes: 61E.

AR-1712-0010

Marine Engineering and Repair
Supervision

Course Number: 55-E-29.

Location: Transportation School, Ft. Eustis, VA.

Length: 12 weeks (433 hours).

Exhibit Dates: 8/55–12/68.

Objectives: To train enlisted personnel to supervise engineroom activities on harborcraft, and to maintain and repair marine engines and auxiliaries.

Instruction: Lectures and practical exercises in supervision of engineroom activities on harborcraft and in maintenance and repair of marine engines and auxiliaries, including basic equipment fundamentals, electricity, pipe design and theory, machine tool operation, refrigeration, fuel injection review, two- and four-stroke propulsion engines, two-stroke auxiliary engines, and diesel fundamentals.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electricity, 2 in machine shop, 3 in introduction to diesel engines, and 1 in introduction to refrigeration (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity, 2 in machine shop, 2 in introduction to diesel engines, and 1 in introduction to refrigeration (7/74).

AR-1712-0011

Diesel-Electric Locomotive Repair

Course Number: 55-E-8.

Location: Transportation School, Ft. Eustis, VA.

Length: 10 weeks (440 hours).

Exhibit Dates: 8/55–12/68.

Objectives: To train enlisted personnel as diesel-electric locomotive repairmen.

Instruction: Lectures and practical exercises in inspection, maintenance, overhaul, and repair of non-electric sections of diesel-electric locomotives and their component parts and assemblies, including general basic technical subjects; diesel engines assemblies; basic blueprint reading and machine sketching; diesel operating principles; hand and power tools; diesel-electric locomotive terms; diesel engine governors; and nomenclature and location of electrical equipment.

Credit Recommendation: In the vocational certificate category, 7 semester hours in diesel technology (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in diesel technology (7/74).

AR-1712-0012

Marine Engineer Repair

Course Number: 652-61C30.

Location: Transportation School, Ft. Eustis, VA.

Length: 10 weeks (355 hours).

Exhibit Dates: 3/71–Present.

Objectives: To train marine engineers to operate, maintain, and repair propulsion systems, auxiliary equipment, machinery, and sustaining equipment on marine vessels.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of propulsion systems, auxiliary equipment, machinery, and sustaining equipment on marine vessels, including mathematics, diesels, gasoline engines, centrifuges and governors, measuring instruments, machine shop procedures and equipment, AC and DC motors and generators, electrical calculations and meters, electronics equipment, oxyacetyleve welding and blacksmithing, refrigeration systems, fuel injection equipment, and installation, operation, maintenance, troubleshooting of diesel engines.

Credit Recommendation: In the vocational certificate category, 2 semester hours as an elective in power technology, 2 in diesel power (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in power technology, 2 in diesel power (7/74); in the upper-division baccalaureate category, 2 semester hours as an elective in power technology (7/74).

Related Occupation Codes: 61C.

AR-1712-0013

1. Power Generation Equipment Repairer PTC
(Power Generation Equipment Repairman)
2. Gas Turbine Generator Repair

Course Number: *All Versions:* 662-52D20. *Version 2:* 662-351.3.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 11-17 weeks (356-539 hours). *Version 2:* 12-13 weeks (442-480 hours).

Exhibit Dates: *Version 1:* 12/72–Present. *Version 2:* 6/65–11/72.

Objectives: To train enlisted personnel to maintain and repair electric control circuitry, electric motors and generators, gas turbine engines, and gasoline and diesel engines.

Instruction: Lectures and practical exercises in the maintenance and repair of electric control circuitry, electric motors and generators, gas turbine engines, and gasoline and diesel engines. Course includes general support maintenance procedures for the following types of generator sets: gasoline engine, tactical precise diesel engine, tactical turbine engine, turbine driven multioutput units, and electrical forklift trucks.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electrical maintenance, 2 in diesel mechanics, 2 in auto mechanics (9/79); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical maintenance, 2 in diesel mechanics, 2 in auto mechanics (9/79). *Version 2:* In the vocational certificate category, 2 semester hours in electrical maintenance, 2 in auto mechanics, 2 in generator repair (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical maintenance, 2 in auto mechanics, 2 in generator repair (8/74).

Related Occupation Codes: 52B, 52D.

AR-1713-0001

Decca Charting and Reproduction

Course Number: 411-F1.

Location: Engineer School, Ft. Belvoir, VA.

Length: 6 weeks (227 hours).

Exhibit Dates: 3/67–Present.

Objectives: To provide enlisted personnel with basic training in Decca hyperbolic navigation charting.

Instruction: Lectures in Decca hyperbolic navigation theory and system, flight log chart production, and chart assembly and reproduction; and exercises in navigational charting techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in radio navigation, 6 in cartography (2/74).

Related Occupation Codes: 81C, 81D.

AR-1713-0002

Antiaircraft Artillery (AAA) Operations and Intelligence Noncommissioned Officer (NCO)

Course Number: 44-E-2.

Location: Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: 14 weeks (507 hours).

Exhibit Dates: 11/56–12/68.

Objectives: To train AAA operations and intelligence specialists to assist operations officers in the establishment of fire control orientation data.

Instruction: Lectures and practical exercises in AAA operations and intelligence, including mathematics, engineering drawing, survey and orientation, map and aerial photograph reading, gunnery, tactics, communications, instructor training, training management, astronomical computations, azimuth determination, AAA service practice recording and analysis, and plane surveying.

Credit Recommendation: In the vocational certificate category, 5 semester hours in plane surveying and engineering drawing (5/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in plane surveying and engineering drawing (5/74).

AR-1713-0003

General Drafting

Course Number: 5-E-3.

Location: Engineer School, Ft. Belvoir, VA.

Length: 9 weeks (330–360 hours).

Exhibit Dates: 1/54–12/68.

Objectives: To train enlisted personnel to assist in cartographic model making and related art and drafting activities.

Instruction: Lectures and practical exercises in basic drafting, mathematics review, military drafting techniques, projected drawings, blueprint reading, and graphs and charts.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic drafting (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic drafting (5/74); in the upper-division baccalaureate category, 4 semester hours in engineering drawing (12/68).

AR-1713-0004

Map Compiling (for Army Personnel)

Course Number: 411-81D20; 5-R-812.1; 5-E-1.

Location: Engineer School, Ft. Belvoir, VA.

Length: 10 weeks (366–400 hours).

Exhibit Dates: 7/53–9/70.

Objectives: To train enlisted personnel to compile and revise planimeter, topographic and photographics maps, using drafting instruments and plotting devices.

Instruction: Lectures and practical exercises in map compiling, including compilation base preparation, radial triangulation, aerial photography planning and mosaics, color separation, situation overlays, and terrain analysis maps.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in map compilation (5/74); in the upper-division baccalaureate category, 4 semester hours in mapping and drafting (12/68).

Related Occupation Codes: 81D.

AR-1713-0005

Map Compiling (for Air Force Personnel)

Course Number: 411-81D20.

Location: Engineer School, Ft. Belvoir, VA.

Length: 11–13 weeks (402–492 hours).

Exhibit Dates: 12/67–9/70.

Objectives: To train enlisted personnel to compile and revise planimeter, topographic, and phtotographic maps, using drafting instruments and plotting devices.

Instruction: Lectures and practical exercises in map compilation, including compilation base preparation, radial triangulation, aerial photography planning and mosaics, color separation, situation overlays, and terrain analysis maps.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in map compilation (5/74); in the upper-division baccalaureate category, 4 semester hours in mapping and drafting (12/68).

AR-1713-0006

Cartographic Drafting

Course Number: 411-81C20; 411-813.1; 5-E-4.

Location: Engineer School, Ft. Belvoir, VA.

Length: 9–11 weeks (321–440 hours).

Exhibit Dates: 7/53–4/72.

Objectives: To train enlisted personnel to be cartographic drafters.

Instruction: Lectures and practical exercises in cartographic drafting, including color separation drafting techniques, map preparation with drafting equipment and scribing instruments, map revision, aerial photomosaic preparation, situation overlays, compilation base preparation, and radial triangulation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in mapping and drafting (5/74); in the upper-division baccalaureate category, 4 semester hours in mapping and drafting (12/68).

Related Occupation Codes: 81C.

AR-1713-0007

Construction Drafting

Course Number: 413-81B20; 5-R-811.1; 5-E-50.

Location: Ft. Belvoir, VA, 4-440 0.

Length: 10–11 weeks (374-440 hours).

Exhibit Dates: 3/54–2/71.

Objectives: To train enlisted personnel to prepare working drawings for bridges, airfields, roads, railroads, and piers.

Instruction: Lectures and practical exercises in basic drafting; mathematics review; materials and methods of construction; construction drawings; estimates and bills of material; plumbing, heating, and wiring layouts; perspective drawings; and roads, railroads, and airfields drawing and calculations for survey notes.

Credit Recommendation: In the vocational certificate category, 10 semester hours in architectural drafting (7/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in architectural drafting (7/74); in the upper-division baccalaureate category, 4 semester hours in engineering drafting (12/68).

AR-1713-0008

Field Artillery Fire Support Specialist

Course Number: 250-13F10.

Location: Field Artillery School, Ft. Sill, OK.

Length: 5–12 weeks (165–497 hours).

Exhibit Dates: 3/78–8/79.

Objectives: To qualify enlisted personnel to become a member of a fire support team.

Instruction: Lectures and practical exercises in map reading, land navigation, resection, polar plotting grid coordinates and use of metric measurement; installation, operation and maintenance of radio transmitters and receivers; requesting fires and the subsequent adjustment of artillery fires, either day or night, using maps, compass, formulas, and radio telephone. NOTE: Thirteen week course includes 8 weeks basic training.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading (1/80).

AR-1714-0001

Tactical Circuit Controller

Course Number: *Version 1:* 202-31N10; 202-31N10-CELT. *Version 2:* 202-31N20.

Location: Southeastern Signal School, Ft. Gordon, GA; Signal School, Ft. Gordon, GA.

Length: *Version 1:* 10–15 weeks (373–610 hours). *Version 2:* 11 weeks (384–391 hours). *Version 3:* 5 weeks (180 hours).

Exhibit Dates: *Version 1:* 6/79–Present. *Version 2:* 8/73–5/79. *Version 3:* 10/66–7/73.

Objectives: To train enlisted personnel to operate tactical patching panels.

Instruction: *All Versions:* Practical exercises in installation, operation, and operator maintenance of communications patching panels. *Version 1:* All basic introductory electronic topics have been deleted from this version.

Credit Recommendation: *Version 1:* Credit is not recommended because of the military-specific nature of the course (8/79) *Version 2:* In the vocational certificate category, 4 semester hours in electrical laboratory, and additional credit on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 2 semester hours in electrical laboratory, and additional credit on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 31N.

AR-1714-0002

Surface-to-Air Missile Mechanical Materiel Maintenance (Nike Ajax)

Course Number: ~~44~~-R-221.2.

Location: Air Defense School, Ft. Bliss, TX.

Length: 8 weeks (278 hours).

Exhibit Dates: 4/57–12/68.

Objectives: To train enlisted personnel to assemble, install, maintain, and adjust Nike Ajax mechanical and hydraulic on-missile guidance control systems and associated equipment.

Instruction: Lectures and practical exercises in assembly and maintenance of surface-to-air missiles, including basic electricity, missile mechanics, mechanical materiel of assembly and launching areas, and missile preparation and depreparation.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

AR-1714-0003

Missile Monitor Operations Central and Terminal Equipment Repair

Course Number: 11-N-298.2.

Location: Signal Fire Distribution Systems Training Activity, Ft. Bliss, TX.

Length: 18 weeks (660 hours).

Exhibit Dates: 6/61–12/68.

Objectives: To train warrant officers and enlisted personnel with electronics backgrounds to perform field and organizational maintenance on missile monitor operations central and coder-decoder subsystems.

Instruction: Lectures and laboratories in coordinate data, digital fundamentals, power supplies, coder-decoder groups, detailed circuit analysis of operations central, ground-to-slant converters, and troubleshooting and repair techniques.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1714-0004

Infantry Communication Supervision

Course Number: 7-R-311.7; 7-E-2.

Location: Infantry School, Ft. Benning, GA.

Length: 11–13 weeks (440–545 hours).

Exhibit Dates: 1/55–12/68.

Objectives: To train personnel to supervise the maintenance of signal communications equipment.

Instruction: Lectures and practical exercises in job-oriented communication fundamentals, including message center operation and cryptography, radio receiver operation, radio sets and allied equipment, wire communication, tactical application of communications, map and aerial photograph reading, and wire-laying techniques and pole climbing.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electricity (3/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1714-0005

Antiaircraft Artillery Remote Control Repair

Course Number: 9-R-301.2.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 9 weeks (315 hours).

Exhibit Dates: 1/57–12/68.

Objectives: To train antiaircraft artillery remote control repairmen to inspect, test, and maintain light and heavy nonintegrated antiaircraft remote control equipment.

Instruction: Lectures and practical exercises in the maintenance of light and heavy nonintegrated antiaircraft remote control equipment, including sighting devices, electrical-mechanical drive controllers, oil gears, indicator systems, power control, motor drives, testing, and field maintenance procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electromechanical repair (3/74); in the upper-division baccalaureate category, credit in electricity on the basis of institutional evaluation (3/74).

AR-1714-0006

Locomotive Electrician

(Diesel-Electric Locomotive Electrician)

Course Number: 55-R-653.1; 55-E-37.

Location: Transportation School, Ft. Eustis, VA.

Length: 10 weeks (350 hours).

Exhibit Dates: 8/55–12/68.

Objectives: To train enlisted personnel to inspect, repair, and maintain electrical equipment and accessories of diesel-electric locomotives.

Instruction: Lectures and practical exercises in the inspection, repair, and maintenance of electrical equipment and accessories of diesel-electric locomotives, including elementary electricity and electrical equipment, tracing of electrical wiring diagrams, generators and traction motors, control equipment, auxiliary electrical equipment operation, batteries, and troubleshooting and test procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity, 1 in electrical laboratory (4/74).

AR-1714-0007

Power Equipment Maintenance

Course Number: 11-E-8.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 10 weeks (356 hours).

Exhibit Dates: 12/55–12/68.

Objectives: To train enlisted personnel to install, operate, and maintain portable gasoline and diesel electrical power-generation equipment.

Instruction: Lectures and practical exercises in installation, operation, and maintenance of portable gasoline and diesel electrical power-generation equipment, including introduction to communications, electrical fundamentals, gasoline power units, diesel engine components and operation, generating components, and power unit installation procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical technology, 3 in automotive technology, and 2 in diesel technology (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical technology, 3 in automotive technology, and 2 in diesel technology (4/74).

AR-1714-0008

Marine Engineering Officer Advanced

Course Number: 4H-562C.

Location: Transportation School, Ft. Eustis, VA.

Length: 14 weeks (477 hours).

Exhibit Dates: 1/72–8/76.

Objectives: To train engineering officers to perform as marine engineering officers for medium-sized vessels.

Instruction: Lectures and practical exercises in marine engineering for medium-sized vessels, including logistics, management, military correspondence, vessel design, hull repair, general engineering principles, diesel engine fundamentals, basic electricity, and refrigeration and air conditioning systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in basic electricity, 1 in introduction to diesel engines, and credit in an industrial, mechanical, or marine technology elective on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity, 1 in introduction to diesel engines, and credit in an industrial, mechanical, or marine technology elective on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in basic electricity and an industrial, mechanical, or marine technology elective on the basis of institutional evaluation (4/74).

AR-1714-0009

Antennaman Noncommissioned Officer (NCO) Basic

Course Number: 621-36D40-EC.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 15 weeks (332 hours).

Exhibit Dates: 5/71–Present.

Objectives: To train noncommissioned officers as antennamen.

Instruction: Lectures and practical exercises in the duties and responsibilities of a noncommissioned officer antennaman, including command leadership subjects, maintenance, signal communications, personnel management, military leadership, civil affairs and disturbances, command tactics, CBR operations weapons, Army aviation, special warfare, active and passive air defense measures, and surveying and installation of antennas.

Credit Recommendation: In the vocational certificate category, 2 semester hours in civil technology (communications) (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in civil technology (communications) (5/74); in the upper-division baccalaureate category, 3 semester hours in civil technology (communications) (5/74).

Related Occupation Codes: 36D.

AR-1714-0010

Lineman Skill Development Base

Course Number: 621-36C40-I.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 12 weeks (479 hours).

Exhibit Dates: 12/68–Present.

Objectives: To train enlisted personnel to qualify as linemen supervisors.

Instruction: Lectures and practical exercises in the responsibilities of a lineman, including leadership training, small-unit tactics, tactical field exercises, general military subjects, organization and employment of signal units, signal systems planning and control, team chief training, counterintelligence, security during movement, defense of signal installations, fundamentals of defensive combat, and communications control.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/74).

Related Occupation Codes: 36C.

AR-1714-0011

Lineman Noncommissioned Officer (NCO) Basic

Course Number: 621 36C40-EC.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 13 weeks (500 hours).

Exhibit Dates: 5/71–Present.

Objectives: To train personnel to supervise linemen.

Instruction: Lectures and practical exercises in the duties of a noncommissioned officer and lineman, including command leadership subjects, command tactics, procurement of outside-plant materials and equipment, military justice, unit readiness, field engineering, mine warfare, special warfare, selection of materials and equipment, construction team supervision, outside-plant inspection, emergency medical treatment, and signal communications.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/74).

Related Occupation Codes: 36C; 31Z.

AR-1714-0012

Field Wireman Noncommissioned Officer (NCO) Basic

Course Number: 621-36K40-EC.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 13 weeks (500 hours).

Exhibit Dates: 5/71–Present.

Objectives: To qualify enlisted personnel as noncommissioned officers in field wiring.

Instruction: Lectures and practical exercises in the basic duties of NCO field wiremen. Topics include command leadership, command tactics, emergency medical treatment, procurement of field wire and field cable, wire team supervision, field wire and cable system inspections, and other general military subject matter.

Credit Recommendation: Credit is not recommended because of the military speecific nature of the course (5/74).

Related Occupation Codes: 36K; 31G; 36C.

AR-1714-0013

Associate Surface-to-Surface Missile (SSM) Battery Officer

Course Number: 44-O-2C.

Location: Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: 15 weeks (600 hours).

Exhibit Dates: 3/55–12/68.

Objectives: To train officers in the responsibilities of battery-grade surface-to-surface artillery officers.

Instruction: Lectures and practical exercises in the duties and responsibilities of surface-to-surface artillery officers. Course includes basic electronics, motors and generators, communications, guidance, and firing.

Credit Recommendation: In the vocational certificate category, 4 semester hours in basic electricity (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity (12/68).

AR-1714-0014

1. Corporal Ground Handling Equipment Repair
2. Corporal Mechanical Systems Repair

(SSM Mechanical Repair)

Course Number: *Version 1:* 9-R-437;1 9-R-F22. *Version 2:* 9-R-432;1 9-E-66.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 9–10 weeks (319–364 hours). *Version 2:* 7–14 weeks (266-519 hours).

Exhibit Dates: *Version 1:* 7/59–12/68. *Version 2:* 5/55–6/59.

Objectives: To train enlisted personnel to perform as Corporal ground handling equipment repairmen or Corporal mechanical systems repairmen.

Instruction: *Version 1:* Lectures and practical exercises in inspection, testing, field maintenance, and repair of Corporal ground handling, launching, servicing and associated test equipment, including ground handling equipment basics, basic pneumatics and air servicing truck, firing station and air compressor, function and operation of servicing platform, basic electricity, erector power set, drive wheel assembly and controller, and erector AC motors, speed decreasers, and control components. *Version 2:* Lectures and practical exercises in inspection, testing, field repair and maintenance of Corporal missile mechanical and propulsion systems; procedures for fueling, defueling, and decontaminating the missile; and operation, field repair, and maintenance of ordnance items of Corporal ground handling equipment, including main air regulation system testing, propellant systems and components testing, propellant valve assembly, missile draining procedures, propellant trucks, and servicing platforms.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (6/74). *Version 2:* Credit is not recommended because of the limited specialized nature of the course (6/74).

AR-1714-0015

1. Wire System Installer/Operator
2. Telephone Installer and Lineman
3. Lineman

Course Number: *Version 1:* 621-36C10-OSUT. *Version 2:* 621-36C20. *Version 3:* 621-36C20; 11-R-321·1 11-E-26.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Signal School, Ft. Gordon, GA. *Version 3:* Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 12 weeks (496 hours). *Version 2:* 9 weeks (315 hours). *Version 3:* 7–8 weeks (244–280 hours).

Exhibit Dates: *Version 1:* 10/78–Present. *Version 2:* 8/74–9/78. *Version 3:* 12/55–7/74.

Objectives: To train selected enlisted personnel to construct, recover, and maintain outside plants consisting of open wire, aerial cable, field wire, and field cable systems, and to install telephones, unattended repeaters, and field switchboards.

Instruction: Lectures and practical exercises in construction, maintenance, and recovery of outside plants consisting of open wire, aerial cable, field wire, and field cable systems, and in installation of telephones, unattended repeaters, and field switchboards. Course includes fixed-cable construction; fixed-telephone installation; field cable transmission lines; and field training exercises. Version 1 eliminates unattended repeaters from the curriculum.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in telephone lineman/installer (8/79). *Version 2:* In the vocational certificate category, 2 semester hours in electrical apprenticeship laboratory (6/75). *Version 3:* In the vocational certificate category, 4 semester hours as an elective in electrical and lineman techniques (8/74).

Related Occupation Codes: 36C.

AR-1714-0016

Cable Splicing

Course Number: 11-R-322.1; 11-E-1.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 14–15 weeks (508–546 hours).

Exhibit Dates: 12/55–12/68.

Objectives: To train enlisted personnel to splice, install, and maintain various types of communications cables used in the military.

Instruction: Lectures and practical exercises in cable splicing, including introduction to communications, basic cable splicing, cable installation, exchange and toll cable installation, and locating and clearing cable faults.

Credit Recommendation: In the vocational certificate category, 4 semester hours as an elective in electrical and cable techniques (8/74).

AR-1714-0017

Electrician

Course Number: 721-51R10.

Location: Training Center, Ft. Leonard Wood, MO.

Length: 8 weeks (278 hours).

Exhibit Dates: 3/78–Present.

Objectives: To provide enlisted personnel with skills required for installing and testing basic low-voltage electrical circuits.

Instruction: Lectures and practical experience in reading construction drawing, basic carpentry and plumbing, simple single-phase, low-voltage, interior electrical wiring, and distribution pole climbing and maintenance.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electricity (9/79).

AR-1714-0018

Wire Systems Installer/Operator by Correspondence

Course Number: J09.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 208 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the practical knowledge necessary to install, maintain, and recover field cable systems, and to install, operate and maintain tactical switchboards and telephone central offices.

Instruction: Course is designed to teach practical knowledge needed to install, maintain and operate field cable systems, switchboards, and telephone sub-systems.

Credit Recommendation: Credit is not recommended due to the limited technical nature of the course (6/79).

Related Occupation Codes: 36C.

AR-1714-0019

CABLE SPLICER BY CORRESPONDENCE

Course Number: J42.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 52 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To teach personnel to prepare, test, and join insulated conductors and to provide basic knowledge in electricity and in the operation of multimeter in multiplex-conductor cables.

Instruction: To provide instruction in basic electricity and the uses of multimeter in testing and joining of insulated conductor cables.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity (6/79).

Related Occupation Codes: 36E.

AR-1714-0020

TACTICAL CIRCUIT CONTROLLER BY CORRESPONDENCE

Course Number: J04.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge necessary to make signal and power connections for the operation of a patch panel facility.

Instruction: Course gives instruction in the operation of a patch panel facility. Provides the knowledge necessary to make signal and power connections, tests, monitors and re-route circuits. Provides instruction in the maintenance of records and preparation of various reports necessary to coordinate patching operations with operating personnel.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (6/79).

AR-1714-0021

ANTENNA INSTALLER SPECIALIST BY CORRESPONDENCE

Course Number: J40.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge necessary to perform basic procedures and techniques involved in the installation and maintenance of pole and steel tower antennas.

Instruction: Course provides instruction in basic mathematics and the basic theory of electricity. Information necessary to understand radio wave propagation and the testing of wire lines using the wheatstone bridge is provided.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and electricity and use of test equipment (9/79). Credit recommended is based on proctored end-of-course examination.

Related Occupation Codes: 36D.

AR-1714-0022

BASIC ELECTRICITY BY CORRESPONDENCE

Course Number: I66.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 52 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the individual with a thorough understanding of AC and DC fundamentals.

Instruction: Course provides instruction in basic mathematics, algebra and mathematical functions and vectors. Electrical AC and DC fundamentals as well as magnetism and electromagnetism are covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity (9/79). Credit recommended is based on completion of proctored end-of-course examination.

AR-1715-0001

ELECTRONIC INSTRUMENT REPAIR

Course Number: 198-35B20.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Southeastern Signal School, Ft. Gordon, GA.

Length: 23–27 weeks (849–1005 hours).

Exhibit Dates: *Version 1:* 12/77–Present. *Version 2:* 3/67–11/77.

Objectives: To train enlisted personnel to maintain and repair electronic test equipment.

Instruction: *Version 1:* Extended course covering the testing, maintenance and repair of specific models of test equipment including multimeters, signal generators, oscilloscopes and wattmeters. Includes analysis of actual circuits, alignment and calibration procedures, troubleshooting and repair, with extensive practical work. *Version 2:* Extended course covering the testing, maintenance, and repair of specific models of test equipment, including meters, test oscillators, oscilloscopes, frequency counters, heterodyne frequency meters, tube testers, radiac instruments and special-purpose test sets. Includes analysis of actual circuits, alignment and calibration procedures, troubleshooting and repair, with extensive practical work.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in soldering and printed circuit board repair and 8 in instrumentation repair (8/79); in the lower-division baccalaureate/associate degree category, 6 semester hours in instrumentation repair (8/79). *Version 2:* In the vocational certificate category, 6 semester hours in electronics (11/73); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (11/73); in the upper-division baccalaureate category, credit in electronic instrument repair on the basis of demonstrated skills and/or instructional evaluations (12/68). *Version 3:* In the vocational certificate category, 6 semester hours in electronics (11/73); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (11/73); in the upper-division baccalaureate category, credit in electronic instrument repair on the basis of demonstrated skills and/or institutional evaluations (12/68).

Related Occupation Codes: 35B.

AR-1715-0002

AIR DEFENSE ELECTRONIC WARFARE (NIKE-HERCULES)

Course Number: 2G-F3; 104-F6.

Location: Air Defense School, Ft. Bliss, TX.

Length: 3 weeks (112 hours).

Exhibit Dates: 10/72–Present.

Objectives: To provide commissioned and warrant officers and selected enlisted personnel with a general knowledge of electronic countermeasures (ECM), use of Nike-Hercules Air Defense radars and ancillary equipment in an ECM environment, and electronic warfare training devices and techniques.

Instruction: Electronic warfare analysis; history of EW and EW targets; electronic warfare activities; ESM/ELSEC/COMSEC; Air Force operations in a hostile environment; frequency surveillance station orientation; electronic countermeasures (ECM); radar detection problem; electronic counter-countermeasures (ECCM) general; low power radar (Lopar) in EW; Operation Apache.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/73).

Related Occupation Codes: 16C20; 16C; 24P; 24Q; 221B; 221C; 222B; 251B.

AR-1715-0003

ELECTRONIC WARFARE (EW) ANALYST (NONCOMMUNICATIONS ECM)

(Electronic Warfare Analyst)

Course Number: 233-98J30.

Location: Security Agency School, Ft. Devens, MA.

Length: 13 weeks (448 hours).

Exhibit Dates: 1/66–Present.

Objectives: To provide selected enlisted personnel with a working knowledge of noncommunications equipment, U.S. and foreign noncommunications signal characteristics, plotting of electronic order of battle, and preparation and submission of required reports.

Instruction: Data processing; touch typing; mathematics; statistics; electronic equipment (amplifiers, oscillators, oscilloscopes, counters, filters, frequency analyzers); PRF determination; oscilloscope cameras; film processing; recording oscillographs and accessories; methods of scan measurement; beam width measurements; reporting; ECM employment, collection operations.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics, 2 in mathematics, 1 in touch typing (11/73); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics, 1 in mathematics (11/73).

Related Occupation Codes: 98J.

AR-1715-0004

ELECTRONIC INSTRUMENT MAINTENANCE

(Electronic Instrument Repair)

Course Number: 198-35B30.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 17 weeks (621–632 hours).

Exhibit Dates: *Version 1:* 12/77–Present. *Version 2:* 12/67–11/77.

Objectives: To train enlisted personnel to test, troubleshoot, maintain, repair, adjust, calibrate, and final test advanced types of electronic test equipment.

Instruction: Analysis of the circuits and principles of operation of the following equipment: electronic voltmeters, signal generators, panoramic indicators, missile system test equipment, digital readout counter, radar test set, oscilloscopes, telegraph test set, and other electronic test equipment. Emphasis on alignment and calibration procedures, troubleshooting and repair, with extensive practical work. Version 1 does not include panoramic indicators or missile system test equipment but does include digital voltmeters.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in instrument repair (8/79); in the lower-division baccalaureate/associate degree category, 6 semester hours in instrument repair (8/89). *Version 2:* In the vocational certificate category, 4 semester hours in electronics (11/73); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (11/73); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (11/73).

Related Occupation Codes: 35B.

AR-1715-0005

Electronic Countermeasures Operations

Course Number: 233-F2.

Location: Security Agency School, Ft. Devens, MA.

Length: 3-5 weeks (108-135 hours).

Exhibit Dates: 7/68-Present.

Objectives: To train personnel to operate electronic countermeasures (ECM) equipment.

Instruction: History of electronic warfare; electronic countermeasures; electronic warfare support measures; electronic counter-countermeasures; electronic warfare; review of basic radio receiver theory; review of basic radio transmitter theory; technical and tactical employment of ECM equipment; ECM techniques; power units for ECM equipment; countermeasures set; second countermeasures set; third countermeasures set.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (9/77).

AR-1715-0006

Electronic Mixer HLC-1A/TSEC

Course Number: 160-F4.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: 3 weeks (108 hours).

Exhibit Dates: 5/71-Present.

Objectives: To provide enlisted personnel with a working knowledge of the techniques required to maintain and repair electronic mixer HLC-1A/TSEC.

Instruction: Equipment orientation; introduction and general description of AN/FGA-21; operational procedures; power supply; basic logic circuits; basic timing circuits; control circuits; character and group counters; data processing circuits; teletypewriter control circuits; installation procedures; troubleshooting procedures; equipment serviceability profile; preventive maintenance; TEMPEST; COMSEC emergency procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (11/73).

Related Occupation Codes: 31G; 31S; 31U.

AR-1715-0007

1. Electronic Warfare Equipment Repairman
2. Electronic Warfare Equipment Repair

Course Number: *Version 1:* 102-26K20. *Version 2:* 11-R-283.1.

Location: *Version 1:* Electronic Warfare School, Ft. Huachuca, AZ; Electronic Warfare School, Ft. Devens, MA. *Version 2:* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 38 weeks (1698 hours). *Version 2:* 33 weeks (1180 hours).

Exhibit Dates. *Version 1:* 6/71-Present. *Version 2:* 6/61-12/68.

Objectives: To train enlisted personnel having little or no prior electronics experience to inspect, test, and repair electronic warfare equipment.

Instruction: Electrical fundamentals; AC and DC circuits; electrical components; RLC circuits; vacuum tubes; special-purpose tubes; amplifiers and oscillators; semiconductor diodes and transistors; linear integrated circuits; single-sideband receivers and transmitters; digital circuits and systems; analog/digital conversion; microwave transmitters and receivers; electronic and mechanical components of radars; electronic warfare and countermeasures fundamentals.

Credit Recommendation: *Version 1:* In the vocational certificate category, 36 semester hours in electronics or full semester-hour equivalent to complete certificate program in electronics (11/73); in the lower-division baccalaureate/associate degree category, 18 semester hours in electronics (11/73); in the upper-division baccalaureate category, 4 semester hours as an elective in radio and electronics, and credit in electrical laboratory on the basis of institutional evaluation (11/73). *Version 2:* In the vocational certificate category, 36 semester hours in electronics or full semester-hour equivalent to complete certificate program in electronics (11/73); in the lower-division baccalaureate/associate degree category, 18 semester hours in electronics (11/73); in the upper-division baccalaureate category, 3 semester hours as an elective in radio and electronics, and credit in electrical laboratory on the basis of institutional evaluation (11/73).

Related Occupation Codes: 26K.

AR-1715-0008

1. Tactical Electronic Maintenance Chief
   (Supervisory Field Communications Equipment Maintenance)
2. Supervisory Field Communications Equipment Maintenance

Course Number: *Version 1:* 101-31W40; 101-31E40; 101-31L40; 160-31J40. *Version 2:* 101-294;6 101-296;6 160-341.6.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 20 weeks (868 hours). *Version 2:* 26 weeks (1144 hours).

Exhibit Dates: *Version 1:* 4/67-Present. *Version 2:* 11/65-3/67.

Objectives: To train enlisted personnel to apply advanced maintenance techniques and to supervise activities involved in the maintenance of field communications equipment.

Instruction: Advanced electronics; basic and advanced teletypewriter maintenance techniques; basic and advanced radio relay and carrier maintenance techniques; basic and advanced radio maintenance techniques; system trouble location; supervisory and training techniques; maintenance management; maintenance and supply procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in electronics (11/73); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in shop management (11/73). *Version 2:* In the vocational certificate category, 5 semester hours in electronics (11/73); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in shop management, 2 in electronics, and credit in electrical laboratory on the basis of demonstrated skills and/or institutional evaluation (11/73).

Related Occupation Codes: 31W.

AR-1715-0009

Air Defense Electronic Warfare

Course Number: 2G-F3.

Location: Air Defense School, Ft. Bliss, TX.

Length: 3 weeks (104 hours).

Exhibit Dates: 8/66-9/72.

Objectives: To provide commissioned officers and warrant officers with a general knowledge of electronic countermeasures, use of air defense radars in an ECM environment, and electronic warfare training devices and techniques.

Instruction: Electronic warfare, intelligence, security, and countermeasures; radar detection; AN/MPQ-T1 simulator.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/73).

Related Occupation Codes: 222B; 251B.

AR-1715-0010

Senior Special Electrical/Electronic Device Repair

Course Number: 198-35E30.

Location: Engineer School, Ft. Belvoir, VA.

Length: *Version 1:* 14 weeks (571 hours). *Version 2:* 10 weeks (319 hours). *Version 3:* 9 weeks (319 hours).

Exhibit Dates: *Version 1:* 3/78-Present. *Version 2:* 1/74-2/78. *Version 3:* 2/66-12/73.

Objectives: To train enlisted personnel in organizational and general support maintenance on electronic distance-measuring and orientation equipment and in general support maintenance on night vision equipment.

Instruction: *Version 1:* Course includes operation, maintenance, and adjustment of night vision, mine detection, battlefield illumination, electronic distance measuring and azimuth orientation equipment. *Version 3:* Operation, maintenance, and adjustment of night vision equipment; advanced electronic instrumentation; electronic distance-measuring equipment; electronic azimuth orientation equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronics (9/79); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronics (9/79); in the upper-division baccalaureate category, 1 semester hour in electronics (9/79). *Version 2:* In the vocational certificate category, 6 semester hours in electronics (9/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics (9/79); in the upper-division baccalaureate category, 1 semester hour in electronics (9/79).

Version 3: In the vocational certificate category, 6 semester hours in electronics (11/73); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics (11/73); in the upper-division baccalaureate category, 1 semester hour in electronics (11/73).

Related Occupation Codes: 32E.

AR-1715-0011

ENLISTED AIR DEFENSE ELECTRONIC WARFARE

Course Number: 104-F6.

Location: Air Defense School, Ft. Bliss, TX.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/68–9/72.

Objectives: To familiarize enlisted personnel with electronic countermeasures and the use of air defense radars.

Instruction: Jamming, target detection, and use of radars in electronic countermeasures; electronic warfare training devices and techniques.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (11/73).

Related Occupation Codes: 16C.

AR-1715-0012

TACTICAL ELECTRONIC EQUIPMENT MAINTENANCE (EE-CMF) NONCOMMISSIONED OFFICER (NCO) BASIC

(Tactical Communications Chief Noncommissioned Officer (NCO) Basic)

(Tactical Communications Chief Noncommissioned Officer (NCO) Basic)

Course Number: 1-31-C40B; 1-EE-C40D; 101-31G40-EC.

Location: Field Artillery School, Ft. Sill, OK.

Length: 12–16 weeks (407–607 hours).

Exhibit Dates: 7/71–6/76.

Objectives: To provide selected personnel with a working knowledge of those duties required to perform as noncommissioned officers in grades E5, E6 and E7.

Instruction: Electronic warfare; radiotelephone procedures; leadership; psychological operations; techniques of instruction; map reading; rappelling and river crossing; mines and demolitions; field artillery subjects; communications systems; wire line construction; field telephones, switchboards; FM radio equipment; radio antenna principles; radio net operation; radio telephone procedures; teletypewriter procedures; online cipher machine; radio set AN/GRC-19; radioteletypes AN/GRC-46, AN/VRC-29, AN/VSC-1; transmitter; multimeters; troubleshooting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (11/73).

Related Occupation Codes: 31B; 31D; 31E; 31G; 31K.

AR-1715-0013

BASIC ELECTRONICS MAINTENANCE

Course Number: 102-F10.

Location: Security Agency School, Ft. Devens, MA.

Length: 26 weeks (844 hours).

Exhibit Dates: 8/70–Present.

Objectives: To train students to analyze basic electronic circuits, use basic test equipment, and maintain general intercept receivers, couplers and demodulators, and single and dual track analog recorders.

Instruction: Basic electronics; arithmetic; scientific notation; equations; AC/DC circuit analysis; introduction to electricity; resistors; Ohm's Law; testing and troubleshooting AC/DC circuits; meters; multimeters; vacuum tube voltmeters; magnetism and electromagnetism; audio signal generators; oscilloscope operation; capacitance; inductance; RLC circuits; testing of components; diodes; triodes; transistor fundamentals; electron tube test sets; power supply circuits; amplifier circuits; audio and IF transformers; RF generators; receiver circuits; wiring diagrams; superheterodyne receiver; solid state; printed circuits; waveforming circuits. Material heavily laboratory oriented.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electronics (11/73); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity and electronics, and credit in electrical laboratory on the basis of institutional evaluation (11/73).

Related Occupation Codes: 33C; 33D; 33F; 33G.

AR-1715-0014

COMMAND AND STAFF OFFICER ELECTRONIC WARFARE

Course Number: 2G-F8.

Location: Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ.

Length: 3 weeks (128–143 hours).

Exhibit Dates: 4/71–Present.

Objectives: To provide commissioned officers and civilians with a working knowledge of the fundamentals of electronic warfare (EW), and a general knowledge of cover and deception (C & D).

Instruction: EW aggressive measures/combat power; informative measures; order of battle; protective measures; EW resources and military operations; EW planning exercise; joint services EW seminar; C & D operations and CS sensors; C & D planning exercise.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (11/73).

AR-1715-0015

LIGHT AIR DEFENSE SYSTEM ELECTRONIC REPAIR

Course Number: *Version 1:* 101-27F20. *Version 2:* 101-27F20. *Version 3:* 121-27F20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 29 weeks (1008 hours). *Version 2:* 27–30 weeks (1072 hours). *Version 3:* 25–30 weeks (897–1072 hours).

Exhibit Dates: *Version 1:* 9/74–Present. *Version 2:* 11/72–8/74. *Version 3:* 8/68–10/72.

Objectives: To train enlisted personnel to perform direct and general support maintenance on the Vulcan air defense system, Chaparral missile system, and associated organizational and support maintenance test equipment.

Instruction: *All Versions:* Missile electronic subjects including: series, parallel, series-parallel, DC and AC resistor circuits; magnetism; inductance, capacitance and impedance; transformers; transients in RC and LR circuits; series and parallel resonance; missile soldering procedures; missile transistors; power supplies; test equipment; electro-mechanical control devices; introduction to digital computers; introduction to logic symbology. *Version 1:* Lecture and laboratory exercises including basic electricity concepts of work, energy, and power; DC and AC circuit theory–series, parallel, series-parallel, inductive, capacitive, and LCR circuits; series and parallel resonant circuits; transformers and power supplies; simplified explanation of RC and LC transients and sine-wave oscillators; soldering techniques and practices; elementary theory of semiconductor devices and circuits including FET's; and Chaparral and Vulcan system and test equipment maintenance and repair.

Credit Recommendation: *Version 1:* In the vocational certificate category, 15 semester hours in basic electronics and troubleshooting (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics and troubleshooting (3/75). *Version 2:* In the vocational certificate category, 36 semester hours in electronics or full semester-hour equivalent to complete certificate program in electronics (11/73); in the lower-division baccalaureate/associate degree category, 12 semester hours in electronics (11/73); in the upper-division baccalaureate category, 4 semester hours in electronics (11/73). *Version 3:* In the vocational certificate category, 36 semester hours in electronics or full semester-hour equivalent to complete certificate program in electronics (11/73); in the lower-division baccalaureate/associate degree category, 12 semester hours in electronics (11/73); in the upper-division baccalaureate category, 4 semester hours in electronic circuitry, and credit in electronic laboratory on the basis of institutional evaluation (12/68).

Related Occupation Codes: 27F.

AR-1715-0016

TACTICAL ELECTRONIC EQUIPMENT MAINTENANCE (EE-CMF) NONCOMMISSIONED OFFICER (NCO) ADVANCED

(Tactical Electronic Maintenance (EE-CMF) Noncommissioned Officer (NCO) Advanced)

Course Number: 1-EE-C42B.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: 10–11 weeks (365–383 hours).

Exhibit Dates: 5/73–Present.

Objectives: To prepare electronic equipment maintenance supervisors for top-level management positions.

Instruction: General military subjects; command and staff operations; combined arms; special weapons and CBR operations; applied communications; leadership; administration and management; combat service support operations; combat support service; logistics; satellite communications; communications security; fixed station radio communications; data processing and data communications; and dial exchange equipment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (5/75).

Related Occupation Codes: 26L; 31U; 35R.

AR-1715-0017

TACTICAL ELECTRONIC EQUIPMENT MAINTENANCE (EE-CMF) NONCOMMISSIONED OFFICER (NCO) BASIC

Course Number: 1-EE-C40B.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: 8–12 weeks (286–414 hours).

Exhibit Dates: 5/73–Present.

Objectives: To train students with electronics backgrounds to perform supervisory duties in communications equipment maintenance.

Instruction: General military subjects, including military justice and race relations; maintenance and supply management; introduction to communications; communication circuit requirements; system management; communication facilities.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (5/75).

Related Occupation Codes: 26L; 31S; 31T.

AR-1715-0018

EW/Signal Intelligence Noncommunications Intercept

(Electronic Warfare (EW) Signal Intelligence Noncommunications Interceptor-Analyst)

(Electronic Warfare (EW) Cryptologic Noncommunications Interceptor-Analyst)

(Electronic Warfare (EW) Operator (Noncommunications ECM))

Course Number: 233-98J10; 233-98J20.

Location: Intelligenc School, Ft. Devens, MA; Security Agency School, Ft. Devens, MA.

Length: 13-15 weeks (407-587 hours).

Exhibit Dates: 3/53-Present.

Objectives: To teach selected students to locate, record, and identify noncommunications electromagnetic emissions, to familiarize them with signal and operations characteristics of electronic equipment, and to provide them with an introduction to noncommunications jamming techniques.

Instruction: Radiotelephone net operations; prefixes, scientific notation and logarithms; direct and alternating currents; modulation and transmitters; oscilloscopes; receivers; recorders; signal recognition; operations; search radar; fire control radar; navigational aids; preventive maintenance; missile ranges; launch configuration; telemetry; fundamentals of jamming; introduction to electronic warfare.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (11/73).

Related Occupation Codes: 98J.

AR-1715-0019

Tactical Electronic Equipment Maintenance (EE-CMF) Noncommissioned Officer (NCO) Basic

Course Number: 1-EE-C40A.

Location: Signal School, Ft. Gordon, GA; Southeastern Signal School, Ft. Gordon, GA.

Length: 8-12 weeks (286-475 hours).

Exhibit Dates: 2/73-Present.

Objectives: To train enlisted personnel with a background in electronic equipment maintenance to perform duties at the supervisory level.

Instruction: Command tactics; career management training; field wire operations; antenna operations; lineman operations; cable splicer operation; switchboard oeprations; circuit controller operations; radio relay and carrier operations; communications center operations; data terminal operations; radio teletypewriter and field radio operations; maintenance; aircraft electronic equipment; installation of electronic equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in telecommunications and 1 in telecommunications laboratory (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in telecommunications laboratory (5/75).

Related Occupation Codes: 31B; 31E; 31J; 31L; 31M; 31N; 35B; 35K; 35L; 35M; 36C; 36D; 36E; 36G; 36K.

AR-1715-0020

Instrument Calibration and Maintenance (35-CMF) Noncommissioned Officer (NCO) Basic

(Tactical Electronic Equipment Maintenance (EE-CMF) Noncommissioned Officer (NCO) Basic)

Course Number: 1-351-C40; 1-EE-C40C.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 8-10 weeks (250-408 hours).

Exhibit Dates: 6/73-Present.

Objectives: To train students with a background in electronic equipment maintenance to perform those duties required of noncommissioned officers.

Instruction: Career management; communication skills; basic data; military symbols; combat surveillance; management; tactical signal communications; supply and maintenance; radio system operation and controls; radiotelephone procedures.

Credit Recommendation: Credt is not recommended because of the military specific nature of the course (11/73).

Related Occupation Codes: 35H20; 35H; 35J.

AR-1715-0021

Communications Operations (CO-CMF) NCO Basic (USASCS)

Course Number: 5-CO-C40B.

Location: Signal School, Ft. Monmouth, NJ.

Length: 12 weeks (414 hours).

Exhibit Dates: 4/73-Present.

Objectives: To train enlisted personnel as communications operators in signal units.

Instruction: Conferences and practical exercises in communications, communication circuit requirements, general military subjects, maintenance and supply management, field training exercises, and systems management.

Credit Recommendation: In the vocational certificate category, 3 semester hours in communications (2/74).

Related Occupation Codes: 72G.

AR-1715-0022

Corporal Computer Repair

(SSM Computer Repair)

Course Number: 9-R-242.1; 9-E-59.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 12-13 weeks (420-455 hours).

Exhibit Dates: 12/55-12/68.

Objectives: To train electronic repair helpers to repair and maintain the Corporal computer system and associated equipment.

Instruction: Lectures and laboratories in fundamental computer circuits, Corporal computers, power supplies and accessory equipment, ordnance test equipment, and field maintenance.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity or electronics, 1 in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electricity or electronics (3/74).

AR-1715-0023

Position Fixing Navigation Equipment Repair

Course Number: 102-F2.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 3 weeks (106 hours).

Exhibit Dates: 6/66-12/68.

Objectives: To train enlisted personnel in the maintenance and repair of navigational equipment.

Instruction: Lectures and practical experience in hyperbolic area coverage navigation, receiving equipment, flight log and system support, receiver circuit analysis, and installation and system analysis.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1715-0024

Fire Distribution Integration Systems Repair (AN/GSG-5)

(Fire Distribution Integration Systems Repair (AN/GSG-5(V) and 6))

(Fire Distribution Integration Systems Repair (AN/GSG-5 and 6))

Course Number: 4B-F8; 150-25D20; 150-362.1; 11-R-F15.

Location: Air Defense School, Ft. Bliss, TX; Signal Fire Distribution Systems Training Activity, Ft. Bliss, TX.

Length: 22-27 weeks (836-962 hours).

Exhibit Dates: 11/61-Present.

Objectives: To train warrant officers and enlisted personnel to perform organizational and support maintenance on fire distribution integration systems.

Instruction: Lectures and laboratories in fundamentals of digital logic; binary number systems; logic elements; functions and electronic logic units; coordinate data systems; modulation techniques; gates, multivibrators, and read amplifiers; trigger circuits, delay lines, and switches; magnetic memory storage elements; power supplies and troubleshooting; sweep circuits; video and tag presentation; computer control of fire distribution systems; BPL and SAGE subsystems; and comprehensive tie-in of systems and subsystems.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electronics, digital logic, and switching, and 3 in electronics or logic laboratory (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours as a technical elective in electronics, digital logic, and switching, and 2 as a technical elective in electronics or logic laboratory (3/74); in the upper-division baccalaureate category, 3 semester hours as a technical elective in electronics, digital logic, and switching, and 1 as a technical elective in electronics or logic laboratory (3/74).

Related Occupation Codes: 25D.

AR-1715-0025

Field Artillery Digital Automatic Computer (FADAC) Mechanics

Course Number: 101-AS1F7; 101-31B30.

Location: Field Artillery School, Ft. Sill, OK.

Length: 3 weeks (73-95 hours).

Exhibit Dates: 9/72-Present.

Objectives: To train field radio mechanics to maintain M18 gun direction computers and ancillary equipment.

Instruction: Lectures and practical exercises in operation, organizational maintenance, and troubleshooting of M18 gun direction computers, M36 radar chronograph, and associated equipment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

Related Occupation Codes: 31B; 31Z.

AR-1715-0026

Supervisory Fixed Station Communications Maintenance

Course Number: 101-32B40; 101-32C40; 101-32D40; 101-32E40.

Location: Signal School, Ft. Monmouth, NJ.

Length: 25 weeks (932 hours).

Exhibit Dates: 4/66–12/68.

Objectives: To train enlisted personnel to supervise, coordinate, and participate in the operation and maintenance of a fixed communication facility.

Instruction: Lectures and practical exercises in the maintenance of a fixed communication facility, with special emphasis on electronic fundamentals. Course includes vacuum-tube and semiconductor circuits, advanced work in modulation and demodulation, wave-shaping networks, pulse and switching circuits, propagation and antenna systems, fixed-station communication systems, repair and installation practices, and use of test equipment, including frequency synthesizers, spectrum analyzers, and distortion meters.

Credit Recommendation: In the vocational certificate category, 30 semester hours in communications (or 15 in electronics, with additional credit awarded on the basis of institutional evaluation), 3 in shop management or supply management (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68), 3 in shop management or supply management (6/74); in the upper-division baccalaureate category, 3 semester hours in shop management (12/68), 3 in supply management (12/68), and, for non-electrical-engineering majors, 10 in electronics (6/74).

Related Occupation Codes: 32B; 32C; 32D; 32E; 32Z.

AR-1715-0027

Supervisory Microwave Radio Maintenance

Course Number: 101-26L40.

Location: Signal School, Ft. Monmouth, NJ.

Length: 25 weeks (932 hours).

Exhibit Dates: 4/66–12/68.

Objectives: To train enlisted personnel to supervise the repair, installation, and maintenance of microwave communication systems.

Instruction: Lectures and practical exercises in the supervision of microwave radio maintenance at the advanced level. General instruction includes electronics fundamentals, vacuum tube circuits, semiconductor devices and their application to pulse and high-frequency circuits. Advanced course work includes amplitude and frequency modulation, multiplexing, pulse code modulation, communication system requirements and practices, special microwave systems, satellite communication systems, waveguides, antennas, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 30 semester hours in communications, or 15 in maintenance management or electronics, with additional credit awarded on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in communications, and additional credit on the basis of institutional evaluation (12/68); in the upper-division baccalaureate category, 3 semester hours in maintenance management, 2 in electronics, and credit in electrical laboratory on the basis of institutional evaluation, or 10 semester hours in electronics for non-electrical-engineering majors (3/74).

Related Occupation Codes: 26L.

AR-1715-0028

Tropospheric Scatter Communication Equipment Repair

Course Number: 11-R-F17.

Location: Signal School, Ft. Monmouth, NJ.

Length: 5 weeks (190 hours).

Exhibit Dates: 5/62–12/68.

Objectives: To train microwave radio repairmen to install, maintain, and repair Collins tropospheric scatter communications equipment.

Instruction: Lectures and laboratories in the circuit analysis and operation of UHF converter amplifiers, traveling-wire amplifiers, power amplifiers, IF assemblies, and power supplies; functional block-diagram circuit analysis for systematic care, servicing, and inspection of Collins equipment; and test equipment, including multimeters, oscilloscopes, and Collins frequency synthesizers.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics laboratory, and additional credit in electronics laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory, and additional credit in electronics laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (3/74).

AR-1715-0029

1. Tactical Solid State Telephone Equipment Repair
2. Manual Cordless Switchboard SB-3082(V)1/GT Repair

Course Number: 622-F16.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 6 weeks (209 hours). *Version 2:* 3 weeks (100 hours).

Exhibit Dates: *Version 1:* 11/74–Present. *Version 2:* 7/73–10/74.

Objectives: To train telephone repairmen to install, operate, maintain, and repair the manual cordless switchboard.

Instruction: Lectures emphasizing practical experience in manual cordless switchboard installation, operation, and repair, including circuit cord assembly, removal, replacement, and voltage measurement; internal wiring continuity checking; troubleshooting internal faults; front panel parts removal and replacement; power supply subassembly, testing, and troubleshooting; and use of telephone set, variable transformer, battery tester, multimeter, and tool kit.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in telephone system maintenance (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (5/75). *Version 2:* In the vocational certificate category, 2 semester hours in electronics, and additional credit in electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (3/74).

Related Occupation Codes: 36G; 36H.

AR-1715-0030

Tropospheric Scatter Terminal REL-2600 Repair

Course Number: 101-F9.

Location: Signal School, Ft. Monmouth, NJ.

Length: 7 weeks (266 hours).

Exhibit Dates: 10/67–12/68.

Objectives: To train microwave radio repairmen to install and maintain REL-2600 tropospheric scatter terminals.

Instruction: Lectures and practical exercises in theory of frequency division multiplexing; GH2 transmitters; receiver circuits; functional analysis, using block and level diagrams to trace signal paths; safety precautions; start-up procedures; alignment; tuning; troubleshooting; servicing; and equipment operation, including distortion analyzer, panel meters, special test fixtures, test oscillators, sweep generators, VTUMs, RF power meters, VSWR monitor, and dummy loads.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics, and additional credit in electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 3 in electronics laboratory (3/74).

Related Occupation Codes: 26L.

AR-1715-0031

Basic Fixed Plant Carrier Equipment Repair

Course Number: 11-R-274.0.

Location: Signal School, Ft. Monmouth, NJ.

Length: 15 weeks (546 hours).

Exhibit Dates: 7/63–12/68.

Objectives: To train enlisted personnel to maintain and repair fixed-station teletypewriters, telephones, and telegraph carrier equipment.

Instruction: Lectures and practical exercises in basic electricity and electronics, telephone and telegraph carrier fundamentals, fixed-station integrated communication systems, and semiconductor fundamentals.

Credit Recommendation: In the vocational certificate category, 15 semester hours in electronics, and credit in electricity on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in electronics, and credit in electricity on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electricity on the basis of institutional evaluation (3/74).

AR-1715-0032

Air Traffic Control Communications Set AN/FSQ-75 Repair

Course Number: 102-F7.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 6 weeks (218 hours).

Exhibit Dates: 1/69–Present.

Objectives: To train avionics equipment repairmen to repair and maintain AN/FSQ-75 air traffic control communications sets.

Instruction: Lectures and practical exercises in AN/FSQ-75 communications set maintenance, repair, test equipment use, operational checks, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in avionics laboratory, additional credit in electronics laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, credit in electronics laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 35L; 35P.

AR-1715-0033

1. ELECTRONIC DEVICES REPAIR
2. ELECTRONIC DEVICES REPAIR (Electronic Instrument Repair)

Course Number: *Version 1:* 198-295;2 11-R-295.2. *Version 2:* 11-E-34.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 16 weeks (584 hours). *Version 2:* 18–26 weeks (660–964 hours).

Exhibit Dates: *Version 1:* 12/59–12/68. *Version 2:* 2/55–11/59.

Objectives: To train personnel to inspect, test, adjust, and repair electrical equipment.

Instruction: Lectures and practical experience in AC and DC circuit analysis, electric tubes and amplifiers, oscillators, instrument calibration, and oscilloscope operation and calibration.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electricity and electronics, and credit in electronics laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity and electronics, and credit in electronics laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 6 semester hours in electricity and electronics, and credit in electronics laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 3 semster hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity and electronics, and credit in electronics laboratory on the basis of institutional evaluation (3/74).

AR-1715-0034

FIRE CONTROL COMPUTER REPAIR (FADAC Radar Technician (Marine))

Course Number: 113-34G10; 113-34G20.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* Self-paced 9–20 weeks (285–629 hours). *Version 2:* 27 weeks (877 hours). *Version 3:* 27 weeks (968 hours). *Version 4:* 25 weeks (946 hours).

Exhibit Dates: *Version 1:* 4/76–Present. *Version 2:* 4/74–3/76. *Version 3:* 6/69–3/74. *Version 4:* 9/66–5/69.

Objectives: To train enlisted personnel to operate, maintain, and repair field artillery digital automatic computer systems.

Instruction: *All Versions:* Lectures and laboratories in DC and AC circuits, electronics, transistor devices and circuits, Boolean algebra, logic gates and circuits, machine language programming, and system maintenance and troubleshooting. *Version 1:* Training for Army personnel includes lectures, laboratories and practical experience in the fundamental concepts of electricity, soldering techniques semiconductors, digital computer functions, oscilloscopes, laser theory, laser range finders, viewer computers, optics and operation, testing, troubleshooting and repair of various types of automatic fire control equipment. Marine Corps personnel learn operation and servicing of signal data reproducer, computer logic unit, and gun directon computer. *Version 2:* Topics cover the technical fundamentals to isolate malfunctions and troubleshoot AC and DC circuits, amplifier circuits, RC and LR circuits, sinewave oscillators, and semiconductor circuits; basic logic circuit, arithmetic type programming, and computer diagnosis and troubleshooting.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 10 semester hours in basic electricity and electronics, 4 in computer technology repair, for a total of 14 hours for Army personnel, or a total of 3 in computer technology for Marine Corps personnel (1/78) *Version 2:* In the vocational certificate category, 6 semester hours in basic electricity and electronics and 6 in computer technology (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics (6/75). computer technology repair, for a total of 14 semester hours for Army personnel, or a total of 3 semester hours in computer technology repair for Marine Corps personnel (1/78). *Version 3:* In the vocational certificate category, 6 semester hours in computer technology, 6 in electricity and electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer technology, 2 in electricity and electronics, and, on the basis of institutional evaluation, credit in electrical laboratory (3/74); in the upper-division baccalaureate category, 2 semester hours in digital computers, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 4:* In the vocational certificate category, 6 semester hours in computer technology, 6 in electricity and electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer technology, 2 in electricity and electronics, and, on the basis of institutional evaluation, credit in electrical laboratory (3/74); in the upper-division baccalaureate category, 2 semester hours in electricity and electronics, and credit in electrical laboratory on the basis of institutional evaluation (12/68).

Related Occupation Codes: 34G; 09B.

AR-1715-0035

WEAPONS MONITORING CENTER REPAIR

Course Number: 4B-F9; 150-25G20; 150-364.1; 11-N-364.1.

Location: Air Defense School, Ft. Bliss, TX.

Length: 32 weeks (1140–1208 hours).

Exhibit Dates: 12/63–Present.

Objectives: To train enlisted personnel and warrant officers to maintain the data processing and display equipment in weapons monitoring centers.

Instruction: Lectures and laboratories in number systems, logic gates and circuits, electronic test equipment, and ancillary data handling and display equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in computer technology, 2 in electricity and electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer technology, and credit in computer or electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, 1 semester hour in digital computers, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 25G.

AR-1715-0036

AUTOMATIC DATA PROCESSING (ADP) REPAIR, PHASE I—COMPUTER TECHNOLOGY

Course Number: 150-34D20 (Phase I).

Location: *Version 1:* Signal School, Ft. Gordon, GA. *All Versions:* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 18 weeks (637–675 hours). *Version 2:* 19 weeks (706 hours).

Exhibit Dates: *Version 1:* 4/75–Present. *Version 2:* 4/70–3/75.

Objectives: To train enlisted personnel to inspect, test, adjust, and repair automatic data processing equipment.

Instruction: Lectures and practical exercises in numbering systems, programming functions, logic gates, counters and registers, and electromechanical data processing equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in digital computer fundamentals and 2 in digital computer laboratory (5/75). *Version 2:* In the vocational certificate category, 2 semester hours in electricity, 4 in computer technology (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer technology (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 34D.

AR-1715-0037

1. SATELLITE COMMUNICATIONS GROUND STATION EQUIPMENT REPAIRMAN
2. SATELLITE COMMUNICATIONS TERMINAL REPAIR
3. SATELLITE COMMUNICATIONS TERMINAL REPAIR

Course Number: 102-26Y20.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 26–36 weeks (963–1338 hours). *Version 2:* 36 weeks (1282–1352 hours). *Version 3:* 36 weeks (1352 hours).

Exhibit Dates: *Version 1:* 7/76–Present. *Version 2:* 11/69–6/76. *Version 3:* 8/68–10/69.

Objectives: To train enlisted personnel to operate, inspect, test, and repair satellite communications terminal equipment.

Instruction: *All Versions:* Lectures and laboratories in electronic fundamentals, servo and data circuitry, telephone and telegraph terminal equipment, specialized test equipment, digital techniques and operations, radio communication subsystems and satellite communications terminals. *Version 1:* Course is divided into two phases: Phase I (10 weeks) includes instruction and practical exercises in troubleshooting and repair of power supplies, audio amplifiers, audio oscillators, pulse generators, transceivers and logic circuits. Phase II (26 weeks) consists of lectures and laboratories in servo and data circuitry, telephone and telegraph terminal equipment, specialized test equipment, digital techniques and operations, radio communications subsystems, and satellite communications terminals. Note: Students who have completed Modules 201, 202, 203, 4, 5/6, and 7 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (26 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (36 weeks) of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 9 semester hours in satellite communication systems repair for students completing 26 weeks, or 6 semester hours in basic electronics and troubleshooting and 9 semester hours in satellite communication systems repair for students completing 36 weeks (see note above) (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in communication systems for students completing either 26 or 36 weeks (see note above) (4/77). *Version 2:* In the vocational certificate category, 12 semester hours in electricity and electronics, 8 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 12 semester hours in electricity and electronics, 8 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68).

Related Occupation Codes: 26Y; 09B.

Automatic Data Processing (ADP) Repair

(Automatic Data Processing System (ADPS) (FIELDATA) Repair)

Course Number: 150-34D20; 11-R-303.1.

Location: Signal School, Ft. Monmouth, NJ.

Length: 36–37 weeks (1344–1391 hours).

Exhibit Dates: 5/59–7/69.

Objectives: To train enlisted personnel to inspect, test, and repair automatic data processing equipment.

Instruction: Lectures and practical exercises in numbering systems, logic circuits and gates, programming, fundamental computer circuits, electrical fundamentals, system troubleshooting, and electromechanical data processing peripheral equipment.

Credit Recommendation: In the vocational certificate category, 4 semester hours in computer technology, 2 in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in digital computers, and credit in computer laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 34D.

1. Automatic Data Processing (ADP) Auxiliary Equipment Repair
2. Automatic Data Processing System (ADP) (FIELDATA) Auxiliary Equipment Repair
3. Automatic Data Processing System (ADPS) (FIELDATA) Auxiliary Equipment Repair

Course Number: *Version 1:* 150-34C20. *Version 2:* 11-R-302.2. *Version 3:* 11-R-302.2.

Location: Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 25 weeks (934 hours). *Version 2:* 25 weeks (926 hours). *Version 3:* 27 weeks (1002 hours).

Exhibit Dates: *Version 1:* 9/68–Present. *Version 2:* 9/64–8/68. *Version 3:* 5/59–8/64.

Objectives: To train enlisted personnel to inspect, test, and repair stored-program computer auxiliary equipment.

Instruction: Lectures and laboratories in basic electricity and electronics theory, measurements on electronic circuits, switching circuits, and computer applications in specific auxiliary equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electricity or electronics, 8 in computer systems (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics, 4 in computer systems (3/74); in the upper-division baccalaureate category, 2 semester hours in computer systems (3/74). *Version 2:* In the vocational certificate category, 6 semester hours in electricity or electronics, 8 in computer systems (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, [illegible] semester hours in computer systems, and additional credit in computer systems on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 6 semester hours in electricity or electronics, 8 in computer systems (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in computer systems, and additional credit in computer systems on the basis of institutional evaluation (3/74).

Related Occupation Codes: 34C; 34D.

AR-1715-0040

Ballistic Missile Digital Computer Repair (Pershing)

Course Number: 150-379.1; 9-S-379.1; 9-S-F37.

Location: Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 27–29 weeks (991–1065 hours).

Exhibit Dates: 7/62–12/68.

Objectives: To train enlisted and civilian personnel to inspect, test, and repair Pershing fire data computer systems.

Instruction: Lectures and laboratories in AC and DC circuits, vacuum tube and transistor devices and circuits, Boolean algebra, logic circuits, and machine language programing for the Pershing fire data control computer.

Credit Recommendation: In the vocational certificate category, 6 semester hours in computer technology, 6 in electricity and electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in digital computers, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1715-0041

Terminal Data Link Fire Unit Integration Facilities (FUIF) Repair

Course Number: 4B-F6; 150-25E20; 11-N-361.1.

Location: Air Defense School, Ft. Bliss, TX.

Length: 12–14 weeks (436–490 hours).

Exhibit Dates: 5/64–12/68.

Objectives: To train warrant officers and enlisted personnel who have experience in electronic engineering to maintain fire unit integration facilities.

Instruction: Lectures and practical exercises in fire unit integration facilities field maintenance, including FUIF introduction and power supplies, AN/TSQ08 transmitter and receiver and ground slant computer, data converter, TYA-13 modification, and associated equipment and system analysis.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

AR-1715-0042

Automatic Tape Processing Equipment

Course Number: 160-F3.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 10 weeks (366 hours).

Exhibit Dates: 10/68–Present.

Objectives: To train typewriter equipment repairmen in automatic multiple-address routing systems, tape recall systems, and data transfer systems maintenance.

Instruction: Lectures and practical exercises in automatic multiple-address routing system data transfer system, and tape recall system operation, mechanical adjustment, block diagrams, logic, power distribution, memory operation and adjustment, program loading, system timing, registers, counters, decoders, preventive maintenance, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

Related Occupation Codes: 31J.

AR-1715-0043

Data Communications Terminal Specialist

(Digital Subscriber Terminal Equipment (DSTE) Operator)

Course Number: 580-72F20.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 3–9 weeks (107–400 hours).

Exhibit Dates: 1/69–12/74.

Objectives: To train enlisted personnel in data communications terminal operations and associated system configurations.

Instruction: Lectures and practical exercises in communications introduction, processing of outgoing and incoming messages, maintenance of communications center files, COMSEC material control, and operator maintenance of teletypewriter and associated equipment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

Related Occupation Codes: 72F.

AR-1715-0044

Automatic Data Processing (ADP) Repair, Phase II-Card Processors U-1005 and U-1004/DLT-6 Repair

(Card Processors U-1005 and U-1004/DLT-6 Repair)

Course Number: 150-34D20 (Phase II); 150-F3.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: 18 weeks (678 hours).

Exhibit Dates: 10/68–Present.

Objectives: To train enlisted personnel to inspect, test, adjust, and repair card processors.

Instruction: Lectures and practical exercises in familiarization with U-1004 and U-1005/DLT-6 processors, card processor input-output equipment, paper tape, equipment, and system maintenance.

Credit Recommendation: In the vocational certificate category, 6 semester hours in digital electronics and 2 in digital electronics laboratory (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital electronics laboratory (5/75).

Related Occupation Codes: 34B; 34D.

AR-1715-0045

1. NCR-500 Computer Repair
2. Automatic Data Processing (ADP) Repair, Phase III—NCR-500 Computer Repair

(NCR-500 Computer Repair)

Course Number: *Version 1:* 150-34E20. *Version 2:* 150-34D20 (Phase III); 150-F4.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 33 weeks (1229 hours). *Version 2:* 18–19 weeks (676–678 hours).

Exhibit Dates: *Version 1:* 6/76–Present. *Version 2:* 2/69–5/76.

Objectives: To train qualified ADPS repairmen to inspect, test, and repair the NCR-500 computer.

Instruction: Lectures and practical exercises in NCR-500 computer inspection, testing, and repair, including programming orientation; 517 processor, power supply, block diagram, cabling, timing, memory configuration, auxiliary register logic, loading, decoding, circuitry, malfunctions, testing, preventive maintenance, adjustment, and repair; 590 console operation, troubleshooting and maintenance of keyboard, binary switch, typewriter, leading frame, and carriage controls; 581/582 card reader and controller; 576 card punch and printer; and peripheral equipment operation, preventive maintenance, troubleshooting, and repair.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in digital circuits; in the lower-division baccalaureate/associate degree category, 3 semester hours in digital circuits laboratory and 3 in computer programming (4/77). *Version 2:* In the vocational certificate category, 6 semester hours in digital circuits and 2 in digital circuits laboratory (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital circuits laboratory (5/75).

Related Occupation Codes: 34D; 34E; 34Z.

AR-1715-0046

Automatic Data Processing (ADP) Repair, Phase VI—Automatic Digital Message Switching Center (ADMSC) Repair

Course Number: 150-34D20 (Phase VI).

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: 11 weeks (388 hours).

Exhibit Dates: 3/73–Present.

Objectives: To train qualified ADP repairmen to supervise the maintenance of automatic digital message switching centers.

Instruction: Lectures and practical exercises in automatic digital message switching center maintenance, including ADMS and ASC equipment operation, preventive maintenance, and troubleshooting procedures; and communication and technical control facility operating procedures, inspection, and testing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in digital computer systems and 1 in digital computer laboratory (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital computer laboratory (5/75).

Related Occupation Codes: 34D.

AR-1715-0047

Satellite Communications (SATCOM) Terminal AN/TSC-54 Repair

Course Number: 102-F6.

Location: Signal School, Ft Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: 8–10 weeks (298–366 hours).

Exhibit Dates: 8/68–Present.

Objectives: To train enlisted personnel to inspect, test, and repair the AN/TSC-54 satellite communications terminal.

Instruction: Lectures and practical exercises in satellite communications terminal inspection, testing, and repair, including system familiarization, transmitter and receiver operation and repair, and antenna system inspection and repair, with emphasis on servicing techniques.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (8/79).

Related Occupation Codes: 26Y.

AR-1715-0048

Airborne Radio Direction Finding

Course Number: 3B-F5.

Location: Security Agency School, Ft. Devens, MA.

Length: 4 weeks (146 hours).

Exhibit Dates: 10/67–Present.

Objectives: To provide instrument flight-rated officers with a general knowledge of airborne radio direction-finding systems.

Instruction: Lectures in airborne radio direction-finding equipment and techniques, and direction-finding plotting exercises and controlled practical exercises.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

AR-1715-0049

Field Radio Relay Equipment Repair, Skill Development Base

Course Number: 101-31L20-I.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 13 weeks (517 hours).

Exhibit Dates: 11/68–Present.

Objectives: To train field radio equipment repairmen to perform as supervisors and technicians.

Instruction: Lectures and practical exercises in leadership and training, small-unit tactics, tactical field exercises, electronics, printed circuit test and repair, radio set AN/GEC-50, and maintenance management.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics for non-electronics majors (3/74); in the upper-division baccalaureate category, 3 semester hours in electronics for non-electronics majors (3/74).

Related Occupation Codes: 31L.

AR-1715-0050

Automatic Dial Central Office AN/FTC-31

Course Number: 622-F1.

Location: Signal School, Ft. Monmouth, NJ.

Length: 14 weeks (478 hours).

Exhibit Dates: 7/68–Present.

Objectives: To train enlisted personnel to maintain automatic dial central office exchanges.

Instruction: Lectures and practical exercises in decimal, binary, and octal numbering systems; logic gating; semiconductor theory and integrated circuits; digital logic and ferrite core memory; use of test equipment; and system analysis and troubleshooting.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (3/74); in the upper-division baccalaureate category, 3 semester hours in electronics (3/74).

Related Occupation Codes: 36H.

AR-1715-0051

Manual Central Office Repair, Skill Development Base

Course Number: 622-36G20-I.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 12 weeks (479 hours).

Exhibit Dates: 11/68–Present.

Objectives: To provide telephone central office repairmen with knowledge and skills necessary to perform management and supervisory functions at mobile telephone central office facilities.

Instruction: Lectures and practical exercises in leadership and civil affairs orientation; maintenance supply and records procedures; generator sets operation; and central office group telephone, manual telephone, tactical switchboards, and telephone wire line-testing procedures.

Credit Recommendation: In the vocational certificate category, credit in electronics on the basis of institutional evaluation (3/74).

Related Occupation Codes: 36G; 36H.

AR-1715-0052

Radio Set AN/FRC-109 Repair

Course Number: 101-F8.

Location: Signal School, Ft. Monmouth, NJ.

Length: 6 weeks (228 hours).

Exhibit Dates: 10/67–12/68.

Objectives: To train microwave radio repairmen to maintain AN/FRC-109 radio sets.

Instruction: Lectures and practical exercises in voice and teletype multiplexing; transmitter, receiver, order-wire, and alarm system maintenance; and integrated wideband communication system familiarization.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics or electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, credit in electronics or electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electronics or electrical laboratory on the basis of institutional evaluation (12/68).

Related Occupation Codes: 26L.

1. Multichannel Communications

EQUIPMENT OPERATOR
2. RADIO RELAY AND CARRIER ATTENDANT
3. RADIO RELAY AND CARRIER ATTENDANT
4. RADIO RELAY AND CARRIER ATTENDANT
5. RADIO RELAY AND CARRIER OPERATION

Course Number: *Version 1:* 31M10-CELT; 202-31M20. *Version 2:* 202-31M20. *Version 3:* 202-31M20. *Version 4:* 202-293.1. *Version 5:* 11-R-293;1 11-E-46.

Location: Southeastern Signal School, Ft. Gordon, GA; Signal School, Ft. Gordon, GA.

Length: *Version 1:* 10–15 weeks (470 hours). *Version 2:* 16 weeks (586–714 hours). *Version 3:* 14 weeks (511 hours). *Version 4:* 12 weeks (437 hours). *Version 5:* 8 weeks (280 hours).

Exhibit Dates: *Version 1:* 6/76–Present. *Version 2:* 8/69–5/76. *Version 3:* 2/68–7/69. *Version 4:* 2/66–1/68. *Version 5:* 4/57–1/66.

Objectives: To train enlisted personnel to install, operate, and maintain field radio relay and carrier systems and associated equipment.

Instruction: Lectures and practical exercises in installation, operation, and maintenance of radio sets, telephone systems, telegraph systems, antennas and generators, FDM systems, and PMC sets; area communications systems equipment maintenance; electronic warfare; and field exercises.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (3/74).

Related Occupation Codes: 31M; 31L; 31N.

AR-1715-0054

OV-1D (MOHAWK) SURVEILLANCE INFRARED REPAIR

Course Number: 104-F10.

Location: Intelligence School, Ft. Huachuca, AZ; Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ.

Length: 5–11 weeks (153–385 hours).

Exhibit Dates: 6/72–Present.

Objectives: To train enlisted personnel to maintain the OV-1D (Mohawk) infrared surveillance system on aircraft and ground stations.

Instruction: Lectures and practical exercises in OV-1D (Mohawk) infrared surveillance system maintenance and repair, including infrared detecting set introduction; system interface alignment and symptom collection; and film drive circuit, magazine, sensor optics, and display and synchronization circuits maintenance.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

Related Occupation Codes: 26N; 26W.

1. FIXED STATION RECEIVER REPAIR
2. FIXED STATION RECEIVER REPAIR
3. FIXED STATION RADIO RECEIVER REPAIR

(Fixed Station Receiver Repair)

Course Number: *Version 1:* 101-32B20. *Version 2:* 101-32B20. *Version 3:* 11-R-271;1 11-E-44

Location: Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 28 weeks (1048 hours). *Version 2:* 25 weeks (934 hours). *Version 3:* 20–22 weeks (736–880 hours).

Exhibit Dates: *Version 1:* 9/70–12/72. *Version 2:* 1/69–8/70. *Version 3:* 9/54–12/68.

Objectives: To train enlisted personnel to install, operate, and repair fixed-receiver station equipment.

Instruction: *All Versions:* Lectures and practical exercises in electrical fundamentals; resistor, series, and parallel circuits; magnetics and electromagnetism; AC circuit reactance and series-parallel resonance; oscilloscope usage; signal generators and impedance bridge; basic amplifier theory; diodes, triodes, tetrodes, and pentodes; basic receiver theory, RF signal generators, oscillators, IF and RF stages, superheterodyning, and troubleshooting; antenna systems, propagation concepts, filters and mixers, BFOs, and AGC concepts; coupling methods; and single-sideband systems in transmitters and receivers. *Version 1:* Instruction includes transistor fundamentals, semiconductor physics and theory, PNP and NCN devices, amplifier configurations, biasing network, bistable and monostable multivibrators, FETs, and regulated power supplies. *Version 2:* Instruction includes transistor fundamentals, semiconductor physics and theory, PNP and NCN devices, amplifier configurations, biasing networks, bistable and monostable multivibrators, FETs, and regulated power supplies.

Credit Recommendation: *Version 1:* In the vocational certificate category, 18 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 12 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, 9 semester hours as an elective in electricity or electronics for non-electrical engineering majors, 6 for majors (3/74). *Version 2:* In the vocational certificate category, 18 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 12 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, 6 semester hours as an elective in electricity or electronics for non-electrical engineering majors, 4 for majors (3/74). *Version 3:* In the vocational certificate category, 9 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 32B.

AR-1715-0056

FIXED STATION RADIO REPAIR

Course Number: 101-32H20.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 23–33 weeks (848–1223 hours). *Version 2:* 40 weeks (1426 hours).

Exhibit Dates: *Version 1:* 8/76–Present. *Version 2:* 1/73–7/76.

Objectives: To train enlisted personnel to install, operate, and repair fixed-station radios and associated equipment.

Instruction: *All Versions:* Lectures and practical exercises in electrical and electronic fundamentals; pulse generator circuitry; logic circuitry; basic receiver electronics; generation of RF energy; transmitter circuitry; multiband receiver and converter circuitry; maintenance, troubleshooting, and repair of radio receiver set AN/FRR-79 and auxiliary equipment; and vacuum theory. *Version 1:* Course is divided into two phases: Phase I (10 weeks) includes laboratory and practical experience in the repair and maintenance of power supply, audio amplifiers, transceiver circuitry, and basic logic circuits. Phase II (23 weeks) covers generation of RF energy, transmitter circuitry multiband receiver and converter circuitry, maintenance, troubleshooting and repair of radio receiver sets R390A/URR, AN/FRR-41, transceiver AN/FRC-93, transmitter AN/FRT-93, and auxiliary equipment. Note: Students who have completed modules 1 through 7 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (23 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (33 weeks) of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronics laboratory for students completing 23 weeks or 3 semester hours in electricity or electronics and 6 semester hours in electricity or electronics laboratory for students completing 33 weeks (see note above) (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics for students completing either 23 or 33 weeks (see note above) (4/77). *Version 2:* In the vocational certificate category, 16 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74).

Related Occupation Codes: 09B; 32H.

1. FIXED STATION TRANSMITTER REPAIR
2. FIXED STATION TRANSMITTER REPAIR
3. FIXED STATION RADIO TRANSMITTER REPAIR

(Fixed Station Transmitter Repair)

Course Number: *Version 1:* 101-32C20. *Version 2:* 11-R-272.1. *Version 3:* 11-E-42.

Location: Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 22 weeks (820 hours). *Version 2:* 21 weeks (774 hours). *Version 3:* 22–24 weeks (880–888 hours).

Exhibit Dates: *Version 1:* 4/69–12/72. *Version 2:* 3/59–3/69. *Version 3:* 9/54–2/59.

Objectives: To train enlisted personnel to install, operate, and repair fixed-station radio transmitters and associated equipment.

Instruction: Lectures and laboratories in electrical and electronic fundamentals (based on vacuum tubes); transmitter circuitry; introduction to antenna types and characteristics; fixed-station fundamentals; amplifier analysis; frequency-measuring and -keying equipment; high-power, single-channel radio transmitters; single-sideband transmitters; and fixed-station, integrated communications systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 9 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 10 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics (3/74), and credit in electrical laboratory on the basis of institutional evaluation (12/68).

Related Occupation Codes: 32C.

2. AN/MSQ-18 Battery Terminal Equipment Maintenance (AN/MSQ-18 Coder-Decoder Group Maintenance)

Course Number: *Version 1:* 4F-F1; 150-F1. *All Versions:* 44-N-F19.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 13 weeks (490–520 hours). *Version 2:* 14 weeks (480–494 hours).

Exhibit Dates: *Version 1:* 11/63–Present. *Version 2:* 2/59–10/63.

Objectives: To train qualified missile system repairmen to maintain and repair the AN/MSQ-18 coder-decoder.

Instruction: *All Versions:* Lectures and practical exercises in AN/MSQ-18 coder-decoder maintenance and repair, including block-diagram and circuit analysis; digital logic circuitry, including binary theory, negators, flip-flops, and flip-zero circuits; and troubleshooting procedures. *Version 1:* Instruction includes diodes, transistors, soldering techniques with semiconductors and printed or etched cards, hand tools usage, gates, switching circuits, basic mathematics, binary counters, shift registers, and logical algebra. *Version 2:* Instruction includes transistor theory, AN-OR gates, and core register.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronics, 1 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics, 1 in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 1 semester hour in electronics, 1 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics, 1 in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1715-0059

Communications-Electronics Maintenance Warrant Officer Intermediate

Course Number: 4-11-C30.

Location: Signal School, Ft. Monmouth, NJ.

Length: 23 weeks (713 hours).

Exhibit Dates: 9/70–Present.

Objectives: To teach signal warrant officers to operate and maintain communications-electronics equipment.

Instruction: Lectures and practical exercises in operation and maintenance of communications equipment and associated electronic instruments, including FM radio sets, navigational equipment, radar, satellite communications systems, multiplex systems, transmitters, TV equipment and components, film and tape systems, dial telephone central office switching system, and automatic digital message switching center.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours as an elective in electricity or electronics for non-engineering majors (3/74).

Related Occupation Codes: 201A; 286A; 281A; 282A; 252A; 287A; 301A; 361A; 290A; 341A; 721A.

AR-1715-0060

Special Forces Base Communications Systems

Course Number: 101-F12.

Location: Institute for Military Assistance, Ft. Bragg, NC.

Length: 6 weeks (187–189 hours).

Exhibit Dates: 8/72–Present.

Objectives: To train enlisted pesonnel to install, operate, and perform preventive maintenance on Special Forces base communications systems.

Instruction: Lectures and practical exercises in the operations and components of communications systems, including radio teletypewriter and radio set components, tuning and cording, communications central equipment, and message center group components and operation. Technical training is limited to that necessary to perform preventive maintenance and to interconnect components for optimum performance. Operation and military considerations are emphasized throughout.

Credit Recommendation: In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 31E; 31Z; 32A; 72B.

AR-1715-0061

ECM/DF Systems Repairmen

Course Number: 102-33G20.

Location: Security Agency School, Ft. Devens, MA.

Length: 16 weeks (522 hours).

Exhibit Dates: 6/69–Present.

Objectives: To train intercept equipment repairmen to maintain and repair electronic countermeasure direction-finding equipment.

Instruction: Lectures and practical exercises in the installation, maintenance, and troubleshooting of electronic countermeasure direction-finding equipment, including various test sets, direction-finding principles, target transmitter operation, logic symbols and circuits, various tubes and antennas, generators, receivers, power systems, calibrators, and hydraulic systems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory, and additonal credit in electrical laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 32B; 33G; 33Z.

AR-1715-0062

COMSEC Equipment MAIT

Course Number: 4C-F9; 160-F2.

Location: Signal School, Ft. Monmouth, NJ.

Length: 3 weeks (94 hours).

Exhibit Dates: 7/73–Present.

Objectives: To train technicians to maintain communications security equipment.

Instruction: Lectures and laboratories in the operation and maintenance of communications security equipment and in military instuction techniques.

Credit Recommendation: In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 31S; 31T; 32F; 32G; 31U; 290A; 341A; 721A.

AR-1715-0063

1. Senior Field Systems COMSEC Repair
2. Field Systems COMSEC Repair
3. Field Systems COMSEC Repair

Course Number: 160-31T30.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Gordon, GA. *Version 3 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 27–33 weeks (1007–1230 hours). *Version 2:* 27–33 weeks (998–1221 hours). *Version 3:* 33 weeks (1238 hours).

Exhibit Dates: *Version 1:* 2/77–Present. *Version 2:* 1/75–1/77. *Version 3:* 1/72–11/74.

Objectives: To train enlisted personnel to install, operate, and repair field systems communications security (COMSEC) equipment.

Instruction: *Version 1:* Course is divided into two phases. Phase I (6 weeks) includes solid state circuitry for power supplies, audio amplifiers, oscillators, and logic trainers. Phase II (27 weeks) covers soldering techniques and security equipment and specific military equipment theory and nomenclature. Note: Students who have completed modules 201, 202, 203, and 7 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (33 weeks) of this course. *Version 2:* The 27-week course is concerned with the application of general troubleshooting techniques to specific military equipment. The 33-week course also contains general information concerning AC and DC circuit troubleshooting, with use of oscilloscope, UTVM, and pulse generators. Note: Students who have completed Modules 1, 2, 3 and 4 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (27 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete Phases I and II (33 weeks). *Version 3:* Lectures and laboratories in electronic fundamentals (based on mathematics through trigonometry); DC and AC fundamentals, including resonance considerations, phase angles, and apparent power; rectification; power supplies; regulation transistors; FETs; Zener diodes; unijunction transistors; oscillators; amplifiers; pulse and switching circuits; and theory, maintenance, and repair of IFF radar systems and equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in precision soldering for students completing 27 weeks or 4 semester hours in basic electronics or troubleshooting and 2 semester hours in precision soldering for students completing 33 weeks (see note above) (4/77); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronic circuit analysis and troubleshooting for students completing either 27 or 33 weeks (see note above) (4/77). *Version 2:* In the vocational certificate category, 1 semester hour in basic electronics laboratory for those students completing 27 weeks or 1 semester hour in basic electronics laboratory and 3 in basic electricity or electronics for students attending 33 weeks of the course (see note above) (5/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity or electronics for students attending 33 weeks of the course (see note above) (5/75). *Version 3:* In the vocational certificate category, 30 semester hours in electronics, and credit in electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 20 semester hours in electronics, and additional credit in electronics on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, 10 semester hours in electronics, and additional credit in electronics on the basis of institutional evaluation (3/74).

Related Occupation Codes: 31T; 31U.

AR-1715-0064

Radio Relay and Carrier Attendant Skill Development Base

Course Number: 202-31M40-I.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 13 weeks (517 hours).

Exhibit Dates: 12/68–12/71.

Objectives: To train radio relay and carrier attendants to perform and/or supervise the installation and operation of tactical radio relay stations.

Instruction: Lectures and practical exercises in installation, administrative supervision, and operation of tactical communications systems; small-unit tactics; tactical field exercises; and general military subjects.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (3/74).

Related Occupation Codes: 31M; 31Z.

AR-1715-0065

CRITICOMM Operator

Course Number: 580-F2.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 2 weeks (79 hours).

Exhibit Dates: 2/72–7/73.

Objectives: To train communications center specialists to operate CRITICOMM terminal and relay stations and to read Baudot five-level teletypewriter code.

Instruction: Lectures and practical exercises in CRITICOMM, message preparation and tape reading, message-handling procedures, and terminal and relay operations.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

Related Occupation Codes: 72B.

AR-1715-0066

Television Equipment Repair Transition

Course Number: 11-R-285.1T.

Location: Signal School, Ft. Monmouth, NJ.

Length: 3 weeks (92 hours).

Exhibit Dates: 3/65–12/68.

Objectives: To train television equipment repairmen to maintain and repair solid-state video tape recorders.

Instruction: Lectures and laboratories in transistors, including introduction to semiconductors and semiconductor diodes, PNP and NPN devices, transistor circuitry, troubleshooting and repair procedures for transistorized equipment, and special-purpose semiconductor devices; and video tape recorders, including video tape recording principles, maintenance of video tape recorders, maintenance of color and auxiliary racks of video tape recorders, and operation of complete television systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics, 1 in electronics laboratory, and, on the basis of institutional evaluation, additional credit in electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics, 1 in electronics laboratory (3/74).

AR-1715-0067

Field General COMSEC Maintenance

Course Number: 160-31S20.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 13–15 weeks (471–542 hours). *Version 2:* 15 weeks (554 hours).

Exhibit Dates: *Version 1:* 8/74–Present. *Version 2:* 1/72–7/74.

Objectives: To train enlisted personnel to operate and maintain field general cryptographic equipment.

Instruction: *All Versions:* Lectures and laboratories in teletypewriter principles, communications security equipment, electronic tactical teletypewriter security equipment, speech security equipment, digital data regenerative repeaters, and maintenance procedures. *Version 1.* Note: Students who have completed Module 1 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (13 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who do not attend COBET will complete both Phases I and II (15 weeks) of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in basic electricity and electronics and 2 semester hours in basic electrical laboratory for those students completing 15 weeks; or 3 semester hours in basic electricity and electronics and 1 in basic electrical laboratory for those students completing 13 weeks (see note above) (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory for those students completing 15 weeks; no credit for those students completing 13 weeks (see note above) (5/75). *Version 2:* In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 31S.

AR-1715-0068

1. ADMSE Repairer
2. Automatic Digital Message Switch Equipment Repair
   (ADMSE Repair)
3. Automatic Data Processing (ADP) Repair, Phase V—ADMS Equipment Repair
   (ADMS Equipment Repair)
4. Automatic Data Processing (ADP) Repair, Phase V—ADMS Equipment Repair
   (ADMS Equipment Repair)

Course Number: *Version 1:* 150-34H20. *Version 2:* 150-34H20. *Version 3:* 150-34D20 (Phase V). *Version 4:* 150-34D20 (Phase V); 622-F5.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Gordon, GA. *Version 3 :* Signal School, Ft. Gordon, GA. *Version 4 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 39 weeks (1457 hours). *Version 2:* 39 weeks (1457 hours). *Version 3:* 20 weeks (734 hours). *Version 4:* 19–20 weeks (716–734 hours).

Exhibit Dates: *Version 1:* 8/78–Present. *Version 2:* 4/75–7/78. *Version 3:* 8/73–3/75. *Version 4:* 4/68–7/73.

Objectives: To train automatic digital programing repairmen to maintain the overseas Autodin, automatic digital message switch (ADMS).

Instruction: *Version 1:* Instruction in the basics of electronics plus study of logic and digital circuits. Several pieces of Army equipment are studied with an emphasis on troubleshooting. The equipment studied is very similar to a digital computer. *Version 2:* Lectures and laboratories in ADMS programming, processor groups, peripheral equipment control units, memory and memory control, memory assemblies, configuration control and consoles, and maintenance and operations. Instruction deals specifically with the automatic digital message switching equipment. *Version 3:* Lectures and laboratories in ADMS programming, processor groups, peripheral equipment control units, memory and memory control, memory assemblies, configuration control and consoles, and maintenance and operations. *Version 4:* Lectures and laboratories in ADMS programming, processor groups, peripheral equipment control units, memory and memory control, memory assemblies, configuration control and consoles, and maintenance and operations.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in computer repair (8/79) in the lower-division baccalaureate/associate degree category, 4 semester hours in digital circuits, 6 in computer repair, and 3 in basic electronics (8/79). *Version 2:* In the vocational certificate category, 3 semester hours in digital circuitry (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital equipment laboratory and 3 in computer systems (4/77). *Version 3:* In the vocational certificate category, 6 semester hours in digital circuits and 2 in digital circuits laboratory (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital circuits laboratory (5/75). *Version 4:* In the vocational certificate category, 12 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics (3/74). *Version 1:* 17

AR-1715-0069

ADMSC Maintenance Supervisory

Course Number: 4C-F11; 4C-F11; 622-F7.

Location: Signal School, Ft. Monmouth, NJ.

Length: 11-15 weeks (389-564 hours).
Exhibit Dates: 4/68-Present.

Objectives: To train data processing equipment repair technicians to supervise the maintenance of overseas automatic digital message-switching centers.

Instruction: Lectures and practical exercises in digital computer principles, switching units, logic functions, magnetic tape and drum principles, peripheral equipment, and systems procedures.

Credit Recommendation: In the vocational certificate category, 8 semester hours in digital computers, 4 in computer laboratory (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in digital computers, 2 in computer laboratory (3/74); in the upper-division baccalaureate category, 2 semester hours in digital computers (3/74).

Related Occupation Codes: 301A; 521A.

1. ADMS Peripheral Equipment Repair
2. Automatic Data Processing (ADP) Repair, Phase IV—ADMS Peripheral Equipment Repair
3. ADMS Peripheral Equipment Repair

Course Number: *Version 1:* 150-34L20. *Version 2:* 150-34D20 (Phase IV). *Version 3:* 622-F4.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ. *Version 3 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 15-23 weeks (603-902 hours). *Version 2:* 9 weeks (295-304 hours). *Version 3:* 9 weeks (312 hours).

Exhibit Dates: *Version 1:* 6/76-Present. *Version 2:* 8/69-5/76. *Version 3:* 4/68-7/69.

Objectives: To acquaint enlisted personnel with the techniques required to operate, inspect, test, and repair the specified switching system peripheral equipment.

Instruction: *Version 1:* Course is divided into two phases. Phase I (8 weeks) includes instruction in circuitry, for operation and repair, of solid state power supply, audio amplifier, audio oscillator, pulse generator, and logic trainer. Phase II (15 weeks) consists of lectures and practical exercises in switching system repair, including magnetic tape subsystem repair, digital circuit analysis, automatic digital switching system (ADMS) equipment maintenance and repair, and printer and memory operation and repair. Note: Students who have attended modules 201, 202, 203, 4, and 7 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II of this course. *Version 2:* Lectures and practical exercises in switching system repair, including magnetic tape subsystem repair, digital circuit analysis, automatic digital switching system (ADMS) equipment maintenance and repair, and printer and memory operation and repair. *Version 3:* Instruction also includes ADMS peripheral equipment operation, maintenance, and repair.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in electronic circuits and troubleshooting for students completing 23 weeks (see note above) (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems laboratory for students completing either 15 or 23 weeks (see note above) (4/77). *Version 2:* In the vocational certificate category, 3 semester hours in digital computer systems (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital computer systems laboratory (5/75). *Version 3:* In the vocational certificate category, 12 semester hours in computer technology or electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in computer technology or electronics (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 34D; 09B; 34L.

AR-1715-0071

Radio Systems Officer

Course Number: *All Versions:* 4C-0505; 4C-0500. *Version 2:* 4C-0503.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 10 weeks (356 hours). *Version 2:* 12-16 weeks (420-562 hours).

Exhibit Dates: *Version 1:* 6/74-Present. *Version 2:* 1/68-5/74.

Objectives: To train commissioned officers to plan, direct, and supervise the installation, operation, and maintenance of tactical and fixed-station radio, microwave radio, and tropospheric scatter equipment and systems.

Instruction: *Version 1:* Lectures and practical exercises include cursory discussions of Ohm's Law, series and parallel circuits, AC circuits, amplifiers, receiver and transmitter fundamentals, and wave propagation. Specific topics include military pulse and FDM systems, field radio, satellite communications, and tropospheric scatter systems. *Version 2:* Lectures and laboratories in DC and AC fundamentals, tubes, transistors, amplifiers, oscillators, transmitters, radar fundamentals, TV, wave propagation and transmission lines, multiplexing, power generation, field radio, telephone equipment, satellite communications, electronic warfare, microwaves, and tropospheric scatter systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic communications and 1 in electronics laboratory (5/75); in the upper-division baccalaureate category, 3 semester hours as an elective in electronic communications (5/75). *Version 2:* In the vocational certificate category, 10 semester hours in electronics, and additional credit in electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in electronics (3/74); in the upper-division baccalaureate category, 6 semester hours in electronics (3/74).

AR-1715-0072

1. Radio Terminal Sets AN/TRC-90/129/132 Repair
2. Radio Terminal Set AN/TRC-90 (RF Portion)

Course Number: *Version 1:* 101-F6. *Version 2:* 11-R-F42.

Location: Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 6 weeks (222 hours). *Version 2:* 5 weeks (190 hours).

Exhibit Dates: *Version 1:* 5/69-Present. *Version 2:* 10/64-4/69.

Objectives: To train microwave repairmen to operate and maintain AN/TRC-90/129/132 tropospheric scatter communications sets.

Instruction: *All Versions:* Lectures and laboratories in tropospheric transmitters and receivers, and operation and repair of tropospheric scatter communications systems. *Version 1:* Includes voice and teletype multiplexing equipment, transportable tropospheric scatter radio terminal sets, and transportable scatter system operations.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (3/74). *Version 2:* In the vocational certificate category, 1 semester hour in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 26L.

AR-1715-0073

Strategic Microwave Systems Operation and Maintenance

Course Number: 101-26V10.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 11-17 weeks (394-617 hours). *Version 2:* 17 weeks (598-630 hours).

Exhibit Dates: *Version 1:* 5/76-9/78. *Version 2:* 8/68-4/76.

Objectives: To train enlisted personnel to install, operate, and maintain line-of-sight and tropospheric-scatter microwave radio equipment.

Instruction: *Version 1:* Course is divided into two phases. Phase I (6 weeks) includes lectures and practical experience in troubleshooting and repair of power supplies, audio amplifiers, audio oscillators, and pulse generators. Phase II (11 weeks) covers RF energy generation; solid state circuitry; wave shaping circuitry; frequency modulation; and frequency division multiplexing equipment, radio sets, multiplexer sets, and tropospheric scatter radio terminal equipment operation, installation, and maintenance. Note: Students who have attended modules 201, 202, 203, and 4 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II of this course. *Version 2:* Lectures and practical exercises in electrical and electronic fundamentals; RF energy generation; solid-state circuitry; wave-shaping circuitry; frequency modulation; and frequency division multiplexing equipment, radio sets, multiplexer set, and tropospheric scatter radio terminal equipment operation, installation, and maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in basic electronics and troubleshooting for completion of 17 weeks (see note above) (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in communication system troubleshooting for students completing either 11 or 17 weeks (see note above) (4/77). *Version 2:* In the vocational certificate category, 16 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in electronics (3/74); in the upper-division baccalaureate category, 3 semester hours in electronics (3/74).

Related Occupation Codes: 09B; 26V.

AR-1715-0074

Satellite Communications Fundamentals
(Satellite Communications PRE NET Training)

Course Number: 11-R-F.

Location: Signal School, Ft. Monmouth, NJ.

Length: 8-10 weeks (304-380 hours).

Exhibit Dates: 9/64-12/68.

Objectives: To provide microwave equipment repairmen, radar repairmen, or fixed-plant carrier equipment repairmen with training in satellite communications.

Instruction: *All Versions:* Lectures and laboratories in history of communications, ground terminal configurations, and future of satellite communications; principles and applications of semiconductor devices, rectifiers, transistors, varactors, bias circuits, amplifier configurations, oscillators, power supplies, regulators, and multivibrators; digital data processing, binary notation, gating circuits, flip-flops, registers, counters, coders, and decoders; satellite communications devices and techniques, klystrons, antennas, FM receivers, modems, parametric amplifiers, synchro and servo circuits, and tracking systems. *Version 1:* Includes an introduction to spread spectrum and measurement interpretation.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1715-0075

Ballistic Missile Propulsion and Structures Repair (Pershing)

Course Number: 631-376.1; 9-S-376.1; 9-S-F38.

Location: Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 12-14 weeks (417-501 hours).

Exhibit Dates: 7/62-12/68.

Objectives: To train enlisted personnel to test and maintain Pershing missile electromechanical systems and associated equipment.

Instruction: Lectures and practical exercises in Pershing ballistic missile electromechanical systems and associated equipment testing and maintenance, including basic electricity, motors and generators, control devices, AC circuit analysis, transformers, and ground handling equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics, and 4 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 46M.

AR-1715-0076

Guided Missile Fire Control System Maintenance, SSM

Course Number: 44-OE-31.

Location: Artillery School, Ft. Bliss, TX.

Length: 32 weeks (1278 hours).

Exhibit Dates: 1/55-12/68.

Objectives: To train warrant officers and enlisted personnel to operate and maintain a surface-to-surface guided missile fire control system.

Instruction: Lectures and practical exercises in the operation and maintenance of a surface-to-surface guided missile fire control system, including basic mathematics, electricity, radio and radar electronics, analog computer and Dopler radio principles and operation, and employment of the Corporal fire control system.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity/electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity/electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity/electronics, and additional credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1715-0077

1. Nike Launcher Control Repair
2. Nike Launcher Control Repair
3. Nike Launcher Control Systems Repair (Ajax/Hercules)

(SAM Launcher Control System Repair)

Course Number: *Version 1:* 121-22G20. *Version 2:* 9-S-251.1. *Version 3:* 9-R-251;1 9-E-62.

Location: *Version 1:* Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Ordnance Guided Missile School, Redstone Arsenal, AL. *Version 3:* Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 16-19 weeks (534-667 hours). *Version 2:* 10-14 weeks (360-502 hours). *Version 3:* 7-9 weeks (228-315 hours).

Exhibit Dates: *Version 1:* 10/66-5/74. *Version 2:* 8/59-9/66. *Version 3:* 7/55-7/59.

Objectives: To train enlisted and civilian personnel to inspect, test, and maintain Nike Hercules launcher control electrical, mechanical, and electronic components and associated test equipment.

Instruction: Lectures and practical exercises in Nike Hercules launcher control electrical, mechanical, and electronic components and associated test equipment inspection, testing, and maintenance, including electricity and electronics fundamentals; ordnance shop practices; launcher assembly and control area introduction; equipment operation; maintenance procedures; underground launchers; command test circuits; technical inspection; and system analysis.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 6 semester hours in electricity and electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electricity and electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* No credit because of the limited specialized nature of the course (3/74).

Related Occupation Codes: 22G.

1. Surface-to-Surface Missile System Maintenance (Pershing)
   Warrant Officer Intermediate
2. Ballistic Missile Maintenance Technician (Pershing)

Course Number: *Version 1:* 4-9-C30-I; 4F-241F-A. *Version 2:* 4F-241F; 122-F3; 9-N-F39; 9-N-241F.

Location: *All Versions:* Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 29 weeks (1038 hours). *Version 2:* 31-35 weeks (1111-1245 hours).

Exhibit Dates: *Version 1:* 10/70-Present. *Version 2:* 7/62-9/70.

Objectives: To provide field artillery missile system technicians, Pershing (214E), with development training in general military and missile-related subjects.

Instruction: Lectures and practical exercises in Army organization, military resource management, maintenance, and special operations; missile electronic and digital computer fundamentals; and Pershing digital equipment, guidance and control, and electrical mechanical systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in electronic digital computers (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronic digital computers (3/74); in the upper-division baccalaureate category, 3 semester hours in electronic digital computers (3/74). *Version 2:* In the vocational certificate category, 8 semester hours in electronic digital computers (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronic digital computers (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 241F; 214E.

2. Pershing Electronic Repair
3. Pershing Electronic Repair
4. Ballistic Missile Guidance and Control Repair (Pershing)
5. Ballistic Missile Guidance and Control Repair (Pershing)

Course Number: *Version 1:* 121-21L10. *Version 2:* 121-21L20. *Version 3:* 121-21L20. *Version 4:* 121-21L20. *Version 5:* 121-21L20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 35 weeks (1112 hours). *Version 2:* 32-36 weeks (1100-1271 hours). *Version 3:* 36 weeks (1255-1271 hours). *Version 4:* 31 weeks (1098 hours). *Version 5:* 31 weeks (1091 hours).

Exhibit Dates: *Version 1:* 9/78-Present. *Version 2:* 5/74-8/78. *Version 3:* 6/73-4/74. *Version 4:* 3/71-5/73. *Version 5:* 4/69-2/71.

Objectives: To train enlisted personnel to inspect, operate, test, and repair Pershing missile ground support equipment.

Instruction: *Version 1:* Lectures and practical exercises in Pershing missile electronic assemblies operation, maintenance, and repair, including electronic fundamentals;

missile electronics; and electronic equipment maintenance, safety, control, portable test equipment and hand tool distribution, systems analysis, and shop operations. Course includes AC,DC, resonance, transformers, power supplies, syncrodevices, soldering techniques, solid state devices and circuits, handtool use, and Pershing missile system test, evaluation, alignment, maintenance and repair. *Version 2:* Lectures and practical exercises in Pershing missile electronic assemblies operation, maintenance and repair, and electronic maintenance, safety, quality control, portable test equipment and hand tools usage, power distribution, systems analysis and shop operations. Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (31-32 weeks) in which is included amplifiers, oscillators, and introduction to logic circuits and digital computers. For COBET recommendation, see AR-1715-0389. Students who have not attended COBET will complete both Phases I (including AC and DC circuits, resonant circuits, and transistor fundamentals) and II for a total of 36 weeks. *Version 3:* Lectures and practical exercises in Pershing missile electronic assemblies operation, maintenance, and repair, including electronic fundamentals; missile electronics; digital computers introduction, computer arithmetic, and logic symbols and circuits; and electronic equipment maintenance, safety, quality control, portable test equipment and hand tools usage, power distribution, systems analysis, and shop operations. *Version 4:* Lectures and practical exercises in Pershing missile electronic assemblies operation, maintenance, and repair, including electronic fundamentals; missile electronics; digital computers introduction, computer arithmetic, and logic symbols and circuits; and electronic equipment maintenance, safety, quality control, portable test equipment and hand tools usage, power distribution, systems analysis, and shop operations. *Version 5:* Lectures and practical exercises in Pershing missile electronic assemblies operation, maintenance, and repair, including electronic fundamentals; missile electronics; digital computers introduction, computer arithmetic, and logic symbols and circuits; and electronic equipment maintenance, safety, quality control portable test equipment and hand tools usage, power distribution, systems analysis, and shop operations.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 2 in transistor devices and circuits and 5 in electronics equipment repair techniques (8/79). *Version 2:* In the vocational certificate category, 9 semester hours in basic electronics, 9 in computer fundamentals for students who complete 31-32 weeks of the course or, 15 semester hours in basic electronics, 9 in computer fundamentals for students who complete 36 weeks of the course (see note above) (8/77). *Version 3:* In the vocational certificate category, 8 semester hours in electronics and digital computers (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics and digital computers (3/74). *Version 4:* In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 5:* In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 21L.

AR-1715-0080

REDSTONE ELECTRONIC MATERIEL MAINTENANCE

Course Number: 6-N-1192B; 6-N-218.1; 6-N-224.3B.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 20-22 weeks (556-931 hours).

Exhibit Dates: 5/57-12/68.

Objectives: To train enlisted personnel and warrant officers to assemble, install, calibrate, adjust, and maintain on-missile electronic guidance control components, systems, and associated electronic test equipment for Redstone missiles.

Instruction: Lectures and laboratories in basic electricity and electronics, radio electronics, radar electronics, magnetism, oscilloscopes, and R-L and C circuits.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics (3/74).

SHORT RANGE AIR DEFENSE (SHORAD) SYSTEMS TECHNICIAN

(Chaparral/ Vulcan System Technician)

Course Number: *All Versions:* 4F-224B. *Version 2:* 121-F21.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 19 weeks (622-648 hours). *Version 2:* 15-16 weeks (551-582 hours).

Exhibit Dates: *Version 1:* 4/74-Present. *Version 2:* 11/69-3/74.

Objectives: To train warrant officers and enlisted personnel with fire control experience to operate and maintain the Chaparral/Vulcan air defense system and associated equipment.

Instruction: Lectures and practical exercises in maintenance of the Chaparral/Vulcan air defense system, including digital fundamentals, armament and turret electronics, performance tests, weapons equipment, antennas computer fundamentals, power supplies, and test equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in basic electronics, 2 in digital fundamentals (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in digital fundamentals (2/75); in the upper-division baccalaureate category, 2 semester hours in digital systems, and additional credit on the basis of institutional evaluation (2/75). *Version 2:* In the vocational certificate category, 6 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (3/74).

BALLISTIC MISSILE TEST STATION REPAIR (PERSHING)

Course Number: 122-21J20; 122-378.1; 9-S-378.1; 9-S-F36.

Location: Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 29-34 weeks (1038-1228 hours).

Exhibit Dates: 7/62-12/68.

Objectives: To train enlisted personnel to inspect, test, and repair the Pershing ballistic missile test stations and associated equipment.

Instruction: Lectures and practical exercises in Pershing ballistic missile test stations and associated equipment inspection, testing, and repair, including AC and DC circuit fundamentals, motors, and generators; semiconductor fundamentals; power supplies; voltage regulators; solid-state circuit analysis; amplifiers, oscillators, and multivibrators; logic circuitry; and servomechanism fundamentals.

Credit Recommendation: In the vocational certificate category, 20 semester hours in electricity, electronics, and electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 10 semester hours in electricity, electronics, and electrical laboratory (3/74); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 21J.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 17 weeks (627 hours). *Version 2:* 18 weeks (673 hours).

Exhibit Dates: *Version 1:* 2/65-12/68. *Version 2:* 5/63-1/65.

Objectives: To train enlisted personnel to maintain field radio equipment.

Instruction: *All Versions:* Lectures and practical exercises in transmitter and receiver fundamentals, transmitter and receiver maintenance and repair, field radio teletypewriter equipment operation and maintenance, and support maintenance procedures. *Version 1:* Instruction includes installation, operation, adjustment, and repair of transistorized FM radio sets.

Credit Recommendation: *Version 1:* In the vocational certificate category, 9 semester hours in electronics or radio repair (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (3/74). *Version 2:* In the vocational certificate category, 6 semester hours in electronics or radio repair (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (3/74).

AR-1715-0094

1. SENIOR FIELD GENERAL COMSEC REPAIR
   (Field General COMSEC Repair)
2. FIELD GENERAL COMSEC REPAIR

Course Number: 160-31S30.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 28-38 weeks (1039-1354 hours). *Version 2:* 38 weeks (1428 hours).

Exhibit Dates: *Version 1:* 1/74-Present. *Version 2:* 1/67-12/73.

Objectives: To train enlisted personnel to install, inspect, test, and maintain tactical communications security and crypto ancillary equipment.

Instruction: *All Versions:* Lectures and practical exercises in maintenance of communications security and ancillary equipment, including electrical fundamentals, circuitry, solid state circuitry and logic, wave shaping, multivibrators, time constants, regulators, principles of teletypewriter equipment, voice and electromechanical security equipment, and systems installation. *Version 1:* Note: Students who have attended 6 weeks of Common Basic Electronics Training (COBET) will complete only Phase II-VII (or only Phase II after 1/77) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete all phases of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in precision soldering for students who complete only Phases II-VII (28 weeks) or Phase II (32 weeks after 1/77) or 4 semester hours in basic electronics and troubleshooting and 2 semester hours in precision soldering for students who complete the entire course (34 or 38 weeks) (see note above) (4/77); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronic circuit analysis and troubleshooting for students completing 28, 32, 34 or 38 weeks of the course (4/77). *Version 2:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics for non-electronics majors, and credit in electricity or electronics on the basis of institutional evaluation for electronics majors (3/74); in the upper-division baccalaureate category, 6 semester hours in electricity or electronics for non-electronics majors (3/74).

Related Occupation Codes: 31S; 31U; 09B.

AR-1715-0095

RADIO OPERATOR

Course Number: *Version 1:* 201-05B10; 05B10-CELT. *Version 2:* 201-05B20.

Location: Signal School, Ft. Gordon, GA; Army Training Centers, Continental U.S..

Length: *Version 1:* 7-12 weeks (237-496 hours). *Version 2:* 9 weeks (315-319 hours).

Exhibit Dates: *Version 1:* 3/79-Present. *Version 2:* 6/72-2/79.

Objectives: To train enlisted personnel to install, operate, and maintain field tactical radio sets and associated equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of tactical radio sets, including communications exercises, driver training, international Morse code, communications procedure and operation of field radio equipment, and ancillary communications equipment operation.

Credit Recommendation: *Version 1:* Credit is not recommended due to the military-specific nature of the course (8/79). *Version 2:* In the vocational certificate category, 2 semester hours in electronics (3/74).

Related Occupation Codes: 05B.

AR-1715-0096

FIXED CIPHONY REPAIR

Course Number: *Version 1:* 160-32F10. *Version 2:* 160-32F20. *Version 3:* 160-32F20.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 35-36 weeks (1312-1346 hours). *Version 2:* 40 weeks (1426 hours). *Version 3:* 40 weeks (1504 hours).

Exhibit Dates: *Version 1:* 2/77-Present. *Version 2:* 4/73-1/77; 4/73-3/73.

Objectives: To train enlisted personnel to install, operate, and repair strategic microwave radio systems.

Instruction: *All Versions:* Lectures and practical experience in scope and VTVM basic testing techniques; duplex key generator operation; speech compression and digitalization equipment operation; wideband, full-duplex speech security equipment operation; narrow-band subscriber terminal operation; and depot repair techniques. *Version 1:* Instruction includes lecture and laboratory experience in solid state power supply, audio amplifier, audio oscillator and logic trainer circuitry. Emphasis on testing and troubleshooting. Basic 'hands on' trouble shooting and testing of equipment also takes place. *Version 2:* Instruction includes electronic communications equipment troubleshooting, binary number system introduction, and basic logic circuits. *Version 3:* Instruction includes electrical fundamentals.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in digital circuitry, 2 semester hours in soldering and printed circuit board repair and 12 in electronics laboratory/troubleshooting (8/79); in the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics (8/79). *Version 2:* In the vocational certificate category, 15 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory (3/74). *Version 3:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 32F.

AR-1715-0097

FIELD SYSTEMS COMSEC MAINTENANCE

Course Number: 160-31T20.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 8-10 weeks (281-351 hours). *Version 2:* 10 weeks (346-516 hours).

Exhibit Dates: *Version 1:* 8/74-Present. *Version 2:* 1/72-7/74.

Objectives: To train enlisted personnel to maintain communications equipment.

Instruction: *All Versions:* Lectures and laboratories in communications equipment maintenance, including electricity introduction (battery characteristics, Ohm's law, basic electrical circuits, tube theory, relays, transformers, solid-state diodes, transistors, oscilloscope use, and binary number system); laboratory work, including meter reading, continuity testing, soldering, reading schematics, VTVM use, and simple equipment use; and installing, troubleshooting, identifying, inspecting, testing, and replacing defective electrical parts. *Version 1:* Note: Students who have completed Module 1 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (8 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who do not attend COBET will complete both Phases I and II (10 weeks) of this course.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electrical laboratory for those students completing 10 weeks; or 1 semester hour in basic electrical laboratory for those students completing 8 weeks (see note above) (5/75). *Version 2:* In the vocational certificate category, 2 semester hours in electrical test laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical test laboratory, and additional credit in electrical test laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 31T.

AR-1715-0098

STRATEGIC MICROWAVE SYSTEMS REPAIR

Course Number: 101-26V20.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Gordon, GA. *Version 3 :* Signal School, Ft. Monmouth, NJ. *Version 4 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 22-32 weeks (812-1187 hours). *Version 2:* 26-32 weeks (928-1139 hours). *Version 3:* 32 weeks (1200 hours). *Version 4:* 23 weeks (858 hours).

Exhibit Dates: *Version 1:* 7/76-9/78. *Version 2:* 5/74-6/76. *Version 3:* 8/70-4/74. *Version 4:* 10/68-7/70.

Objectives: To train enlisted personnel to install, operate, and repair strategic microwave radio systems.

Instruction: *Version 1:* Lectures and practical experience in troubleshooting and repair of power supplies, audio amplifiers, audio oscillators, pulse generators, transceivers and logic circuits; operation and troubleshooting of microwave communication equipment and principles of microwave techniques. Note (1): Students who have completed Modules 201, 202, 203, 4 5/6, and 7 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (22 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (32 weeks) of this course. *Version 2:* Lectures and practical exercises in operation and troubleshooting microwave communication equipment, electrical fundamentals, pulse generator circuitry, electronics applied to basic receivers and logic circuits, and principles of microwave techniques. Note (2): Students who have completed Modules 1, 2, 3 and 4 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (26 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete Phases I and II (32 weeks) of this course. *Version 3:* Lectures and laboratories in AC and DC circuits and networks fundamentals; electronic amplifier fundamentals, including vacuum tubes; receiver fundamentals, including heterodyning, AGC, coupling, oscillators and mixers; semiconductor theory; basic emitter-collector configurations; wave-shaping circuits on DC and differential amplifiers; FM and microwave techniques; voice and teletype multiplexing equipment; and radio system installation, operation, and repair techniques. *Version 4:* Instruction is same as Version 2 and also includes generation of RF energy and time constants.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in basic electronics and troubleshooting for those students completing 32 weeks of the course (see note (1) above) (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in communication system troubleshooting for students completing either 22 or 32 weeks of the course (see note (1) above) (4/77). *Version 2:* In the vocational certificate category, 6 semester hours in communications electronics for those students completing 26 weeks or 10 semester hours in communications electronics for students attending 32 weeks of the course (see note (2) above) (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronics for students completing 26 weeks or 3 semester hours as an elective in electronics and 2 in electronics laboratory for students attending 32 weeks of the course (see note (2) above) (6/75). *Version 3:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 4:* In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 09B; 26V.

1. Surface-to-Air Missile System Maintenance (Hawk) Warrant Officer Intermediate
2. Air Defense Missile Maintenance Technician (Hawk)
3. Air Defense Missile Maintenance Technician (Hawk)

(Hawk Maintenance Supervision)

Course Number: *Version 1:* 4-9-C30-F; 4F-251C-A. *Version 2:* 4F-251C; 122-F5. *Version 3:* 9-N-251C.

Location: *Version 1:* Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Missile and Munitions School, Redstone Arsenal, AL. *Version 3:* Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 17 weeks (612 hours). *Version 2:* 41 weeks (1466 hours). *Version 3:* 40-46 weeks (1458-1661 hours).

Exhibit Dates: *Version 1:* 10/71-Present. *Version 2:* 9/69-9/71. *Version 3:* 5/59-8/69.

Objectives: To train warrant officers who have a background in missile technology to repair Hawk air defense missiles.

Instruction: *All Versions:* Lectures and practical exercises in Hawk missile system support maintenance. *Version 2:* Includes test equipment, radars, power supplies, launcher, fire command console, engagement simulator, AC and DC circuits, and system analysis and troubleshooting procedures. *Version 3:* Includes test equipment, radars, power supplies, servomechanisms, fire command console, launcher, engagement simulator, logisitcal support, and system analysis.

Credit Recommendation: *Version 1:* Credit is not recommended because of the limited technical nature of the course (3/74). *Version 2:* In the vocational certificate category, 8 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics (3/74). *Version 3:* In the vocational certificate category, 8 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance management (12/68); in the upper-division baccalaureate category, 2 semester hours in electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 223B; 223D; 251D; 251D.

AR-1715-0100

Ballistic Missile Test Station Repair (Sergeant)

Course Number: 9-S-375.1; 9-S-F28.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 23-27 weeks (828-966 hours).

Exhibit Dates: 3/61-12/68.

Objectives: To train enlisted and civilian personnel to inspect, test, and repair Sergeant missile electronic systems and associated equipment.

Instruction: Lectures and laboratories in basic electricity, power supplies, transistor circuits, linear wave shaping, servomechanisms, and Sergeant test equipment.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1715-0101

Hawk Missile and Launcher Maintenance

Course Number: *Version 1:* 121-24D20. *Version 2:* 121-24D20. *Version 3:* 121-24D20. *Version 4:* 121-22J20; 44-R-227.1.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 14 weeks (514 hours). *Version 2:* 14 weeks (519-525 hours). *Version 3:* 14 weeks (507 hours). *Version 4:* 20-26 weeks (770-919 hours).

Exhibit Dates: *Version 1:* 3/75-Present. *Version 2:* 5/73-2/75. *Version 3:* 9/70-4/73. *Version 4:* 5/59-8/70.

Objectives: To train enlisted personnel in Hawk system loaders, launchers, missiles, and associated test equipment operation, adjustment, maintenance, and troubleshooting.

Instruction: Lectures and practical exercises in the maintenance of the Hawk missile and launcher, including AC and DC circuits, linear circuit elements, transistors and vacuum tubes, oscilloscopes, multimeters, and oscillators.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in basic electronics laboratory (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics laboratory (6/75). *Version 2:* In the vocational certificate category, 3 semester hours in basic electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics laboratory (6/74). *Version 3:* Credit is not recommended because of the limited technical specialized nature of the course (3/74). *Version 4:* In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 24D.

Sergeant Missile Battery Officer
(Sergeant Missile Battery)

Course Number: 4F-214F; 043-15B30; 121-15B30; 4F-F4; 121-161.2.

Location: Field Artillery School, Ft. Sill, OK; Artillery and Missile School, Ft. Sill, OK.

Length: 5-6 weeks (161-241 hours).

Exhibit Dates: 5/62-6/75.

Objectives: To train warrant officers and enlisted personnel to assemble, check out, maintain, and operate Sergeant missile and associated ground handling equipment.

Instruction: Lectures and laboratories in basic electronics and Sergeant guided missile system familiarization, operation, and maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (3/74).

Related Occupation Codes: 15B; 214E; 241F.

AR-1715-0103

Ballistic Missile Inertial Guidance and Control Repair (Pershing)

Course Number: 122-377.1; 9-S-377.1; 9-S-F35.

Location: Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 28 weeks (957-1020 hours).

Exhibit Dates: 7/62-12/68.

Objectives: To train enlisted and civilian personnel to inspect, test, and maintain electronic guidance and control assemblies of Pershing missile and related ground support equipment.

Instruction: Lectures and laboratories in missile electronics, including basic electricity, power supplies, transistors, amplifiers, digital computer fundamentals, linear wave shaping, and servomechanisms, and maintenance procedures for Pershing missiles and ground support equipment.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 21H.

AR-1715-0104

Ballistic Missile Guidance and Control Repair

Course Number: *Version 1:* 9-S-373.3. *Version 2:* 9-R-371.1.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 20 weeks (754 hours). *Version 2:* 13 weeks (456 hours).

Exhibit Dates: *Version 1:* 1/61–12/68. *Version 2:* 5/58–12/60.

Objectives: To train enlisted and civilian personnel to operate, inspect, test, and maintain ballistic missile guidance and control systems and components.

Instruction: Lectures and laboratories in basic ordnance shop practices; electrical fundamentals, electronic fundamentals, including power supplies, oscilloscopes, and analog computers; common guidance and control of ballistic missiles; and Redstone ballistic missile guidance and control systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 6 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1715-0105

Surface-to-Air Missile Systems Maintenance Warrant Officer Advanced

(Surface-to-Air Missile Systems Maintenance Warrant Officer Intermediate (221B, 222B, 223C))

Course Number: 2-44-C32; 2-44-C30.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 21 weeks (747–759 hours). *Version 2:* 23 weeks (763–920 hours). *Version 3:* 24 weeks (658–882 hours).

Exhibit Dates: *Version 1:* 2/79–Present. *Version 2:* 8/76–1/79. *Version 3:* 1/73–7/76.

Objectives: To train warrant officers to perform as technical advisors or instructors on surface-to-air missile systems.

Instruction: Lectures and practical exercises in surface-to-air missile systems, including high- and low-altitude air defense, missile electronics and control systems, digital computer fundamentals, data storage, semiconductor theory, automatic data processing, amplifiers, oscillators, multivibrators, RF transmitters and receivers, and logic circuits. Version 2 includes probability and statistics.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 3 semester hours in semiconductor electronics, 3 in electrical laboratory, 1 in computer programming (8/77); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory, 2 in statistics and operational analysis (8/77). *Version 3:* In the vocational certificate category, 12 semester hours in electronics or digital computers (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics or digital computers (3/74); in the upper-division baccalaureate category, 3 semester hours in electronics or digital computers (3/74).

Related Occupation Codes: 221B; 221C; 222B; 251B.

AR-1715-0106

Nike-Hercules Missile Electronic Maintenance

(Nike Hercules Missile Electronic Materiel Maintenance Transition)

Course Number: 44-N-225.1T; 44-N-F6.

Location: Air Defense School, Ft. Bliss, TX.

Length: 9–11 weeks (303–402 hours).

Exhibit Dates: 10/57–12/68.

Objectives: To train warrant officers and enlisted personnel to perform and supervise the maintenance of Nike Hercules missiles and associated equipment.

Instruction: Lectures and practical exercises in components, operation, and circuitry of missile and assembly area equipment; operation and maintenance of Nike Hercules high-explosive warheads; rocket motors, and equipment in the servicing and launching area; assembly and testing of Nike Hercules nuclear warheads; and safety procedures in handling nuclear material and equipment.

Credit Recommendation: In the upper-division baccalaureate category, credit in radio or electronics on the basis of institutional evaluation (3/74).

Related Occupation Codes: 221B; 221C.

AR-1715-0107

Artillery Communications Supervisors

(Artillery Communications Supervisors)
(Artillery Communication Supervision)
(Artillery Communication Enlisted)

Course Number: 6-R-313.6; 6-R-313.7; 6-E-1.

Location: Artillery and Missile School, Ft. Sill, OK; Artillery and Guided Missile School, Ft. Sill, OK.

Length: 13–16 weeks (495–679 hours).

Exhibit Dates: 10/55–12/68.

Objectives: To train enlisted personnel experienced in field wire, radio operation, or radio maintenance to supervise the operation of artillery communications units.

Instruction: Lectures and practical exercises in map reading, fundamentals of electricity, wire communication equipment, radio communication equipment, maintenance of communication equipment and signal supply procedures, message center procedures and cryptography, radioteletype procedures, and communication systems for artillery units.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1715-0108

Infantry Radio Maintenance

Course Number: 101-311.1; 7-R-311.1; 7-E-3.

Location: Infantry School, Ft. Benning, GA.

Length: 12–15 weeks (476–615 hours).

Exhibit Dates: 1/55–12/68.

Objectives: To train enlisted personnel to perform organizational maintenance on field radios and associated electronic equipment.

Instruction: Lectures and laboratories in fundamentals of electricity, including AC and DC circuits, power supplies, vacuum tubes, transformers, amplifiers, oscillators, modulation, and receiving and transmitting circuits; and maintenance and repair of radio sets.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, credit in electricity or electronics laboratory (3/74).

Related Occupation Codes: 31B.

AR-1715-0109

Armor Radio Maintenance

Course Number: *Version 1:* 17-R-312.1. *All Versions:* 17-E-2.

Location: Armor School, Ft. Knox, KY.

Length: *Version 1:* 12–13 weeks (451–505 hours). *Version 2:* 17 weeks (705 hours).

Exhibit Dates: *Version 1:* 7/55–12/68. *Version 2:* 7/54–6/55.

Objectives: To train enlisted personnel to operate and maintain communication equipment used in armor communication systems.

Instruction: *All Versions:* Lectures and laboratories in fundamentals of electricity, repair of AM and FM radio sets, and field maintenance. *Version 1:* Emphasizes AM and FM radio repair techniques. *Version 2:* Emphasizes fundamentals of electricity and radio repair.

Credit Recommendation: *Version 1:* In the vocational certificate category, 15 semester hours in basic shop practice (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic shop practice, and additional credit in basic shop practice on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 10 semester hours in basic shop practice (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity (12/68).

AR-1715-0110

Fixed Station Radio Equipment Operation and Maintenance

Course Number: 101-32A10; 11-R-270.0; 11-E-45.

Location: Signal School, Ft. Monmouth, NJ.

Length: 14–15 weeks (508–600 hours).

Exhibit Dates: 9/54–Present.

Objectives: To train enlisted personnel to operate and maintain ground radio equipment.

Instruction: Lectures and laboratories in electrical fundamentals, basic radio fundamentals, fixed-station layout, telegraph fundamentals, terminal equipment, transmitters, radio receivers, and fixed-station integrated communications systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical or electronics laboratory (3/74).

Related Occupation Codes: 32A; 32B; 32C; 32D; 32E.

2. Radio Relay and Carrier Repair
3. Radio Relay and Carrier Repair
4. Field Carrier Equipment Repair
   (Carrier Equipment Repair)
   (Repeater and Carrier Equipment Installation and Maintenance)

Course Number: *Version 1:* 101-31L20. *Version 2:* 101-31L20; 101-294.1. *Version 3:* 101-294.1. *Version 4:* 11-R-294;1 11-E-9.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Southeastern Signal School, Ft. Gordon, GA. *Version 3:* Southeastern Signal School, Ft. Gordon, GA. *Version 4:* Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 17-23 weeks (639-855 hours). *Version 2:* 14-23 weeks (523-864 hours). *Version 3:* 28 weeks (1045 hours). *Version 4:* 20-25 weeks (800-931 hours).

Exhibit Dates: *Version 1:* 10/74-12/78. *Version 2:* 1/66-9/74. *Version 3:* 8/64-12/65. *Version 4:* 3/53-7/64.

Objectives: To train enlisted personnel to install and maintain radio relay, repeater, and carrier equipment.

Instruction: *Version 1:* Lectures and practical troubleshooting exercises in military communications systems, carrier equipment circuits and systems repair, telephone terminal testing, repair, and system analysis; and general shop practices and troubleshooting procedures. *Version 2:* Lectures and practical exercises in AC and DC circuit theory; electronics fundamentals; communications introduction; carrier equipment circuits and systems repair; telephone terminal testing, repair, and system analysis; and shop practices and troubleshooting procedures. *Version 3:* Instruction is same as Version 2 and also is more detailed and at a higher level. *Version 4:* Instruction is same as Version 2 and also is more detailed and at a higher level.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in communications electronics, 1 in communications electronics laboratory for those students completing the 17-week course or 3 semester hours in communications electronics, 2 in communications electronics laboratory for those students completing the 23-week course (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in communication electronics for those students who complete either the 17-week or 23-week course (5/75). *Version 2:* In the vocational certificate category, 6 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 9 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in radio or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electronics or electricity, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 4:* In the vocational certificate category, 9 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in radio or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electronics laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 31L; 31M.

AR-1715-0112

Artillery Radio Maintenance

Course Number: 6-R-313.1; 6-E-3.

Location: Artillery and Missile School, Ft. Sill, OK; Artillery and Guided Missile School, Ft. Sill, OK.

Length: 12-14 weeks (519-597 hours).

Exhibit Dates: 7/56-12/68.

Objectives: To train enlisted personnel to install, operate, maintain, and repair artillery communications systems equipment.

Instruction: Lectures and practical exercises in electrical fundamentals, including AC and DC circuits and theory; electronics fundamentals, including vacuum tubes, diodes, triodes, pentodes, amplifiers, and oscillators; circuit analysis for specific receivers and transmitters; and radio systems installation, operation, maintenance, and repair procedures.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 22A; 22G; 22K; 22L; 22M; 23N; 23Q; 23S; 23T; 23U.

AR-1715-0113

Guided Missile Repair Helper
(Ordnance Electronics (Entry))

Course Number: 121-22A10; 9-R-250.0; 9-E-51.

Location: *Version 1:* Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL. *Version 2:* Signal School, Ft. Monmouth, NJ.

Length: 10-11 weeks (351-402 hours).

Exhibit Dates: 9/56-Present.

Objectives: To train enlisted personnel to repair guided missile electronic equipment.

Instruction: Lectures and practical exercises in electrical and electronics fundamentals; communications electronics; pulse techniques; video systems; special-purpose circuits timing and soldering techniques; equipment record system familiarization; basic mathematics for AC and DC circuits; and operation and repair procedures for various missile transmitters, receivers, amplifiers, oscillators, voltage regulators, and servomechanisms.

Credit Recommendation: In the vocational certificate category, 8 semester hours in radio and electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in radio and electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in radio and electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

2. Nike Missile Repair
   (Nike Missile Repairman)
   (Nike Internal Guidance Repair)
3. Nike Internal Guidance Repair
   (Nike Internal Guidance System Repair)
4. SAM Internal Guidance System Repair

Course Number: *Version 1:* 121-22M20. *Version 2:* 121-22M20; 121-254;1 9-S-254.1. *Version 3:* 9-S-254;1 9-R-254.1. *Version 4:* 9-E-65.

Location: *Version 1:* Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL. *Version 3:* Ordnance Guided Missile School, Redstone Arsenal, AL. *Version 4:* Ordnance Guided Missile school, Redstone Arsenal, AL.

Length: *Version 1:* 22 weeks (744 hours). *Version 2:* 23-28 weeks (879-1039 hours). *Version 3:* 12-13 weeks (420-483 hours). *Version 4:* 7 weeks (245 hours).

Exhibit Dates: *Version 1:* 10/72-5/74. *Version 2:* 2/63-9/72. *Version 3:* 5/57-1/63. *Version 4:* 12/55-4/57.

Objectives: To train SAM electronic repair helpers to inspect, test, and repair the Nike Hercules missile and associated test equipment.

Instruction: Lectures and practical exercises in basic electricity; AC and DC circuits; linear wave shaping; communication systems; vacuum tubes, amplifiers, and video systems; and missile system operation, maintenance, and test procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (3/74). *Version 2:* In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 4 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 4:* In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 22M.

AR-1715-0115

Combat Missile System Repair
(Combat Missile System Repair (Redeye-Shillelagh-Tow))

Course Number: 121-27C20; 121-F15.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 15-24 weeks (525-844 hours).

Exhibit Dates: 5/66-Present.

Objectives: To train enlisted and civilian personnel to inspect, test, and maintain combat missile systems and associated test equipment.

Instruction: Lectures and practical exercises in combat missile systems and associated test equipment inspection, testing, and maintenance, including electricity and electronics fundamentals, transistors and transistor principles, logic circuits and digital computer operation, system components repair procedures, and safety and security procedures.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 22C.

AR-1715-0116

Ballistic Missile General Support
Shop Set Repair (Sergeant)

Course Number: 122-21F30; 122-375.2; 9-S-F44.

Location: Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 18 weeks (648-681 hours).

Exhibit Dates: 1/64-12/68.

Objectives: To train enlisted and civilian personnel to inspect, test, and repair the general support shop set and Sergeant missile electronic systems and associated equipment through field maintenance level.

Instruction: Lectures and practical exercises in missile electronics subjects, including heterodyne receivers, AM and FM transmitters, radio waves, amplifiers, basic communications circuits, missile digital controller, testing and repair of general electronics equipment, and linear wave-shaping techniques.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (3/74).

AR-1715-0117

1. Pershing System Maintenance
2. Pershing System Maintenance
3. Pershing System Maintenance
4. Pershing System Maintenance (Pershing Specialist)

Course Number: *All Versions:* 4F-214E; 121-21G20. *Version 4:* 6-N-214E; 6-N-163.2.

Location: *Version 1:* Field Artillery School, Ft. Sill, OK. *Version 2:* Field Artillery School, Ft. Sill, OK. *Version 3:* Artillery and Missile School, Ft. Sill, OK. *Version 4:* Artillery and Missile School, Ft. Sill, OK.

Length: *Version 1:* 13-14 weeks (477-525 hours). *Version 2:* 12 weeks (462 hours). *Version 3:* 14 weeks (480 hours). *Version 4:* 17-20 weeks (634-757 hours).

Exhibit Dates: *Version 1:* 5/72-7/77. *Version 2:* 10/70-4/72. *Version 3:* 12/68-9/70. *Version 4:* 8/63-11/68.

Objectives: To train warrant officers and enlisted personnel in the assembly, operation, and maintenance of Pershing missile and associated support equipment.

Instruction: Lectures and practical exercises in basic electricity, test equipment usage, AC circuit fundamentals, AC and DC motors, switches, synchro mechanisms, mathematics review, digital computer fundamentals, solid-state fundamentals, Pershing missile theory and functioning, and missile equipment operation and maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electricity or electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics laboratory (3/74). *Version 2:* In the vocational certificate category, 2 semester hours in electricity or electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (3/74). *Version 3:* In the upper-division baccalaureate category, credit in electricity or electronics laboratory on the basis of institutional evaluation (3/74). *Version 4:* In the vocational certificate category, 4 semester hours in electricity or electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electricity or electronics laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 21G; 214E; 241F.

AR-1715-0118

Ballistic Missile Digital Equipment
Repair (Pershing)

Course Number: 150-21M20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 25-26 weeks (874-911 hours).

Exhibit Dates: 2/69-Present.

Objectives: To train enlisted and civilian personnel to inspect, test, and repair the Pershing digital and associated equipment through general support maintenance level.

Instruction: Lectures and practical exercises in operation of the Pershing digital equipment, including missile electronic subjects, basic electrical principles, and computer operation, testing, and components.

Credit Recommendation: In the vocational certificate category, 16 semester hours in electronics and digital equipment (3/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in electronics and digital equipment (3/74).

Related Occupation Codes: 21M.

AR-1715-0119

Pershing System Maintenance
(Transition)

Course Number: 4F-F7; 121-F18.

Location: Field Artillery School, Ft. Sill, OK.

Length: 9 weeks (305 hours).

Exhibit Dates: 1/69-10/71.

Objectives: To train warrant officers who qualify as Pershing missile systems technicians and enlisted fire control specialists to operate new Pershing equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of new Pershing equipment, including guided missile instruction, operation of the programmer test station, the Pershing erector-launcher, firing position procedures, digital computer hardware and logic, and basic solid-state electronics related to the new equipment.

Credit Recommendation: In the vocational certificate category, 4 semester hours in digital computers (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital computers (3/74).

Related Occupation Codes: 21G; 214E; 241F.

AR-1715-0120

Chaparral System Mechanic

Course Number: 121-24N10; 121-24N20.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 10-12 weeks (404-411 hours). *Version 2:* 11-12 weeks (377-413 hours). *Version 3:* 19 weeks (688 hours). *Version 4:* 10 weeks (352 hours).

Exhibit Dates: *Version 1:* 8/76-Present. *Version 2:* 9/70-7/76. *Version 3:* 6/69-8/70. *Version 4:* 11/68-5/69.

Objectives: To train enlisted personnel to maintain Chaparral weapon systems and associated equipment.

Instruction: Lectures and laboratories in vaccum tube and transistor electronics, synchro/servo relay systems, and familiarization with low-altitude Chaparral air defense systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronic troubleshooting (8/77). *Version 2:* Credit is not recommended because of the limited specialized nature of the course (3/74). *Version 3:* In the vocational certificate category, 8 semester hours in basic electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in basic electronics (3/74). *Version 4:* Credit is not recommended because the limited specialized nature of the course (3/74).

Related Occupation Codes: 24N; 09B.

AR-1715-0121

Ballistic Meteorology Crewman,
Specialist Candidate
(Ballistic Meteorology Crewman, Skill Development Base)

Course Number: 420-93F20-I.

Location: Field Artillery School, Ft. Sill, OK.

Length: 11-12 weeks (394-455 hours).

Exhibit Dates: 2/69-Present.

Objectives: To train ballistic meteorology crewmen as supervisors or technicians on ballistic meteorology crews.

Instruction: Lectures and practical exercises in meteorology, meteorological equipment, maintenance procedures and tactical employment of meteorology sections, and leadership subjects.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

Related Occupation Codes: 93F.

AR-1715-0122

Pershing Electrical-Mechanical
Repair
(Ballistic Missile Electrical Mechanical Repair (Pershing))

Course Number: *Version 1:* 631-46N10. *Version 2:* 631-46N20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 14-18 weeks (493-639 hours).

Exhibit Dates: *Version 1:* 9/78-Present. *Version 2:* 3/69-8/78.

Objectives: To train enlisted personnel to inspect, test, and repair Pershing missile electrical, mechanical, and hydraulic systems and associated test and ground support equipment.

Instruction: Lectures and laboratory exercises including basic electricity concepts of work, energy, and power; DC and AC circuit theory-series, parallel, series-parallel, inductive, capacitive, and LCR circuits; soldering techniques and practices; basic manual skills and missile hydraulic systems and associated test and ground support equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in electronics repair techniques (8/79); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity/electronic fundamentals (8/79). *Version 2:* In the vocational certificate category, 5 semester hours in basic electronics and troubleshooting (3/75).

Related Occupation Codes: 46N.

AR-1715-0123

1. Lacrosse External Guidance Repair
2. Lacrosse External Guidance Repair
   (Lacrosse External Guidance System Repair)

Course Number: *Version 1:* 9-S-248.1. *Version 2:* 9-R-248.1.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 29 weeks (1077 hours). *Version 2:* 17–19 weeks (608–704 hours).

Exhibit Dates: *Version 1:* 2/63–12/68. *Version 2:* 6/58–1/63.

Objectives: To train electronic repair helpers to inspect, test, and maintain Lacrosse external guidance systems and associated test equipment.

Instruction: Lectures and laboratories in ordnance shop practices; missile radar and missile radar circuits, including basic electricity, basic electronics, transistors, amplifiers, and communication circuit linear wave shaping; and field maintenance of Lacrosse missile guidance central.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 4 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

1. Lacrosse Internal Guidance Repair
2. Lacrosse Internal Guidance Repair
3. Lacrosse Internal Guidance System Repair

Course Number: *Version 1:* 9-S-247.1. *Version 2:* 9-R-247.1. *Version 3:* 9-R-247.1.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 25 weeks (902 hours). *Version 2:* 14–15 weeks (504–554 hours). *Version 3:* 11 weeks (391 hours).

Exhibit Dates: *Version 1:* 2/63–12/68. *Version 2:* 8/59–1/63. *Version 3:* 6/58–7/59.

Objectives: To train enlisted and civilian personnel to inspect, test, and maintain Lacrosse internal guidance systems and associated equipment.

Instruction: Lectures and practical exercises in missile electronics, including basic electricity, solid-state devices, communication circuits, vacuum tube circuits, transistor circuits, and Lacrosse internal guidance system maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in electricity and electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity and electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 4 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1715-0125

Fixed Plant Carrier Equipment Repair

Course Number: *All Versions:* 101-32E20. *Version 2:* 11-R-274;1 11-R-297.1.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 28–29 weeks (1030–1031 hours). *Version 2:* 23–33 weeks (850–1230 hours).

Exhibit Dates: *Version 1:* 5/73–9/78. *Version 2:* 1/58–4/73.

Objectives: To train enlisted personnel to install, operate, maintain, and repair fixed-plant carrier and fixed-station radio equipment.

Instruction: *All Versions:* Lectures and practical exercises in fixed-plant carrier and fixed-station radio equipment operation, installation, maintenance, and repair, including electrical fundamentals, AC and DC series and parallel circuits, inductance and capacitance, vacuum tubes, semiconductors, electronic circuits, amplifiers, oscillators, and clippers and clampers; and specialized equipment operation, including telephones and telephone terminals, and telegraphs and telegraph terminals. *Version 2:* Instruction covers basic electronics in greater detail.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 6 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 32E.

AR-1715-0126

Nike Track Radar Repair (Improved Hercules Transition)
(Nike Track Radar Repair (Hercules Transition))

Course Number: 9-S-253.1 (T).

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 4–12 weeks (134–438 hours).

Exhibit Dates: 10/58–12/68.

Objectives: To train field maintenance personnel to maintain Nike Hercules tracking and ranging radar systems.

Instruction: Lectures and practical exercises in Nike Hercules tracking and ranging radar system functions, components operation, field maintenance test equipment, and detailed check-out and maintenance procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1715-0127

Hawk Missile and Launcher Repair (Transition Instruction)

Course Number: 121-22K20 (TI).

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 25 weeks (880 hours).

Exhibit Dates: 2/67–12/68.

Objectives: To train enlisted personnel to inspect, test, maintain, and repair the Hawk missile and launcher electronic systems.

Instruction: Lectures and practical exercises in the maintenance of the Hawk missile and launcher electronic systems, including AC and DC fundamentals (RCL, series, parallel, and series-parallel circuits, reactance, impedance, time constants); vacuum tubes, semiconductors, electronic circuits, amplifiers, clippers, clampers, oscillators, and transformers. Mathematics is pre-calculus.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 22K; 23V.

AR-1715-0128

1. Sergeant Test Equipment Repair
2. Sergeant Test Equipment Repairman

Course Number: 121-21T20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 27 weeks (938 hours). *Version 2:* 32 weeks (1157 hours).

Exhibit Dates: *Version 1:* 11/72–Present. *Version 2:* 1/67–10/72.

Objectives: To train enlisted personnel who have had previous training in algebra and general science to test, inspect, and repair Sergeant field maintenance test station equipment.

Instruction: Lectures and practical experience in Sergeant field maintenance test station inspection, testing, maintenance, and repair, including AC and DC circuit fundamentals (RLC circuits, series and parallel circuits, reactance, impedance, resonance, transients, and time constants), vacuum tubes, semiconductors, electronic circuits (amplifiers, clippers, clampers, gates, power supplies, and transformers), and mathematics through calculus.

Credit Recommendation: *Version 1:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electricity or electronics laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electtonics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 21T.

AR-1715-0129

Small Missile Systems Repair

Course Number: 632-426.1.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 1[illegible] weeks (513 hours).

Exhibit Dates: 10/66–12/68.

Objectives: To train enlisted personnel to inspect, test, and maintain small missile systems, simulators and associated test equipment.

Instruction: Lectures and practical exercises in the maintenance of specific small missile systems; AC and DC fundamentals; vacuum tubes and semiconductors; basic electronic circuits; transformers; operation and components of specific equipment, simulators, and test equipment; and troubleshooting. Mathematics is pre-calculus.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (3/74).

Related Occupation Codes: 45H.

AR-1715-0130

Land Combat Missile System Repair Technician

(Land Combat Support Missile System Repair Technician)

Course Number: 4F-271A; 121-F16.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 30 weeks (1071 hours). *Version 2:* 41 weeks (1459 hours). *Version 3:* 34 weeks (1189 hours).

Exhibit Dates: *Version 1:* 4/79–Present. *Version 2:* 1/71–3/79. *Version 3:* 9/67–12/70.

Objectives: To train warrant officers and enlisted personnel to inspect, test, maintain, and repair land combat support missile systems.

Instruction: *Version 1:* Lectures and practical exercises in land combat support missile systems testing, inspection, maintenance, and repair procedures, including limited coverage of electronic fundamentals; missile system logistical support; TOW/Dragon Missile system, Shillelagh weapon system, and Lance missile system operation, inspection, maintenance, and repair. Instruction places considerable emphasis on basic electricity, electronic principles and computer electronics. *Version 2:* Lectures and practical exercises in land combat support missile systems testing, inspection, maintenance, and repair procedures, including limited coverage of electronic fundamentals; missile system logistical support; Redeye weapon system, Shillelagh weapon system, and Chaparral/Vulcan weapon system operation, inspection, maintenance, and repair. Instruction places greater emphasis on pulse circuits in this version. *Version 3:* Lectures and practical exercises in land combat support missile systems testing, inspection, maintenance, and repair procedures, including limited coverage of electronic fundamentals; missile system logistical support; Redeye weapon system, Shillelagh weapon system, and Chaparral/Vulcan weapon system operation, inspection, maintenance, and repair.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in laboratory techniques (8/79) in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronics, 3 in computer systems, 5 laboratory measurements, and for those students enrolled in an electrical engineering program, 1 semester hour in personnel management and 3 in maintenance management (8/79). *Version 2:* In the vocational certificate category, 5 semester hours in electronic circuits (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic circuits (12/68); in the upper-division baccalaureate category, 3 semester hours in electronic circuits on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 8 semester hours in electronic circuits (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic circuits (12/68); in the upper-division baccalaureate category, 3 semester hours in electronic circuits on the basis of institutional evaluation (3/74).

AR-1715-0131

Light Target Missile Flight Control System Maintenance

Course Number: 198-31R20.

Location: *Version 1:* Air Defense School, Ft. Bliss, TX. *Version 2:* Combat Surveillance School, Ft. Huachuca, AZ.

Length: *Version 1:* 12 weeks (429 hours). *Version 2:* 13 weeks (454 hours).

Exhibit Dates: *Version 1:* 5/68–Present. *Version 2:* 7/66–4/68.

Objectives: To train enlisted personnel to operate and maintain the light target missile flight control system.

Instruction: Lectures and practical exercises in light target missile flight control system operation and maintenance, including AC and DC circuit theory, vacuum tube and semiconductor circuits, including clippers and clampers; operation of amplifiers, oscillators, and transformers; and MQM target control system block diagram, transmitter and receiver circuit analysis, alignment, installation, signal generator calibration, and troubleshooting.

Credit Recommendation: *Version 1:* In the vocational certificate category, 7 semester hours in electronics, 2 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 31R.

AR-1715-0132

Hawk Missile and Launcher Repair

Course Number: 121-22K20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 26–30 weeks (890–1032 hours); 26–30 weeks (1052–1316 hours). *Version 2:* 31–37 weeks (1143 hours); 31–37 weeks (1143 hours).

Exhibit Dates: *Version 1:* 4/74–Present. *Version 2:* 7/69–3/74. *Version 3:* 9/67–6/69.

Objectives: To train enlisted personnel to maintain and repair the Hawk missile launcher system.

Instruction: *All Versions:* Lectures and practical exercises in Hawk missile launcher system maintenance and repair, including AC and DC circuit theory; series, parallel, RCL and R,C,L circuits; RC and RL transients; series and parallel resonance; vacuum tubes, transistor circuits, single- and multistage amplifiers; power supplies; microwaves; and Hawk missile, launchers, and associated test equipment maintenance and repair. *Version 1:* Includes simplified explanation of RC and LC transients and sinewave oscillators; soldering techniques and practices; elementary theory of semiconductor devices and circuits; basic microwave procedures related to radar systems; basic manual skills and missile hydraulic systems; missile, launchers, and associated test equipment and repair. Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (26 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete Phases I and II (30 weeks).

Credit Recommendation: *Version 1:* In the vocational certificate category, 18 semester hours in basic electronics and troubleshooting for those students completing 26 weeks or 21 semester hours in basic electricity, electronics and troubleshooting for students attending 30 weeks of the course (see note above) (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity and electronics for students attending 30 weeks of the course (see note above) (3/75). *Version 2:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, 2 semester hours in electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 22K.

AR-1715-0133

OV-1D (Mohawk) Aviator Combat Surveillance Qualification

Course Number: 2B-F19.

Location: Intelligence School, Ft. Huachuca, AZ; Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ.

Length: *Version 1:* 5 weeks (132 hours). *Version 2:* 2–5 weeks (98–186 hours).

Exhibit Dates: *Version 1:* 5/79–Present. *Version 2:* 10/7[illegible]–4/79.

Objectives: To train OV-1 aviators to utilize D-model combat surveillance systems.

Instruction: *Version 1:* Course includes photographic surveillance systems, inertial navigation systems, electronic warfare operation, employment of photographic systems, infrared missions, and radar systems. *Version 2:* Lectures and practical exercises on KS-113 photographic surveillance system, inertial navigation systems, infrared detection set, operation procedures and employment techniques, infrared surveillance missions, and radar warning receivers.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in aerial photo and photographic systems (6/79). *Version 2:* Credit is not recommended because of the military specific nature of the course (3/74).

AR-1715-0134

Hawk Continuous Wave (CW) Radar Maintenance

Course Number: *Version 1:* 104-24B20. *Version 2:* 104-24B20; 104-23R20; 44-R-221. *Version 3:* 44-R-221.1 44-N-221.1 44-N-F17.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 15 weeks (560-565 hours). *Version 2:* 23-29 weeks (852-1026 hours). *Version 3:* 23-28 weeks (772-997 hours).

Exhibit Dates: *Version 1:* 11/70-Present. *Version 2:* 5/63-10/70. *Version 3:* 6/58-4/63.

Objectives: To train enlisted personnel to maintain the Hawk continuous-wave radar system.

Instruction: *All Versions:* Lectures and practical experience in Hawk continuous-wave radar system maintenance, including basic electricity and electronics, AC and DC circuits, vacuum tube electronics, transistors, radar circuits, descriptive treatment of radar system components, and maintenance techniques and supply procedures. *Version 1:* Instruction includes soldering techniques, electrical units and color codes, and maintenance publications. *Version 2:* Instruction includes assault fire control console operation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electrical laboratory (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory (6/75). *Version 2:* In the vocational certificate category, 6 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 6 semester hours in electricity or electronics, 6 in radar technology, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 24B.

1. Station Technical Controller
2. Fixed Station Technical Controller
3. Fixed Station Technical Controller
4. Fixed Station Technical Controller

(Fixed Station Facilities Controller)

Course Number: *Version 1:* 101-32D10. *Version 2:* 101-32D20. *Version 3:* 101-32D20. *Version 4:* 11-R-273.1.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2* : Signal School, Ft. Gordon, GA. *Version 3* : Signal School, Ft. Monmouth, NJ. *Version 4* : Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 21 weeks (792 hours). *Version 2:* 18-24 weeks (659-882 hours). *Version 3:* 18-23 weeks (668-858 hours). *Version 4:* 10 weeks (361-362 hours).

Exhibit Dates: *Version 1:* 2/79-Present. *Version 2:* 6/76-1/79. *Version 3:* 10/67-5/76. *Version 4:* 7/64-9/67.

Objectives: To train enlisted personnel as maintenance technicians for fixed-station facilities.

Instruction: *Version 1:* Lectures and laboratory experience in the fundamentals of basic electronics, digital circuits, multiplexing techniques and digital communications transmission system control and operation at the block diagram level. *Version 2:* Lectures and laboratory experience in electrical fundamentals, semiconductor electronic circuits, radio and communication circuits; the application and troubleshooting of communication circuits as applied to the maintenance of fixed station facilities. Note: Students who have completed modules 201, 202, 203, and 204 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (18 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (24 weeks) of this course. *Version 3:* Lectures and laboratories in DC and AC fundamentals, electronic fundamentals (tubes and semiconductors), electronic circuits, radio and communication circuits, and application to maintenance activities. *Version 4:* Lectures and laboratories in terminal equipment, transmitter and receiver equipment, and system control and coordination.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in digital circuitry, 1 in basic electronics communications (8/79) in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronics (8/79). *Version 2:* In the vocational certificate category, 3 semester hours in electronics laboratory for students who complete 18 weeks of the course or 2 semester hours in electricity or electronics and 5 semester hours in electricity or electronics laboratory for students who complete 24 weeks of the course (see note above) (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics for students completing either 18 or 24 weeks of the course (see note above) (4/77). *Version 3:* In the vocational certificate category, 6 semester hours in electricity or electronics, 3 in electrical or electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics, 3 in electrical or electronics laboratory (4/74). *Version 4:* In the vocational certificate category, 3 semester hours in electrical or electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical or electronics laboratory (4/74).

AR-1715-0136

Intercept Demultiplex Systems Repairman

Course Number: 102-33F20.

Location: Security Agency School, Ft. Devens, MA.

Length: 17-18 weeks (600 hours).

Exhibit Dates: 3/68-Present.

Objectives: To train general intercept equipment repairmen in the specific operational and maintenance procedures associated with intercept demultiplex systems.

Instruction: The course is highly equipment oriented, with specific training in expert-level repair and maintenance procedures. Fundamentals and topics requiring analytical or abstract skills are not covered.

Credit Recommendation: Credit is not recommended credit because of the limited specialized nature of the course (4/74).

Related Occupation Codes: 33B; 33F; 33Z.

AR-1715-0137

Telemetry Identification and Collection

(Telemetry Signal Analysis)

Course Number: 233-F3.

Location: Security Agency School, Ft. Devens, MA.

Length: 7-10 weeks (238-300 hours).

Exhibit Dates: 6/71-Present.

Objectives: To train enlisted personnel who have completed basic electronic intelligence courses to analyze telemetry signals.

Instruction: Lectures and practical exercises in recognition of telemetry signals, separation of desirable signals from noise, signal analysis, and report preparation.

Credit Recommendation: Credit is not recommended because of the specific-military nature of the course (9/77).

AR-1715-0138

1. Intercept Receiving Systems Repairman
2. Terminal Intercept Equipment Repair

Course Number: *Version 1:* 102-33C20. *Version 2:* 32-R-286.2.

Location: Security Agency School, Ft. Devens, MA.

Length: *Version 1:* 15 weeks (527 hours). *Version 2:* 20 weeks (663 hours).

Exhibit Dates: *Version 1:* 6/69-Present. *Version 2:* 5/60-5/69.

Objectives: To train enlisted personnel to inspect, install, test, and maintain terminal intercept equipment.

Instruction: *All Versions:* Lectures and practical exercises in electricity and electronics fundamentals, including AC and DC circuits, vacuum tubes, amplifiers, oscillators, antennas, transmission lines, and microwave components and measurement; communications fundamentals; demultiplex systems theory and equipment installation and maintenance; networks; electrical mathematics; and basic shop practice. *Version 1:* Instruction in mathematics fundamentals is not detailed and course emphasis is on practical applications of theory to terminal intercept equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electricity or electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 6 semester hours in electricity or electronics, 3 in electricity or electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 33B; 33C; 33Z.

AR-1715-0139

INTERCEPT RECORDING SYSTEMS REPAIRMAN

Course Number: 102-33D20.

Location: Security Agency School, Ft. Devens, MA.

Length: 17 weeks (768 hours).

Exhibit Dates: 4/69–Present.

Objectives: To train enlisted personnel to perform preventive and corrective maintenance on intercept recording systems.

Instruction: Lectures and practical exercises in intercept recording systems functions and descriptions, and components maintenance, alignment, adjustment, and troubleshooting procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 32B; 33D; 33Z.

AR-1715-0140

IMPROVED NIKE HERCULES FIRE CONTROL SYSTEM MAINTENANCE TRANSITION

Course Number: 4B-F13; 121-F13; 44-H-F29.

Location: Air Defense School, Ft. Bliss, TX.

Length: 5–11 weeks (192–388 hours).

Exhibit Dates: 1/62–12/68.

Objectives: To train Nike Hercules fire control mechanics to operate, adjust, and maintain improved Nike Hercules fire control systems.

Instruction: Lectures and practical exercises on the employment, operation, adjustment, and maintenance of the Nike Hercules fire control system, and the improved Nike Hercules fire control system, including improved Nike Hercules target-track radars, and improved Nike Hercules acquisition radar systems.

Credit Recommendation: Credit is not recommended because of the specialized nature of the course (4/74).

Related Occupation Codes: 222B; 251B.

AR-1715-0141

HEAVY FIRE CONTROL EQUIPMENT REPAIR

Course Number: 9-R-232.1; 9-E-32.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 19 weeks (655–722 hours).

Exhibit Dates: 3/56–12/68.

Objectives: To train fire control repair helpers to inspect, test, and perform field and depot maintenance on heavy integrated electronic fire control equipment.

Instruction: Lectures and practical exercises in principles of M33 radar systems, basic M33 servo and computer systems, acquisition transmitting and receiving systems, track radar transmitting and receiving systems, maintenance and troubleshooting of acquisition and track radar systems, computing systems, maintenance and troubleshooting of complete computer systems, and integrated radar system performance and OPD 6.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/74).

AR-1715-0142

ARTILLERY FIRE CONTROL SYSTEM MAINTENANCE SCR-584 AND DIRECTOR M9 OR M10

Course Number: 44-OE-27.

Location: Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: 16 weeks (600 hours).

Exhibit Dates: 6/55–12/68.

Objectives: To train warrant officer and enlisted personnel of the National Guard to employ, operate, adjust, and maintain artillery fire control systems and associated equipment.

Instruction: Lectures and practical exercises in introductory electronics, radar theory, and the use, maintenance, and repair of the SCR-584, the M12A1 remote control system, the Mark X IFF, and associated equipment.

Credit Recommendation: In the vocational certificate category, credit in electronics and electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics and electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electronics and electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0143

1. AVIONIC RADAR EQUIPMENT REPAIRMAN
2. AIRBORNE NAVIGATION RADAR REPAIR
3. AIRBORNE NAVIGATION RADAR REPAIR

Course Number: 102-35R10; 102-35R20.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Signal School, Ft. Monmouth, NJ. *Version 3:* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 17–27 weeks (621–996 hours). *Version 2:* 27 weeks (1010 hours). *Version 3:* 26 weeks (972 hours).

Exhibit Dates: *Version 1:* 10/76–Present. *Version 2:* 2/70–9/76. *Version 3:* 11/68–1/70.

Objectives: To train enlisted personnel who have backgrounds in algebra and science to inspect, test, and repair airborne navigation radar systems.

Instruction: *All Versions:* Lectures and practical exercises in electrical fundamentals, amplifiers and receivers, signal generators and solid-state circuitry, logic circuits, airborne weather radar sets and radar navigation sets operation, semiconductor fundamentals, and supply procedures and catalogs. *Version 1:* Note: Students who have completed Modules 201, 202, 203, 4, 5, 6, and 7 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (17 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (27 weeks) of this course. *Version 3:* Instruction includes microwave transmitters, receivers, and measurement procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in radar equipment operations laboratory for students who complete 17 weeks of the course or 6 semester hours in electronic circuits and troubleshooting and 3 semester hours in radar equipment operations laboratory for students who complete 27 weeks of the course (see note above) (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic circuitry laboratory for students who complete either 17 or 27 weeks of the course (see note above) (4/77). *Version 2:* In the vocational certificate category, 6 semester hours in electricity or electronics, 6 in electrical or electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics, 3 in electrical or electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electrical or electronics laboratory on the basis of institutional examination (3/74). *Version 3:* In the vocational certificate category, 6 semester hours in electricity or electronics, 6 in electricity or electronics laboratory, 3 in microwaves (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics, 3 in electricity or electronics laboratory, 3 in microwaves (3/74); in the upper-division baccalaureate category, credit in electronics or microwaves laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 35R; 35P; 09B.

AR-1715-0144

SIGNAL OFFICER BASIC BY CORRESPONDENCE

Course Number: E05.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 11/79–Present.

Objectives: To provide basic branch training in military readiness, support, and general maintenance of communications equipment.

Instruction: This course gives instruction in basic military preparedness, support, and operations. It also provides instruction in fundamental communications theory in radio, multichannel systems, and power equipment. Practical training in tactical radio, telecommuncations operations, and field maintenance is included. Credit recommendation is based on successful completion of the comprehensive end-of-course examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics in the area of communications (5/79).

AR-1715-0145

SIGNAL OFFICER ADVANCED BY CORRESPONDENCE

Course Number: E25.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 208 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 11/79–Present.

Objectives: To orient the individual in basic electronics theory in order to understand the operation and use of various types of telecommunications equipment.

Instruction: This course gives instruction in AC, DC theory, vacuum tubes and solid-state devices, and various basic electronic circuits in order to understand the set-up and use of telephone switching systems, antennas, transmission lines, multichannel radio systems, RF radiation charts and TDM-PCM multichannel cable communication systems. A basic knowledge of the operation of general and special types of test equipment necessary to checkout telecommunication systems is also covered. Course includes comprehensive proctored end-of-course examination. Credit recommendation is based on successful completion of the examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electronics (5/79)

AR-1715-0146

HAWK ORGANIZATIONAL MAINTENANCE SUPERVISOR

Course Number: *All Versions:* 4F-223C; 121-F9. *Version 2:* 44-N-223C; 44-N-1184; 44-N-F22.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 37–39 weeks (1255–1321 hours). *Version 2:* 32–40 weeks (1112–1413 hours).

Exhibit Dates: *Version 1:* 7/68–Present. *Version 2:* 11/59–6/68.

Objectives: To train warrant officers and enlisted personnel to operate and maintain the Hawk missile systems and related equipment.

Instruction: Lectures and laboratories covering a detailed descriptive treatment of components, operation, and maintenance techniques of Hawk radar system and related equipment, including data converter AN/GSA-77 battery terminal equipment and self-propelled Hawk.

Credit Recommendation: *Version 1:* In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 2 semester hours in maintenance management, and credit in electrical laboratory on the basis of institutional evaluation (12/68).

Related Occupation Codes: 24E, 24D, 24F, 24P, 24Q, 24U, 222B, 251B, 221B, 221C.

1. GROUND SURVEILLANCE RADAR REPAIR
2. COMBAT AREA SURVEILLANCE RADAR REPAIRMAN

(Ground Surveillance Radar Mechanic (AN/TPS-33 and AN/PPS-4))

Course Number: 104-26C20.

Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ. *Version 2:* Combat Surveillance School, Ft. Huachuca, AZ; Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ.

Length: *Version 1:* 18 weeks (586 hours). *Version 2:* 5–8 weeks (191–284 hours).

Exhibit Dates: *Version 1:* 1/75–Present. *Version 2:* 9/66–12/74.

Objectives: To train enlisted personnel to maintain specific radar sets.

Instruction: *All Versions:* Lectures and practical exercises in the maintenance of the AN/PPS-4A, AN/PPS-5, AN/TPS-25, and AN/TPS-33 surveillance radar sets. *Version 1:* Topics include basic circuits, electronic theory, and troubleshooting.

Credit Recommendation: *Version 1:* In the vocational certificate category, 9 semester hours in communication electronics (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronics and 2 in electronics laboratory (6/75). *Version 2:* Credit is not recommended because of the limited specialized nature of the course (4/74).

Related Occupation Codes: 26C; 26W.

SATELLITE COMMUNICATIONS OFFICER

Course Number: 4C-F12.

Location: Signal School, Ft. Monmouth, NJ.

Length: 4 weeks (139–140 hours).

Exhibit Dates: 9/68–Present.

Objectives: To train commissioned officers and warrant officers to supervise the installation, operation, and maintenance of satellite communications equipment.

Instruction: Lectures and practical exercises in satellite communications, including electronics fundamentals, communications systems, and communications ground terminals, with instruction in modulation, transmitters, and receivers as related to satellite communication.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/74). ; No credit because of the limited specialized nature of the course (4/74).

Related Occupation Codes: 286A; 281A; 282A.

AR-1715-0149

ELECTRONIC SWITCHING SYSTEMS REPAIR

Course Number: 150-F7.

Location: Signal School, Ft. Gordon, GA.

Length: *Version 1:* 38 weeks (409 hours). *Version 2:* 26 weeks (953 hours).

Exhibit Dates: *Version 1:* 8/77–Present. *Version 2:* 8/76–7/77.

Objectives: To provide enlisted personnel with the knowledge to install and perform organizational, direct support, and general support maintenance on the automatic telephone central office AN/TCC-38(V) and the AN/TCC-25(V).

Instruction: *Version 1:* Instruction includes computer programming and diagnostic troubleshooting, solid state logic circuitry, soldering training and printed circuit board repair, and tracing signal flow and performing diagnostic procedures on data processing circuits. Student also performs maintenance and repair on switching equipment. *Version 2:* Conferences and practical exercises to include system installation, hookup and initial operation; operator's, network/terminal, common control, and power subsystems; maintenance of equipment; marker, switching matrix, processor, and interface units.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in solid state circuits, 2 in soldering and printed circuit board repair (8/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer electronics, 2 in computer operations laboratory, 3 in computer troubleshooting (8/79). *Version 2:* In the vocational certificate category, 3 semester hours in electronic maintenance, 1 in telecommunications laboratory (3/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in computer operation laboratory (3/77).

MODE V SUBSCRIBER TERMINAL

Course Number: 622-F2.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Monmouth, NJ. *Version 3 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 4–9 weeks (152-342 hours). *Version 2:* 11 weeks (389 hours). *Version 3:* 6 weeks (228 hours).

Exhibit Dates: *Version 1:* 7/76–Present. *Version 2:* 1/73–6/76. *Version 3:* 7/68–12/72.

Objectives: To train teletypewriter repairmen to inspect, test, and repair Mode V subscriber terminal equipment.

Instruction: *All Versions:* Lectures and laboratories in electrical fundamentals, pulse generator circuitry, logic circuits, introduction to Mode V, teletypewriter control units, and low-level signaling units. *Version 1:* Note: Course is divided into 2 phases. Students may complete both Phases I and II (9 weeks) or Phase II only (4 weeks).

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in system maintenance and troubleshooting for completion of Phase I and 3 semester hours in system maintenance and troubleshooting for completion of Phase II (see note above) (4/77). *Version 2:* In the vocational certificate category, 3 semester hours in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (4/74). *Version 3:* Credit is not recommended because of the limited specialized nature of the course (4/74).

Related Occupation Codes: 31J; 32G.

AR-1715-0152

MICROWAVE RADIO RELAY OPERATION

Course Number: 11-R-291.1; 11-E-53.

Location: Signal School, Ft. Monmouth, NJ.

Length: 10 weeks (356 hours).

Exhibit Dates: 10/55–12/68.

Objectives: To train enlisted personnel to operate and maintain microwave radio relay equipment.

Instruction: Lectures and laboratories in operation and maintenance of fixed and transportable multichannel microwave radio relay equipment, including microwave multiplex units, transmitters, receivers, repeaters, antenna tower assemblies, and associated power units.

Credit Recommendation: In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0153

1. Field Artillery Target Acquistion Specialist
2. Sound Ranging Crewman
   (Artillery Sound Ranging)
   (Artillery Sound Ranging (Advanced))

Course Number: *Version 1:* 412-17C10. *Version 2:* 412-17C20; 6-R-155.2 6-E-12; 412-155.2 6-R-102.1.

Location: Field Artillery School, Ft. Sill, OK; Artillery and Missile School, Ft. Sill, OK; Artillery and Guided Missile School, Ft. Sill, OK.

Length: *Version 1:* 5–10 weeks (150–300 hours). *Version 2:* 7–8 weeks (260–343 hours).

Exhibit Dates: *Version 1:* 12/76–Present. *Version 2:* 4/56–11/76.

Objectives: To train enlisted personnel to install, operate, and maintain field artillery sound-ranging systems.

Instruction: Lectures and practical exercises in communications; target acquisition and sound-ranging, including meteorology, sound-ranging techniques, procedures, and applications; and systems maintenance.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, credit in map reading and plotting on the basic of institutional evaluation. *Version 2:* In the upper-division baccalaureate category, credit in plotting or surveying on the basis of institutional evaluation (12/68).

Related Occupation Codes: 17C.

AR-1715-0154

Fire Unit Integration Facilities (FUIF) Repair

Course Number: 11-N-298.1.

Location: Signal Fire Distribution Systems Training Activity, Ft. Bliss, TX.

Length: 11 weeks (394 hours).

Exhibit Dates: 6/61–12/68.

Objectives: To train warrant officers and enlisted personnel who have a knowledge of electronics engineering and/or radio electronics to maintain the fire unit integration facilities (FUIF).

Instruction: Lectures and practical exercises in the maintenance of the fire unit integration facilities subsystem of the AN/FSG-1 missile master, including function and description of system and system components; coordinate data set receiver and transmitter, data conversion circuits, system analysis, battery presentation system, target designation data link, and other fire distribution systems; and troubleshooting and tests.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/74).

AR-1715-0155

Meteorological Equipment Repairman

Course Number: 198-35D30.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 20 weeks (753 hours).

Exhibit Dates: 7/67–Present.

Objectives: To train enlisted personnel to maintain and repair electronic meteorological equipment.

Instruction: Lectures and practical exercises in the maintenance and repair of electronic meteorological equipment used in artillery ballistic meteorology sections and research and development activities, including electrical fundamentals (DC and AC), electronic fundamentals (vacuum tube only), radio fundamentals (transmitters and receivers), special circuits, target acquisition, tactical subjects, and applications to maintenance procedures for specific equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 35D.

AR-1715-0156

Weapons Support Radar Repair

Course Number: 104-26B30.

Location: Signal School, Ft. Monmouth, NJ.

Length: 30 weeks (1124 hours).

Exhibit Dates: 12/66–11/73.

Objectives: To train enlisted personnel to maintain and repair weapons support radar equipment.

Instruction: (Note: For course after 11/73, see AR-1715-0362.) Lectures and practical exercises in the maintenance and repair of weapons support radar equipment, including AC and DC fundamentals, electronic fundamentals, electronic circuits, microwave circuits and measurements, semiconductors, servo and data circuitry, timer indicator components, nonsinusoidal circuitry, and inspection and testing of specific radar equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics, 3 in electricity or electronics laboratory, 3 in microwave measurements (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 26B; 26W.

AR-1715-0157

Marine Radar Observer

Course Number: 8C-F1; 813-F1.

Location: Transportation School, Ft. Eustis, VA.

Length: 2 weeks (72–84 hours).

Exhibit Dates: 10/72–Present.

Objectives: To provide water craft operators with a working knowledge of the fundamentals in the operation, use, interpretation, and analysis of radar.

Instruction: Training includes principles of radar, radar navigation and plotting, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 1 semester hour in radar operation (6/75).

Related Occupation Codes: 61B.

AR-1715-0158

Ordnance Fire Control Materiel Maintenance

Course Number: 9-B-4806.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 20 weeks (712 hours).

Exhibit Dates: 4/57–12/68.

Objectives: To train commissioned officers to supervise the maintenance and repair of fire control equipment.

Instruction: Lectures and practical exercises in basic AC and DC circuit theory and an extensive survey of electronic system components and instrumentation, with emphasis on vacuum tubes, radar electronics, mathematics, and antiaircraft fire control system maintenance and repair procedures.

Credit Recommendation: In the vocational certificate category, 6 semester hours in basic electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics for non-electrical-engineering majors (12/68).

1. Hawk Pulse Radar Repair
2. Hawk Pulse Radar Repair
3. Hawk Pulse Radar Repair
4. Hawk Pulse Radar Repair (Non-US)
5. Hawk Pulse Radar Repair
   (Hawk Pulse Acquisition Radar and Battery Control Repair)
6. Hawk Pulse Acquisition Radar and Battery Control Repair

Course Number: *Version 1:* 104-23S20. *Version 2:* 104-23S20. *Version 3:* 104-23S20. *Version 4:* 104-23S20. *Version 5:* 104-23S20; 104-255.1. *Version 6:* 9-S-255;1 9-S-255.1.

Location: *Version 1:* Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Missile and Munitions School, Redstone Arsenal, AL. *Version 3:* Missile and Munitions School, Redstone Arsenal, AL. *Version 4:* Missile and Munitions School, Redstone Arsenal, AL. *Version 5:* Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL. *Version 6:* Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 21–25 weeks (726–868 hours). *Version 2:* 27 weeks (899 hours). *Version 3:* 32 weeks (1125 hours). *Version 4:* 38 weeks (1365 hours). *Version 5:* 31–46 weeks (1103–1697 hours). *Version 6:* 21–25 weeks (767–911 hours).

Exhibit Dates: *Version 1:* 4/74–Present. *Version 2:* 11/72–3/74. *Version 3:* 6/71–10/72. *Version 4:* 2/70–5/71. *Version 5:* 2/63–1/70. *Version 6:* 1/59–1/63.

Objectives: To train personnel to maintain Hawk pulse radar systems.

Instruction: *All Versions:* Lectures and practical exercises in AC and DC circuits, transients, vacuum tubes, and basic electronic circuits; radar principles, pulse radars, and radar electronics; microwaves; and shop practice and test equipment operation and maintenance, including a descriptive treatment of Hawk radar system components and maintenance techniques. *Version 1:* Includes simplified explanation of RC and LC transients and sine-wave oscillators; soldering techniques and practices; empirical description of operation of vacuum-tube pulse circuits; basic microwave procedures related to radar systems; and shop practice and test equipment operation and maintenance to include a descriptive treatment of Hawk radar system components and maintenance techniques. Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (21 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete Phases I and II (25 weeks).

Credit Recommendation: *Version 1:* In the vocational certificate category, 14 semester hours in basic electronics and troubleshooting for those students completing 21 weeks or 17 semester hours in basic electricity, electronics and troubleshooting for students attending 25 weeks of the course (see note above) (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity or electronics for students attending 25 weeks of the course (see note above) (3/75). *Version 2:* In the vocational certificate category, 4 semester hours in electricity or electronics, 4 in radar technology, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics, 2 in radar technology, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 4 semester hours in electricity or electronics, 6 in radar technology, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics, 3 in radar technology, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 4:* In the vocational certificate category, 6 semester hours in electricity or electronics, 6 in radar technology, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics, 3 in radar technology, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 5:* In the vocational certificate category, 4 semester hours in electricity or electronics, 6 in radar technology, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 6:* In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 23S.

INERTIAL NAVIGATION SET AN/ASN-86 REPAIR

Course Number: 102-F13.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: 10 weeks (353–362 hours).

Exhibit Dates: 7/73–Present.

Objectives: To train avionic radar equipment repairmen to inspect, test, and maintain the AN/ASN-86 inertial navigation set.

Instruction: Lectures and practical exercises in the maintenance of the AN/ASN-86 inertial navigation set, including control indicator, navigation computer, computer interface A/D and D/A, gyro-stabilized platform and repair test, and special test instruments.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electronics (3/74).

Related Occupation Codes: 35R; 32P.

AR-1715-0162

VULCAN MECHANIC

Course Number: 121-24M20.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 10–12 weeks (373–420 hours). *Version 2:* 20 weeks (713 hours). *Version 3:* 11 weeks (415 hours).

Exhibit Dates: *Version 1:* 5/70–Present. *Version 2:* 6/69–5/70. *Version 3:* 7/68–5/69.

Objectives: To train enlisted personnel to maintain Vulcan weapons systems, associated accessories, and range-only radar equipment.

Instruction: *All Versions:* Lectures and laboratories in armament and turret electronics and towed Vulcan systems, maintenance management, and equipment records systems. *Version 1:* Includes lectures and laboratories in basic electronics. *Version 2:* Includes lectures and laboratories in basic electronics.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electricity (2/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity (2/75); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory for non-electronics majors (2/75). *Version 2:* In the vocational certificate category, 6 semester hours in electricity (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity (3/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory for non-electronics majors (3/74). *Version 3:* In the vocational certificate category, 1 semester hour in electricity (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity (3/74).

Related Occupation Codes: 24M.

OVERSEAS ASC COMMUNICATION EQUIPMENT REPAIR
(ADMSC Communication Equipment Repair)

Course Number: 622-F6.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: 8–16 weeks (298–590 hours).

Exhibit Dates: 4/68–Present.

Objectives: To train fixed-plant carrier equipment repairmen to install, operate, and repair overseas automatic digital message switching center equipment.

Instruction: Lectures and practical exercises in overseas communication equipment familiarization, coordination simulator, troubleshooting procedures, and communication facilities.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

Related Occupation Codes: 32E.

1. NIKE TRACK RADAR REPAIR
2. NIKE TRACK RADAR REPAIR
   (Nike Track Radar Systems Repair (Ajax/Hercules))
   (SAM Track Radar Systems Repair)

Course Number: *All Versions:* 9-S-253.1. *Version 2:* 9-R-253;1 9-E-64.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 36 weeks (1353 hours). *Version 2:* 20–26 weeks (720–974 hours).

Exhibit Dates: *Version 1:* 2/63–12/68. *Version 2:* 12/55–1/63.

Objectives: To train enlisted and civilian personnel to inspect, test, and maintain Nike Hercules/Ajax missile-tracking and target-tracking radar systems.

Instruction: *All Versions:* Lectures and laboratories in tracking radars and field maintenance test equipment. *Version 1:* Includes missile electronics fundamentals. *Version 2:* Includes missile radar fundamentals and missile radar circuits.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electricity or electronics, 6 in electricity or electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* Credit is not recommended because of the limited specialized nature of the course (4/74).

AR-1715-0165

AN/MPQ-T1 RADAR SIGNAL SIMULATOR MAINTENANCE

Course Number: 121-24Q30; 4C-F6; 121-F11; 44-H-F43.

Location: Air Defense School, Ft. Bliss, TX.

Length: 10–12 weeks (353–456 hours).

Exhibit Dates: 10/64–Present.

Objectives: To train warrant officers and enlisted personnel to operate, adjust, and maintain AN/MPQ-T1 radar signal simulators.

Instruction: Topics include information on system AC and DC power distribution, semiconductor applications, block diagram analysis, oscilloscope operation, troubleshooting and corrective maintenance.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics laboratory or electronics maintenance (3/75); in the lower-division baccalaureate/associate degree category, credit in electronics laboratory or electronics maintenance on the basis of institutional evaluation (3/75).

Related Occupation Codes: 24Q.

AR-1715-0166

AIR DEFENSE RADAR REPAIR

Course Number: 104-26H20.

Location: *All Versions:* Signal School, Ft. Monmouth, NJ. *Version 1:* Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 35 weeks (1194 hours). *Version 2:* 35 weeks (1134–1161 hours). *Version 3:* 31 weeks (1100 hours). *Version 4:* 32 weeks (1200 hours).

Exhibit Dates: *Version 1:* 8/76–Present. *Version 2:* 11/74–7/76. *Version 3:* 3/73–10/74. *Version 4:* 12/66–2/73.

Objectives: To train enlisted personnel to inspect, test, and repair defense radar equipment.

Instruction: Lectures and laboratories in DC and AC circuits, vacuum tubes, solid-state electronics, electronic circuits, microwave electronics, servos and data circuitry, and radar set familiarization.

Credit Recommendation: *Version 1:* In the vocational certificate category, 9 semester hours in electronics circuits, 1 in digital logic, 10 in electronic circuit troubleshooting (8/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic circuits applications, 2 in electronics circuits laboratory, both on the basis of institutional evaluation (8/77). *Version 2:* In the vocational certificate category, 6 semester hours in electronics laboratory, 6 in electronics maintenance (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory, 3 in electronics maintenance or as an elective in electronic systems (2/75); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (2/75). *Version 3:* In the vocational certificate category, 6 semester hours in electricity and electronics, 6 in electrical and electronics laboratory, 3 in microwave measurements (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics, 3 in electrical and electronics laboratory, 3 in microwave measurement (4/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (4/74). *Version 4:* In the vocational certificate category, 6 semester hours in electricity and electronics, 6 in electrical and electronics laboratory, 3 in microwave measurements (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity and electronics (12/68).

Related Occupation Codes: 26H; 26W.

AR-1715-0167

RADAR REPAIR

Course Number: 11-R-282.1; 11-E-21.

Location: Signal School, Ft. Monmouth, NJ.

Length: 33 weeks (1230 hours).

Exhibit Dates: 2/54–12/68.

Objectives: To train enlisted personnel to inspect, test, repair, and maintain ground radar equipment.

Instruction: Lectures and laboratories in DC and AC circuits, vacuum tubes, electronic circuits, solid-state electronics, microwave electronics, servos and data circuitry, troubleshooting techniques, and radar set familiarization.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity and electronics, 6 in electrical and electronics laboratory, 3 in microwave measurement (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity and electronics (12/68).

AR-1715-0168

OV-1D (MOHAWK) AIRBORNE RADAR REPAIR

Course Number: 104-F11.

Location: Intelligence School, Ft. Huachuca, AZ; Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ.

Length: *Version 1:* 6 weeks (186–187 hours). *Version 2:* 6–13 weeks (186–459 hours).

Exhibit Dates: *Version 1:* 1/74–3/79. *Version 2:* 6/72–12/73.

Objectives: To provide personnel with knowledge necessary to maintain the airborne surveillance radar of the OV-ID (Mohawk) system.

Instruction: *All Versions:* Lectures and practical exercises in operation, maintenance, and troubleshooting procedures for OV-ID (Mohawk) airborne radar systems. *Version 1:* Student will perform organizational, direct and general support maintenance.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 9 semester hours in basic electronics theory and laboratory (6/79). *Version 2:* Credit is not recommended because of the limited specialized nature of the course (6/75).

Related Occupation Codes: 26M.

AR-1715-0169

FORWARD AREA ALERTING RADAR REPAIR

Course Number: 104-F12.

Location: Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ.

Length: 11 weeks (373 hours).

Exhibit Dates: 10/72–Present.

Objectives: To train enlisted personnel to perform direct and general support maintenance on specific radar systems and associated equipment.

Instruction: Lectures and practical exercise in the maintenance procedures for the forward-area alert radar, including system logic; power distribution system; receiving, display, and data link systems; circuit analysis; various testing systems; the stimulus generator; and system troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/74).

Related Occupation Codes: 26C; 26W.

AR-1715-0170

LIGHT FIRE CONTROL EQUIPMENT REPAIR

Course Number: 9-R-231.1; 9-E-53.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 16 weeks (560–608 hours).

Exhibit Dates: 3/56–12/68.

Objectives: To train personnel to inspect, test, and maintain light, integrated electronic fire control systems.

Instruction: Lectures and practical exercises on light fire-control equipment, including system components, conversion, prediction, inversion, and ballistic units; malfunction and feedback systems; power control; auxiliary equipment; and specific instruction on M4 systems maintenance.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/74).

AR-1715-0171

1. AN/MPQ-36 RADAR SIGNAL SIMULATOR MAINTENANCE
(15D2 Radar Signal Simulator Maintenance)
2. 15D2 RADAR TARGET SIMULATOR MAINTENANCE

Course Number: 44-R-F13.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 7–9 weeks (250–308 hours). *Version 2:* 10 weeks (375–381 hours).

Exhibit Dates: *Version 1:* 2/60–12/68. *Version 2:* 3/58–1/60.

Objectives: To train enlisted missile or air defense fire control mechanics to operate and maintain AN/MPQ-36 or 15D2 radar simulators.

Instruction: *All Versions:* Lectures and practical exercises in radar simulator operation and maintenance, including target simulator, jamming simulation, missile simulation, and monitor circuits. *Version 1:* Instruction includes operator training and AN/MPQ-36 radar simulator familiarization. *Version 2:* Instruction includes basic electronics review, manipulator training, and servo systems introduction.

Credit Recommendation: Credit is not recommended because of the specialized nature of the course (4/74).

AR-1715-0172

AN/MPS-23 Radar Repair

Course Number: 4C-F2; 104-181.3; 11-N-282.3.

Location: Air Defense School, Ft. Bliss, TX.

Length: 16 weeks (565–586 hours).

Exhibit Dates: 10/63–12/68.

Objectives: To train warrant officers and enlisted personnel to operate and maintain AN/MPS-23 and AN/MPS-23A radar sets.

Instruction: Lectures and laboratories in radar set theory, programmer and transmitters, indicators and testing functions, system maintenace, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/74).

Related Occupation Codes: 211A.

AR-1715-0173

Radar Tracking Station Equipment Repair
(Radar Tracking Station Repair)

Course Number: 11-N-362.2; 11-N-F24.

Location: Air Defense School, Ft. Bliss, TX.

Length: 18–27 weeks (660–929 hours).

Exhibit Dates: 4/62–12/68.

Objectives: To train experienced electronics technicians to maintain the OA-2952/GSQ radar tracking station.

Instruction: Lectures and practical exercises in radar tracking station equipment maintenance, including radar station fundamentals; comprehensive survey of logic circuitry and systems; computer and automatic data link operation and troubleshooting; radar integration unit operation and troubleshooting procedures; and system check-out, alignment, installation, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 6 semester hours in computer technology (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer technology (4/74); in the upper-division baccalaureate category, credit in computer technology laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 211A.

AR-1715-0174

Improved Alternate Battery Acquisition Radar Maintenance Transition

Course Number: 4B-222B-T; 104-26J20-T; 104-229.1T.

Location: Air Defense School, Ft. Bliss, TX.

Length: 6–7 weeks (256–288 hours).

Exhibit Dates: 12/65–12/68.

Objectives: To train fire control and radar mechanics to operate, adjust, and maintain improved, alternate battery acquisition radars and associated ECCM consoles.

Instruction: Lectures and practical exercises in improved, alternate battery acquisition radar equipment operation, adjustment, and maintenance, including an introduction to ABAR and ECCM consoles; equipment record system familiarization; operation, adjustment, and troubleshooting of various transmitters, receivers, and transistors; test equipment usage; and functional operation, adjustment, alignment, and troubleshooting procedures for ECCM consoles.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/744).

Related Occupation Codes: 23G; 26J.

Meteorological Equipment Mechanic
(Weather Equipment Maintenance)

Course Number: 198-205.1; 6-R-205.1; 6-N-201A; 6-N-8219; 6-N-205.1; 6-N-215.3; 6-OE-36.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 14–16 weeks (509–599 hours).

Exhibit Dates: 10/54–12/68.

Objectives: To train enlisted personnel to operate and maintain electrical meteorological equipment.

Instruction: Lectures and loboratory in electrical meteorological equipment operation and maintenance, including AC and DC circuts; circuit components; communications system vacuum tube circuits and components, and gas tubes; and transmitters/receivers operation and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of insitutional evaluation (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics for non-electrical-engineering majors (4/74).

Related Occupation Codes: 35D.

(Field Artillery Radar Maintenance)
3. Field Artillery Radar Maintenance

Course Number: *Version 1:* 104-26B20; 4C-211A. *Version 2:* 4C-211A; 104-26B20; 6-N-211A; 6-N-211;3 6-N-1121; 6-N-211.2. *Version 3:* 6-N-1121; 6-N-211;1 6-N-211;2 6-OE-37.

Location: *Version 1:* Field Artillery School, Ft. Sill, OK; Artillery and Missile School, Ft. Sill, OK. *Version 2:* Artillery and Missile School, Ft. Sill, OK. *Version 3:* Artillery and Missile School, Ft. Sill, OK; Artillery and Guided Missile School, Ft. Sill, OK.

Length: *Version 1:* 24–27 weeks (891–1001 hours). *Version 2:* 32–37 weeks (968–1223 hours). *Version 3:* 24–30 weeks (1010–1269 hours).

Exhibit Dates: *Version 1:* 8/68–11/73. *Version 2:* 5/61–7/68. *Version 3:* 3/56–4/61.

Instruction: (Note: For course after 11/73, see AR-1715-0362.) Lectures and laboratories in mathematics review, including algebra, trigonometry, and vector number work; fundamentals of electricity and electronics; radar fundamentals; and utilization of ; Lectures and laboratories in mathematics review, including algebra, trigonometry, and vector number work; fundamentals of electricity and electronics; radar fundamentals; and utilization of multimeters, oscilloscopes, AC circuit transformers, DC-AC machines, and electronic (vacuum tube) circuits and systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, 1 in electrical laboratory for non-engineering majors (4/74). *Version 2:* In the vocational certificate category, 6 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, 1 in electrical laboratory for non-engineering majors (4/74). *Version 3:* In the vocational certificate category, 6 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, 1 in electrical laboratory for non-engineering majors (4/74).

Related Occupation Codes: 26B; 26W; 211A.

AR-1715-0177

Field Artillery Radar Technician

Course Number: 4C-211A; 104-F8.

Location: Field Artillery School, Ft. Sill, OK.

Length: 8 weeks (279 hours).

Exhibit Dates: 1/70–Present.

Objectives: To train warrant officers and enlisted personnel who have backgrounds in electronics, general science, and radar operation and maintenance to operate and maintain weapons support radar equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of weapons support radar equipment, including fire direction, fire observation, operation of various radar sets, artillery transport, communications/electronics subjects related to radio and radar, tactics, and target acquisition.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/74).

Related Occupation Codes: 26B; 211A.

AR-1715-0178

1. Ground Surveillance Radar Crewman
2. Ground Surveillance Radar Operation
(Ground Surveillance Radar Operator)

Course Number: 221-17K20.

Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ. *Version 2:* Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ; Combat Surveillance School, Ft. Huachuca, AZ.

Length: *Version 1:* 6 weeks (194 hours). *Version 2:* 4–7 weeks (132–252 hours).

Exhibit Dates: *Version 1:* 1/75–Present. *Version 2:* 7/69–12/74.

Objectives: To train enlisted personnel to operate ground surveillance radar equipment.

Instruction: Lectures, practical exercises, and demonstrations in AN/PPS-4A, AN/PPS-5A, AN/TPS-33A, and AN/TPS-25A ground surveillance radar equipment operation and maintenance procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in logical troubleshooting techniques (6/75). *Version 2:* Credit is not recommended because of the limited specialized nature of the course (4/74).

Related Occupation Codes: 17K.

AR-1715-0179

1. AIR DEFENSE ACQUISITION RADAR MAINTENANCE
2. AIR DEFENSE ACQUISITION RADAR MAINTENANCE
   (Defense Acquisition Radar Maintenance)
3. SURVEILLANCE RADAR MAINTENANCE
   (Artillery Surveillance Radar Maintenance)

Course Number: *Version 1:* 104-24P20. *Version 2:* 4B-222B-B; 44-R-229;1 104-24P20; 44-R-212;2 104-26J20. *Version 3:* 44-R-212;2 44-F-35.

Location: *All Versions:* Air Defense School, Ft. Bliss, TX. *Version 3:* Artillery School, Ft. Bliss, TX.

Length: *Version 1:* 38–40 weeks (1332–1404 hours). *Version 2:* 18–44 weeks (663–1526 hours). *Version 3:* 22–24 weeks (842–950 hours).

Exhibit Dates: *Version 1:* 6/70–Present. *Version 2:* 6/58–5/70. *Version 3:* 2/55–5/58.

Objectives: To train enlisted personnel to operate, adjust, and maintain defense acquisition radars.

Instruction: *All Versions:* Lectures and practical exercises in electrical and electronic fundamentals; extensive briefing and maintenance practice on radar equipment; mathematics; and modulator, transmitter, receiver, MTI, DC control, indicator and repeater systems operation, adjustment, and maintenance. *Version 2:* Instruction includes more electrical and electronic fundamentals, vacuum tube-based electronics and extensive vacuum tube circuit measurement. *Version 3:* Instruction includes more electrical and electronic fundamentals, vacuum tube-based electronics and extensive vacuum tube circuit measurement.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electricity or electronics, 2 in electrical or electronics laboratory (2/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical or electronics laboratory (2/75). *Version 2:* In the vocational certificate category, 6 semester hours in electricity or electronics, 3 in electrical or electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68). *Version 3:* In the vocational certificate category, 6 semester hours in electricity or electronics, 3 in electrical or electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68).

Related Occupation Codes: 24P.

AR-1715-0180

NIKE HIGH POWER ACQUISITION RADAR AND RADAR SIMULATOR REPAIR
(Nike Hipar and Radar Simulator Repairer)

Course Number: *All Versions:* 104-23U20. *Version 3:* 104-F4; 9-S-F49.

Location: Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 34–36 weeks (1129–1249 hours). *Version 2:* 28–34 weeks (987–1150 hours). *Version 3:* 34–44 weeks (1177–1605 hours).

Exhibit Dates: *Version 1:* 5/78–Present. *Version 2:* 5/74–4/78. *Version 3:* 7/64–4/74.

Objectives: To train enlisted personnel who have backgrounds in general science and algebra to inspect, test, and maintain high-power acquisition radar equipment and radar signal simulator stations.

Instruction: *Version 1:* Lectures and laboratory exercises include basic AC, and DC circuits, a simplified coverage of RC and LC transients and sinewave oscillators; soldering techniques and practices; elementary theory of semiconductor devices and circuits; empirical description of operation of vacuum tube pulse circuits; basic microwave procedures related to radar systems; and high power acquisition radar hardware familiarization and techniques. *Version 2:* Lectures and laboratory exercises include a simplified coverage of RC and LC transients and sine-wave oscillators; soldering techniques and practices; elementary theory of semiconductor devices and circuits; empirical description of operation of vacuum tube pulse circuits; basic microwave procedures related to radar systems; and high power acquisition radar hardware familiarization and techniques. Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will attend only Phase II (30 weeks) of this course. COBET was revised in 6/75; students who have completed Modules 1, 2, 3, 4/5 and 6, at Ft. Jackson, SC will attend only Phase II (27–28 weeks). See AR-1715-0389 for credit recommendation for COBET. Students who do not attend COBET will complete both Phases I and II (33–34 weeks) of this course. *Version 3:* Lectures and practical exercises in basic electronics, including electrical and electronic circuit fundamentals, AC and DC circuits, series-parallel and combination circuits, inductance, capacitance, magnetism, transformers, impedance using vector mathematics, RL and RC transients, resonance, synchros, tubes and tube circuit applications, microwave sources and power measurements, microwave transmitters and receivers, modulation principles, pulse and timing circuits, CRT displays, power supplies, and regulators; multimeter, oscilloscope, and advanced test instruments operation; and high-power acquisition radar hardware familiarization and techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in electronic equipment repair techniques (8/79); In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 2 in transistor theory, 2 in vacuum tube circuit theory, 1 in microwave theory, and 3 in circuits/electronics laboratory (8/79). *Version 2:* In the vocational certificate category, 23 semester hours in basic electricity, electronics, and troubleshooting for those students completing 33–34 weeks; or 20 semester hours in basic electronics and troubleshooting for those students completing 27–30 weeks (see note above) (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity or electronics for those students completing 33–34 weeks; no credit for those students completing 27–30 weeks (see note above) (3/75). *Version 3:* In the vocational certificate category, 24 semester hours in electrical circuits or electronics (4/74); in the lower-division baccalaureate/associate degree category, 12 semester hours in electrical circuits or electronics (4/74); in the upper-division baccalaureate category, 6 semester hours in electrical circuits or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 23U.

AR-1715-0181

1. RCAT RADIO MAINTENANCE
2. RADIO-CONTROLLED AIRPLANE TARGET RADIO MAINTENANCE

Course Number: *Version 1:* 44-R-209;1 44-R-209.2. *All Versions:* 44-E-23.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 9 weeks (315–350 hours). *Version 2:* 7 weeks (229 hours).

Exhibit Dates: *Version 1:* 3/57–12/68. *Version 2:* 3/53–2/57.

Objectives: To train enlisted personnel to test, adjust, and maintain radio-controlled aircraft target radios, gyros, and autopilot equipment.

Instruction: Lectures and practical exercises in basic electricity, including AC and DC circuits; series, parallel, and RLC circuits; motors, generators, and vacuum tubes; C-2 flight control system testing, adjustment, and maintenance; and control systems preflight procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics (3/74); in the upper-division baccalaureate category, credit in electricity on the basis of institutional evaluation (3/74). *Version 2:* Insufficient data for evaluation (3/74).

AR-1715-0182

1. RADIO WAVE PROPAGATION
2. RADIO PROPAGATION
3. RADIO WAVE PROPAGATION

Course Number: *Version 1:* 198-26P20. *Version 2:* 198-26P20. *Version 3:* 11-R-287.1.

Location: Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 24–29 weeks (850–1086 hours). *Version 2:* 29 weeks (1086 hours). *Version 3:* 28 weeks (1078–1080 hours).

Exhibit Dates: *Version 1:* 12/69–Present. *Version 2:* 12/66–11/69. *Version 3:* 12/56–11/66.

Objectives: To train enlisted personnel to install, operate, and maintain radio frequency hazards and interference-measuring equipment, and oblique-incidence-sounding equipment.

Instruction: Lectures and practical exercises in electrical fundamentals; electronics as applied to basic transmitters and receivers, nonsinusoidal circuitry, microwave transmitters, modulators, and receivers; ionosphere theory; ionogram analysis; vertical incidence equipment theory and maintenance; film records photographic processing; field station operation; and troubleshooting procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 26P.

AR-1715-0183

Radio Set LRC-3 Repair

Course Number: 101-F7.

Location: Signal School, Ft. Monmouth, NJ.

Length: 8 weeks (304 hours).

Exhibit Dates: 1/67–Present.

Objectives: To train microwave systems repairmen to install and maintain the LRC-3 radio set.

Instruction: Lectures and practical exercises in LRC-3 radio set installation and maintenance, including principles of tropospheric scatter communication; LRC-3 system introduction; transmitter and receiver sections components operation and preventive maintenance procedures; auxiliary equipment, including teletype order wire and supervisory alarm system operation and preventive maintenance; multiplex equipment block-diagram analysis, troubleshooting, and preventive maintenance; and system alignment and adjustment procedures.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (3/74).

Related Occupation Codes: 26V.

AR-1715-0184

Basic Radio Relay and Carrier Repair

Course Number: 101-294.0; 11-R-294.0.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 19 weeks (703 hours).

Exhibit Dates: 2/65–12/68.

Objectives: To train enlisted personnel to install, operate, and maintain radio relay and carrier equipment.

Instruction: Lectures and practical exercises in the installation, operation, and maintenance of radio relay and carrier equipment, including electronic fundamentals, DC and AC circuitry, motors, generators, reactance, vacuum tubes, modulation principles, amplifiers, magnetism, transformers, oscilloscopes, block-diagrams of specific radio equipment, telephone terminal system, telephone repeater, and test and repair procedures for system components.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68).

AR-1715-0185

DECCA Transmitting Equipment Repair

Course Number: 102-F3.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 7–10 weeks (254–345 hours).

Exhibit Dates: 3/67–Present.

Objectives: To train enlisted personnel to operate and maintain DECCA Mark 5 navigational radio transmitters.

Instruction: Lectures and practical exercises in DECCA Mark 5 navigational radio transmitter operation and maintenance, including hyperbolic navigational system introduction, time-shared transmissions, master station and slave station layout, oscilloscope operation, oscillators, pulse-forming circuits, switching and monitoring circuits, Mark 10 master and slave station operation and maintenance, and system circuit analysis and power supplies operation.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in electronics (3/74).

Related Occupation Codes: 32C; 32Z.

AR-1715-0186

Radio Officer

Course Number: 4C-0500; 11-A-0500.

Location: Signal School, Ft. Monmouth, NJ.

Length: 11–13 weeks (390–456 hours).

Exhibit Dates: 4/59–12/67.

Objectives: To train commissioned officers to supervise the operation and maintenance of field and fixed-station radio equipment.

Instruction: Lectures and practical exercises in electrical fundamentals, vacuum tubes and amplifiers, AM and FM receivers and transmitters, electronic components and radar, antennas, wave propagation, frequency allocation, small field radio sets and AN/GRC-26 radio set operation, radio telegraph operation, communications operations, and fixed-station, single- and multichannel transmitting and receiving stations.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electricity and electrical laboratory (4/74).

AR-1715-0187

Corporal Doppler Repair
(SSM Doppler Repair)

Course Number: 9-R-241.1; 9-E-58.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 10–12 weeks (350–428 hours).

Exhibit Dates: 12/55–12/68.

Objectives: To train qualified electronic repair helpers to inspect, test, maintain, and repair the Corporal Doppler system.

Instruction: Lectures and practical exercises in Corporal Doppler system component analysis, block diagrams, test equipment operation, supply forms and publications, transmitter and receiving systems, audio frequency coder and control indicator, troubleshooting, and maintenance check sheets and operating procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics (4/74).

AR-1715-0188

Tandem Switch Repair

Course Number: 622-F14.

Location: Signal School, Ft. Monmouth, NJ.

Length: 18 weeks (641 hours).

Exhibit Dates: 2/69–Present.

Objectives: To train dial central office repairmen to repair tandem switches and associated equipment.

Instruction: Lectures and practical exercises in the repair of tandem switches and associated equipment, including circuit analysis, block diagrams, purposes, troubleshooting and testing of relay and trunk finder, register sender, translator, selector, trunk, transmission, switchboard, interface, and power equipment; system concepts and limitations; and preventive maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electricity or electronics laboratory (4/74).

Related Occupation Codes: 36H.

AR-1715-0189

General Intercept Equipment Repair

Course Number: 102-33B20; 32-R-286.1.

Location: Security Agency School, Ft. Devens, MA.

Length: 22 weeks (711 hours).

Exhibit Dates: 6/63–12/69.

Objectives: To train enlisted personnel to test, maintain, and repair intercept and associated equipment.

Instruction: Lectures and practical exercises in the maintenance and repair of intercept and associated equipment, including basic mathematics, DC and AC electronic circuits, solid-state devices, transmitters and wave propagation, basic radio circuits, receiver and converter equipment, specific recording and reproducing equipment, signal and cryptographic security, and installation and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 10 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0190

1. Corporal Radar Repair
2. SSM Radar System Repair

Course Number: *Version 1:* 9-R-243.1. *Version 2:* 9-E-60.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 18 weeks (670 hours). *Version 2:* 15 weeks (550 hours).

Exhibit Dates: *Version 1:* 5/57–12/68. *Version 2:* 12/55–4/57.

Objectives: To train qualified electronic repair helpers to maintain and repair the Corporal radar system and associated test equipment.

Instruction: *All Versions:* Lectures and practical exercises in Corporal radar equipment and associated test equipment maintenance and repair, including missile system history, safety procedures, tactics and logistics, radar test equipment operation and maintenance, block diagrams, communications circuits, radar systems analysis, and supply terms and publications. *Version 1:* Instruction includes basic technical mathematics and circuit analysis. *Version 2:* Instruction is geared to specific equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronics, 2 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 1 in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 3 semester hours in electronics, 1 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 1 in electrical laboratory (4/74); in the upper-division baccalaureate category, 3 semester hours as an elective in electronics (4/74).

AR-1715-0192

Signal Company Officer

Course Number: 11-A-C2; 11-O-1.
Location: Signal School, Ft. Monmouth, NJ.
Length: 27 weeks (969–1134 hours).
Exhibit Dates: 9/53–12/68.
Objectives: To train commissioned officers to be Signal Corps officers.
Instruction. Lectures and practical exercises in map and aerial photograph reading, weapons, command and staff procedures, modern warfare, tactics and techniques of ground forces, wire and radio communications equipment and systems, communications center operations, signal supply and maintenance, and organization and employment of signal communications.
Credit Recommendation: In the vocational certificate category, 6 semester hours in radio communications and electricity (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in radio communications and electricity (4/74); in the upper-division baccalaureate category, 6 semester hours in radio communications and electricity (12/68).

AR-1715-0193

Infantry Communications Officer

Course Number: 7-B-0200.
Location: Infantry School, Ft. Benning, GA.
Length: 11 weeks (423 hours).
Exhibit Dates: 3/57–12/68.
Objectives: To train officers and warrant officers to install, operate, and maintain infantry communications systems.
Instruction: Lectures and practical exercises in the installation, operation, and maintenance of infantry communications systems, including general communications subjects, message center operation and cryptography, radio operation, radio sets and associated equipment, wire communications, tactical application of communications, map and aerial photograph reading, atomic weapons effects and characteristics, and tactical subjects.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electricity and radio operation and maintenance on the basis of institutional evaluation (12/68).
Related Occupation Codes: 290A; 341A; 721A; 286A; 281A; 282A; 252A.

AR-1715-0194

Medical Equipment Maintenance (Supplementary and Refresher)

Course Number: 4B-F3; 198-F1.
Location: Fitzsimons General Hospital, Denver, CO.
Length: 6 weeks (210 hours).
Exhibit Dates: 4/65–Present.
Objectives: To train qualified medical equipment repair technicians to install, inspect, maintain, and repair complex electronic medical equpment.
Instruction: Lectures and practical exercises in the installation, inspection, maintenance, and repair of complex electronic medical equipment, including review of electronics, use of electronic test equipment, special circuits, records, and electronics subjects applicable to medical equipment repair.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity, 1 in electrical laboratory (4/74).
Related Occupation Codes: 35G; 011A; 911A; 202A.

AR-1715-0195

1. Secure Voice Access System Repair
2. Secure Voice Access Console Repair

Course Number: 622-F15.
Location: Signal School, Ft. Monmouth, NJ; Signal School, Ft. Gordon, GA.
Length: *Version 1:* 19 weeks (684–722 hours). *Version 2:* 9 weeks (328 hours).
Exhibit Dates: *Version 1:* 10/70–Present. *Version 2:* 10/68–9/70.
Objectives: To train dial central office repairmen to maintain the automatic dial central office and the secure voice access console (SEVAC).
Instruction: Lectures and practical exercises in automatic dial control office equipment operation, logic gating and correlation, logic functions, binary counters, register, simulator, controllers, maintenance panel operation, and troubleshooting procedures; and secure voice access console (SEVAC) basic circuits and logic functions, power distribution, maintenance, alignment, and troubleshooting procedures.
Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (3/74). *Version 2:* In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (3/74).
Related Occupation Codes: 36H.

AR-1715-0196

Circuit Conditioning

Course Number: 101-F10.
Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.
Length: 5–7 weeks (167–260 hours).
Exhibit Dates: 8/68–Present.
Objectives: To train microwave system, fixed-plant carrier, fixed-ciphony, or dial central office repairmen to maintain signal-conditioning equipment.
Instruction: Lectures and practical exercises in signal-conditioning equipment maintenance, including circuit conditioning and testing; types of circuit-conditioning test equipment; envelope delay distortion principles and equalizers; communications systems interfacing; and troubleshooting, repair, and preventive maintenance procedures.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics, 1 in electrical laboratory (4/74).
Related Occupation Codes: 26L; 26V; 32E; 32F; 36H.

AR-1715-0197

Communications Central AN/TSC-38B Repair

Course Number: 101-F11.
Location: Signal School, Ft. Monmouth, NJ; Signal School, Ft. Gordon, GA.
Length: 12–15 weeks (450–548 hours).
Exhibit Dates: 6/70–Present.
Objectives: To train receiver, transmitter, or carrier equipment repairmen to operate and maintain the AN/TSC-38B communication central.
Instruction: Lectures and practical exercises in the operation and maintenance of the AN/TSC-38B communication central, including monitoring and test facilities; power, VFTG, and audio subsystem analysis and troubleshooting procedures; radio equipment subsystem components; and exciter, radio receiver, primary and secondary transmitter, and antenna systems operation, alignment, and troubleshooting.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (4/74).
Related Occupation Codes: 32B; 32C; 32E; 32Z.

AR-1715-0198

Improved Hawk Fire Control Repairer
(Improved Hawk Fire Control Repair)

Course Number: *Version 1:* 104-24H10; 104-24H1T. *Version 2:* 104-24H20. *Version 3:* 104-24H20. *Version 4:* 104-24H20.
Location: Missile and Munitions School, Redstone Arsenal, AL.
Length: *Version 1:* 38–45 weeks (1324–1548 hours). *Version 2:* 38–44 weeks (1259–1468 hours). *Version 3:* 42–46 weeks (1470–1612 hours). *Version 4:* 46 weeks (1634 hours).
Exhibit Dates: *Version 1:* 3/78–Present. *Version 2:* 1/77–2/78. *Version 3:* 4/74–12/76. *Version 4:* 1/72–3/74.
Objectives: To train enlisted personnel to maintain the improved Hawk battery control central, information and coordination central, and target engagement simulator of the Hawk fire control system.
Instruction: *Version 1:* Conferences, lectures and laboratory exercises include a simplified coverage of RC and LC transients and sine-wave oscillators; soldering techniques and practices; elementary theory of semiconductor devices and circuits; empirical description of operation of vacuum tube pulse circuits; introduction to computer subsystems, registers, counters, logic operations, memories, I/O, control, and arithmetic units; functional organization and troubleshooting procedures of Hawk fire control systems; and maintenance and repair of fire control systems. Basic electronic training is included in this course. *Version 2:* Conferences, lectures and laboratory exercises include a simplified coverage of RC and LC transients and sine-wave oscillators; soldering techniques and practices; elementary theory of semiconductor devices and cricuits; empirical description of operation of vacuum tube pulse circuits; introduction to computer subsystems, registers, counters, logic operations, memories, I/O, control, and arithmetic units; functional organization and troubleshooting procedures of Hawk fire control systems; and maintenance and repair of fire control systems. Note: Students who have completed Modules 1, 2, 3, and 4 of Basic Common Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (37–38 weeks) of this course. See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete both Phases I and II (43–44 weeks) of this course. *Version 3:* Lectures and laboratory exercises include a simplified coverage of RC and LC transients and sine-wave oscillators; soldering techniques and practices; elementary theory of semiconductor devices and circuits; empirical description of operation of vacuum tube pulse circuits; in-

troduction to computer subsystems, registers, counters, logic operations, memories, I/O, control, and arithmetic units; functional organization and troubleshooting procedures of Hawk computer fire control systems; and maintenance and repair of fire control systems. Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (42 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who do not attend COBET will complete both Phases I and II (46 weeks) of this course. *Version 4:* Lectures and practical exercises in the maintenance of the improved Hawk battery control central, information and coordination central, and target engagement simulator of the Hawk fire control system, including AC and DC circuits, DC transients, electron tubes and functional circuits, electron tube pulse circuits, introduction to semiconductors, sinewave oscillators, magnetic amplifiers, power supplies, basic transistors, gating, analysis and operation of specific systems equipment, and mathematics and digital computer principles.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in computer circuits, 3 in electronic circuits and systems, 5 in electronic repair techniques (8/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in computer fundamentals, 2 in solid state devices and circuits OR 1 semester hour in electrical engineering electronics laboratory, 3 in introduction to electrical engineering (8/79). *Version 2:* In the vocational certificate category, 12 semester hours in computer fundamentals, 12 in electronics laboratory for students who complete 37–38 weeks of the course or 12 semester hours in computer fundamentals, 18 in electronic laboratory for students completing 43–44 weeks of the course (see note above) (8/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer fundamentals, 1 in electronics laboratory for all students (8/77). *Version 3:* In the vocational certificate category, 27 semester hours in basic electricity, electronics, and troubleshooting for those students completing 46 weeks; or 24 semester hours in basic electronics and troubleshooting for those students completing 42 weeks (see note above) (3/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic computer subsystems and 1 in electricity or electronics for those students completing 46 weeks; or 3 semester hours in computer subsystems for those students completing 42 weeks (see note above) (3/75). *Version 4:* In the vocational certificate category, 4 semester hours in electronics, 3 in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 1 in electronics laboratory, and 3 as an elective in electronics (4/74); in the upper-division baccalaureate category, 3 semester hours in electronics, 1 in electronics laboratory (4/74).

Related Occupation Codes: 24H.

1. Ground Control Radar Repair
2. Ground Control Radar Repair
3. Ground Control Radar Repair
4. Ground Control Radar Repair (Ground Control Approach Equipment Repair)

Course Number: *Version 1:* 104-26D10. *Version 2:* 104-26D20. *Version 3:* 104-26D30; 11-R-282;2 104-26D20; 11-E-59. *Version 4:* 104-26D20.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Gordon, GA. *Version 3 :* Signal School, Ft. Gordon, GA. *Version 4 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 32 weeks (1200 hours). *Version 2:* 23–33 weeks (849–1224 hours). *Version 3:* 27–33 weeks (999–1222 hours). *Version 4:* 20–33 weeks (736–1174 hours).

Exhibit Dates: *Version 1:* 11/79–Present. *Version 2:* 12/76–10/79. *Version 3:* 3/75–11/76. *Version 4:* 11/56–2/75.

Objectives: To train enlisted personnel to maintain ground control approach radars and associated IFF equipment.

Instruction: *Version 2:* Phase I (10 weeks) includes lectures and practical experience in troubleshooting pulse generators, power supplies, audio amplifiers, and audio generators. Phase II (23 weeks) includes lectures and practical experience in installation and maintenance of radar sets; nonsinusoidal circuitry; radar beacon systems; basic receivers, microwave transmitters, receivers, and modulators. Note (1): Students who have completed Modules 1 through 7 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (23 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (33 weeks) of this course. *Version 3:* Phase I (6 weeks) includes lectures and practical experience in troubleshooting pulse generators, power supplies, audio amplifiers, and audio generators. Phase II (27 weeks) includes lectures and practical experience in installation and maintenance of radar sets; nonsinusoidal circuitry; radar beacon systems; basic receivers, microwave transmitters, receivers, and modulators. Note (2): Students who have completed Modules 1, 2, 3, and 4 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (27 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (33 weeks) of this course. *Version 4:* Lectures and practical experience in electrical fundamentals; applied electronics; transmitter circuitry; semiconductor fundamentals; nonsinusoidal circuitry; timer-indicator components; microwave transmitters, receivers, and modulators; transmitter-receiver performance measurements; interrogator and radar set operation; and air traffic control radar beacon systems operation and field exercises.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 3 semester hours in basic electronics and troubleshooting for students who have completed 33 weeks of the course (see note (1) above) (4/77); in the lower-division baccalaureate/associate degree category, 2 semester hours in microwave systems for students who have completed either 23 or 33 weeks of the course (see note (1) above) (4/77). *Version 3:* In the vocational certificate category, 6 semester hours in microwave electronics for students completing 27 weeks of the course or 6 semester hours in microwave electronics and 4 in electronics and troubleshooting for students completing 33 weeks of the course (see note (2) above) (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in microwave electronics for students completing 27 weeks of the course or 3 semester hours in microwave electronics and 2 in electronics and troubleshooting for students completing 33 weeks (see note (2) above) (6/75). *Version 4:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

AR-1715-0201

Corporal Handling Equipment Maintenance

Course Number: 6-H-F8.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 4 weeks (140–168 hours).

Exhibit Dates: 10/57–12/68.

Objectives: To train officers and enlisted personnel to operate and maintain Corporal missile handling equipment.

Instruction: Lectures and practical exercises in basic electricity, including AC and DC motors, transformers, magnetism, and rectifiers; maintenance and troubleshooting of Erector M2 and its components; and operation and maintenance of Corporal servicing equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (4/74).

AR-1715-0202

Teletypewriter Set AN/FGC-140 Maintenance

Course Number: 160-F19.

Location: Signal School, Ft. Gordon, GA.

Length: 4 weeks (150 hours).

Exhibit Dates: 1/74–Present.

Objectives: To provide students with the knowledge to perform general support maintenance on a specific teletype set.

Instruction: Instruction in the general operation and repair of the AN/FGC-140 teletypewriter, including installation and replacement of subsystems, with minor emphasis on troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 1 semester hour in general maintenance procedures (4/77).

AR-1715-0203

1. Airborne Surveillance Radar Repair
2. Airborne Surveillance Radar Repair
3. Airborne Radar Repair (AN/APS-94)

Course Number: 104-26M20.

Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ. *Version 2:* Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ. *Version 3:* Signal School (Phase I)/Combat Surveillance School (Phase II), Ft. Monmouth, NJ (Phase I)/Ft. Huachuca, AZ (Phase II).

Length: *Version 1:* 21 weeks (676 hours). *Version 2:* 30 weeks (1051–1055 hours). *Version 3:* 34 weeks (1263 hours).

Exhibit Dates: *Version 1:* 6/74–Present. *Version 2:* 9/69–5/74. *Version 3:* 12/66–8/69.

Objectives: To train enlisted personnel to inspect, test, and maintain airborne radar systems.

Instruction: *All Versions:* Lectures and laboratories in basic electricity; basic electronics; special circuitry, including nonlinear wave shaping; airborne surveillance radar; radar transmitting sets; radar data receiving sets; and data transfer system alignment. *Version 1:* Instruction emphasizes troubleshooting and maintenance of power supplies, signal comparators, signal monitors, transmitters, receivers, encoders and decoders for a specialized radar system.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electrical laboratory (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (6/75). *Version 2:* In the vocational certificate category, 8 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (4/74); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (12/68). *Version 3:* In the vocational certificate category, 8 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (4/74); in the upper-division baccalaureate category, 6 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (12/68).

Related Occupation Codes: 26M.

AR-1715-0204

NUCLEAR WEAPONS MAINTENANCE

Course Number: 644-55G10; 644-55G20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 9–12 weeks (299–406 hours).

Exhibit Dates: 6/72–Present.

Objectives: To train enlisted personnel to assemble, disassemble, maintain, test, and inspect nuclear weapons and to cope with nuclear emergency situations.

Instruction: Lectures and practical exercises in the assembly, disassembly, maintenance, testing, and repair of nuclear weapons and techniques of coping with nuclear emergency situations, including nuclear fundamentals, principles and components of nuclear weapons, electrical systems, electrical test equipment, care and handling of nuclear weapons, common shop operations, various examining procedures, emergency team operations, effects of nuclear weapons, and emergency destruction.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/74).

Related Occupation Codes: 55G; 09B.

AR-1715-0205

CH-54 AUTOMATIC FLIGHT CONTROL EQUIPMENT REPAIR

Course Number: 102-F5.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 3 weeks (106 hours).

Exhibit Dates: 12/67–Present.

Objectives: To train avionic flight control equipment repairmen to perform direct and general support maintenance on CH-54 automatic flight control equipment.

Instruction: Lectures and practical exercises in automatic flight control familiarization, block-diagram analysis, power distribution and time sequencing, servo loop analysis, pitch channel circuit analysis, roll channel analysis, and altitude and yaw channel analysis; supervisory panel familiarization and block-diagram analysis; and troubleshooting and maintenance procedures.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/74).

Related Occupation Codes: 35N; 35P.

AR-1715-0206

DEFENSE AGAINST SOUND EQUIPMENT

Course Number: 3C-F1; 244-F1.

Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ; Intelligence School, Ft. Holabird, MD; Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Intelligence School, Ft. Holabird, MD; Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 19 weeks (691 hours). *Version 2:* 17 weeks (605 hours).

Exhibit Dates: *Version 1:* 12/67–Present. *Version 2:* 6/67–11/67.

Objectives: To provide intelligence specialists with advanced training in specialized electronic equipment and the techniques used in the detection and location of listening devices, and to provide them with training in basic electricity, electronics, solid-state devices, and transistor circuits.

Instruction: *All Versions:* Lectures and practical exercises in AC and DC circuits, resistor combinations, transformer and coupled circuits, power supplies, regulators, series and parallel resonance, RC/RL circuits, and use of oscilloscopes, multimeters, spectrum analyzers, and signal generators. *Version 1:* Includes transistor amplifiers, transmitters, modulators, and receivers; AM and FM detectors and oscillator circuits; transmission lines; and microwave and wave-guide techniques. *Version 2:* Includes use and application of miniature transmitters and miniature receivers signal analysis techniques.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics for non-electrical-engineering majors, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0208

DIGITAL CONVERTING PROGRAMMING GROUP MAINTENANCE (AN/TCA-4)
(Digital Converting Programming Group (AN/TCA-4))

Course Number: 102-F9.

Location: Security Agency School, Ft. Devens, MA.

Length: 8 weeks (149–288 hours).

Exhibit Dates: 8/69–Present.

Objectives: To train intercept system repairmen to maintain and repair the AN/TCA-4 digital converting programming group.

Instruction: Lectures and practical exercises in the maintenance and repair of the AN/TCA-4 digital converting programming group, including basic signal analysis, system operation, circuit cards, synchronizer, demultiplexing logic, translating logic, power supplies, programming, and troubleshooting and testing procedures.

Credit Recommendation: Credit is not recommended because of the military nature of the course (9/77).

Related Occupation Codes: 33F; 33Z.

1. NIKE ACQUISITION RADAR AND COMPUTER REPAIR
2. NIKE ACQUISITION RADAR AND COMPUTER REPAIR
   (Nike Acquisition Radar and Computer Systems Repair)
   (SAM Acquisition Radar and Computer Systems Repair)

Course Number: *All Versions:* 9-S-252.1. *Version 2:* 9-R-252;1 9-E-63.

Location: Ordnance Guided Missile school, Redstone Arsenal, AL.

Length: *Version 1:* 34 weeks (1257 hours). *Version 2:* 17–24 weeks (613–924 hours).

Exhibit Dates: *Version 1:* 2/63–12/68. *Version 2:* 12/55–1/63.

Objectives: To train enlisted personnel to operate and maintain missile acquisition radar and computer systems.

Instruction: *All Versions:* Lectures and practical exercises in the description, operation, organization, maintenance, and repair of Nike missile acquisition radar and computer systems. *Version 1:* Instruction includes electrical and electronic fundamentals and basic circuit analysis and troubleshooting techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electricity or electronics, 6 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 6 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0210

IMPROVED NIKE HERCULES HIGH POWER ACQUISITION RADAR MAINTENANCE

Course Number: 4B-F14; 121-F14.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 7 weeks (282 hours). *Version 2:* 5 weeks (186–188 hours).

Exhibit Dates: *Version 1:* 2/70–Present. *Version 2:* 10/65–1/70.

Objectives: To train warrant officers, commissioned officers, and enlisted personnel to operate and maintain the improved Nike Hercules acquisition radar.

Instruction: Lectures and practical exercises in improved Nike Hercules high-power acquisition radar system operation and maintenance, including acquisition, transmitting, stagger, receiving, and MTI systems organization, description, capabilities, characteristics, block-diagram analysis, and safety precautions.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electrical laboratory, and additional credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 3 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory, and additional credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 24Q; 24P; 222B; 251B.

1. Hawk Fire Control Maintenance
2. Hawk Fire Control Maintenance (Hawk Pulse Acquisition Radar and Battery Control Central Maintenance)
3. Hawk Pulse Acquisition Radar and Battery Control Central Maintenance
4. Hawk Pulse Acquisition Radar and Battery Control Center Maintenance

Course Number: *Version 1:* 121-24F20. *Version 2:* 121-24F20; 121-23P20; 121-228;1 44-R-228.1. *Version 3:* 44-R-228.1. *Version 4:* 44-R-228;1 44-N-F15.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 18 weeks (657–671 hours). *Version 2:* 34–35 weeks (1114–1218 hours). *Version 3:* 29 weeks (987 hours). *Version 4:* 32–33 weeks (1141–1251 hours).

Exhibit Dates: *Version 1:* 10/70–Present. *Version 2:* 3/62–9/70. *Version 3:* 6/60–2/62. *Version 4:* 7/58–5/60.

Objectives: To train enlisted personnel to install, test, adjust, and maintain Hawk missile system pulse acquisition radar and battery control central systems.

Instruction: Lectures and practical exercises in basic electricity and electronics, Hawk pulse acquisition radar systems and missile battery fire control systems theory of operation, fault diagnosis and repair using standard and special test equipment, block-diagram analysis and signal tracing, and maintenance and adjustment procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electronics (6/75); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (6/75); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (6/75). *Version 2:* In the vocational certificate category, 3 semester hours in electricity or electronics and 2 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68) and 2 in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 2 semester hours in electricity or electronics and 2 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68) and 2 in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 4:* In the vocational certificate category, 2 semester hours in electricity or electronics and 2 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68) and 2 in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 24F.

AR-1715-0212

Airborne Sensor Specialist Skill Development Base

Course Number: 221-17L20-I.

Location: Combat Surveillance School, Ft. Huachuca, AZ.

Length: 16 weeks (570 hours).

Exhibit Dates: 7/69–Present.

Objectives: To train airborne sensor specialists to perform or supervise the maintenance of airborne sensor systems.

Instruction: Lectures and practical exercises in the operation and maintenance of airborne sensor systems, including Doppler navigation, airborne photographic surveillance, radar reconnaissance, infrared surveillance systems.

Credit Recommendation: No credit because of the military nature of the course (4/74).

Related Occupation Codes: 17L.

AR-1715-0213

1. M33 Fire Control System Maintenance
2. M33, SCR-584 Fire Control System Maintenance (Artillery Fire Control System Maintenance, M33)

Course Number: *Version 1:* 44-N-213.3. *Version 2:* 44-OE-28.

Location: *All Versions:* Air Defense School, Ft. Bliss, TX. *Version 2:* Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: *Version 1:* 27 weeks (1058 hours). *Version 2:* 34–39 weeks (1292–1476 hours).

Exhibit Dates: *Version 1:* 8/58–12/68. *Version 2:* 2/55–7/58.

Objectives: To train warrant officers and enlisted personnel to employ, adjust, and maintain the M33 antiaircraft fire control system and associated equipment.

Instruction: *All Versions:* Lectures and practical exercises in M33 antiaircraft fire control system employment, adjustment, and maintenance, including vacuum tube fundamentals; Ohm's law applied to AC and DC circuits; AC and DC motors construction and operation; load-line analysis; RC coupled, cathode follower, RF, and power amplifiers operation; oscillators; superheterodyne receiver operation and alignment; wave-shaping circuits, klystrons, magnetrons, and transmission lines and high-frequency measurement techniques; and adjustment, maintenance, and repair procedures. *Version 2:* Instruction includes mathematics review through right triangles and vectors, with emphasis on the operation, troubleshooting, maintenance, and repair of equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics for non-engineering majors (4/74). *Version 2:* In the vocational certificate category, 10 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics for non-engineering majors (4/74).

AR-1715-0214

1. AAA Integrated Fire Control Maintenance
2. AAA Integrated Fire Control Maintenance Officer

Course Number: *Version 1:* 44-B-1120; 44-B-1121. *Version 2:* 44-O-7.

Location: *Version 1:* Air Defense School, Ft. Bliss, TX. *Version 2:* Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: *Version 1:* 30 weeks (1165 hours). *Version 2:* 31–34 weeks (1198–1295 hours).

Exhibit Dates: *Version 1:* 6/58–12/68. *Version 2:* 7/55–5/58.

Objectives: To train officers and warrant officers in the function, technical operation, characteristics, employment, maintenance, and inspection of antiaircraft fire control systems.

Instruction: *All Versions:* Lectures and practical exercises in basic AC and DC circuits, RL/RCL circuits and transformers, waveforms, and series/parallel elements; utilization of amplifiers, vacuum tubes, inverters, Colpitts/Hartley oscillators, oscilloscopes, multimeters, and signal generators; and troubleshooting, inspection, and repair procedures for radars and computers. *Version 2:* Emphasizes radar electronics, including bootstrap circuits, magnetrons, transmission lines, field concepts, and AC/DC motor drive characteristics.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in electricity and electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity and electronics for non-electrical-engineering majors, and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 8 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics for non-electrical-engineering majors, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0215

1. M-38 Fire Control System Maintenance
2. M-38 Fire Control System Maintenance (Artillery Fire Control System Maintenance, T-38)

Course Number: *Version 1:* 44-N-214.4. *Version 2:* 44-OE-29.

Location: *Version 1:* Air Defense School, Ft. Bliss, TX. *Version 2:* Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX; Antiaircraft and Guided Missile School, Ft. Bliss, TX.

Length: *Version 1:* 24 weeks (922 hours). *Version 2:* 30–31 weeks (1126–1238 hours).

Exhibit Dates: *Version 1:* 6/58–12/68. *Version 2:* 2/55–5/58.

Objectives: To train warrant officer and enlisted personnel to operate, adjust, and maintain the M-38 artillery fire control system and associated radar equipment.

Instruction: *All Versions:* Lectures and practical exercises in AC and DC circuits; motor and generator operation; circuits, including phase shift networks, superheterodyne receivers, oscillators, squaring circuits, H.V. power supplies, and strobing and timing circuits; use of oscilloscopes, signal generators, multimeters, and audio oscillators; and system troubleshooting and repair. *Version 2:* Instruction includes mathematics review. *Version 3:* Instruction includes mathematics review.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics for non-engineering majors, and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 7 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics for non-engineering majors, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

1. NIKE AJAX FIRE CONTROL SYSTEM MAINTENANCE
2. SAM FIRE CONTROL SYSTEM MAINTENANCE, NIKE AJAX

Course Number: *All Versions:* 44-N-227.2; 44-N-1178. *Version 1:* 44-N-1178A; 44-N-224.1.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 37-38 weeks (1436-1477 hours). *Version 2:* 42 weeks (1632 hours).

Exhibit Dates: *Version 1:* 6/58-12/68. *Version 2:* 6/57-5/58.

Objectives: To train enlisted personnel to operate and maintain the Nike Ajax fire control system and associated IFF equipment.

Instruction: *All Versions:* Lectures and practical experience in radio principles; AC and DC circuits; vacuum tubes; amplifiers, oscillators, and CWANDAM transmitters; DC power supplies, regulators, and distribution; radar circuits, including detectors, receivers, nonsinusoidal generators, and shock-excited oscillators; IFF system introduction; acquisition and target-track radar functional operation; Nike Ajax computer functions; and system check-out and adjustment procedures. *Version 2:* Instruction includes review of algebra fundamentals and right-triangle solutions.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68). *Version 2:* In the vocational certificate category, 4 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68).

Related Occupation Codes: 222B; 251B.

1. SKYSWEEPER GUN SECTION FIRE CONTROL MAINTENANCE
   (T38 Gun Section Fire Control Maintenance)
2. GUN SECTION FIRE CONTROL MAINTENANCE, T38

Course Number: *Version 1:* 44-R-214-3. *All Versions:* 44-E-36.

Location: *Version 1:* Air Defense School, Ft. Bliss, TX; Antiaircraft and Guided Missile School, Ft. Bliss, TX. *Version 2:* Antiaircraft and Guided Missile School, Ft. Bliss, TX.

Length: *Version 1:* 15 weeks (568-572 hours). *Version 2:* 18 weeks (720 hours).

Exhibit Dates: *Version 1:* 4/56-12/68. *Version 2:* 2/55-3/56.

Objectives: To train enlisted personnel to operate, employ, adjust, and troubleshoot artillery fire control systems.

Instruction: *Version 1:* Lectures and practical exercises in system operation (block-diagram level), including receivers, range servos, reference generators, computer, power controls, and field adjustment techniques. *Version 2:* Lectures and practical exercises in basic AC and DC circuits, vacuum tube characteristics, operation of synchroscopes, and voltmeters; explanation of system components; and troubleshooting procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, credit in electronics and electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics and electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electronics and electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 1 semester hour in electronics and electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics and electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electronics and electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0218

FIELD ARTILLERY DATA COMPUTER (FADAC) MAINTENANCE

Course Number: 6-D-F29.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/63-12/68.

Objectives: To train communications officers and enlisted personnel qualified as artillery communications specialists to maintain the field artillery data computer and ancillary equipment.

Instruction: Lectures and practical exercises in the maintenance of field artillery data computers and ancillary equipment, including computer operation, number systems, programming and memory, component replacement, power control circuits, signal data reproducer, logic test set, and troubleshooting of equipment.

Credit Recommendation: In the vocational certificate category, credit in electronics, digital logic, or computer science on the basis of institutional evaluation (4/74).

AR-1715-0219

1. TACTICAL SATELLILE MICROWAVE SYSTEM OPERATOR
2. TACTICAL MICROWAVE SYSTEMS OPERATION AND MAINTENANCE
3. TACTICAL MICROWAVE SYSTEMS OPERATION AND MAINTENANCE
4. TACTICAL MICROWAVE SYSTEMS OPERATION AND MAINTENANCE
5. BASIC MICROWAVE RADIO EQUIPMENT REPAIR
6. BASIC MICROWAVE RADIO EQUIPMENT REPAIR

Course Number: *Version 1:* 201-26Q10. *Version 2:* 101-26L10. *Version 3:* 101-26L10. *Version 4:* 101-26L10. *Version 5:* 101-281.0. *Version 6:* 11-R-281.0.

Location: *Version 1:* Signal School, Ft. Gordon, GA.. *Version 2 :* Signal School, Ft. Gordon, GA. *Version 3 :* Signal School, Ft. Gordon, GA. *Version 4 :* Signal School, Ft. Monmouth, NJ; Signal School, Ft. Monmouth, NJ. *Version 6 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 15 weeks (542 hours). *Version 2:* 11-15 weeks (395-542 hours); 11-15 weeks (395-542 hours); 11-15 weeks (392-539 hours). *Version 4:* 15 weeks (526-554 hours). *Version 5:* 19 weeks (706 hours). *Version 6:* 15 weeks (548 hours).

Exhibit Dates: *Version 1:* 9/78-Present. *Version 2:* 1/77-8/78. *Version 3:* 11/74-12/76. *Version 4:* 9/68-10/74. *Version 5:* 2/66-8/68. *Version 6:* 3/63-1/66.

Objectives: To train enlisted personnel to operate, adjust, install, and repair microwave radio equipment.

Instruction: *All Versions:* Lectures and practical exercises in electrical and electronics fundamentals; circuit applications in radio, especially microwave; servicing procedures of radio sets and use of associated test equipment. *Version 1:* COBET equivalent is included in this version of the course. *Version 2:* Note (1): Students who have completed Modules 201, 202, and 203 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (11 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (15 weeks) of this course. *Version 3:* Note (2): Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (11 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who do not attend COBET will complete both Phases I and II (15 weeks) of this course. *Version 5:* Includes a much more thorough coverage of electrical and electronic fundamentals, with added sections in complex wave circuitry and solid-state devices.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in troubleshooting techniques (8/79); in the lower-division baccalaureate/associate degree category, 5 semester hours in basic electronies communications(8/79). *Version 2:* In the vocational certificate category, 2 semester hours in basic electronics for students who complete 11 weeks of the course or 5 semester hours in basic electronics and troubleshooting for students who complete 15 weeks of the course (see note (1) above) (4/77). *Version 3:* In the vocational certificate category, 3 semester hours in basic electricity and electronics and 2 in electronics laboratory for those students completing 15 weeks; or 2 semester hours in electronics laboratory for those students completing 11 weeks (see note (2) above) (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics for those students completing 15 weeks; no credit for those students completing 11 weeks (see note (2) above) (5/75). *Version 4:* In the vocational certificate category, 8 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics (4/74). *Version 5:* In the vocational certificate category, 16 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics (4/74). *Version 6:* In the vocational certificate category, 8 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics (4/74).

AR-1715-0220

Basic Radar Repair

Course Number: 11-R-282.0.

Location: Signal School, Ft. Monmouth, NJ.

Length: 19 weeks (698 hours).

Exhibit Dates: 9/63–12/68.

Objectives: To train enlisted personnel to operate and maintain radar equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of radar equipment, including detailed circuit analysis of DC and AC circuits, transformers, semiconductors, vacuum tubes, electronic circuits, radio circuits, power supplies, radar circuits, nonsinusoidal circuits, special circuits, radar systems and specific radar sets; and troubleshooting and repair procedures.

Credit Recommendation: In the vocational certificate category, 16 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and additional credit in electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0221

1. Overseas Automatic Switching Center (ASC) Technical Controller
2. Automatic Digital Message Switching Center (ADMSC) Technical Controller
3. Automatic Digital Message Switching Center (ADMSC) Technical Controller
4. Automatic Digital Message Switching Center (ADMSC) Technical Controller

Course Number: 622-F8.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 5 weeks (167-173 hours). *Version 2:* 6 weeks (222 hours). *Version 3:* 8 weeks (282 hours). *Version 4:* 6 weeks (206 hours).

Exhibit Dates: *Version 1:* 5/73–Present. *Version 2:* 6/71–4/73. *Version 3:* 2/69–5/71. *Version 4:* 4/68–1/69.

Objectives: To train fixed-station technical controllers to test and maintain the continuity and quality of the operational circuits of automatic digital message switching centers.

Instruction: *All Versions:* Lectures and practical exercises in the operation of, and signal tracing through, automatic digital message switching center equipment and technical control equipment, operation of consoles, and use of test equipment. *Version 2:* Extensive use of test equipment. *Version 3:* Extensive use of test equipment. *Version 4:* Extensive use of test equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, credit in electronics or instrumentation on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics or instrumentation on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 2 semester hours in electronics or instrumentation (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics or instrumentation on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 2 semester hours in electronics or instrumentation (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics or instrumentation on the basis of institutional evaluation (4/74). *Version 4:* In the vocational certificate category, 2 semester hours in electronics or instrumentation (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics or instrumentation on the basis of institutional evaluation (4/74).

Related Occupation Codes: 32D.

Improved Hawk Pulse Acquisition Radar Repairer

(Improved Hawk Pulse Acquisition Radar Repair)

(Improved Hawk Pulse Radar Repair)

Course Number: *Version 1:* 104-24JIT. *Version 2:* 104-24J10. *Version 3:* 104-24J20. *Version 4:* 104-24J20. *Version 5:* 104-24J20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 38 weeks (1314-1315 hours). *Version 2:* 34 weeks (1157 hours). *Version 3:* 29–35 weeks (983–1196 hours). *Version 4:* 33–37 weeks (1115–1257 hours). *Version 5:* 41 weeks (1446 hours).

Exhibit Dates: *Version 1:* 10/79–Present. *Version 2:* 3/78–9/79. *Version 3:* 2/77–2/79. *Version 4:* 5/74–1/77. *Version 5:* 4/72–4/74.

Objectives: To train enlisted personnel to inspect, test, repair, and maintain Hawk pulse radar systems, ground equipment test sets, and support maintenance equipment.

Instruction: *All Versions:* Lectures and practical exercises in fundamentals of AC and DC circuits, transistors, vacuum tubes, electronic circuits, power supplies, and communications circuits and systems; and detailed theory *Version 2:* Instruction includes soldering techniques and basic electronics. COBET is not required as a prerequisite. of operation of acquisition radar, range radar, and associated test equipment. *Version 3:* Note: Students who have completed Modules 1, 2, 3, and 4 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (29 weeks) of this course. See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete both Phases I and II (35 weeks) of this course. *Version 4:* Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (33 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who do not attend COBET will complete both Phases I and II (37 weeks) of this course.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 1 semester hour in microwaves 1 in computer circuits and 5 in electronic repair techniques (8/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in basic electronics, 2 in solid state and 2 in circuits and systems OR, for those students in an electrical engineering program 1 semester hour in electrical engineering electronics laboratory, 3 in introduction to electrical engineering (8/79). *Version 3:* In the vocational certificate category, 18 semester hours in basic electronics for students who complete 29 weeks of this course or 24 semester hours in basic electronics for students who complete 35 weeks of this course (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory for students who complete 35 weeks of the course (see note above) (8/77). *Version 4:* In the vocational certificate category, 25 semester hours in basic electricity, electronics, and troubleshooting for those students completing 37 weeks; or 22 semester hours in basic electronics and troubleshooting for those students completing 33 weeks (see note above) (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics for those students completing 37 weeks; no credit for those students completing 33 weeks (see note above) (3/75). *Version 5:* In the vocational certificate category, 24 semester hours in electricity and electronics (4/74); in the lower-division baccalaureate/associate degree category, 12 semester hours in electricity and electronics (4/74); in the upper-division baccalaureate category, 6 semester hours in electricity and electronics (4/74).

Related Occupation Codes: 24J.

Improved Hawk Continuous Wave (CW) Radar Repairer

(Improved Hawk Continuous Wave (CW) Radar Repair)

Course Number: *Version 1:* 104-24K10; 104-24K1T. *Version 2:* 104-24K20. *Version 3:* 104-24K20. *Version 4:* 104-24K20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 29-30 weeks (1001-1003 hours). *Version 2:* 30-36 weeks (953-1164 hours). *Version 3:* 34-38 weeks (1174-1316 hours). *Version 4:* 43 weeks (1531 hours).

Exhibit Dates: *Version 1:* 3/78–Present. *Version 2:* 1/77–2/78. *Version 3:* 3/74–12/76. *Version 4:* 4/72–2/74.

Objectives: To train enlisted personnel to operate and maintain Hawk continuous wave radar systems.

Instruction: *Version 1:* Lectures and practical exercises in fundamentals of DC and AC circuits, transistors, vacuum tubes, electronic circuits, power supplies, communications circuits and systems, and fundamental digital circuits and subsystems, and detailed theory of operation of Hawk launchers, illuminator radar, acquisition radar, and associated test equipment. *Version 2:* Lectures and practical exercises in fundamentals of DC and AC circuits, transistors, vacuum tubes, electronic circuits, power supplies, communications circuits and systems, and digital computer circuits; and detailed theory of operation of Hawk launchers, illuminator radar, acquisition radar, and associated test equipment. Note: Students who have completed Modules 1, 2, 3, and 4 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (30 weeks) of the course. See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete both Phases I and II (36 weeks) of the course. Note: Students who have completed Modules *Version 3:* Lectures and practical exercises in fundamentals of DC and AC circuits, transistors, vacuum tubes, electronic circuits, power supplies, communications circuits and systems, and digital computer circuits; and detailed theory of operation of Hawk launchers, illuminator radar, acquisition radar, and associated test equipment. Note: Students who have competed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (34 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who do not attend COBET will complete both Phases I and II (38 weeks) of this course. *Version 4:* Lectures and practical exercises in fundamentals of DC and aAC circuits, transistors, vacuum tubes, electronic circuits, power supplies, communications circuits and systems, and digital computer circuits; and detailed theory of operation of Hawk launchers, illuminator radar, acquisition radar, and associated test equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in microwaves, 1 in computer circuits and 5 in electronic repair techniques (8/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical engineering fundamentals, 3 in electrical engineering electronics laboratory OR, 3 semester hours in basic electronics, 3 in basic electricity, 2 in solid state circuits and systems, and 2 in circuits & systems (8/79). *Version 2:* In the vocational certificate category, 15 semester hours in basic electronics and 3 in computer fundamentals for students who complete 30 weeks of the course, or 21 semester hours in basic electronics and 3 in computer fundamentals for students completing 36 weeks of the course (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory for students completing 36 weeks of the course (8/77). *Version 3:* In the vocational certificate category, 25 semester hours in basic electricity, electronics, and troubleshooting for those students completing 38 weeks; or 22 semester hours in basic electronics and troubleshooting for those students completing 34 weeks (see note above) (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics and 1 in basic computer subsystems for those students completing 38 weeks; or 1 semester hour in basic computer subsystems for those students completing 34 weeks (see note above) (3/75). *Version 4:* In the vocational certificate category, 24 semester hours in electricity and electronics (4/74); in the lower-division baccalaureate/associate degree category, 12 semester hours in electricity and electronics (4/74); in the upper-division baccalaureate category, 6 semester hours in electricity and electronics (4/74).

UNATTENDED GROUND SENSOR OPERATION

Course Number: 3A-F22; 221-F2.

Location: Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ; Combat Surveillance School, Ft. Huachuca, AZ.

Length: 3–5 weeks (136–196 hours).

Exhibit Dates: 8/69–Present.

Objectives: To train enlisted personnel and officers to prepare, employ, and operate unattended ground sensors and monitors, to perform organizational maintenance on all sensors and related equipment, and to analyze and react to sensor-provided data.

Instruction: Lectures and practical exercises on unattended ground sensors, operation and maintenance of specific sensor equipment, and sensor employment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/74).

Related Occupation Codes: 11B; 11C; 11D; 11E; 11F; 13E.

1. NUCLEAR WEAPONS ELECTRONICS MAINTENANCE
2. NUCLEAR WEAPONS ELECTRONIC MAINTENANCE
3. NUCLEAR WEAPONS ELECTRONIC MAINTENANCE
4. ARMY NUCLEAR WEAPONS ELECTRONICS SPECIALIST (PHASE I)

Course Number: *Version 1:* 140-35F10. *Version 2:* 140-35F20. *Version 3:* 140-35F20. *Version 4:* 140-35F20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 11–12 weeks (353–400 hours). *Version 2:* 17–21 weeks (588–734 hours). *Version 3:* 20–22 weeks (708–726 hours). *Version 4:* 11 weeks (391 hours).

Exhibit Dates: *Version 1:* 4/76–Present. *Version 2:* 4/74–3/76. *Version 3:* 6/72–3/74. *Version 4:* 9/68–5/72.

Objectives: To train enlisted personnel to maintain electrical and electronic components and test equipment associated with nuclear weapons.

Instruction: *All Versions:* Lectures and practical exercises in basic electronic circuits, vacuum tube circuits, and maintenance techniques for specific devices. There is a discussion of transistors and vintage test equipment. *Version 1:* Lectures and laboratory exercises include simplified coverage of RC and LC transients and sinewave oscillators; elementary semiconductors and multistage amplifiers; three-phase AC; schmitt triggers and control circuits; and troubleshooting and maintenance of test equipment, specialized test equipment, and electronic systems associated with nuclear weapons. NOTE: Students have completed their basic electronics studies in this course, and not in COBET. *Version 2:* Lectures and laboratory exercises include simplified coverage of RC and LC transients and sinewave oscillators; elementary semiconductors and multistage amplifiers; three-phase AC; schmitt triggers and control circuits; and troubleshooting and maintenance of test equipment, specialized test equipment, and electronic systems associated with nuclear weapons. Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (17 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who do not attend COBET will complete both Phases I and II (21 weeks) of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in basic electricity, 3 in test equipment repair and calibration (8/79); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic circuits, 2 in basic electronics. Credit is recommended on the basis of of institutional evaluation at the introductory Electrical Engineering level (8/79). *Version 2:* In the vocational certificate category, 9 semester hours in basic electricity, electronics, and troubleshooting for those students completing 21 weeks; or 6 semester hours in basic electronics and troubleshooting for those students completing 17 weeks (see note above) (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics for those students completing 21 weeks; no credit for those students completing 17 weeks (see note above) (3/75). *Version 3:* In the vocational certificate category, 6 semester hours in electricity and electronics, 2 in electrical and electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics, 1 in electrical and electronics laboratory (4/74); in the upper-division baccalaureate category, 1 semester hour in electrical and electronics laboratory (4/74). *Version 4:* In the vocational certificate category, 6 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (4/74); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics and additional credit in electrical laboratory on the basis of institutional evaluation (12/68).

Related Occupation Codes: 35F.

(Communications Officer)

Course Number: *All Versions:* 4C-25A. *Version 2:* 4C-0205; 4C-0200; 6-A-0200.

Location: Field Artillery School, Ft. Sill, OK; Artillery and Missile School, Ft. Sill, OK.

Length: *Version 1:* 9 weeks (281 hours). *Version 2:* 10–11 weeks (320–419 hours).

Exhibit Dates: *Version 1:* 12/79–Present. *Version 2:* 5/64–11/79.

Objectives: To train signal officers to supervise and coordinate the installation, operation, and maintenance of communications systems and selected electronic equipment.

Instruction: Lectures and practical exercises in the supervision of the installation, operation, and maintenance of communications systems and selected electronic equipment including instruction in AM and FM radio fundamentals and equipment, applied communications, radiotelephony, automatic data processing equipment, tactics, ground surveillance equipment, and management procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in communications system installation (1/80); in the lower-division baccalaureate/associate degree category, 2 semester hours in communications equipment maintenance management, 1 in communications systems planning and 1 in technical writing (1/80). *Version 2:* In the vocational certificate category, 2 semester hours in communications equipment maintenance (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in communications equipment maintenance on the basis of institutional evaluation (6/75).

Huachuca, AZ.

Length: *Version 1:* 18 weeks (532–876 hours). *Version 2:* 15 weeks (511 hours). *Version 3:* 24 weeks (853 hours). *Version 4:* 27–28 weeks (942–970 hours). *Version 5:* 24 weeks (862 hours).

Exhibit Dates: *Version 1:* 3/77–9/77. *Version 2:* 6/74–2/77. *Version 3:* 1/73–5/74. *Version 4:* 7/69–12/72. *Version 5:* 3/66–6/69.

Objectives: To train enlisted personnel to repair and maintain airborne infrared systems.

Instruction: *Version 1:* Course includes basic electronic theory and laboratory and emphasizes necessary theory and troubleshooting to train personnel to install, maintain, adjust, determine defective components and replace defective components in infrared surveillance equipment. Systems include optics, radio, servos, digital, cryogenic, and photo equipment. *Version 2:* Instruction emphasizes practical exercise in troubleshooting techniques on various types of infrared equipment. *Version 3:* Lectures and practical exercises in the repair and maintenance of the AN/UAS-4A or the AN/UAS-4 airborne infrared system, including basic DC and AC circuit fundamentals, basic electronics (tubes and transistor circuits), infrared system components, power supply, special circuitry and associated equipment maintenance. *Version 4:* Lectures and practical exercises in the repair and maintenance of the AN/UAS-4A or the AN/UAS-4 airborne infrared system, including basic DC and AC circuit fundamentals, basic electronics (tubes and transistor circuits), infrared system components, power supply, special circuitry and associated equipment maintenance. *Version 5:* Lectures and practical exercises in the repair and maintenance of the AN/UAS-4A or the AN/UAS-4 airborne infrared system, including basic DC and AC circuit fundamentals, basic electronics (tubes and transistor circuits), infrared system components, power supply, special circuitry and associated equipment maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in communication electronics, 2 in instrumentation, 2 in digital, 2 in troubleshooting, 1 in optics, and, for students completing the Basic Electronics Training phase, 3 in introduction to electronics, 1 in technical mathematics, 2 in AC/DC theory, 2 in solid state circuits, 2 in troubleshooting techniques, 2 in digital circuits, and, for National Guard or reserve personnel, 2 in vacuum tubes (6/79); in the lower-division baccalaureate/associate degree category, 2 semester hours in communications electronics, 2 in instrumentation, 2 in troubleshooting, 1 in optics, 2 in digital and, for students completing the Basic Electronics training phase, 3 in introduction to electronics, 1 in technical mathematics, 2 in AC/DC theory, 2 in solid state circuits, 2 in troubleshooting techniques, 2 in digital circuits and, for National Guard or reserve personnel, 2 in vacuum tube circuits (6/79). *Version 2:* In the vocational certificate category, 2 semester hours in troubleshooting techniques (6/75). *Version 3:* In the vocational certificate category, 2 semester hours in basic electricity, 2 in basic electronics, 10 in electronic equipment maintenance (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity, 2 in basic electronics, 10 in electronic equipment maintenance (4/74); in the upper-division baccalaureate category, 2 semester hours in basic electricity, 2 in basic electronics, 1 in electronics laboratory, all on the basis of institutional evaluation (4/74). *Version 4:* In the vocational certificate category, 2 semester hours in basic electricity, 2 in basic electronics, 12 in electronic equipment maintenance (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 5:* In the vocational certificate category, 2 semester hours in basic electricity, 2 in basic electronics, 10 in electronic equipment maintenance (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 26N; 26W.

AR-1715-0228

Integrated Data Link Repair

Course Number: 4B-F7; 150-361.2; 11-N-361.2.

Location: Air Defense School, Ft. Bliss, TX.

Length: 29 weeks (1030 hours).

Exhibit Dates: 5/64–12/68.

Objectives: To train enlisted personnel who have backgrounds in electronics to maintain AN/FSG-1 missile master Sage data link equipment.

Instruction: Lectures and practical exercises in the maintenance of AN/FSG-1 missile master (Sage data-link) equipment, including system circuit analysis and principles of operation of the power subsystem, Sage receiving system, transmission subsystem, designation and broadcast function, battery data-link function, and adjustment and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 10 semester hours in electrical equipment maintenance, 5 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 10 semester hours in electrical equipment maintenance, 5 in electrical laboratory, all on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

(Ground Surveillance Radar Repair)

Course Number: *All Versions:* 104-26C30. *Version 2:* 11-R-282.1A.

Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ; Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ. *Version 2:* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 27 weeks (800 hours). *Version 2:* 24–29 weeks (896–1080 hours).

Exhibit Dates: *Version 1:* 9/72–Present. *Version 2:* 6/63–8/72.

Objectives: To train enlisted personnel to inspect, test, and repair ground surveillance radar equipment and tracking and plotting radar equipment.

Instruction: Lectures and practical exercises in the inspection, testing, and repair of ground surveillance radar equipment and tracking and plotting radar equipment, including basic electricity and electronics, radar principles, semiconductors, RF energy, nonsinusoidal circuitry, microwave equipment, servo and data circuitry, and equipment components.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in electricity or electronics, 5 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 10 semester hours in electricity, 5 in electrical laboratory, all on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 6 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (12/68). *Version 2:* In the vocational certificate category, 10 semester hours in electricity or electronics and 5 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 6 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 26C; 26W.

AR-1715-0230

Hawk Fire Control Repair

Course Number: 121-23Q20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 23–27 weeks (779–921 hours). *Version 2:* 28 weeks (932 hours). *Version 3:* 33 weeks (1188 hours).

Exhibit Dates: *Version 1:* 3/74–Present. *Version 2:* 10/72–2/74. *Version 3:* 3/67–10/72.

Objectives: To train enlisted personnel to inspect, test, and repair Hawk battery control central, assault fire command console, platoon command post, and radar signal simulator electronic systems and associated test equipment.

Instruction: *All Versions:* Lectures and practical exercises in inspection, testing, and repair of Hawk battery control central, assault fire command console, platoon command post, and radar signal simulator electronic systems and associated test equipment, including basic electricity and electronics theory, AC and DC circuits, electronic devices, wave-shaping circuits, fire control fault diagnosis, systems operation, and analysis of various circuits and components for specific equipment. *Version 1:* Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (23 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who do not attend COBET will complete both Phases I and II (27 weeks) of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electricity and electronics and 3 in electronics laboratory for those students completing 23 weeks; or 5 semester hours in electricity and electronics and 3 in electronics laboratory for those students completing 27 weeks (see note above) (5/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics and 3 in electronics laboratory for those students completing 23 weeks; or 5 semester hours in electricity and electronics and 3 in electronics laboratory for those students completing 27 weeks (see note above) (5/75). *Version 2:* In the vocational certificate category, 5 semester hours in electricity or electronics, and 3 in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in electricity or electronics, and 3 in electronics laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 5 semester hours in electricity or electronics, 3 in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electronics laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 23Q.

AR-1715-0231

LAND COMBAT SUPPORT SYSTEM TEST SPECIALIST

Course Number: 121-27B20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 17–20 weeks (680–800 hours). *Version 2:* 25 weeks (872–875 hours). *Version 3:* 27 weeks (952 hours).

Exhibit Dates: *Version 1:* 11/76–Present. *Version 2:* 5/73–10/76. *Version 3:* 2/69–4/73.

Objectives: To train enlisted personnel to operate, inspect, test, and repair the land combat support system and to isolate faults and verify tests on assemblies, modules, and components of supported missile systems.

Instruction: *All Versions:* Lectures and practical exercises in the operation, inspection, testing, and repair of land combat support systems and fault isolation and test verification of assemblies, modules, and components of supported missile systems, including missile electronics subjects (transistors, vacuum tubes, generators, and logic circuits), block-diagram analysis and circuitry of power supply, data processor and other components; pulse and signal generators, digital multimeter, waveforms, system analyses, optics, and ancillary equipment. *Version 1:* Does not include vacuum tubes. Note: Students who have completed Modules 201, 202, 203, 4 and 7 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (17 weeks) of the course. See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete both Phases I and II (20 weeks) of the course. *Version 2:* Includes electricity fundamentals and instruction processing.

Credit Recommendation: *Version 1:* In the vocational certificate category, 12 semester hours in basic electronics for students who complete 17 weeks of the course or 18 semester hours in basic electronics for students who complete 20 weeks of the course (see NOTE above) (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics for all students (8/77). *Version 2:* In the vocational certificate category, 8 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (4/74); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 8 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 27B; 27Z.

AR-1715-0232

1. FIRE DISTRIBUTION SYSTEMS ELECTRONICS
2. FIRE DISTRIBUTION SYSTEMS ELECTRONICS
3. FIRE DISTRIBUTION SYSTEM MAINTENANCE

Course Number: *Version 1:* 121-F5. *Version 2:* 11-R-F12. *Version 3:* 11-R-F12.

Location: *Version 1:* Air Defense School, Ft. Bliss, TX. *Version 2:* Air Defense School, Ft. Bliss, TX. *Version 3:* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 6–9 weeks (222–352 hours). *Version 2:* 9 weeks (320–352 hours). *Version 3:* 18 weeks (660 hours).

Exhibit Dates: *Version 1:* 4/68–Present. *Version 2:* 5/63–3/68. *Version 3:* 5/61–4/63.

Objectives: To train enlisted personnel to maintain test equipment and circuits utilized in air defense fire distribution systems.

Instruction: *All Versions:* Lectures and practical exercises in the maintenance of test equipment and in electrical and electronics fundamentals, including AC and DC circuits, vacuum tubes, power supplies, synchros, servos, transistor theory and circuits, and mathematics review. *Version 1:* Includes fundamentals of counterinsurgency operations and civil affairs. *Version 3:* Includes pulse and indicator circuitry, theory and application of semiconductors, and analog and digital computer circuitry.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in electricity or electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics laboratory (4/74). *Version 2:* In the vocational certificate category, 8 semester hours in electricity or electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68). *Version 3:* In the vocational certificate category, 8 semester hours in electricity or electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68).

Related Occupation Codes: 25D; 25G; 25H; 25J; 25K.

AR-1715-0233

1. NIKE ACQUISITION RADAR AND COMPUTER REPAIR (IMPROVED HERCULES TRANSITION)
2. NIKE ACQUISITION RADAR AND COMPUTER REPAIR (HERCULES TRANSITION)

(Nike Acquisition Radar and Computer Repair (Improved Hercules Transition))

Course Number: *Version 1:* 9-S-252.1(TI). *Version 2:* 9-S-252.1(T).

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 11–13 weeks (402–475 hours). *Version 2:* 5 weeks (214 hours).

Exhibit Dates: *Version 1:* 4/61–12/68. *Version 2:* 10/58–3/61.

Objectives: To train enlisted personnel to inspect, test, and maintain the Nike Hercules acquisition radar and computer system.

Instruction: Lectures and practical exercises in operation and repair procedures for transmitters, receivers, indicators, and test equipment; field power system theory of operation and repair procedures; and special field maintenance equipment theory of operation and repair procedures. This is a highly specialized equipment course with very little mathematics.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 3 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0234

CORPORAL ELECTRONIC MATERIEL MAINTENANCE

Course Number: 6-N-1192A; 6-N-214.1; 224.3C.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 28–29 weeks (1042–1172 hours).

Exhibit Dates: 6/58–12/68.

Objectives: To train warrant officer and enlisted personnel to assemble, install, adjust, and maintain on-missile electronic guidance control systems and associated test equipment.

Instruction: Lectures and practical exercises in communications and electronics, algebra, trigonometry, vectors, terms and symbols, multimeters, series and parallel DC circuits, Ohm's law, magnetism, AC voltages and currents, oscilloscopes and audio oscillators; R, L, and C combination impedance in AC series and parallel circuits; time constants and resonant circuits; transformers; AC and DC motors and generators and three-phase power; electronic circuit elements, diodes, tubes, and rectifiers; voltage regulators; amplifiers and modulation methods; superheterodyne receivers; radar theory and components; a-f-c circuits and sweep generators; magnetic amplifiers, synchros and automatic control system elements; integrating and differentiating circuits; Corporal missile electronics; beacons, transponders, decoders, servomotors, signal converters, and check-out procedures.

Credit Recommendation: In the vocational certificate category, 24 semester hours in radio and electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in radio and electronics (12/68); in the upper-division baccalaureate category, 6 semester hours in elementary circuit theory (4/74).

AR-1715-0235

Electronic Warfare Officer

Course Number: 11-A-0144.

Location: Signal School, Ft. Monmouth, NJ.

Length: 7 weeks (254 hours).

Exhibit Dates: 12/62–12/68.

Objectives: To train commissioned officers with two years of college training or comparable field experience in electronics, communications, physics, electrical engineering, or related activities to plan and supervise electronic warfare combat operations and the location, installation, and employment of electronic countermeasures and counter-countermeasures equipment.

Instruction: Lectures and practical exercises in the planning and supervision of electronic warfare combat operations and the location, installation, and employment of electronic countermeasures and counter-countermeasures equipment, including ground and sky wave propagation, UHF and VHF characteristics, satellite communications and jamming techniques, infrared, electronics fundamentals, oscilloscopes, modulation, transmission lines and antennas, types and functions of radars, active and passive ECM systems, and multipurpose jamming equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (4/74); in the upper-division baccalaureate category, credit in electronics on the basis of institutional evaluation (4/74).

AR-1715-0236

Hawk Continuous Wave (CW) Radar Repair

Course Number: *Version 1:* 104-23T20. *Version 2:* 104-23T20; 9-S-256;1 104-256.1. *Version 3:* 9-S-256.1.

Location: *Version 1:* Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL. *Version 3:* Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 24–28 weeks (813–955 hours). *Version 2:* 28–34 weeks (948–1245 hours). *Version 3:* 20–24 weeks (722–871 hours).

Exhibit Dates: *Version 1:* 3/74–Present. *Version 2:* 2/63–2/74. *Version 3:* 1/59–1/63.

Objectives: To train enlisted personnel to inspect, test, and repair continuous-wave radar equipment and associated test instruments.

Instruction: *All Versions:* Lectures and practical exercises in continuous-wave radar equipment and associated test instruments inspection, testing, and repair, including system familiarization, troubleshooting and testing specific missile-related hardware items, and equipment and hand tools usage. *Version 1:* Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (24 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who do not attend COBET will complete both Phases I and II (28 weeks) of this course. *Version 2:* Instruction includes elementary mathematics; basic circuit laws; series and parallel DC circuits, batteries, and power supplies; AC circuits, magnetism, Lenz's law, R-L-C combinations with vectorial solutions; transformers and m-g sets; multimeters, oscilloscopes, and VTVMs; series and parallel resonance; transients in R-L and R-C circuits and integrating and differentiating circuits; diodes, filters, triodes, amplifiers, and coupling circuits; sine-wave oscillators, tube testers, and regulated power supplies; heterodyne receivers, r-f amplifiers, and r-f signal sources; mixers, IF stages, AM detectors, and alignment techniques; FM sources, modulation, transmitters, receivers, and discriminators; CRT circuits, pulse circuits, limiters, clampers, sawtooth generators, and multivibrators; semiconductor devices and applications; and CE-CB-CC transistor amplifiers.

Credit Recommendation: *Version 1:* In the vocational certificate category, 9 semester hours in basic electricity or electronics for those students completing 24 weeks; or 12 semester hours in basic electricity, electronics or troubleshooting for those students completing 28 weeks (see note above) (5/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity or electronics for those students completing 24 weeks; or 3 semester hours in basic electricity or electronics for those students completing 28 weeks (see note above) (5/75). *Version 2:* In the vocational certificate category, 12 semester hours in electric circuits or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electric circuits or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electric circuits or electronics and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 6 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 23T.

AR-1715-0237

1. Operations Central Repair
2. Operations Central Repair
3. Operations Central and Coder-Decoder Group Repair

Course Number: *All Versions:* 150-25J20; 4B-F10. *Version 3:* 150-365;1 11-N-365.1.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 25 weeks (861–873 hours). *Version 2:* 18–19 weeks (659–684 hours). *Version 3:* 20 weeks (683–725 hours).

Exhibit Dates: *Version 1:* 6/72–Present. *Version 2:* 2/69–5/72. *Version 3:* 10/63–1/69.

Objectives: To train enlisted personnel to maintain and repair the AN/TSP-38 operations central coder-decoder.

Instruction: *All Versions:* Lectures and practical exercises in AN/TSQ-3C coder-decoder digital circuits, oscillators, multivibrators, blocking oscillators and circuit analysis, missile monitor subsystem specialized training, and instrumentation required for maintenance. *Version 3:* Emphasis is on hands-on equipment maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in basic electricity and electronics and digital fundamentals (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital fundamentals and 3 in basic electronics laboratory (2/75); in the upper-division baccalaureate category, 3 semester hours as an elective in computer systems (2/75). *Version 2:* In the vocational certificate category, 6 semester hours in digital circuits (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital circuits (4/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 4 semester hours in digital circuits (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital circuits (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 25J.

AR-1715-0238

Corporal Ground Guidance Repair

Course Number: *Version 1:* 9-S-245.1. *Version 2:* 9-R-F19.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 33 weeks (1251 hours). *Version 2:* 23 weeks (847 hours).

Exhibit Dates: *Version 1:* 2/63–12/68. *Version 2:* 7/59–1/63.

Objectives: To train enlisted personnel to inspect, test, maintain, and repair the Corporal ground guidance system.

Instruction: *All Versions:* Lectures and practical exercises in AC and DC circuit fundamentals, vacuum tubes, transistors, electronic circuits, radio circuits, radar principles and test equipment, portable test equipment operation and repair procedures, power supplies, and guidance system subsystems. *Version 1:* Instruction includes electricity and electronics fundamentals. *Version 2:* Instruction is equipment oriented.

Credit Recommendation: *Version 1:* In the vocational certificate category, 16 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (12/68); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0239

Nike Test Equipment Repair

Course Number: *Version 1:* 121-22L10. *Version 2:* 121-22L10. *Version 3:* 121-22L20. *Version 4:* 104-22L20; 9-S-F48.

Location: Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 33 weeks (1148 hours). *Version 2:* 32 weeks (1073 hours). *Version 3:* 25–31 weeks (879–1065 hours). *Version 4:* 32–36 weeks (1076–1274 hours).

Exhibit Dates: *Version 1:* 10/79–Present. *Version 2:* 5/78–9/79. *Version 3:* 5/74–4/78. *Version 4:* 8/64–4/74.

Objectives: To train enlisted personnel to operate, inspect, test, repair, and maintain Nike field maintenance test equipment and Nike air defense guided missile system assemblies.

Instruction: *Version 2:* Lectures and practical exercises in the Nike Air Defense guided missile system, basic AC and DC circuits, transients, vacuum tubes, transistors, power supplies, regulators, amplifiers, oscillators, wave-shaping circuits, receiver principles, microwave principles, troubleshooting techniques, and standard electronics and special Nike test equipment usage. *Version 3:* Note: Students who have completed Modules 1, 2, and 3 of Commom Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (25–27 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (31 weeks) of this course.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 5 semester hours in electronics equipment repair techniques (8/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 2 in transistor theory, 2 in vacuum tube circuits theory, 1 in microwave theory, and 3 in circuit electronics laboratory (8/79). *Version 3:* In the vocational certificate category, 21 semester hours in basic electricity, electronics and troubleshooting for those students completing 31 weeks; 18 semester hours in basic electronics for those students completing 25–27 weeks (see note above) (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity and electronics for those students completing 31 weeks (see note above) (3/75). *Version 4:* In the vocational certificate category, 18 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 21L.

AR-1715-0240

SUPERVISORY RADAR REPAIR

Course Number: 104-26F40.

Location: Signal School, Ft. Monmouth, NJ.

Length: 25 weeks (932 hours).

Exhibit Dates: 4/66–12/68.

Objectives: To train radar mechanics and ground radar repairmen to supervise nonintegrated radar maintenance personnel.

Instruction: Lectures and practical experience in AC and DC circuit fundamentals, advanced electronic circuitry, microwave equipment operation and measurement procedures, digital computer systems and circuitry, supervisory and instructional techniques, and operation and maintenance procedures for various radars.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics, 3 in microwaves, 3 in computer systems (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics, 3 in maintenance management (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics, 3 in maintenance management, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0241

GUIDED MISSILE INSTALLATION ELECTRICAL EQUIPMENT REPAIR

Course Number: 5-E-63.

Location: Engineer School, Ft. Belvoir, VA.

Length: 12 weeks (445 hours).

Exhibit Dates: 7/56–12/68.

Objectives: To train enlisted personnel to operate and maintain guided missile electrical equipment and to troubleshoot and repair gasoline and diesel engines, air conditioning equipment, and specialized guided missile hydraulic equipment.

Instruction: Lectures and practical exercises in guided missile electrical equipment operation and maintenance, electrical fundamentals, circuit analysis, including meters, magnetism, AC generators, control circuits, frequency convertors and motors; and troubleshooting, repair, and overhaul of internal-combustion engines, air conditioning units, and hydraulic controls.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electrical laboratory, 3 in internal-combustion engines, 2 in air conditioning, 2 in introduction to hydraulics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory, 2 in internal-combustion engines, 2 in air conditioning, 1 in introduction to hydraulics (4/74).

AR-1715-0242

RADAR DATA PROCESSING CENTER REPAIR

Course Number: 4C-F5; 150-25H20; 11-N-364.2.

Location: Air Defense School, Ft. Bliss, TX.

Length: 28–31 weeks (968–1086 hours).

Exhibit Dates: 11/63–Present.

Objectives: To train warrant officers and enlisted personnel to test, troubleshoot, and repair radar data processing center equipment.

Instruction: Lectures and practical exercises in binary numbers, basic logic elements and circuits, oscilloscopes, semiconductor circuits review, digital circuits and digital testers, processing center power supplies, memory drum and read-write circuitry, data conversion equipment, display equipment, tracking equipment, buffers, digital data transmitters and receivers, and system troubleshooting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer maintenance, and credit in electronics or electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer maintenance, and credit in electronics or electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 25G; 25H; 25Z; 211A.

AR-1715-0243

CORPORAL MECHANICAL MATERIEL MAINTENANCE

(Missile Mechanical Materiel Maintenance, Corporal)

Course Number: 6-R-164.3; 6-R-222.2A; 6-E-42.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 8 weeks (276–336 hours).

Exhibit Dates: 10/56–12/68.

Objectives: To train enlisted personnel to assemble, install, maintain, and adjust Corporal mechanical, on-missile, guidance control systems and associated test equipment, and to assemble missiles and check Corporal propulsion and mechanical systems.

Instruction: Lectures and practical exercises in the assembly, installation, maintenance, and adjustment of Corporal mechanical, on-missile, guidance control systems and associated test equipment, and the assembly of missiles and check-out of Corporal propulsion and mechanical systems, including basic electricity, various circuits, test equipment, motors and generators, tactics and combined arms, artillery transport, and specific equipment maintenance.

Credit Recommendation: In the vocational certificate category, 1 semester hour in basic electricity (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity (4/74).

AR-1715-0244

REDSTONE MECHANICAL MATERIEL MAINTENANCE

Course Number: 6-R-169.1; 6-R-222.2B.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 8–10 weeks (261–418 hours).

Exhibit Dates: 7/57–12/68.

Objectives: To train enlisted personnel to assemble, install, and maintain Redstone mechanical guidance and control systems and associated test equipment; to perform checks on Redstone propulsion, pneumatic, and mechanical systems; and to operate and supervise maintenance of Redstone servicing equipment.

Instruction: Lectures and practical exercises in the assembly, installation, and maintenance of Redstone on-missile guidance and control systems and associated test equipment; propulsion, pneumatic, and mechanical systems; and operation and supervision of Redstone servicing equipment maintenance, including basic electricity (Ohm's law, AC and DC, motors and generators, series and parallel circuits) and operation of electrical test equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in basic electricity (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity (4/74).

AR-1715-0245

SPECIALIZED TELETYPEWRITER EQUIPMENT REPAIR

Course Number: *Version 1:* 160-F1. *Version 2:* 160-F1. *Version 3:* 11-R-F22.

Location: Signal School, Ft. Gordon, GA; Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 10 weeks (380 hours). *Version 2:* 10–13 weeks (373–480 hours).

Version 3: 7 weeks (256 hours). *Version 4:* 6 weeks (217-219 hours).

Exhibit Dates: *Version 1:* 6/78-Present. *Version 2:* 11/68-5/78. *Version 3:* 9/67-10/68. *Version 4:* 7/62-8/67.

Objectives: To train enlisted security agency teletype equipment repairmen to install, maintain, and repair specialized teletypewriter equipment.

Instruction: *Version 1:* Lectures and practical exercises in the installation, maintenance, and repair of specialized teletypewriter equipment, including operation and troubleshooting of keyboards. Practical exercises in the repair of specialized teletypewriter equipment (KSR-37), including power supplies, drivers, logic distributor, speed shift and parity circuits. *Version 2:* Lectures and practical exercises in the installation, maintenance, and repair of specialized teletypewriter equipment, including operation and troubleshooting of keyboards, reperforators, typing units, wire distributors, time sequence generators, power and signal circuitry, control circuits, transmission and channel components, and logic modules (if present) and associated test equipment of specialized and modified teletypewriter equipment. *Version 3:* Lectures and practical exercises in the installation, maintenance, and repair of specialized teletypewriter equipment, including operation and troubleshooting of keyboards, reperforators, typing units, wire distributors, time sequence generators, power and signal circuitry, control circuits, transmission and channel components, and logic modules (if present) and associated test equipment of specialized and modified teletypewriter equipment. *Version 4:* Lectures and practical exercises in the installation, maintenance, and repair of specialized teletypewriter equipment, including operation and troubleshooting of keyboards, reperforators, typing units, wire distributors, time sequence generators, power and signal circuitry, control circuits, transmission and channel components, and logic modules (if present) and associated test equipment of specialized and modified teletypewriter equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in teletypewriter repairer (8/79). *Version 2:* In the vocational certificate category, 3 semester hours as an elective in electricity or electronics (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in electricity or electronics (5/74). *Version 3:* In the vocational certificate category, 2 semester hours as an elective in electricity or electronics (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in electricity or electronics (5/74). *Version 4:* In the vocational certificate category, 1 semester hour as an elective in electricity or electronics (5/74).

Related Occupation Codes: 31J.

AR-1715-0246

1. Surface-to-Surface Missile System Maintenance (Sergeant) Warrant Officer Intermediate
2. Ballistic Missile Maintenance Technician (Sergeant)
3. Ballistic Missile Maintenance Technician (Sergeant)

Course Number: *Version 1:* 4-9-C30-H; 4F-241E-A. *Version 2:* 4F-241E; 122-F2; 2F-241E. *Version 3:* 9-N-241E; 9-N-F25.

Location: *Version 1:* Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL. *Version 3:* Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 20 weeks (717 hours). *Version 2:* 39 weeks (1386-1414 hours). *Version 3:* 23-46 weeks (856-1705 hours).

Exhibit Dates: *Version 1:* 8/70-Present. *Version 2:* 5/65-7/70. *Version 3:* 3/61-4/65.

Objectives: To train warrant officers who are field artillery missile system technicians, enlisted personnel who have taken an electronic field maintenance course, warrant officers who have training in basic electricity and electronics, or warrant officers who have taken a missile maintenance supervision course to test, inspect, and repair Sergeant missile systems and associated equipment.

Instruction: *All Versions:* Lectures and practical exercises in testing, inspection, and repair of Sergeant missile systems and associated equipment, including supply procedures, nuclear warfare, shop procedures, soldering techniques, electrical test equipment and Sergeant missile system components. *Version 1:* Includes maintenance management; map and aerial photography reading and intelligence; mine warfare; chemical, biological, and radiological warfare; weaponry; and signal communication. *Version 2:* Includes logistics; electronic subjects (transistors, semiconductors, DC amplifiers, oscillators and multivibrators, power supplies, gating curcuits, digital controllers logic, programming, and maintenance); mechanical, hydraulic, and electrical components; and ballistic missile inertial guidance and control equipment repair. *Version 3:* Includes solid-state devices, transistors, power supplies, digital and analog computers, and amplifiers; firing set operation and computer; missile digital control; and mechanical, hydraulic, and electrical components of Sergeant missile systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (3/74). *Version 2:* In the vocational certificate category, 6 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 4 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

Related Occupation Codes: 241E; 214E.

AR-1715-0247

Radio Teletype Operator Skill Development Base

Course Number: 201-05C40-I.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 13 weeks (484 hours).

Exhibit Dates: 7/68-Present.

Objectives: To train enlisted personnel to operate and supervise the operations of a radio teletype.

Instruction: Lectures and practical exercises in the operation of a radio teletype and the supervision of such activities. Course includes leadership training, small-unit tactics, tactical field exercises, general military subjects, organization and employment of signal units, signal systems planning and control, tactical radio communications supervision, and advanced communications operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

Related Occupation Codes: 05C.

AR-1715-0248

Teletype Interception

Course Number: 231-05K20.

Location: Security Agency School, Ft. Devens, MA.

Length: 11 weeks (432 hours).

Exhibit Dates: 1/66-Present.

Objectives: To train enlisted personnel to inspect, maintain, interconnect, and operate all equipment associated with a radio teletypewriter terminal.

Instruction: Lectures and practical exercises in the operation of a radio teletypewriter terminal. Course includes teletypewriter familiarization and operation, and location and repair of system malfunctions. The course does not provide instruction in electrical and mechanical systems repair.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/74).

Related Occupation Codes: 05K.

AR-1715-0249

Corporal Maintenance Supervision
(Guided Missile Systems Maintenance Supervision (Corporal))
(Guided Missile Systems Maintenance Supervisors, Corporal II)

Course Number: 9-N-4812; 9-OE-70.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 43 weeks (1582-1602 hours).

Exhibit Dates: 2/56-12/68.

Objectives: To train commissioned and warrant officers and enlisted personnel who have previous technical training to perform as Corporal II guided missile systems maintenance officers.

Instruction: Lectures and practical exercises on the supervision of the maintenance of the Corporal II guided missile systems and associated equipment, including ordnance service in the field, radar set AN/MPQ-25, computer group AN/MSA-6, radio set AN/MRQ-7 (Doppler), mechanical systems and ground handling equipment, Corporal propellants and internal guidance, ordnance guided missile maintenance in the field, ground guidance, missile and CORPORAL systems analysis.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electricity, electronics, or electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, credit in electricity, electronics, and electrical laboratory on the basis of institutional evaluation (12/68).

Related Occupation Codes: 223B; 223D; 251D; 271A.

Field Artillery Radar Operator
(Field Artillery Radar Crewman)
(Counterbattery/Countermortar Radar Crewman)
(Field Artillery Radar Operation)

Course Number: 221-17B10; 221-17B20; 6-R-156.1; 6-R-211.1; 6-E-22.

Location: Field Artillery School, Ft. Sill, OK; Artillery and Missile School, Ft. Sill, OK.

Length: Self paced 6-10 weeks (209-426 hours).

Exhibit Dates: 5/56-Present.

Objectives: To train enlisted personnel to operate and maintain field artillery radar.

Instruction: Lectures and practical exercises in field artillery radar operation and preventive maintenance, including radar site evaluation; equipment emplacement, adjustment, calibration, and orientation; radar gunnery exercises; maintenance procedures; and map reading and plotting routines.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

Related Occupation Codes: 17B; 09B.

AR-1715-0251

Microwave Radio Officer

Course Number: 4C-0503; 11-O-32.

Location: Signal School, Ft. Monmouth, NJ.

Length: 12-14 weeks (432-492 hours).

Exhibit Dates: 9/55-12/67.

Objectives: To train commissioned officers who have completed the signal officer orientation course or its equivalent to perform as microwave radio officers.

Instruction: Lectures and practical exercises on direction and supervision of installation, operation and organizational maintenance of microwave radio and tactical tropospheric scatter equipment, including microwave communications; transportable microwave equipment and systems; specific receivers and transmitters; antennas, radiowave propagation and frequency management; electronic countermeasures; satellite communications; and specific receiving multiplex, RF unit, transmitting multiplex, control units, and systems operation.

Credit Recommendation: In the vocational certificate category, credit in electricity, electronics and electrical laboratory on the basis of institutional evaluation (6/74).

AR-1715-0252

Field Artillery Radar Officer
(Field Artillery Radar)

Course Number: 6-A-0140; 6-O-10.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 3-7 weeks (136-319 hours).

Exhibit Dates: 2/56-12/68.

Objectives: To train officers in field artillery radar operation, maintenance, and employment.

Instruction: Lectures and demonstrations in field artillery radar operation, maintenance, and employment, including target acquisition, fire direction, position fixing and vectoring of light Army aircraft, observation techniques, tactics, communications systems, and electronics.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

3. Automatic Data Processing (ADP) Repair, Phase VII—Digital Subscriber Terminal Equipment (DSTE) Repair
   (ADP Repair, Phase VII—DSTE Repair)
   (DSTE Repair)
4. DSTE Repair

Course Number: *Version 1:* 150-34F20. *Version 2:* 150-34F20. *Version 3:* 150-34D20 (Phase VII). *Version 4:* 150-34D20; 622-F11.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Signal School, Ft. Gordon, GA; Communications Electronics School, Ft. Monmouth, NJ. *Version 3:* Signal School, Ft. Gordon, GA. *Version 4:* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 23 weeks (849 hours). *Version 2:* 30 weeks (1066-1115 hours). *Version 3:* 20 weeks (745 hours). *Version 4:* 16-19 weeks (602-716 hours).

Exhibit Dates: *Version 1:* 12/77-Present. *Version 2:* 3/75-1/77. *Version 3:* 8/73-2/75. *Version 4:* 8/68-7/73.

Objectives: To train senior technicians to operate, maintain, and repair subscriber terminals of digital communications systems.

Instruction: *Version 1:* Practical exercises in the troubleshooting and repair of digital subscriber terminal equipment. *Version 2:* Lectures and practical exercises in subscriber terminal of digital communications systems operation, maintenance, and repair, including computer data processing and transmission, terminal systems, control keyboards, paper tape and card equipment, forward techniques, computer logic, and control techniques. Topics deal specifically with the digital subscriber terminal equipment. *Version 3:* Lectures and practical exercises in subscriber terminal of digital communications systems operation, maintenance, and repair, including computer data processing and transmission, terminal systems, control keyboards, paper tape and card equipment, forward techniques, computer logic, and control techniques. *Version 4:* Lectures and practical exercises in subscriber terminal of digital communications systems operation, maintenance, and repair, including computer data processing and transmission, terminal systems, control keyboards, paper tape and card equipment, forward techniques, computer logic and control techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in computer peripheral equipment repair (8/79). *Version 2:* In the vocational certificate category, 6 semester hours in digital circuits (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer programming and 3 semester hours in computer equipment laboratory (4/77). *Version 3:* In the vocational certificate category, 6 semester hours in digital circuits and 2 in digital circuits laboratory (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in digital circuits laboratory (5/75). *Version 4:* In the vocational certificate category, 3 semester hours in digital communications, 3 in terminal equipment and 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital communications, 2 in electrical laboratory, and 3 in terminal equipment on the basis of institutional evaluation (6/74); in the upper-division baccalaureate category, 3 semester hours in digital communications, 2 in electrical laboratory (6/74).

Related Occupation Codes: 09B; 34F; 34D.

AR-1715-0254

Communications-Electronics Systems Engineer

Course Number: 4C-7750.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 53 weeks (1767 hours). *Version 2:* 50 weeks (1690 hours).

Exhibit Dates: *Version 1:* 3/73-Present. *Version 2:* 6/70-2/73.

Objectives: To train communications and electronics officers in communications and electronic systems planning and engineering.

Instruction: *All Versions:* Lectures and practical exercises in communications and electronic systems planning and engineering, including mathematics review, basic electronics review; radio electronics; transmission system fundamentals; and principles and operation of AM, FM, TV, data communications, and telephone communications systems. *Version 4:* Lectures and practical exercises in subscriber terminal of digital communications systems operation, maintenance, and repair, including computer data processing and transmission, terminal systems, control keyboards, paper tape and card equipment, forward techniques, computer logic, and control techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in technical mathematics (5/75); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronic communication theory, 3 in electronics, and 2 in electronics laboratory (5/75); in the upper-division baccalaureate category, 3 semester hours in electronic communication theory (5/75). *Version 2:* In the vocational certificate category, 1 semester hour in college algebra, 2 in general electronics, 3 in electronics laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in college algebra, 2 in general electronics, 3 in radio electronics, 3 in electronics laboratory, 9 in telecommunications system engineering, 3 in telecommunications laboratory (4/74); in the upper-division baccalaureate category, 1 semester hour in college algebra, 2 in general electronics, 3 in radio electronics, 3 in electronics laboratory, 9 in telecommunications system engineering, 3 in telecommunications laboratory (4/74).

2. Air Defense Missile Maintenance Technician (Nike)
   (Nike Air Defense Missile Repair)
   (Nike Maintenance Supervision)
   (Nike Maintenance Supervision (Ajax/Hercules))
   (Guided Missile Maintenance Supervision, Nike)

Course Number: *Version 1:* 4-9-C30-G; 4F-251B-A. *Version 2:* 4F-251B; 122-F4; 9-N-251B; 9-N-4811; 9-OE-69.

Location: *Version 1:* Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Missile and Munitions School, Redstone Arsenal, AL; Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 20 weeks (726 hours). *Version 2:* 41-55 weeks (1516-2051 hours).

Exhibit Dates: *Version 1:* 11/71-Present. *Version 2:* 1/56-10/71.

Objectives: To train warrant officers and enlisted personnel to supervise Nike guided missile systems and associated equipment maintenance.

Instruction: Lectures and practical exercises in Nike guided missile systems and associated test equipment maintenance, including AC and DC distribution; basic electronics, including power supplies, multimeter, counters, and oscilloscopes; preventive medicine; chemical, biological and radiological identification and decontamination; leadership training; and management practices and techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory (3/74). *Version 2:* In the vocational certificate category, 8 semester hours in shop management (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in shop management (12/68); in the upper-division baccalaureate category, 3 semester hours in shop management (3/74).

Related Occupation Codes: 251B; 222B.

AR-1715-0256

Air Defense Artillery Automatic Weapons Repair

Course Number: 121-16F30; 642-45F20-A.

Location: Air Defense School, Ft. Bliss, TX.

Length: 4-5 weeks (156-177 hours).

Exhibit Dates: 6/66-Present.

Objectives: To train enlisted personnel as artillery mechanics.

Instruction: Lectures and practical exercises in organizational maintenance of unit small arms and air defense artillery automatic weapons, including small arms and general subjects; .50 caliber machine gun and M55 mount; power drive unit and variable response; troubleshooting; twin 40mm gun, self-propelled M42; field stripping; M38 computing sight; automatic weapons firing; organizational maintenance procedures; and maintenance, lubrication, inspection, and troubleshooting of specific guns and mounts.

Credit Recommendation: No credit because of the limited technical nature of the course (6/74).

Related Occupation Codes: 16F.

AR-1715-0257

Telephone and Teletypewriter Equipment Repair

Course Number: 11-E-30.

Location: Signal School, Ft. Monmouth, NJ.

Length: 14-15 weeks (560-600 hours).

Exhibit Dates: 11/53-12/68.

Objectives: To qualify enlisted personnel as telephone and teletypewriter equipment mechanics.

Instruction: Lectures and practical exercises in the repair of telephone and teletypewriter equipment, including repair of telephone subsets, monocord switchboards, multicord switchboards, power equipment, PBX switchboards, non-multiple C.B. switchboards, and multiple C.B. switchboards; telephone and teletypewriter repair shop procedures; field training; and repair, testing, and troubleshooting of associated equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in telephone and teletype repair, and credit in electrical laboratory on the basis of institutional evaluation (6/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (6/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (6/74).

AR-1715-0258

Nuclear Weapons Maintenance (Entry)

(Atomic Weapons Electronics (Entry))

Course Number: 9-R-260.0; 9-E-55.

Location: Signal School, Ft. Monmouth, NJ.

Length: 12 weeks (434-440 hours).

Exhibit Dates: 9/56-12/68.

Objectives: To train enlisted personnel as atomic weapons electrical assembly helpers.

Instruction: Lectures and practical exercises in electronics and in the repair of atomic weapons systems and equipment, including supply procedures and catalogs, electrical fundamentals, use of Ohm's law formulas and measurements using TS-352, induction, AC and DC motors and generators, electronics as applied to basic receivers, diode vacuum tubes, alignment of a superheterodyne receiver, electronics as applied to basic transmitters, nonsinusoidal circuitry, and radio set AN/VRC-19.

Credit Recommendation: In the vocational certificate category, 6 semester hours in radio and electronics, 3 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in radio and electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in radio and electronics, and credit in electrical laboratory on the basis of institutional evaluation (6/74).

AR-1715-0259

Radar and Countermeasures Equipment Repair Officer

Course Number: 11-0-19.

Location: Signal School, Ft. Monmouth, NJ.

Length: 18 weeks (632-660 hours).

Exhibit Dates: 9/56-12/68.

Objectives: To train commissioned and warrant officers to direct and supervise maintenance and repair of radar and electronic countermeasures equipment.

Instruction: Lectures and practical exercises in the supervision of radar and electronic countermeasures equipment repair. Topics include AC/DC networks, resonance and transients, vacuum tube electronics including amplifiers, cathode followers, sweep circuits, pulse and microwave circuits, and functional block-diagram analysis of radar systems. Instruments used include multimeters, oscilloscopes, audio oscillators, signal generators, frequency meters, and pulse generators.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electricity or electronics, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics for non-electrical engineering majors, and credit in electrical laboratory on the basis of institutional evaluation (6/74).

2. Teletypewriter Repairman
3. Teletypewriter Equipment Repair
4. Teletypewriter Equipment Repair
   (Teletypewriter Equipment Maintenance)

Course Number: *Version 1:* 106-31J10. *Version 2:* 160-31J20. *Version 3:* 160-31J20. *Version 4:* 11-R-341;1 11-R-340;0 11-E-11.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Signal School, Ft. Gordon, GA; Southeastern Signal School, Ft. Gordon, GA. *Version 3:* Southeastern signal School, Ft. Gordon, GA. *Version 4:* Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 20 weeks (730 hours). *Version 2:* 15-21 weeks (543-766 hours). *Version 3:* 21-25 weeks (771-930 hours). *Version 4:* 18-20 weeks (703-736 hours).

Exhibit Dates: *Version 1:* 10/78-Present. *Version 2:* 5/77-9/78. *Version 3:* 9/66-4/77. *Version 4:* 12/53-8/66.

Objectives: To train maintenance personnel to install, troubleshoot, and repair teletypewriter systems.

Instruction: *Version 1:* Lectures and laboratory in installing, troubleshooting, and repairing six different teletypewriter systems. These systems include electrical and mechanical components. *Version 2:* Lectures and laboratory in communications introduction; teletypewriter fundamentals; installation of teletypewriter systems; field and depot shop maintenance. Note: Students who have completed Modules 202, 4 and 7 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (15 weeks) of this course. See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete both Phases I and II (21 weeks) of this course. *Version 3:* Lectures and laboratory in communications introduction; teletypewriter fundamentals; installation of teletypewriter systems; field and depot shop maintenance. Includes facsimile equipment. *Version 4:* Lectures and laboratory in communications introduction; teletypewriter fundamentals; installation of teletypewriter systems; field and depot shop maintenance. Includes introductory electricity.

Credit Recommendation: *Version 1:* In the vocational certificate category, 12 semester hours in teletype repair (8/79). *Version 2:* In the vocational certificate category, 5 semester hours in teletype repair, 1 in facsimile repair, 2 in electrical laboratory for students who complete 15 or 21 weeks of the course (see NOTE above). *Version 3:* In the vocational certificate category, 5 semester hours in teletype repair, 1 in facsimile repair, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (6/74); in the upper-division baccalaureate category, 2 semester hours in electrical laboratory, and additional credit in electrical laboratory on the basis of institutional evaluation (6/74). *Version 4:* In the vocational certificate category, 1 semester hour in basic electricity, 5 in teletype repair, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity, 2 in electrical laboratory (6/74); in the upper-division baccalaureate category, 1 semester hour in basic electricity, 2 in electrical laboratory, and additional credit in electrical laboratory on the basis of institutional evaluation (6/74).

Related Occupation Codes: 31J; 09B.

AR-1715-0261

Signal Field Grade Officer Refresher

Course Number: 11-A-C8.

Location: Signal School, Ft. Monmouth, NJ.

Length: 4 weeks (140 hours).

Exhibit Dates: 2/57–12/68.

Objectives: To qualify commissioned officers as signal field grade officers.

Instruction: Lectures and demonstrations in methods and system design of telephone and radio link communications. Topics include basic telephone circuits, automatic switching, cable layout and loading, repeater and microwave links, and communications center operations.

Credit Recommendation: In the vocational certificate category, 3 semester hours in telephone and radio systems (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in telephone and radio systems on the basis of institutional evaluation (6/74).

AR-1715-0262

Field and Fixed Station Radio Officer

Course Number: 11-A-0501; 11-A-0502; 11-O-26.

Location: Signal School, Ft. Monmouth, NJ.

Length: 11 weeks (394–398 hours).

Exhibit Dates: 7/55–12/68.

Objectives: To train commissioned officers to direct and supervise the installation, operation, and organizational maintenance of field and fixed station radio equipment.

Instruction: Lectures and practical exercises in basic fundamentals of electricity and radio communications. Topics include AC and DC fundamentals, vacuum tubes and amplifiers, CW and AM transmitters, AM and FM receivers, antennas, field radio sets, radio relay, tactical radio net operations, fixed station operations and servicing procedures, electronic countermeasures, and radiotelegraph operations.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electricity, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity, 2 in electrical laboratory, all on the basis of institutional examination (6/74); in the upper-division baccalaureate category, credit in electricity and electrical laboratory on the basis of institutional evaluation (12/68).

AR-1715-0263

Emergency Action Console Repair

Course Number: 622-F13.

Location: Signal School, Ft. Monmouth, NJ; Signal School, Ft. Gordon, GA.

Length: 8–9 weeks (288–324 hours).

Exhibit Dates: 3/70–Present.

Objectives: To train enlisted dial central office repairmen to operate and maintain the emergency action console.

Instruction: Lectures and practical exercises in emergency action console repair, including description and function of emergency action console; operator's console and recorder; console register line identification and access; equipment interface with EAC, systems analysis and strapping procedures; supervisory and power equipment; distribution system and fault analysis; systems training; strapping of a specific register and marker; and system review and common control troubleshooting.

Credit Recommendation: No credit because of the limited specialized nature of the course (6/74).

Related Occupation Codes: 36H.

AR-1715-0264

Area Communications Systems Operations

Course Number: *All Versions:* 580-31Z40. *Version 2:* 11-R-727.7.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 15 weeks (547 hours). *Version 2:* 18–19 weeks (666–727 hours).

Exhibit Dates: *Version 1:* 5/74–Present. *Version 2:* 8/60–4/74.

Objectives: To train enlisted personnel as area communications chiefs.

Instruction: Lectures and practical exercises in the supervision, installation, operation, and maintenance of an integrated area communications system, including concept and application of area communications systems; communications system for combat and support elements; forward-area communications; division command communications; airborne and airmobile division communications; division, corps, and army radio nets; corps and army communications; and theater communications.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in basic telecommunications electricity or electronics (5/75). *Version 2:* In the vocational certificate category, 4 semester hours in business organization and management, 4 in wire and radio communications (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in business organization and management, 4 in wire and radio communications (6/74); in the upper-division baccalaureate category, 4 semester hours in business organization and management, and credit in wire and radio communication on the basis of institutional evaluation (12/68).

Related Occupation Codes: 31Z.

AR-1715-0265

Regular Army Signal Officer Basic

Course Number: 4-11-C20RA.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 6 weeks (222 hours).

Exhibit Dates: 6/67–Present.

Objectives: To qualify commissioned officers as signal officers.

Instruction: Lectures and practical exercises in the basics of radio and telephone communications systems. Topics include communications center operations, wire communications, radio communications, applied communications, and general military subjects.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radio and telephone communications systems (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in radio and telephone communications systems (6/74); in the upper-division baccalaureate category, 3 semester hours in military science (12/68).

AR-1715-0266

Telephone and Teletypewriter Officer
(Wire Communications Officer)

Course Number: 4C-0400; 11-A-0400.

Location: Signal School, Ft. Monmouth, NJ.

Length: 11–14 weeks (484–494 hours).

Exhibit Dates: 4/57–Present.

Objectives: To train officers to perform as telephone and teletypewriter officers.

Instruction: Lectures and practical exercises in supervision, management, planning, installation, operation, and maintenance of telephone, teletypwriter, and carrier facilities, equipment, and systems; including signal center operations; mathematics for communications-electronics; electrical fundamentals; telephone transmission principles; outside-plant principles and practices; telephone systems and equipment; fundamentals of facsimile systems; carrier transmission systems and equipment; radio communications; and ground mobile communications equipment.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in telecommunications, and additional credit in telecommunications on the basis of institutional evaluation (6/74).

AR-1715-0267

Defense Special Security Communications System Operator
(DSSCS Operator)

Course Number: 580-F2.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 2–3 weeks (66–118 hours).

Exhibit Dates: 8/73–Present.

Objectives: To train enlisted personnel to operate the Defense Special Security Communications System (DSSCS).

Instruction: Lectures and practical exercises in the operation of a defense special security communications system (DSSCS) terminal. Topics include message preparation, log messages, Baudot five-level teletypewriter code (with emphasis on scanning for format), and operation of the message header generator. and operation of the message header generator.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/74).

Related Occupation Codes: 72B; 72F.

AR-1715-0268

Telephone-Digital Communications Officer

Course Number: 4C-25C; 4C-26C; 4C-0405.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 11–13 weeks (345–440 hours). *Version 2 :* 11–13 weeks (452 hours).

Exhibit Dates: *Version 1:* 4/75–Present. *Version 2:* 3/73–3/75.

Objectives: To train officers to supervise, manage, plan, install, operate, and maintain telephone, teletypewriter, and carrier equipment, facilities, and systems.

Instruction: Lectures and practical exercises in the operation and maintenance of telephone and digital communications. Course includes basic electronics and mathematics as applied to the repair of telephone equipment and systems; teletypewriter equipment and systems; carrier and ground mobile communications equipment and systems; communications security; communications-electronics systems engineering; and maintenance management.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in basic electronics and telecommunications (5/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and telecommunications and 1 in electronics laboratory (5/75). *Version 2:* In the vocational certificate category, 3 semester hours in basic electricity, 3 in electronics, 3 in telephone systems (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in electronics, and, on the basis of institutional evaluation, 3 in telephone systems (6/74); in the upper-division baccalaureate category, 3 semester hours in basic electricity, and 3 in electronics on the basis of institutional evaluations (6/74).

AR-1715-0269

AIRCRAFT FIRE CONTROL REPAIR

Course Number: 112-35J20.

Location: Transportation School, Ft. Eustis, VA; Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 15–21 weeks (486–687 hours). *Version 2:* 16–20 weeks (496–697 hours).

Exhibit Dates: *Version 1:* 8/76–Present. *Version 2:* 9/70–7/76.

Objectives: To train enlisted personnel as aircraft fire control repairmen.

Instruction: *All Versions:* Lectures and practical exercises in direct and general support maintenance of fire control systems, aircraft armament subsystems electronic components, and system-peculiar test equipment, including helicopter armament subsystem repair; M5 helicopter armament subsystem; LOH and UH-1 helicopter armament subsystems; AH-1G helicopter armament subsystems; fire control systems review and maintenance; solid-state circuitry; applied electronics; rocket control and display subsystem; and optics. *Version 1:* Note: Students who have completed Modules 201, 202, 203 and 4 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete Phases II and III (15 weeks). See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete Phases I, II, and III for 21 weeks.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 4 semester hours in electricity and electronics (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics (6/75); in the upper-division baccalaureate category, 2 semester hours in electronics laboratory (6/75).

Related Occupation Codes: 35J.

AR-1715-0270

SIGNAL OFFICER FAMILIARIZATION

Course Number: 11-A-C21.

Location: Signal School, Ft. Monmouth, NJ.

Length: 6 weeks (212–220 hours).

Exhibit Dates: 3/60–12/68.

Objectives: To train officers in the organization, operational functions, duties and responsibilities of the Signal Corps.

Instruction: Lectures and practical exercises in the organization, operational functions, duties and responsibilities of the Signal Corps, including logistics, automatic data processing systems, organization and tactics, radio communications, telephone communications, communications center operations, signal plans and operations, electronic warfare, equipment use within the army signal battalions, and CONUS logistical support to a theater of operations.

Credit Recommendation: In the upper-division baccalaureate category, Credit in radio and wire communications on the basis of institutional evaluation (12/68).

AR-1715-0271

TECHNICAL EVALUATION PROGRAM (TEP) TRAINING

Course Number: 101-F13.

Location: Signal School, Ft. Gordon, GA.

Length: 10–11 weeks (357–381 hours).

Exhibit Dates: 10/75–Present.

Objectives: To provide students with the techniques required to perform technical and operational measurements, analysis, and evaluation of communications equipment.

Instruction: Instruction covers testing procedures and microwave system operation and testing procedures, including some basic mathematics, noise and level measurements distortion, noise power, frequency response, gain, and other communications-system-related evaluation procedures.

Credit Recommendation: In the vocational certificate category, 6 semester hours in microwave communications systems (4/77).

Related Occupation Codes: 26V; 26Y; 32D; 32E.

AR-1715-0272

1. TACTICAL MICROWAVE SYSTEMS REPAIR
2. TACTICAL MICROWAVE SYSTEMS REPAIR
3. TACTICAL MICROWAVE SYSTEMS REPAIR
4. MICROWAVE RADIO EQUIPMENT REPAIR
5. MICROWAVE RADIO EQUIPMENT REPAIR

Course Number: *Version 1:* 101-26L20. *Version 2:* 101-26L20. *Version 3:* 101-26L20. *Version 4:* 11-R-281;1 11-E-24. *Version 5:* 11-E-24.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Monmouth, NJ. *Version 3 :* Signal School, Ft. Monmouth, NJ. *Version 4 :* Signal School, Ft. Monmouth, NJ. *Version 5 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 23–29 weeks (847–1070 hours). *Version 2:* 36 weeks (1352 hours). *Version 3:* 28 weeks (1048 hours). *Version 4:* 28–30 weeks (1040–1116 hours). *Version 5:* 26 weeks (1040 hours).

Exhibit Dates: *Version 1:* 9/74–12/78. *Version 2:* 11/71–8/74. *Version 3:* 11/68–10/71. *Version 4:* 11/55–10/68. *Version 5:* 10/53–10/55.

Objectives: To train enlisted personnel to operate, install, and repair tactical microwave radio systems.

Instruction: *All Versions:* Lectures and laboratory in tactical microwave radio systems installation, operation, and repair, including electrical fundamentals, audio amplifier basics, electronic devices and circuits, elements of electronic communications, microwave techniques, and electronic principles applied to specific equipment. *Version 1:* Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (23 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (29 weeks) of this course. *Version 2:* Instruction includes solid-state devices. *Version 3:* Instruction includes solid-state devices.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electronics laboratory for those students completing 23 weeks; or 3 semester hours in basic electronics for students completing 29 weeks (see note above) (5/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and 1 in electronics laboratory for those students completing 23 weeks; or 5 semester hours in basic electronics and 1 in electronics laboratory for those students completing 29 weeks (see note above) (5/75). *Version 2:* In the vocational certificate category, 15 semester hours in electronic communications, 5 in electronic communications laboratory (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronic communications, 3 as an elective in electronic communications, 3 in electronic communications laboratory (6/74); in the upper-division baccalaureate category, 3 semester hours as an elective in electronic communications on the basis of institutional evaluation (6/74). *Version 3:* In the vocational certificate category, 15 semester hours in electronic communications, 5 in electronic communications laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours as an elective in electronic communications on the basis of institutional evaluation (6/74). *Version 4:* In the vocational certificate category, 12 semester hours in electronic communications, 4 in electronic communications laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours as an elective in electronic communications on the basis of institutional evaluation (6/74). *Version 5:* In the vocational certificate category, 12 semester hours in electronic communications, 4 in electronic communications laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity, 6 in radio (12/68); in the upper-division baccalaureate category, 3 semester hours as elective in electronic communications on the basis of institutional evaluation (6/74).

Related Occupation Codes: 26L.

AR-1715-0273

ARTILLERY COMMUNICATIONS OFFICER

Course Number: 6-A-0200; 6-B-0200; 6-O-6.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 12–15 weeks (457–640 hours).

Exhibit Dates: 3/56–12/68.

Objectives: To train officers in artillery communications.

Instruction: Lectures and practical exercises in the supervision and coordination of the installation, operation, and maintenance of artillery communication equipment and systems, including radiotelephone procedures and security, fundamentals of electricity and radio, wire communications, FM and AM equipment, signal supply operations and maintenance prodedures, radiotelegraph, radio teletypewriter procedures, message center procedures and cryptography, field artillery communication system, and maintenance of computers.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity and radio operation and maintenance, 1 in electrical laboratory (6/74).

AR-1715-0274

CORPORAL OFFICER

Course Number: 6-A-1190A; 6-A-1190.

Location: Artillery and Guided Missile School, Ft. Sill, OK.

Length: 10 weeks (344–412 hours).

Exhibit Dates: 4/57–12/68.

Objectives: To train commissioned officers in the capabilities, limitations, and operation of a specific missile and its equipment.

Instruction: Lectures and practical exercises in the operation of the Corporal missile. Topics include artillery transport, communications and electronics, gunnery, equipment and accessories, tactics and combined arms, and target acquistion. Course contains a limited coverage of electrical circuit fundamentals.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (6/74).

AR-1715-0275

CORPORAL MAINTENANCE OFFICER

Course Number: 6-A-1191; 6-O-41.

Location: Artillery and Guided Missile School, Ft. Sill, OK.

Length: 32–33 weeks (1366–1436 hours).

Exhibit Dates: 10/56–12/68.

Objectives: To train artillery officers in Corporal maintenance.

Instruction: Lectures and practical exercises in the function, technical operations, characteristics, maintenance, and inspection of Corporal fire control systems, launching and handling equipment, and on-missile material, including communications and electronics; mathematics; fundamentals of electricity; radio electronics; radar electronics; target acquisition; AN/MPQ-25 radar; Doppler; AN/MSA-6 computer; emplacement and loop checks; Corporal missile components, test equipment, and check-out and firing procedures; propulsion system, uncrating assembly, and service area check-out; and Corporal atomic warhead.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68).

AR-1715-0276

AN/TPQ-21 HAWK GUIDED MISSILE SYSTEM SIMULATOR MAINTENANCE

Course Number: 121-24F30; 4F-F6; 121-F10; 44-R-F42.

Location: Air Defense School, Ft. Bliss, TX.

Length: 8–9 weeks (305–348 hours).

Exhibit Dates: 7/64–Present.

Objectives: To train enlisted personnel to operate, adjust, and maintain a guided missile system simulator.

Instruction: Lectures and practical exercises in guided missile system simulator operation, adjustment and maintenance, including AC and DC control circuits, control console, countermeasures console, system analysis, operating procedures, programming, transistors, safety and test equipment, power system, and maintenance and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical maintenance laboratory (6/74).

Related Occupation Codes: 24F.

AR-1715-0277

AVIONIC EQUIPMENT MAINTENANCE SUPERVISOR

Course Number: 102-35P40.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 19 weeks (702 hours). *Version 2:* 22 weeks (826 hours).

Exhibit Dates: *Version 1:* 10/67–12/68. *Version 2:* 5/66–9/67.

Objectives: To train enlisted personnel as avionic equipment maintenance supervisors.

Instruction: Lectures and practical exercises in advanced maintenance techniques and maintenance supervision of avionic equipment, including advanced electronics; semiconductor principles, transistor types, transistor circuits, zener and tunnel diode operation; avionic communications and navigation equipment; automatic flight control equipment; and supervisory and training techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronics, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 1 in electrical laboratory (6/74); in the upper-division baccalaureate category, 3 semester hours as an elective in electronic circuits (6/74). *Version 2:* In the vocational certificate category, 6 semester hours in electronics, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (12/68); in the upper-division baccalaureate category, 3 semester hours as an elective in electronic circuits (6/74).

Related Occupation Codes: 35K; 35L; 35M; 35N; 35P.

AR-1715-0278

TELEVISION EQUIPMENT REPAIR

Course Number: *Version 1:* 191-26T20. *Version 2:* 11-R-285.1. *Version 3:* 11-R-285;1 11-E-35.

Location: Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 33 weeks (1175 hours). *Version 2:* 33 weeks (1238 hours). *Version 3:* 25–27 weeks (926–1002 hours).

Exhibit Dates: *Version 1:* 5/73–Present. *Version 2:* 8/68–4/73. *Version 3:* 2/56–7/68.

Objectives: To train enlisted personnel to install, operate, maintain, and repair television receivers, camera chains, studio equipment microwave links, video tape recorders and closed-circuit systems.

Instruction: *All Versions:* Lectures and practical exercises in electrical fundamentals, electronics as applied to basic amplifiers and receivers, generation of RF energy, monochrome television receivers, image orthicon cameras, vidicon television equipment, and color television. *Version 1:* Instruction includes video tape recorders and semiconductor fundamentals. *Version 2:* Instruction includes video tape recorders and semiconductor fundamentals.

Credit Recommendation: *Version 1:* In the vocational certificate category, 24 semester hours in television systems, 8 in television systems laboratory (6/74); in the lower-division baccalaureate/associate degree category, 9 semester hours in television systems, 2 in television systems laboratory (6/74); in the upper-division baccalaureate category, 3 semester hours as an elective in television systems, 1 in television systems laboratory (6/74). *Version 2:* In the vocational certificate category, 24 semester hours in television systems, 8 in television systems laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 3 semester hours as an elective in television systems, 1 in television systems laboratory (6/74). *Version 3:* In the vocational certificate category, 18 semester hours in television systems, 6 in television systems laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 3 semester hours as an elective in television systems, 1 in television systems laboratory (6/74).

Related Occupation Codes: 26T.

AR-1715-0279

PROJECTOR EQUIPMENT REPAIR

(Sound Projector Repair)

Course Number: 198-41F20; 11-R-401.2; 11-E-28.

Location: Signal School, Ft. Monmouth, NJ.

Length: 10–11 weeks (386–402 hours).

Exhibit Dates: 7/54–Present.

Objectives: To train enlisted personnel as projector repairmen.

Instruction: Lectures and practical exercises on the maintenance and repair of still and sound motion picture projectors and audio tape recorders, and related equipment, including electrical fundamentals, audio amplifiers, principles of photographic equipment repair, tape recorders, repair of specific projector sets, basic optics and shop practices, sound motion picture projectors, maintenance of screens, and supply and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanics, 2 in electromechanical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electromechanics, 1 in electromechanical laboratory (6/74).

Related Occupation Codes: 41F; 41H.

AR-1715-0280

CORPORAL FIRE CONTROL SYSTEM MAINTENANCE

Course Number: 6-N-1186; 6-N-228.2.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 32 weeks (1291 hours).

Exhibit Dates: 8/58–1/62.

Objectives: To train warrant officers and enlisted personnel to adjust, maintain, and operate Corporal fire control systems.

Instruction: Lectures and practical exercises in the operation and maintenance of Corporal fire control systems. Topics include communications, mathematics, fundamentals of electricity and electronics, and specific radar, Doppler, and computer systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68).

Related Occupation Codes: 221B; 221C; 222B; 251B; 223B; 223D; 251D; 224B.

AR-1715-0281

FIELD ARTILLERY BATTERY OFFICER

(Field Artillery and Surface-to-Surface Missile Battery Officer)

Course Number: 6-A-C2; 6-O-1.

Location: Artillery and Guided Missile School, Ft. Sill, OK.

Length: 33–36 weeks (1133–1302 hours).

Exhibit Dates: 3/56–12/68.

Objectives: To train officers to be field artillery battery officers.

Instruction: Lectures and practical exercises in basic electricity, gunnery, material, motors, military tactics, associated ground handling equipment, communication equipment, field artillery radar, ground guidance systems, leadership, air-ground special operations, and special weapons employment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in basic electrical laboratory (6/74).

AR-1715-0282

Fixed Station Terminal Repair

Course Number: 11-E-43.

Location: Signal School, Ft. Monmouth, NJ.

Length: 24 weeks (960 hours).

Exhibit Dates: 9/54–12/68.

Objectives: To train enlisted personnel to perform as fixed-station terminal equipment repairmen.

Instruction: Lectures and practical exercises in the installation, operation, and repair of fixed-station terminal radio communications equipment, and the rebuilding and overhaul of fixed-station radio transmitters, receivers, and terminal equipment, including introduction to communications and electricity; basic electronic circuits; fixed-station fundamentals; antenna systems; telephone and telegraph fundamentals; fixed-station carrier fundamentals; four-channel, twelve-channel, and single-sideband carrier equipment; and fixed-station integrated communication systems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity and electronics, and credit in electrical laboratory on the basis of institutional evaluation (6/74).

AR-1715-0283

1. Armor Communication Officer
2. Armor Communication Officer (Armor Communication)

Course Number: *Version 1:* 17-A-0200. *Version 2:* 17-B-0200; 17-O-7.

Location: Armor School, Ft. Knox, KY.

Length: *Version 1:* 8 weeks (300 hours). *Version 2:* 10 weeks (355–375 hours).

Exhibit Dates: *Version 1:* 5/63–12/68. *Version 2:* 10/55–4/63.

Objectives: To train commissioned officers to supervise the installation, operation, and maintenance of field communications systems.

Instruction: *All Versions:* Lectures and practical exercises in field communication systems installation; message center procedures and codes; care and use of test equipment; field radio maintenance, troubleshooting, and repair; and some AM, FM, and CW theory. *Version 2:* Instruction includes AC and DC circuit theory, Ohm's law, and vacuum tube theory.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electricity or radio operation and maintenance on the basis of institutional examination (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or radio operation and maintenance on the basis of institutional evaluation (6/74); in the upper-division baccalaureate category, credit in electronics or radio operation and maintenance on the basis of institutional evaluation (12/68). *Version 2:* In the vocational certificate category, 3 semester hours in electricity or radio operation and maintenance on the basis of institutional evaluation (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or radio operation and maintenance on the basis of institutional evaluation (6/74); in the upper-division baccalaureate category, credit in electricity or radio operation maintenance on the basis of institutional evaluation (12/68).

AR-1715-0284

1. Unattended Ground Sensor Mechanic
2. Unattended Ground Sensor Specialist/Maintenance Specialist

Course Number: *Version 1:* 221-17M30. *Version 2:* 221-17M20.

Location: *Version 1:* Intelligence School, Ft. Huachuca, AZ. *Version 2:* Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ.

Length: *Version 1:* 5 weeks (165 hours). *Version 2:* 10 weeks (323 hours).

Exhibit Dates: *Version 1:* 3/75–Present. *Version 2:* 4/73–2/75.

Objectives: To train enlisted personnel in the operation and installation of unattended ground sensor equipment.

Instruction: *All Versions:* Lectures and practical exercises in the operation and installation of unattended ground sensor equipment, and the maintenance and repair of radio-link sensors, read-out equipment, relays, antennas and test equipment associated with unattended ground sensor systems, including physical security sensors, radio-link sensors, sensor read-out, relay and employment, non-type classified sensors, sensor assembly test and maintenance, portable monitoring equipment, antenna group AN/USA-32, and relay and automated read-out equipment. *Version 1:* Topics include testing and maintenance, by subassembly replacement, of radio link sensors, readout and associated test equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in electronic equipment servicing laboratory (6/75). *Version 2:* In the vocational certificate category, 1 semester hour in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory on the basis of institutional evaluation (6/74).

Related Occupation Codes: 17M.

AR-1715-0285

Antiaircraft Artillery Remote Control Repair (Basic)

Course Number: 9-R-301.1.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 8 weeks (280 hours).

Exhibit Dates: 1/57–12/68.

Objectives: To train enlisted personnel to perform as antiaircraft artillery remote control repairmen.

Instruction: Lectures and practical exercises in antiaircraft artillery remote control repair, including general subjects; hydraulics and mechanics; purpose and operation of gear trains, differential assemblies, speed reducers, and cams; electrical fundamentals; meters and test equipment; electron tubes; synchros; series, parallel, and series-parallel DC circuits; cable repair; 90mm and 120mm AAFCS equipment; and light AAA control systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electricity and electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity and electrical laboratory (6/74).

AR-1715-0286

1. Systems Engineering, Analysis and Management (Guided Missile)
2. Guided Missile Systems Officer
3. Guided Missile Systems Officer
4. Guided Missile Systems Officer
5. Guided Missile Staff Officer
6. Guided Missile Staff Officer

Course Number: *Version 1:* 4F-14F; 4F-1181. *Version 2:* 4F-1181. *Version 3:* 44-A-1181. *Version 4:* 44-A-1181. *Version 5:* 44-A-1181. *Version 6:* 44-O-5.

Location: *Version 1:* Air Defense School, Ft. Bliss, TX. *Version 2:* Air Defense School, Ft. Bliss, TX. *Version 3:* Air Defense School, Ft. Bliss, TX. *Version 4:* Air Defense School, Ft. Bliss, TX. *Version 5:* Air Defense School, Ft. Bliss, TX. *Version 6:* Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: *Version 1:* 35 weeks (1346 hours). *Version 2:* 30–33 weeks (1090–1136 hours). *Version 3:* 39 weeks (1302–1389 hours). *Version 4:* 38 weeks (1270–1306 hours). *Version 5:* 35 weeks (1216 hours). *Version 6:* 26 weeks (840 hours).

Exhibit Dates: *Version 1:* 9/75–Present. *Version 2:* 3/68–8/75. *Version 3:* 7/61–2/68. *Version 4:* 7/58–6/61. *Version 5:* 6/57–6/58. *Version 6:* 2/57–5/57.

Objectives: To provide officers with knowledge relative to research, development and application of guided missile systems.

Instruction: *All Versions:* Lectures, discussion groups, and demonstrations in vector and differential calculus, electricity and electronics, basic physics, nuclear physics, electronics, systems analysis, radiation theory and radar, mechanics, aerodynamics, guidance and control, and propulsion. *Version 3:* Instruction includes air defense operations and tactics, nuclear weapons employment, and SSM systems. *Version 4:* Instruction includes Hawk system, Nike materiel, air defense tactics, missile response equations, and combined arms. *Version 5:* Instruction includes Corporal system, air atomic defense tactics, Nike materiel, and guided missile tactics. *Version 6:* Instruction includes range facilities and firing at WSPG, engineering machanics and thermodynamics, and advanced guidance systems.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 6 semester hours in engineering mathematics, 3 in electronics, 3 in mechanics, 3 in system dynamics (8/77). *Version 2:* In the upper-division baccalaureate category, 6 semester hours in engineering mathematics, 6 in electricity and electronics, 3 in mechanics, and 3 in systems analysis (6/74). *Version 3:* In the upper-division baccalaureate category, 15 semester hours in engineering electronics, mechanics, aeropropulsion, or aerodynamics, 3 in systems analysis, and credit in mathematics and physics on the basis of institutional evaluation (12/68). *Version 4:* In the upper-division baccalaureate category, 15 semester hours in engineering electronics, mechanics, aeropropulsion, or aerodynamics, and credit in mathematics and physics on the basis of institutional evaluation (12/68). *Version 5:* In the upper-division baccalaureate category, 12 semester hours in engineering electronics, mechanics, aeropropulsion, or aerodynamics, and credit in mathematics and physics on the basis of institutional evaluation (12/68). *Version 6:* In the upper-division baccalaureate category, 10 semester hours in engineering electronics, mechanics, aeropropulsion, or aerodynamics and credit in mathematics and physics on the basis of institutional evaluation (12/68).

AR-1715-0287

Nike Ajax Missile Mechanical Maintenance

Course Number: 44-R-172.1.

Location: Air Defense School, Ft. Bliss, TX.

Length: 6–7 weeks (208–232 hours).

Exhibit Dates: 10/59–12/68.

Objectives: To train enlisted personnel as Nike Ajax missile mechanics.

Instruction: Lectures and practical exercises in Nike Ajax missile mechanical maintenance, including basic electricity, mechanical materiel of Nike Ajax assembly and launching areas, Nike Ajax missile preparation and depreparation, electrical units, propulsion system and warheads, launcher and launching area equipment and operations, and missile electrical check-out.

Credit Recommendation: In the vocational certificate category, 8 semester hours in missile maintenance technology, 2 in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in missile maintenance technology, 1 in electronics laboratory (6/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (6/74).

AR-1715-0288

1. Associate Air Defense Missile Battery Officer
2. Associate Antiaircraft Artillery (AAA) Missile Battery Officer
3. Associate Surface-to-Air Missile (SAM) Battery Officer

Course Number: *Version 1:* 44-A-C3B. *Version 2:* 44-A-C3B. *Version 3:* 44-O-2B.

Location: *Version 1:* Air Defense School, Ft. Bliss, TX. *Version 2:* Air Defense School, Ft. Bliss, TX. *Version 3:* Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: *Version 1:* 16 weeks (585–591 hours). *Version 2:* 17 weeks (620 hours). *Version 3:* 16–17 weeks (600–660 hours).

Exhibit Dates: *Version 1:* 7/58–12/68. *Version 2:* 9/57–6/58. *Version 3:* 3/55–8/57.

Objectives: To train officers as air defense battery officers assigned to SAM units.

Instruction: Lectures and practical exercises in internal-combustion and diesel engines, basic electronics, basic radar, analog computers, communications, characteristics and operation of Nike Ajax Battery Control equipment and operations, nuclear weapons, special warheads, air defense tactics, and carbine marksmanship.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electricity and electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity and electrical laboratory (6/74). *Version 2:* In the vocational certificate category, 2 semester hours in electricity and electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (12/68). *Version 3:* In the vocational certificate category, 4 semester hours in electricity and electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity, and credit in electrical laboratory on the basis of institutional evaluation (12/68).

AR-1715-0289

1. Air Defense Missile Staff Officer (Hawk)
   (Surface-to-Air Missile Staff Officer (Hawk))
2. Surface-to-Air Missile Staff Officer (Hawk)
3. SAM Staff Officer (Hawk)
4. SAM Staff Officer (Hawk)
5. Surface-to-Air Missile Staff Officer (Hawk)

Course Number: *Version 1:* 2G-1178. *Version 2:* 44-A-F21. *Version 3:* 44-A-F21. *Version 4:* 44-A-F21. *Version 5:* 44-A-F21.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 17–18 weeks (635–676 hours). *Version 2:* 19 weeks (722–734 hours). *Version 3:* 37 weeks (1271–1354 hours). *Version 4:* 35 weeks (1216 hours). *Version 5:* 35 weeks (1288 hours).

Exhibit Dates: *Version 1:* 1/68–Present. *Version 2:* 9/64–12/67. *Version 3:* 7/61–8/64. *Version 4:* 4/60–6/61. *Version 5:* 4/59–3/60.

Objectives: To train commissioned officers to operate, maintain, inspect, and technically employ Hawk missile systems.

Instruction: Lectures and practical exercises in basic electronics, including AC and DC circuits, linear elements, vacuum tubes, and transistors; communication receivers; radar fundamentals; use of electronic test equipment; pulse acquisition radar and range only radar; and loader, launcher and missile components.

Credit Recommendation: *Version 1:* In the vocational certificate category, 12 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics (6/74); in the upper-division baccalaureate category, 2 semester hours in electrical laboratory (6/74). *Version 2:* In the vocational certificate category, 8 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics (6/74); in the upper-division baccalaureate category, 2 semester hours in electrical laboratory (6/74). *Version 3:* In the vocational certificate category, 8 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electrical laboratory (6/74). *Version 4:* In the vocational certificate category, 6 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electrical laboratory (6/74). *Version 5:* In the vocational certificate category, 6 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electrical laboratory (6/74).

AR-1715-0290

Surface-to-Air Missile System Maintenance (Hawk) Warrant Officer Advanced

Course Number: 4-9-C32; 4-9-C32-A; 4F-251C-B.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 19 weeks (689 hours).

Exhibit Dates: 2/72–10/76.

Objectives: To train warrant officers in logistical management and operation of Hawk surface-to-air missiles.

Instruction: Lectures and practical exercises in maintenance and operation of Hawk surface-to-air missiles. Topics include personnel management, data processing techniques, supply and administration, maintenance procedures, troubleshooting, and operation of Hawk missile systems.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in electronics laboratory (6/74); in the upper-division baccalaureate category, 3 semester hours as a technical elective in business administration, or 2 semester hours in electronics laboratory for non-electrical-engineering majors (6/74).

AR-1715-0291

Lacrosse Fire Control Operation

Course Number: 6-R-167.6; 6-R-F9.

Location: Artillery Missile School, Ft. Sill, OK.

Length: 3–5 weeks (139–198 hours).

Exhibit Dates: 2/58–12/68.

Objectives: To train enlisted personnel as Lacrosse field artillery missile fire control crewmen.

Instruction: Lectures and practical exercises on adjustment, maintenance, and operation of Lacrosse missile guidance central and auxiliary equipment, including communications and electronics, basic electronics, communications, gunnery, firing data, material, Lacrosse missile, and guidance section, tactics and combined arms, launcher, target acquisition, map reading, organizational maintenance, and tactical deployment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/74).

AR-1715-0292

Nike Maintenance Chief Noncommissioned Officer (NCO) Advanced

Course Number: 104-23W50-EC.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 19 weeks (684 hours).

Exhibit Dates: 9/71–3/73.

Objectives: To train enlisted personnel in operation, organizational check-out and functional analysis of Nike missile maintenance equipment.

Instruction: Lectures and practical exercises in the duties of Nike missile maintenance chiefs. Course includes training on electronic test equipment, communications equipment, power supplies, and basic computer fundamentals.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics (6/74); in the upper-division baccalaureate category, 2 semester hours in electronics laboratory (6/74).

Related Occupation Codes: 22G; 22L; 22M; 23N; 23U; 23W.

AR-1715-0293

Hawk Maintenance Chief Noncommissioned Officer (NCO) Advanced

Course Number: 121-23V50-EC.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 19 weeks (684 hours).

Exhibit Dates: 7/71-3/73.

Objectives: To train enlisted personnel to operate and organize check-out procedures and functional analysis of Hawk missile maintenance equipment.

Instruction: Lectures and practical exercises in the duties of Hawk missile maintenance chiefs. Course includes training on electronic test equipment and communications equipment, power supplies, and basic computer fundamentals.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics (6/74); in the upper-division baccalaureate category, 2 semester hours in electronics laboratory (6/74).

Related Occupation Codes: 22K; 23Q; 23S; 23T; 23V.

AR-1715-0294

Improved Hawk Information Coordination Central Maintenance

Course Number: *Version 1:* 104-24G10. *Version 2:* 104-24G20. *Version 3:* 104-24G20.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 27-28 weeks (976 hours). *Version 2:* 25 weeks (895 hours). *Version 3:* 21 weeks (692 hours).

Exhibit Dates: *Version 1:* 6/78-Present. *Version 2:* 5/76-5/78. *Version 3:* 1/73-4/76.

Objectives: To train enlisted personnel to maintain the improved continuous-wave acquisition radar and the information coordination central.

Instruction: Lectures and practical exercises in the maintenance of the Hawk information coordination central and the continuous-wave acquisition radar. Topics include missile electronics theory, DC and AC circuits, magnetism, reactive components, vacuum tubes and transistors, test equipment, radar fundamentals, power supplies, and digital computer fundamentals.

Credit Recommendation: *Version 1:* Pending evaluation *Version 2:* In the vocational certificate category, 2 semester hours in transistor electronics, 2 in digital systems, 8 in electronics laboratory (8/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital electronics on the basis of institutional evaluation, 2 in electricity/electronic circuits laboratory (8/77). *Version 3:* In the vocational certificate category, 8 semester hours in electronics, 4 in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics, 2 in electronics laboratory (6/74); in the upper-division baccalaureate category, 1 semseter hour in electronics laboratory (6/74).

Related Occupation Codes: 24G.

AR-1715-0295

Improved Hawk Organizational Maintenance Supervisor

Course Number: 4F-223D.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 46 weeks (1581 hours). *Version 2:* 42 weeks (1432-1441 hours).

Exhibit Dates: *Version 1:* 7/75-Present. *Version 2:* 1/73-6/75.

Objectives: To provide warrant officers and enlisted personnel with the knowledge of the operation, organizational maintenance, and repair of the improved Hawk missile system.

Instruction: Lectures and practical exercises in the maintenance of the Hawk missile system. Course includes basic electronic circuits, radar electronics, fundamental digital computer electronics, and digital computer machine language programming.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in computer fundamentals, 1 in transistor electronics, 6 in electronic troubleshooting (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (8/77). *Version 2:* In the vocational certificate category, 6 semester hours in basic electronics and introductory digital computers (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and introductory digital computers (6/74); in the upper-division baccalaureate category, 1 semester hour in basic electronics and introductory digital computers (6/74).

Related Occupation Codes: 24B; 24C; 24D; 24E; 24F; 24G; 24P; 24Q; 24U; 223D; 223B; 221B; 221C; 222B; 251B.

AR-1715-0296

Signal Officer Advanced (Nonresident/Resident)

Course Number: 4-11-C23 (NR/R).

Location: Signal School, Ft. Gordon, GA.

Length: Resident 8 weeks (288 hours).

Exhibit Dates: 8/72-Present.

Objectives: To prepare officers for branch command and staff duties at battalion through brigade levels.

Instruction: Phases IA, II, IV and VI, completed in residence, cover instruction in general communications electronics subjects, including DC and AC principles, tubes, transmitters, receivers, infrared equipment and radar; tactical communications equipment and signal communications. Phases I, III and V, completed by correspondence, cover instruction in military-related subjects, including leadership, tactics, and procedures and policies.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and communications systems (4/77).

AR-1715-0297

Missile Systems Apprentice

Course Number: 121-27A10.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 13 weeks (455 hours).

Exhibit Dates: 2/68-Present.

Objectives: To train enlisted personnel to maintain and repair land combat missile systems and land combat support systems.

Instruction: Lectures and practical exercises in the maintenance and repair of land combat missile systems. Course includes basic electricity, linear and nonlinear devices, inverters, converters, use of electronic test equipment, and basic computer logic and fundamentals.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics (6/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (6/74).

Related Occupation Codes: 27A; 27B; 27C; 27D.

AR-1715-0298

1. Lance Missile System Repair
2. Lance Missile System Repair
3. Combat Support Missile System Repair

Course Number: 121-27D20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 8-12 weeks (240-406 hours). *Version 2:* 12-13 weeks (406-433 hours). *Version 3:* 15 weeks (497 hours).

Exhibit Dates: *Version 1:* 4/75-Present. *Version 2:* 6/74-3/75. *Version 3:* 5/73-5/74.

Objectives: To train enlisted personnel to maintain the Lance Missile System.

Instruction: *Version 1:* Lectures and laboratory exercises including basic electricity concepts, AC and DC circuit theory—series, parallel, series-parallel, inductive, capacitive, and LCR circuits; series and parallel resonant circuits; elementary theory of semiconductor devices and circuits including FETs; soldering techniques and practices; troubleshooting and maintenance of Lance test equipment and missile systems. Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will take only Phase II (8 weeks) of this course. See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete both Phases I and II (12 weeks). *Version 2:* Lectures and laboratory exercises including basic electricity concepts of power, work, and energy; DC and AC circuit theory—series, parallel, series-parallel, inductive, capacitive, and LCR circuits; series and parallel resonant circuits; transformers and power supplies; elementary theory of semiconductor devices and circuits including FETs; soldering techniques and practices; troubleshooting and maintenance of Lance test equipment and missile systems. *Version 3:* Lectures and practical exercises in the maintenance of the Lance missile system. Course includes basic AC and DC circuits, RLC circuits, transients, resonance, transistor circuits, nonlinear wave shaping, and soldering techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in basic electronics for students who complete 8 weeks of the course or 14 semester hours in basic electronics for students who complete 12 weeks of this course (see NOTE above) (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics for all students (8/77). *Version 2:* In the vocational certificate category, 4 semester hours in basic electronics and troubleshooting (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics and troubleshooting (3/75). *Version 3:* In the vocational certificate category, 8 semester hours in basic electronics (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in basic electronics (6/74).

Related Occupation Codes: 27D.

AR-1715-0299

WIRE GUIDED MISSILE SYSTEM REPAIR

Course Number: 121-27E20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* Self-paced 10–15 weeks (400–480 hours). *Version 2:* 13 weeks (431 hours). *Version 3:* 17 weeks (590 hours).

Exhibit Dates: *Version 1:* 11/74–Present. *Version 2:* 11/72–10/74. *Version 3:* 6/70–10/72.

Objectives: To train personnel as wire guided missile system repairmen.

Instruction: *All Versions:* Lectures and practical exercises in direct and general support maintenance on TOW weapon system trainers, and associated equipment, including missile electronic subjects, TOW weapon system familiarization, multimeter care and use, test equipment, soldering, modulators and demodulators, introduction to logic symbology, threaded inserts, optical sight, traversing unit and launch tube, maintenance of the missile guidance set, shop operations, battery charger, and troubleshooting transistorized circuits. *Version 1:* Electronics subjects include basic electricity concepts of work, energy, and power; DC and AC circuit theory—series, parallel, series-parallel, inductive, capacitive, and LCR circuits; series and parallel resonant circuits; transformers and power supplies; RC and LC transients; soldering techniques and practices; and elementary semiconductor devices and circuits including FET.

Credit Recommendation: *Version 1:* In the vocational certificate category, 7 semester hours in basic electronics and troubleshooting (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics (3/75). *Version 2:* In the vocational certificate category, 8 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics (6/74); in the upper-division baccalaureate category, 2 semester hours in electronics laboratory (6/74). *Version 3:* In the vocational certificate category, 12 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics (6/74); in the upper-division baccalaureate category, 3 semester hours in electronics laboratory (6/74).

Related Occupation Codes: 27E; 27Z.

AR-1715-0300

RADAR ENGAGEMENT SIMULATOR AN/TPQ-29

(Improved Hawk Guided Missile Simulator Maintenance Maintenance)

Course Number: 121-ASIG6; 121-24E30.

Location: Air Defense School, Ft. Bliss, TX.

Length: 8 weeks (280–295 hours).

Exhibit Dates: 5/73–Present.

Objectives: To train enlisted personnel to operate, adjust, and maintain the Hawk simulator system.

Instruction: Lectures and practical exercises in the maintenance of the Hawk simulator system. Topics include AC and DC control systems, electronic test equipment, basic computer logic, radar fundamentals, and circuit analysis.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics, 4 in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 2 in electronics laboratory (6/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (6/74).

Related Occupation Codes: 24E.

AR-1715-0301

REDEYE WEAPON SYSTEM REPAIR

Course Number: 121-27G20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 9–12 weeks (276–382 hours). *Version 2:* 12 weeks (419 hours).

Exhibit Dates: *Version 1:* 11/76–Present. *Version 2:* 12/71–10/76.

Objectives: To provide enlisted and civilian personnel with the capability to inspect, test and perform support maintenance on the Redeye weapon system.

Instruction: *All Versions:* Lectures and practical exercises in electronic fabrication techniques (including soldering), AC/DC circuits, solid state electronics, power supplies, and introduction to digital techniques. *Version 1:* Version 1 includes resonant circuits. Note: Students who have completed Modules 201 and 202 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (9 weeks) of the course. See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete both Phases I and II (12 weeks) of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in basic electronics for students who complete 9 weeks of the course or 12 semester hours in basic electronics for students who complete 12 weeks of the course (see NOTE above) (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics for all students (8/77). *Version 2:* In the vocational certificate category, 10 semester hours in basic electronics (6/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in basic electronics (6/74).

Related Occupation Codes: 27G.

AR-1715-0302

SERGEANT MISSILE GUIDANCE REPAIR

Course Number: *Version 1:* 121-21S20. *Version 2:* 122-21S20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 16 weeks (546 hours). *Version 2:* 19 weeks (673–679 hours).

Exhibit Dates: *Version 1:* 11/72–Present. *Version 2:* 1/67–10/72.

Objectives: To train enlisted personnel to operate and maintain the Sergeant missile system.

Instruction: Lectures and practical exercises in Sergeant missile system operation and maintenance, including AC and DC circuits, multimeters, soldering techniques, RLC circuits, transistors, nonlinear wave shaping, differentiation and integration, series resonance, power supplies, control panel self-test, missile handling equipment, missile trainer maintenance, and field maintenance test station.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in electronics laboratory (6/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (6/74). *Version 2:* In the vocational certificate category, 10 semester hours in electricity or electronics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours as an elective in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (6/74).

Related Occupation Codes: 21S.

AR-1715-0303

SHILLELAGH MISSILE SYSTEM REPAIR

Course Number: 121-27H20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 12–16 weeks (403–495 hours). *Version 2:* 15–16 weeks (501–528 hours). *Version 3:* 15–16 weeks (557 hours).

Exhibit Dates: *Version 1:* 11/76–Present. *Version 2:* 5/73–10/76. *Version 3:* 11/71–4/73.

Objectives: To train enlisted personnel to inspect, test, and maintain Shillelagh missile systems and associated support equipment.

Instruction: *All Versions:* Lectures and practical exercises in basic electricity, linear and nonlinear devices, power supplies, basic computer fundamentals, control systems, instructor control unit maintenance, test and check-out panel maintenance, logic analysis, digital computers introduction, missile soldering procedures, launch vehicle maintenance, and human self-development. *Version 1:* Note: Students who have completed Modules 201 and 202 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (12 weeks) of this course. See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete both Phases I and II (16 weeks) of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in basic electronics for students who complete 12 weeks of the course or 14 semester hours in basic electronics for students who complete 16 weeks of the course (8/77). *Version 2:* In the vocational certificate category, 12 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics (6/74). *Version 3:* In the vocational certificate category, 12 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity and electronics, and credit in electrical laboratory on the basis of institutional evaluation (6/74).

Related Occupation Codes: 27H; 27Z.

AR-1715-0304

NIKE HERCULES FIRE CONTROL SYSTEM MAINTENANCE TRANSITION

Course Number: 44-N-226.1; 44-N-1178T; 44-OE-30(T); 44-N-226.1T; 44-N-F5.

Location: Air Defense School, Ft. Bliss, TX.

Length: 9–12 weeks (315–461 hours).

Exhibit Dates: 7/57–12/68.

Objectives: To train Nike Ajax fire control crewmen to operate, adjust, and maintain Nike Hercules fire control systems.

Instruction: Lectures and practical exercises in Nike Hercules fire control systems, including tracking radar circuits, analog computer control systems, inertial guidance sensing equipment, and maintenance and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics and electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics and electrical laboratory (6/74); in the upper-division baccalaureate category, credit in electronics and electrical laboratory on the basis of institutional evaluation (6/74).

Related Occupation Codes: 222B; 251B.

AR-1715-0305

Nike System Maintenance Officer Transition

(SAM Staff Officer Transition (Hercules))

Course Number: 44-A-F9.

Location: Air Defense School, Ft. Bliss, TX.

Length: 14–21 weeks (505–786 hours).

Exhibit Dates: 8/57–12/68.

Objectives: To train officers with technical backgrounds to operate and maintain Hercules missile systems.

Instruction: Lectures and practical exercises in Hercules missile systems operation and maintenance, including radar and missile systems special electronic circuits; block-diagram and system analysis; and missile systems test equipment, launcher area warhead, computer, and guidance set.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in applied electronics (6/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (6/74).

AR-1715-0306

Combat Missile Maintenance (27-CMF) Noncommissioned Officer (NCO) Basic

(Field Artillery Missile (FM-CMF) Noncommissioned Officer (NCO) Basic)

Course Number: 1-272-C40; 1-FM-C40A.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 8–12 weeks (260–394 hours).

Exhibit Dates: 6/73–Present.

Objectives: To qualify enlisted personnel as senior noncommissioned officers in field artillery missile maintenance.

Instruction: Lectures and practical exercises in the duties of senior noncommissioned officers and in the maintenance and operation of field artillery missiles. Course includes test equipment repair, computer fundamentals, power supplies, and specialized missile components and subsystems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics, 4 in electronic laboratory (9/77); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics, 2 in electronics laboratory (9/77); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (9/77).

Related Occupation Codes: 21L; 21R; 21S; 21T; 27B; 27D; 27E; 27F; 27G; 27H; 46L; 46N.

AR-1715-0307

Improved Hawk Firing Section Maintenance

Course Number: 121-24C10; 121-24C20.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 19 weeks (672 hours). *Version 2:* 22–23 weeks (784–822 hours). *Version 3:* 22 weeks (764–773 hours).

Exhibit Dates: *Version 1:* 7/79–Present. *Version 2:* 3/75–6/79. *Version 3:* 1/73–2/75.

Objectives: To train enlisted personnel to maintain improved Hawk missile systems.

Instruction: *All Versions:* Lectures and practical exercises in maintenance of improved Hawk missile systems, with special emphasis on the high-power illuminator radar. Course includes instruction in basic electricity (DC & AC circuits), linear and nonlinear devices, test equipment, radar principles, troubleshooting, and circuit analysis. *Version 2:* Topics include troubleshooting regulated power supplies, low frequency amplifiers, and fundamentals of high powered illuminator radar.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 6 semester hours in electronics (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (6/75). *Version 3:* In the vocational certificate category, 10 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in electronics (6/74); in the upper-division baccalaureate category, 2 semester hours in electrical laboratory (6/74).

Related Occupation Codes: 24C; 09B.

AR-1715-0308

Nike Universal Officer

(Nike Universal Officer Qualification)
(Officer Qualification, Nike Ajax)

Course Number: 44-A-F4; 44-O-42.

Location: Air Defense School, Ft. Bliss, TX.

Length: 8–10 weeks (368–440 hours).

Exhibit Dates: 3/57–8/63.

Objectives: To train artillery officers in Nike Hercules Universal system materiel and tactics.

Instruction: Lectures and practical exercises in Nike Hercules Universal system materiel and tactics, including basic electronics, missile track radars and radar command systems, guided missile system employment techniques, computer functioning, prelaunch, electronic countermeasures, tactical control system, operational readiness inspections, maintenance safety concepts, weapons handling air defense operations, warhead tests and corrective procedures, and air-space utilization.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (6/74).

AR-1715-0309

Redstone Officer

Course Number: 6-A-1190B.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 7–9 weeks (287–361 hours).

Exhibit Dates: 6/57–11/58.

Objectives: To train artillery officers as surface-to-surface missile unit commanders.

Instruction: Lectures and practical exercises on the characteristics, operating principles, capabilities, and limitations of the Redstone missile and associated equipment, including artillery transport, communications and electronics, basic electricity, missile electrical fundamentals, gunnery, materiel, Redstone introduction and warhead installation, target acquisition, and tactics and combined arms.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electricity and electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electrical laboratory (6/74); in the upper-division baccalaureate category, credit in electricity and electrical laboratory on the basis of institutional evaluation (6/74).

AR-1715-0310

Nike Ajax Officer Qualification (Reserve Component)

Course Number: 44-A-F24.

Location: Air Defense School, Ft. Bliss, TX.

Length: 8 weeks (263–277 hours).

Exhibit Dates: 2/60–12/68.

Objectives: To train officers in Nike Ajax missile system operation.

Instruction: Lectures and practical exercises in Nike Ajax missile system operation, including basic electricity, electronics, radar systems, block-diagram analysis, launching area equipment and assembly area operations, integrated battery operations, air defense operations and tactics, and battery control area equipment.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (6/74); in the upper-division baccalaureate category, 1 semester hour in electrical or electronics laboratory for non-electrical-engineering majors (6/74).

AR-1715-0311

Missile Master Systems Management Officers

Course Number: 11-A-F14; 11-B-F14.

Location: Air Defense School, Ft. Bliss, TX; Signal Fire Distribution Systems Training Activity, Ft. Bliss, TX.

Length: 12 weeks (421–434 hours).

Exhibit Dates: 6/61–12/68.

Objectives: To train commissioned officers to operate and maintain the AN/FSG-1 air defense system and to supervise maintenance personnel.

Instruction: Lectures and practical exercises in AN/FSG-1 air defense system operation and maintenance, including radar display equipment fundamentals, computer principles, circuit tracing, data link transmission and reception, power equipment, analog-to-digital converter, performance testing, test equipment, equipment adjustments and checks, SAGE integration equipment, and system management.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (6/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (6/74).

AR-1715-0312

Ballistic Missile Inertial Guidance and Control Repair (Sergeant)

Course Number: 9-S-373.1; 9-S-F26.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 23–29 weeks (854–1049 hours).

Exhibit Dates: 3/61–12/68.

Objectives: To train military and civilian personnel to inspect, test, and repair electronic assemblies of the Sergeant missile and firing set.

Instruction: Lectures and practical exercises in AC and DC circuits, motors, generators, linear and nonlinear devices, inertial guidance principles, stabilization systems, power systems, digital techniques, test equipment, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electricity and electronics or electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electronics laboratory (6/74).

AR-1715-0313

Hawk Internal Guidance and Launcher Electronics Repair

Course Number: 9-S-257.1.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 25 weeks (917 hours). *Version 2:* 15 weeks (538–548 hours).

Exhibit Dates: *Version 1:* 2/63–12/68. *Version 2:* 4/59–1/63.

Objectives: To train enlisted personnel to inspect, test, maintain, and repair Hawk internal guidance and launcher electronics systems and associated test equipment.

Instruction: *All Versions:* Lectures and practical exercises in the inspection, testing, maintenance, and repair of Hawk internal guidance and launcher electronics systems and associated test equipment, including principles of Hawk guidance, basic electricity, test equipment, antenna control and autopilot systems, launcher system, hydraulics, various circuits, speedgate system, and power system and supplies. *Version 1:* Includes special electronic circuits, transmitter and receiver analysis, mathematics, counterinsurgency, amplifiers and oscillators, multivibrators, and motors and generators. *Version 2:* Includes nuclear warfare instruction and equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 12 semester hours in electronics, 6 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity and electronics, and credit in electrical laboratory on the basis of institutional evaluation (6/74). *Version 2:* In the vocational certificate category, 8 semester hours in electronics, 4 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics, 2 in electrical laboratory (6/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (6/74).

AR-1715-0314

Lacrosse Fire Control System Maintenance

Course Number: 6-N-217.1.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: *Version 1:* 24 weeks (847 hours). *Version 2:* 7 weeks (274 hours).

Exhibit Dates: *Version 1:* 11/60–12/68. *Version 2:* 10/59–10/60.

Objectives: To train warrant officers and enlisted personnel with previous technical experience to perform as Lacrosse field artillery missile fire control mechanics.

Instruction: *All Versions:* Lectures and practical exercises in adjustment and maintenance of Lacrosse ground guidance equipment, including target acquisition, power supplies, angular tracker and test set, calibration of missile tracking antenna, range indicator, interrogator set and precision test transponder, guidance computer, target ranging and measuring equipment, and guidance system. *Version 2:* Topics include fundamentals of electricity and electronics.

Credit Recommendation: *Version 1:* In the vocational certificate category, 9 semester hours in electricity and electronics (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity or electronics (6/74). *Version 2:* In the vocational certificate category, 4 semester hours in electronics and electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics and electrical laboratory (6/74); in the upper-division baccalaureate category, 1 semester hour in electronics and electrical laboratory (6/74).

AR-1715-0315

1. Air Defense Missile Staff Officer (Nike Hercules)
   (Surface-to-Air Missile Staff Officer)
2. Nike System Maintenance Officer
3. Surface-to-Air Missile Staff Officer (Nike)
   (SAM Maintenance)
4. SAM Maintenance

Course Number: *Version 1:* 2G-1177; 44-A-1177. *Version 2:* 44-A-1177. *Version 3:* 44-A-1177. *Version 4:* 44-O-40.

Location: *Version 1:* Air Defense School, Ft. Bliss, TX. *Version 2:* Air Defense School, Ft. Bliss, TX. *Version 3:* Air Defense School, Ft. Bliss, TX. *Version 4:* Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: *Version 1:* 18–19 weeks (637–677 hours). *Version 2:* 42 weeks (1555–1578 hours). *Version 3:* 42–45 weeks (1566–1741 hours). *Version 4:* 49 weeks (1900 hours).

Exhibit Dates: *Version 1:* 5/63–Present. *Version 2:* 9/60–4/63. *Version 3:* 6/58–8/60. *Version 4:* 1/57–5/58.

Objectives: To train officers to be maintenance/staff officers of Nike surface-to-air missile battalions.

Instruction: Lectures and practical exercises in basic electrical and electronic circuits, theory, and block-diagram analysis of radar and missile systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (6/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory for non-electrical engineering majors (6/74). *Version 2:* In the vocational certificate category, 8 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory for non-electrical engineering majors, or 2 in electronics laboratory for electrical engineering majors (6/74). *Version 3:* In the vocational certificate category, 8 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory for non-electrical engineering majors, or 2 in electronics laboratory for electrical engineering majors (6/74). *Version 4:* In the vocational certificate category, 8 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory for non-electrical engineering majors, or 2 in electronics laboratory for electrical engineering majors (6/74).

AR-1715-0316

1. Biomedical Equipment Maintenance
2. Biomedical Equipment Maintenance
3. Medical Equipment Maintenance (Basic)

Course Number: *All Versions:* 4B-F2. *Version 1:* 198-35G10. *Version 2:* 198-35G20. *Version 3:* 198-35G20; 198-208.1.

Location: *Version 1:* Medical Equipment and Optical School, Denver, CO. *Version 2:* Medical Optical and Maintenance Agency, Denver, CO; Fitzsimmons General Hospital, Denver, CO.

Length: *Version 1:* 15 weeks (526 hours). *Version 2:* 19 weeks (625–655 hours). *Version 3:* 10–13 weeks (359–455 hours).

Exhibit Dates: *Version 1:* 1/79–Present. *Version 2:* 9/73–12/78. *Version 3:* 7/60–8/73.

Objectives: To train warrant officers and enlisted personnel to install, inspect, maintain, repair, calibrate and adjust mechanical and electromechanical medical equipment.

Instruction: *Version 1:* Lectures and practical exercises in DC series, parallel and series-parallel circuits. AC waveform nomenclature and fundamental concepts of capacitance, inductance, magnetism relays, motors, diodes and transmitters are presented. Emphasis is given to the presentation of medical equipment theory of operation, maintenance and troubleshooting techniques for dental equipment (not x-ray equipment), sterilizers and pulmonary equipment. *Version 2:* Lectures and practical exercises in installation, inspection, maintenance, repair, calibration and adjustment of mechanical and electromechanical medical equipment (excepting electronic components), including basic electricity, maintenance management and special techniques, insurgency and counterinsurgency, character guidance, command information, medical terminology, anatomy and physiology, and human relations. *Version 3:* Lectures and practical exercises in installation, inspection maintenance, repair, calibration and adjustment of mechanical and electromechanical medical equipment (excepting electronic components), including base electricity, maintenance management and special techniques, insurgency and counterinsurgency, character guidance, command information, medical terminology, anatomy and physiology, and human relations.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in AC and DC circuit fundamentals, 9 in medical equipment, theory of operation and troubleshooting (10/79) *Version 2:* In the vocational certificate category, 4 semester hours in DC and AC circuit fundamentals, 8 in medical equipment maintenance, 1 in anatomy and physiology (10/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in human relations (10/75). *Version 3:* In the vocational certificate category, 3 semester hours in electrical laboratory (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory (7/74).

Related Occupation Codes: 35G; 35S; 35T; 202A.

AR-1715-0317

1. Biomedical Electronic Equipment Maintenance
2. Biomedical Equipment Maintenance (Advanced)
3. Medical Equipment Maintenance (Advanced)

Course Number: *Version 1:* 4B-202A; 198-35S20. *Version 2:* 4B-202A; 198-35G30. *Version 3:* 8-N-202A; 8-N-208.2.

Location: *Version 1:* Medical Equipment and Optical School, Denver, CO. *Version 2:* Medical Optical and Maintenance Agency, Denver, CO. *Version 3:* Fitzsimons General Hospital, Denver, CO.

Length: *Version 1:* 40 weeks (1249–1255 hours). *Version 2:* 35 weeks (1206 hours). *Version 3:* 30 weeks (991 hours).

Exhibit Dates: *Version 1:* 9/73–Present. *Version 2:* 1/71–8/73. *Version 3:* 1/65–12/70.

Objectives: To train warrant officers to perform as medical equipment repair technicians and enlisted personnel to perform as medical equipment repairmen.

Instruction: *All Versions:* Lectures and practical exercises in installation, inspection, maintenance, repair, calibration, and adjustment of selected electrical and electronically controlled or operated medical equipment, including electricity and electronics and maintenance management. *Version 1:* Topics include fundamentals of DC and AC circuits, vacuum tubes, and solid-state electronics devices; principles of operation and maintenance of clinical laboratory and medical instrumentation, including related topics in physics; general- and biochemistry; and technical writing. *Version 2:* Topics include electron tubes and circuits, solid-state devices, biophysical measurements, biomedical electronic instrumentation and instruments, problem solving, and communication and technical report writing. *Version 3:* Topics include biomedical x-ray equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in DC and AC circuits, 2 in applied physics, 6 in electronics, 1 in technical writing, 1 in medical instrumentation, 3 in general- and biochemistry, 4 in medical instrumentation maintenance, and 5 in clinical laboratory instrument maintenance (10/75). *Version 2:* In the vocational certificate category, 10 semester hours in electricity or electronics (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (7/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (7/74). *Version 3:* In the vocational certificate category, 6 semester hours in electricity or electronics (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (7/74).

Related Occupation Codes: 35G; 35S; 202A.

AR-1715-0318

Radioteletypewriter Repair

Course Number: 11-E-17.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 22 weeks (880 hours).

Exhibit Dates: 5/54–12/68.

Objectives: To train enlisted personnel as radioteletypewriter repairmen.

Instruction: Lectures and practical exercises in installation, repair, and depot maintenance of mobile or fixed single-channel radioteletypewriter transmitting and receiving equipment, including principles of electricity, tuned circuits, radio, electron tubes, power supplies and amplifiers, oscillators, transmitters and antennas, detectors and receivers, basic shop, amplitude modulation, fixed-station fundamentals, receiving equipment, field radioteletypewriter equipment, and integrated field training.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity and electronics (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics (12/68).

1. Signal Officer Advanced (Core Phase)
2. Signal Officer Advanced
3. Signal Officer Advanced
4. Signal Officer Career
5. Signal Officer Career (Signal Officer Advanced)

Course Number: *Version 1:* 4-11-C22. *Version 2:* 4-11-C22. *Version 3:* 4-11-C22. *Version 4:* 4-11-C22; 11-A-C22. *Version 5:* 11-A-C22; 11-A-C4; 11-O-3.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Southeastern Signal School, Ft. Gordon, GA. *Version 3:* Signal School, Ft. Monmouth, NJ. *Version 4:* Signal School, Ft. Monmouth, NJ. *Version 5:* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 12 weeks (395 hours). *Version 2:* 39 weeks (1233 hours). *Version 3:* 39 weeks (1209 hours). *Version 4:* 30 weeks (950–966 hours). *Version 5:* 35–36 weeks (1103–1512 hours).

Exhibit Dates: *Version 1:* 12/76–Present. *Version 2:* 7/73–11/76. *Version 3:* 4/70–6/73. *Version 4:* 9/64–3/70. *Version 5:* 10/53–8/64.

Objectives: To train Signal Corps officers for command and staff duties at battalion through brigade levels in divisional nondivisional units.

Instruction: *All Versions:* Lectures and practical exercises in the technical aspects of radio and telephone digital communications, communications arts, and general management. *Version 1:* Students attend the 12 week core program, then branch off into specialized training, attending one of the following: Combat-Electronics Material Management Advanced (4B-0A72), Combat Communications Electronics Advanced (4C-0A25), or Fixed Telecommunications Systems Advanced (4C-0A26). See individual exhibits for credit recommendations. *Version 2:* Instruction includes introduction to computers. *Version 3:* Instruction includes introduction to computers. *Version 4:* Instruction includes introduction to computers.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in basic introduction to computers (4/77). *Version 2:* In the vocational certificate category, 12 semester hours in introduction to computers and general business (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as a nontechnical elective in computers, 5 as an elective in general business (7/74); in the upper-division baccalaureate category, 3 semester hours as a nontechnical elective in introduction to computers, 2 as a technical elective in general business, and additional credit in general business on the basis of institutional evaluation (7/74). *Version 3:* In the vocational certificate category, 12 semester hours in general business and introduction to computers (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as a nontechnical elective in introduction to computers, 5 as an elective in general business (7/74); in the upper-division baccalaureate category, 6 semester hours in business organization and management and credit in electronics and communications engineering on the basis of institutional evaluation (12/68). *Version 4:* In the vocational certificate category, 7 semester hours in general business and introduction to computers (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour as a nontechnical elective in introduction to computers, 3 as a technical elective in general business (7/74); in the upper-division baccalaureate category, 6 semester hours in business organization and management and credit in communications engineering on the basis of institutional evaluation (12/68). *Version 5:* In the vocational certificate category, 2 semester hours in general business and introduction to computers and additional credit in general business and introduction to computers on the basis of institutional evaluation (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in general business and introduction to computers and additional credit in general business and introduction to computers on the basis of institutional evaluation (7/74); in the upper-division baccalaureate category, 6 semester hours in business organization and management and credit in electronics and communications engineering on the basis of institutional evaluation (12/68).

AR-1715-0320

Aircraft Armament Repair

Course Number: 646-45J20.

Location: *Version 1:* Transportation School, Ft. Eustis, VA. *Version 2:* Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 11–17 weeks (358–559 hours). *Version 2:* 13–17 weeks (419–595 hours). *Version 3:* 17 weeks (657 hours).

Exhibit Dates: *Version 1:* 7/76–Present. *Version 2:* 7/70–6/76. *Version 3:* 4/67–6/70.

Objectives: To train enlisted personnel in aircraft armament maintenance and repair.

Instruction: *All Versions:* Lectures and practical exercises in armament systems, electricity and electronics, hydraulic systems, and solid-state devices. *Version 1:* Note: Students who have completed Modules 201, 202, 203 and 204 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phases II and III (11 weeks). See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete Phases I, II and III (17 weeks) of this course.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 3 semester hours in electricity or electronics laboratory (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics laboratory (7/74). *Version 3:* In the vocational certificate category, 2 semester hours in electricity, electronics, or electrical laboratory (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity, electronics, or electrical laboratory (7/74).

Related Occupation Codes: 45J; 09B.

AR-1715-0321

Electric Motor and Generator Repairman
(Electric Motor and Generator Repair)

Course Number: 5-E-11.

Location: Engineer School, Ft. Belvoir, VA.

Length: 10 weeks (368–400 hours).

Exhibit Dates: 4/55–12/68.

Objectives: To train enlisted personnel to maintain and repair electric motors, dynamotors, motor generators, generators, and allied control and starting equipment.

Instruction: Lectures and practical exercises in the maintenance and repair of electric motors and generators. Topics include basic electricity, DC and AC generators, single- and multi-phase motors, and AC and DC motors.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (7/74).

AR-1715-0322

Fixed Cryptographic Equipment Repair

Course Number: 160-32G10; 160-32G20.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2 :* Signal School, Ft. Monmouth, NJ. *Version 3 :* Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 29–35 weeks (1080–1303 hours). *Version 2:* 37 weeks (1319 hours). *Version 3:* 24 weeks (896 hours).

Exhibit Dates: *Version 1:* 11/76–Present. *Version 2:* 5/73–10/76. *Version 3:* 12/71–4/73.

Objectives: To train cryptographic equipment repairmen to install, operate, and repair fixed cryptographic equipment.

Instruction: *All Versions:* Lectures and practical exercises in the installation, operation, and repair of fixed cryptographic equipment, including electrical and electronic fundamentals, and teletypewriter security equipment TSEC/KW-26. *Version 1:* Phase I (6 weeks) includes lectures and laboratory experience in electrical fundamentals and repair of semiconductor power supplies, oscillators, and basic logic circuits. Phase II (29 weeks) covers installation, operation and repair of fixed cryptographic equipment, and teletypewriter security equipment. Note: Students who have attended Modules 201, 202, 203, and 7 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (29 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (35 weeks) of this course. *Version 2:* Topics include pulse generator circuitry, logic circuits, security subjects, electronic tactical teletypewriter security equipment TSEC/KW-7, full-duplex electronic key generator TSEC/KG-13, and COMSEC support facility.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronics laboratory for students completing 29 weeks of the course or 2 semester hours in electricity or electronics and 5 in electricity or electronics laboratory for students completing 35 weeks of the course (see note above) (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics for students completing either 29 or 35 weeks of the course (see note above) (4/77). *Version 2:* In the vocational certificate category, 8 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics (6/74); in the upper-division baccalaureate category, 2 semester hours in electrical and electronic laboratory for non-electrical-engineering students, 2 as a technical elective for non-electrical-engineering students or 1 in electronic instrumentation laboratory for electrical engineering students (6/74). *Version 3:* In the vocational certificate category, 6 semester hours in electricity and electronics (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electrical and electronic laboratory for non-electrical-engineering students, 2 as a technical elective for non-electrical-engineering students, or 1 in electronic instrumentation laboratory for electrical engineering students (6/74).

Related Occupation Codes: 32G; 09B.

AR-1715-0323

Nike Internal Guidance Repair
(Hercules Transition)

Course Number: 9-S-254.1(T).

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 4–5 weeks (140–180 hours).

Exhibit Dates: 10/58–12/68.

Objectives: To provide Nike Ajax internal guidance repairmen with transition training on the Nike Hercules system.

Instruction: Lectures and practical exercises in the inspection, test, and field maintenance of the Nike Hercules internal guidance system, including introduction to Nike Hercules system, internal guidance set and control system, test set group, RF and pulse components, guidance set chassis field maintenance check-out laboratory, detonation control and transistors, automatic pilot control servo and missile harness, RF test set component analysis, and guidance set and complete missile check-out.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (6/74).

AR-1715-0324

Pershing Officer

Course Number: *Version 1:* 2F-13C; 2F-1190P. *Version 2:* 2F-1190P; 2F-1190E; 6-A-1190E.

Location: *Version 1:* Field Artillery School, Ft. Sill, OK. *Version 2:* Field Artillery School, Ft. Sill, OK; Artillery and Missile School, Ft. Sill, OK.

Length: *Version 1:* 7–8 weeks (263–295 hours). *Version 2:* 6–8 weeks (222–299 hours).

Exhibit Dates: *Version 1:* 2/72–Present. *Version 2:* 11/62–1/72.

Objectives: To train officers to supervise the maintenance and operation of the Pershing missile system.

Instruction: *All Versions:* Lectures and practical exercises in the supervision of the maintenance and operation of the Pershing missile system, including communications equipment. *Version 1:* Topics include missile assembly and disassembly, and firing section operations. *Version 2:* Topics include inertial guidance and control, nuclear safety, gunnery and launcher familiarization, basic electronics, digital computer fundamentals, firing battery and data computer, ground handling equipment, and testing procedures.

Credit Recommendation: *All Versions:* Credit is not recommended because of the limited technical nature of the course (6/75). *Version 2:* In the vocational certificate category, 4 semester hours in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (6/74).

AR-1715-0325

Surface-to-Surface Missile (SSM) Officer Basic

Course Number: 44-O-C.

Location: Antiaircraft and Guided Missile School, Ft. Bliss, TX.

Length: 14–16 weeks (504–583 hours).

Exhibit Dates: 9/55–12/68.

Objectives: To train newly commissioned officers to perform as missile officers.

Instruction: Lectures and practical exercises in missile subjects, including motors and generators, basic electronics, communications, mathematics, map reading, guidance and firing procedures, propulsion systems, missile assembly and maintenance, ground handling equipment, gunnery, tactics, combined arms, and administrative procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity (12/68); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory for non-electrical-engineering majors (6/74).

AR-1715-0326

Ordnance Guided Missile Officer, ADM
(Ordnance Guided Missile Officer, AAGM)

Course Number: 9-A-4802; 9-A-F8; 9-O-68A.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 19–20 weeks (698–741 hours).

Exhibit Dates: 11/56–12/68.

Objectives: To train company grade officers to perform as ordnance guided missile officers.

Instruction: Lectures and practical exercises in the operation, maintenance, test, and check-out of air defense systems and associated equipment, including guided missile fundamentals; alternating current laws, circuitry, and test equipment; computers; principles of conventional missile warheads and nuclear weapons; Hercules acquisition radar; air defense missile systems; Hercules computer; ordnance guided missile and nuclear weapons logistics; GM and NW maintenance and shops; and logistical control procedures and logistical exercises.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electrical or mechanical systems laboratory, or 1 as an elective in management and administration (6/74).

AR-1715-0327

Surface-to-Surface Missile (SSM) Maintenance

Course Number: 44-O-41.

Location: Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: 31 weeks (1202 hours).

Exhibit Dates: 10/55–12/68.

Objectives: To train artillery officers in the function, operation, characteristics, maintenance, and inspection of guided-missile fire control systems, launching and handling equipment, and on-missile materiel.

Instruction: Lectures and practical exercises in the function, operation, characteristics, maintenance, and inspection of guided-missile fire control systems, launching and handling equipment, and on-missile materiel, including electricity; radar electronics; specific radar, computer and Doppler sets; operational employment of the Corporal fire control system; Corporal missile components and test equipment; missile check-out and firing; missile propulsion system, missile uncrating and assembly, and service area check-out; missile ground handling equipment; SSM gunnery; guided missile atomic warhead materiel orientation; and surface-to-surface missile tactics.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics (6/74).

AR-1715-0328

SSM Mechanical Materiel Maintenance

Course Number: 44-E-39.

Location: Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: 8 weeks (279 hours).

Exhibit Dates: 10/55–12/68.

Objectives: To train enlisted personnel to assemble, install, and maintain SSM mechanical on-missile guidance systems and associated test equipment.

Instruction: Lectures and practical exercises in SSM mechanical on-missile guidance systems and associated test equipment assembly, installation, and maintenance, including basic electricity, test equipment, Corporal missile orientation, missile servicing, and ground handling equipment operation.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (6/74).

AR-1715-0329

Ordnance Guided Missile Company Grade Officer

Course Number: 9-O-68.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 10 weeks (440 hours).

Exhibit Dates: 1/56–12/68.

Objectives: To train commissioned officers who have completed the ordnance officer basic course to perform as ordnance guided missile operations officers.

Instruction: Lectures and practical exercises in general supervision and direction of logistical support required for ordnance guided missile systems, including fundamental missile subjects, SAM systems, SSM systems, electrical and radar fundamentals, Corporal guidance system and computer, logistics, and new guided missile development.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electricity (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity (6/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (6/74).

AR-1715-0330

1. Missile Maintenance Officer
2. Missile Maintenance Officer
3. Ordnance Missile Systems Maintenance Officer
   (Ordnance Guided Missile Officer (FAM))
   (Ordnance Guided Missile Officer (FAGM))

Course Number: *Version 1:* 4F-4516. *Version 2:* 4E-4516. *Version 3:* 9-A-4801; 9-A-4802; 9-A-F9; 9-O-68B.

Location: *Version 1:* Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Missile and Munitions School, Redstone Arsenal, AL. *Version 3:* Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 14–22 weeks (478–774 hours). *Version 2:* 20–21 weeks (689–729 hours). *Version 3:* 19–20 weeks (700–746 hours).

Exhibit Dates: *Version 1:* 5/71–Present. *Version 2:* 1/66–4/71. *Version 3:* 11/56–12/65.

Objectives: To train officers to be missile officers.

Instruction: Lectures and practical exercises in electronic circuit analysis, mechanical and hydraulic systems, block-diagram analysis of missile subsystems, and missile systems familiarization.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronics (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (6/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (6/74). *Version 2:* In the vocational certificate category, 2 semester hours in business administration or management (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (12/68); in the upper-division baccalaureate category, 3 semester hours in maintenance management (12/68). *Version 3:* In the vocational certificate category, 4 semester hours in business administration or management (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (6/74).

AR-1715-0331

Communication Center Operations

Course Number: 11-E-27.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 8 weeks (280 hours).

Exhibit Dates: 12/55–12/68.

Objectives: To train enlisted personnel to receive and process incoming and outgoing messages for transmission by signal communications.

Instruction: Lectures and practical exercises in communication center operations, including introduction to communications; messenger communication; elementary military cryptography; operation with specific converters; operation of specific equipment; message center operations; tape relay procedures; comcenter operations; message flow through a communications center and the duties of personnel; operation characteristics of semiautomatic equipment and the duties of tape relay personnel; and radio procedure headings.

Credit Recommendation: In the vocational certificate category, 2 semester hours in cryptography, and 2 as an elective in electronic communications (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in cryptography, and 2 as an elective in electronic communications (7/74).

AR-1715-0332

Telephone Installation and Repair

Course Number: 11-R-323.1; 11-E-5.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 8 weeks (280–320 hours).

Exhibit Dates: 11/53–12/68.

Objectives: To train enlisted personnel to install, replace, and maintain local and common battery telephones.

Instruction: Lectures and practical exercises in the installation, replacement, and maintenance of local and common battery telephones, including communications introduction, basic telephone principles, substation installation, field telephone installation, electrical test equipment, circuit analysis and basic electricity applicable to telephone equipment, and troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity, 2 in communications within electronics programs (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity, 2 in communications within electronics programs (7/74).

AR-1715-0333

Radio Fingerprinting

Course Number: 231-F3.

Location: Security Agency School, Ft. Devens, MA.

Length: 6 weeks (200 hours).

Exhibit Dates: 1/66–Present.

Objectives: To train enlisted personnel in the theories and techniques of radio fingerprinting.

Instruction: Lectures and practical exercises in the theories and techniques of radio fingerprinting, including theory and equipment operation, processing and analysis, records and reports, transmitter characteristics and classification, and film processing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics or radio theory (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics or radio theory (7/74); in the upper-division baccalaureate category, 3 semester hours in electronics or radio theory (7/74).

AR-1715-0334

Basic Avionics Maintenance Officer

Course Number: 4C-F7.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 4 weeks (152–155 hours).

Exhibit Dates: 2/67–Present.

Objectives: To train commissioned and warrant officers in the maintenance procedures for aircraft electronic communication, navigation, stabilization, and identification systems, and associated ground tactical equipment.

Instruction: Lectures and practical exercises in basic avionics maintenance, including introduction to avionics; avionics equipment in light observation and light transport aircraft; avionics equipment in command, transport, and surveillance aircraft; ground communication, navigation, and radar equipment; administrative and supply procedures; and bench repair and airfield facilities operation.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

AR-1715-0335

AVIATION ELECTRONIC EQUIPMENT REPAIR

Course Number: 102-284.2; 11-R-284.2.

Location: Southeastern Signal School, Ft. Gordon, GA

Length: 28 weeks (1040–1045 hours).

Exhibit Dates: 5/62–5/66.

Objectives: To train enlisted personnel in aviation electronic equipment repair.

Instruction: Lectures and practical exercises in the performance of field and depot maintenance on electronic communication, navigation, stabilization, identification, and associated ground equipment, including introduction to communications and avionics, electronic fundamentals, VHF and UHF aircraft communications and command communications equipment, automatic flight communication equipment, field maintenance of avionics equipment, and specific avionics equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity and electronics, 3 in electrical laboratory (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory or 2 as an elective for non-engineering students (7/74).

AR-1715-0336

AVIONIC COMMUNICATIONS EQUIPMENT REPAIR

Course Number: 102-35L20.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Signal School, Ft. Gordon, GA. *Version 3:* Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 14–22 weeks (507–806 hours). *Version 2:* 16–22 weeks (581–804 hours). *Version 3:* 19–22 weeks (702–815 hours).

Exhibit Dates: *Version 1:* 1/77–Present. *Version 2:* 1/75–12/76. *Version 3:* 5/67–12/74.

Objectives: To train technicians to operate and maintain airborne communication equipment.

Instruction: *All Versions:* Lectures and practical exercises in basic electrical and electronic circuit theory, block-diagram analysis of communication systems, and troubleshooting techniques. *Version 1:* Note (1): Students who have completed Modules 201, 202, 203, 4, 5 and 6 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (14 weeks) of this course. Please see AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phase I and II (22 weeks) of this course. *Version 2:* Note (2): Students who have completed Modules 1, 2, 3, and 4 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (16 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who do not attend COBET will complete both Phases I and II (22 weeks) of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in basic electronics and troubleshooting for students completing 22 weeks of the course (see note (1) above) (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in communication systems for completion of 14 or 22 weeks of the course (see note (1) above) (4/77). *Version 2:* In the vocational certificate category, 2 semester hours in electronics laboratory for those students completing 16 weeks; or 3 semester hours in basic electricity or electronics and 2 in electronics laboratory for those students completing 22 weeks (see note (2) above) (3/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity or electronics for those students completing 22 weeks; no credit for students completing 16 weeks (see note above) (3/75). *Version 3:* In the vocational certificate category, 4 semester hours in electrical and electronic circuit theory, 3 in electrical laboratory (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical and electronic circuit theory, 2 in electrical laboratory (7/74); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (7/74).

Related Occupation Codes: 09B; 35L; 35P.

AR-1715-0337

AVIONIC FLIGHT CONTROL EQUIPMENT REPAIR

Course Number: 102-35N20.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Signal School, Ft. Gordon, GA. *Version 3:* Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 12–15 weeks (431–540 hours). *Version 2:* 12–15 weeks (429–538 hours). *Version 3:* 14–18 weeks (512–663 hours).

Exhibit Dates: *Version 1:* 6/76–3/78. *Version 2:* 9/74–5/76. *Version 3:* 4/67–8/74.

Objectives: To train technicians to maintain and repair aircraft control systems.

Instruction: *All Versions:* Lectures and practical exercises in aircraft control systems maintenance and repair, including electrical and electronic circuit theory, control system principles, block diagram analysis, and troubleshooting techniques. *Version 1:* Note (1): Students who have attended Modules 201 and 202 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will attend only Phase II (12 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (15 weeks) of this course. *Version 2:* Note (2): Students who have completed Modules 1 and 2 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (12 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (15 weeks) of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in troubleshooting procedures for students completing 12 weeks of the course or 2 semester hours in basic electronics and troubleshooting and 2 semester hours in troubleshooting procedures for students completing 15 weeks of the course (see note (1) above) (4/77). *Version 2:* In the vocational certificate category, 3 semester hours in basic electricity or electronics laboratory for those students completing 15 weeks; or 2 semester hours in electronics laboratory for those students completing 12 weeks (see note (2) above) (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity or electronics laboratory for those students completing 15 weeks; no credit for those students completing 12 weeks (see note (2) above) (5/75). *Version 3:* In the vocational certificate category, 2 semester hours in electrical and electronic circuit theory and 3 in electronics laboratory (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical and electronic circuit theory and 2 in electronics laboratory (7/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (7/74).

Related Occupation Codes: 09B; 35N; 35P.

AR-1715-0338

AVIONICS MECHANIC

Course Number: 102-35K20.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 14–18 weeks (505–664 hours).

Exhibit Dates: 3/67–Present.

Objectives: To train enlisted personnel to maintain aircraft electronic communication, navigation, stabilization, identification, and associated ground tactical equipment.

Instruction: Lectures and practical exercises in the maintenance of aircraft electronic communication, navigation, stabilization, identification, and associated ground tactical equipment. Course includes block-diagram analysis and troubleshooting techniques for varied aircraft electronic equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electricity or electronics laboratory (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics laboratory (7/74).

Related Occupation Codes: 35K; 35P.

AR-1715-0339

LACROSSE ORDNANCE MAINTENANCE SUPERVISION

Course Number: 9-N-4815.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 29 weeks (1061 hours).

Exhibit Dates: 2/58–12/68.

Objectives: To train warrant officers and enlisted personnel to supervise the maintenance of the Lacrosse guided missile system and associated test equipment.

Instruction: Lectures and practical exercises in the maintenance of the Lacrosse guided missile system and associated test equipment, including ordnance service in the field, electromechanical system and ground handling equipment, Lacrosse guidance system operation, missile-borne guidance system circuit analysis and shop set, test equipment maintenance and repair, system analysis, and ordnance guided missile maintenance in the field.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical shop, 1 in shop supervision (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory, 1 in shop supervision (7/74); in the upper-division baccalaureate category, 2 semester hours in shop management (12/68).

AR-1715-0340

Avionic Navigation Equipment Repair

Course Number: 102-35M20.

Location: *Version 1:* Signal School, Ft. Gordon, GA. *Version 2:* Signal School, Ft. Gordon, GA. *Version 3:* Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 9–17 weeks (315–614 hours); 9–17 weeks (391–614 hours). *Version 2:* 11–17 weeks (617–626 hours); 11–17 weeks (617–626 hours).

Exhibit Dates: *Version 1:* 6/76–3/78. *Version 2:* 9/74–5/76. *Version 3:* 5/66–8/74.

Objectives: To train technicians to operate and repair electronic navigation equipment.

Instruction: *All Versions:* Lectures and practical exercises in electrical and electronic circuit principles; circuit and block diagram analysis of transmitting and receiving navigation systems; and troubleshooting and maintenance procedures. *Version 1:* Note (1): Students who have attended Modules 201, 202, 203, 4, 5/6 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (9 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (17 weeks) of this course. *Version 2:* Note (2): Students who have completed Modules 1, 2, 3, and 4 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (11 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who do not attend COBET will complete both Phases I and II (17 weeks) of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in basic electronics and troubleshooting for students completing 17 weeks of the course (see note (1) above) (4/77); in the lower-division baccalaureate/associate degree category, 2 semester hours in communications laboratory for students completing 9 or 17 weeks of the course (see note (1) above) (4/77). *Version 2:* In the vocational certificate category, 3 semester hours in basic electricity or electronics and 2 in electronics laboratory for those students completing 17 weeks; or 2 semester hours in electronics laboratory for those students completing 11 weeks (see note (2) above) (5/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity or electronics for those students completing 17 weeks; no credit for those students completing 11 weeks (see note (2) above) (5/75). *Version 3:* In the vocational certificate category, 5 semester hours in electrical circuit theory and 3 in electronics laboratory (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical circuit theory and 2 in electronics laboratory (7/74); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory (7/74).

Related Occupation Codes: 09B; 35M; 35P.

AR-1715-0341

Conventional/Precise Power Generation

Course Number: 662-52B20; 662-52B30.

Location: Engineer School, Ft. Belvoir, VA.

Length: 9 weeks (342 hours).

Exhibit Dates: 9/67–4/71.

Objectives: To train enlisted personnel in the installation, operation, and organizational maintenance of portable generating equipment, and in precise-power generation.

Instruction: Lectures and practical exercises in conventional- and precise-power generation, including fundamental maintenance, internal-combustion engine maintenance, diesel engine maintenance, electrical fundamentals, conventional generator sets, and precise-power generation.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electrical laboratory and machine theory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in machines laboratory, and additional credit in machines laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 2 semester hours in machines laboratory, and additional credit in machines laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 52B; 52C; 52D.

AR-1715-0342

Navy Broadcast Terminal Operator

Course Number: 102-F32.

Location: Signal School, Ft. Gordon, GA.

Length: 2 weeks (78 hours).

Exhibit Dates: 5/76–3/78.

Objectives: To train Navy personnel in the skills and techniques required to operate, inspect, test, and identify malfunctions to the operation level in specific satellite communications terminals.

Instruction: Instruction in satellite communications terminal operation and function, including RF systems, tracking equipment, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in satellite communications equipment maintenance (4/77).

AR-1715-0343

Overseas ASC UPS Bypass Repair

Course Number: 622-F17.

Location: Signal School, Ft. Gordon, GA.

Length: 6 weeks (205–210 hours).

Exhibit Dates: *Version 1:* 8/78–Present. *Version 2:* 9/76–7/78.

Objectives: To provide general support maintenance on the overseas automatic switching center (ASC) uninterrupted power system.

Instruction: *Version 1:* Instruction in aligning, preventative maintenance and troubleshooting the Bypass Power System including battery charger and inverter. Review of transistor fundamentals, logic, circuits and polyphase theory and oscilloscope operation. *Version 2:* Instruction in the maintenance and operation of a specific switchboard set, a telephone set, and signal converters.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in basic electronics (8/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting (8/79). *Version 2:* In the vocational certificate category, 3 semester hours in telephone system maintenance (4/77).

Related Occupation Codes: 32E.

AR-1715-0344

Satellite Communications Controller
(SATCOM Controller)

Course Number: 102-F26.

Location: Signal School, Ft. Gordon, GA.

Length: 4 weeks (150 hours).

Exhibit Dates: 6/76–Present.

Objectives: To provide students with a working knowledge of the operation of a satellite communications control system and the basic mathematical computations relating to system operation.

Instruction: Phase I instruction covers satellite system operations, control, subsystem operation and satellite control station management. Phase II covers instruction in basic mathematics, including exponential numbers and logarithms; aspects of satellite systems, including signal techniques, noise, spectrum analysis, transmission problems and related materials.

Credit Recommendation: In the vocational certificate category, 1 semester hour in satellite communications for Phase I and 2 semester hours in satellite communications system operation for Phase II (4/77).

Related Occupation Codes: 26Y; 32D.

AR-1715-0345

Satellite Communications Terminals AN/FSC-78 and AN/FSC-79 Repair
Satellite Communications Terminals AN/FSC-78(V) and AN/FSC-79 Operation and Maintenance Training)

Course Number: 102-F42; 102-F31.

Location: Signal School, Ft. Gordon, GA.

Length: 7–8 weeks (272–295 hours).

Exhibit Dates: 5/76–Present.

Objectives: To provide selected personnel with the knowledge, skills, and techniques required to operate, inspect, test, and perform maintenance calibrations and repairs on specified satellite communications terminals.

Instruction: Instruction in the operation and repair of satellite communications terminals, including RF circuitry, troubleshooting, block-diagram analysis, tracking equipment, and control systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in satellite communications system maintenance (4/77).

Related Occupation Codes: 26Y.

1. AVIATION ELECTRONIC EQUIPMENT MAINTENANCE
2. ELECTRONIC NAVIGATION EQUIPMENT REPAIR
3. ELECTRONIC NAVIGATION EQUIPMENT REPAIR

Course Number: 0 11-R-284.1.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: *Version 1:* 19 weeks (698–703 hours). *Version 2:* 32 weeks (1184 hours). *Version 3:* 23 weeks (850 hours).

Exhibit Dates: *Version 1:* 8/62–5/66. *Version 2:* 3/60–7/62. *Version 3:* 3/57–2/60.

Objectives: To train technicians to operate, maintain, and repair airborne electronic equipment.

Instruction: Lectures and practical exercises in airborne electronic equipment operation, maintenance, and repair, including electronic circuit theory, block-diagram analysis, introduction to communications, electron tubes, amplifiers and oscillators, power supplies and transmitters, UHF and VHF aircraft communications equipment, and troubleshooting techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in electricity or electronics, 4 in electrical laboratory (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics as a technical elective for non-technical students and 1 in electrical laboratory (7/74). *Version 2:* In the vocational certificate category, 7 semester hours in electricty, 4 in electrical laboratory (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics as a technical elective for non-technical students and 1 in electrical laboratory (7/74). *Version 3:* In the vocational certificate category, 6 semester hours in electricity or electronics, 4 in electrical laboratory (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics as a technical elective for non-technical students and 1 in electrical laboratory (7/74).

2. BALLISTIC MISSILE TEST INSTRUMENT REPAIR

Course Number: 9-R-371.2.

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 13 weeks (483 hours). *Version 2:* 14 weeks (528 hours).

Exhibit Dates: *Version 1:* 12/72–12/68. *Version 2:* 5/58–11/62.

Objectives: To train guidance and control repairmen in the operation, trouble diagnosis, and maintenance of Redstone missile guidance and control test instruments.

Instruction: *All Versions:* Lectures and practical exercises in the operation, trouble diagnosis, and maintenance of ballistic missile guidance and control test instruments, including introduction to components test fixtures; components test instruments; guidance computer test fixture; actuator; control computer and inverter test fixture, and relay box, program device, and specific test fixture. *Version 1:* Topics include digital controller and functional units; pulse generators; special amplifiers; performance tests; clippers, clampers, and limiters; and programming. *Version 2:* Topics include multivibrators; triodes and multielement tubes; vacuum tubes, rectifiers, and voltage multipliers; blocking and ringing oscillators; LC and RC oscillators; and RC coupled, audio power, RF, and DC amplifiers.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electronics laboratory (8/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (8/74). *Version 2:* In the vocational certificate category, 2 semester hours in electronics laboratory (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics (12/68).

AR-1715-0349

PERSHING MISSILE BATTERY

Course Number: *Version 1:* 121-15E20. *Version 2:* 121-15E20; 121-163.1. *Version 3:* 6-R-163;6 6-R-F23.

Location: *Version 1:* Field Artillery School, Ft. Sill, OK. *Version 2:* Artillery and Missile School, Ft. Sill, OK. *Version 3:* Artillery and Missile School, Ft. Sill, OK.

Length: *Version 1:* 7 weeks (263 hours). *Version 2:* 7 weeks (244 hours). *Version 3:* 9 weeks (326–327 hours).

Exhibit Dates: *Version 1:* 2/69–Present. *Version 2:* 3/65–1/69. *Version 3:* 10/62–2/65.

Objectives: To train enlisted personnel in the assembly, check-out, maintenance, and operation of the Pershing missile and associated ground support equipment.

Instruction: *All Versions:* Lectures and practical exercises on the Pershing missile battery, including power-producing equipment, erector-launcher, laying, and warhead section. *Version 1:* Topics include general subjects, firing-battery operations, and fundamentals of internal defense/development operations. *Version 2:* Topics include specific artillery transport, electrical safety and computers, programmer test station, azimuth laying, ground handling equipment, firing-platoon operations, and target acquisition. *Version 3:* Topics include specific artillery transport, communications systems and equipment, basic electricity, theory and functioning of missile, missile fire data computer, automatic guidance sequencing equipment, test and check-out, ground handling equipment, missile handling, battery area, firing-position procedures, azimuth laying, target acquisition, and tactics and combined arms.

Credit Recommendation: *Version 1:* In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (7/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (7/74). *Version 2:* In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (7/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (7/74). *Version 3:* In the vocational certificate category, 2 semester hours in electrical laboratory (7/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (7/74).

Related Occupation Codes: 12E.

AR-1715-0350

Dial Central Office Repair
(Dial Central Office Maintenance)

Course Number: 622-36H20; 11-R-328.1; 11-R-332.1; 11-E-6.

Location: Signal School, Ft. Monmouth, NJ; Signal School, Ft. Gordon, GA.

Length: 19–32 weeks (706–1,200 hours).

Exhibit Dates: 10/54–12/78.

Objectives: To provide the working knowledge required to perform maintenance and repair and to assist in the installation of dial central office telephone exchange equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (7/74); in the upper-division baccalaureate category, credit in electricity or electronics on the basis of institutional evaluation (7/74).

Related Occupation Codes: 36H.

AR-1715-0351

Manual Central Office Repair
(Manual Central Office Maintenance)

Course Number: 622-36G20; 622-327.1; 11-R-327.1; 11-R-331.1; 11-E-4.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 13–15 weeks (473–560 hours).

Exhibit Dates: 11/53–12/78.

Objectives: To train enlisted personnel to install and repair telephones and manual central office exchange equipment.

Instruction: Lectures and practical exercises in the installation and maintenance of telephones and manual central office exchange equipment, including tactical switchboards, mobile multiple-position central offices, outside-circuit testing and equipment maintenance, introduction to communications, principles of electricity, basic telephony, fixed central offices, outside-plant testing, and supply and telephone systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electricity, 4 in electronic communications (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 4 in electronic communications (7/74).

Related Occupation Codes: 36G.

AR-1715-0352

1. Improved Hawk Launcher and Mechanized Systems Repairer
2. Improved Hawk Launcher and Mechanical Systems Repair
3. Improved Hawk Mechanical Systems Repair
4. Improved Hawk Mechanical Systems Repair

Course Number: *Version 1:* 121-24L10. *Version 2:* 121-24L20. *Version 3:* 121-46D20. *Version 4:* 121-46D20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 30–31 weeks (1039 hours). *Version 2:* 33 weeks (1023 hours). *Version 3:* 24 weeks (820 hours). *Version 4:* 25 weeks (880 hours).

Exhibit Dates: *Version 1:* 3/78–Present. *Version 2:* 3/77–2/78. *Version 3:* 6/74–2/77. *Version 4:* 12/72–5/74.

Objectives: To train enlisted personnel to inspect, test, and repair the electrical, electro-mechanical, mechanical, hydraulic, and hydro-pneumatic portions of the Improved Hawk Missile System.

Instruction: *Version 1:* Conferences, demonstrations and practical exercises in electronics subjects including DC and AC circuits, resonant circuits, electronic amplifier circuits, advanced circuits and transistor fundamentals; soldering procedures; general missile mechanics; and extensive coverage of the Improved Hawk launcher electronics and electomechanical systems. *Version 2:* Conferences, demonstrations and practical exercises in electronic subjects including DC and AC circuits, resonant circuits, electronic amplifier circuits, advanced circuits and transistor fundamentals; soldering procedures; general missile mechanics; and extensive coverage of the Improved Hawk launcher electronics and electromechanical systems. *Version 3:* Lectures and practical exercises geared to a thorough working knowledge of DC and AC series and parallel resistive circuits, characteristics of inductors and capacitors, principles of transformers, the RL, RC and RLC circuits. Emphasis is on electrical, mechanical, and hydraulic system maintenance, inspection, testing, and repair of the Improved Hawk Missile System and associated test equipment. Version I includes transistor fundamentals. *Version 4:* Lectures and practical exercises geared to a thorough working knowledge of DC and AC series and parallel resistive circuits, characteristics of inductors and capacitors, principles of transformers, the RL, RC and RLC circuits. Emphasis is on electrical, mechanical, and hydraulic system maintenance, inspection, testing, and repair of the Improved Hawk Missile System and associated test equipment. Version includes transistor fundamentals.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 2 in transistor theory, 2 in vacuum tube circuit theory, 4 in hydraulic systems and maintenance and 4 in mechanical systems (8/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 2 in basic electronics, 6 in hydraulic systems and maintenance and 6 in mechanical systems (8/79). *Version 3:* In the vocational certificate category, 4 semester hours in basic electronics and troubleshooting (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics and troubleshooting (3/75). *Version 4:* In the vocational certificate category, 4 semester hours in electronics, 3 in mechanics, 2 in electricity, and 4 in physics for technicians (8/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 3 in mechanics, 3 in physics for technicians, and 3 as a technical elective for nonmajors (8/74).

Related Occupation Codes: 46D; 24L; 09B.

AR-1715-0353

1. Sergeant Firing Set Repair
2. Sergeant Firing Set Repair
   (Sergeant Firing Set Repairman)

Course Number: 121-21R20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 18 weeks (614 hours). *Version 2:* 22 weeks (770–777 hours).

Exhibit Dates: *Version 1:* 11/72–Present. *Version 2:* 1/67–10/72.

Objectives: To provide the student with a working knowledge necessary to inspect, test, perform support maintenance, and to isolate and repair malfunctions of the assembly level of a Sergeant missile system.

Instruction: Emphasis is on a general knowledge of the function, operation, and maintenance of a Sergeant missile system. Additional topics include: DC and AC series and parallel resistive circuits; series RL, RC, RLC, and series and parallel resonance; use of the multimeter, impedance calculator, vector diagram, VTVM, and oscilloscope; the characteristics of vacuum tubes, power supplies, class A and AB amplifiers, coupling circuits, voltage regulators, magnetic amplifiers, oscillators, and syncros; and semiconductor devices, power supplies, amplifiers, pulse networks, and servo systems unique to a missile system.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electricity or electronics (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (8/74). *Version 2:* In the vocational certificate category, 4 semester hours in electricity or electronics (8/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (12/68).

Related Occupation Codes: 21R.

AR-1715-0354

Calibration Technician and Specialist

Course Number: 4B-252A; 198-35H20.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 40–41 weeks (1309–1519 hours). *Version 2:* 19 weeks (750 hours).

Exhibit Dates: *Version 1:* 12/69–1/78. *Version 2:* 4/66–11/69.

Objectives: To train enlisted personnel and warrant officers to calibrate standards and all test and measuring equipment, and to perform maintenance and repair on secondary reference and secondary transfer calibration standards.

Instruction: *All Versions:* Lectures and laboratories in fundamentals of algebra, trigonometry, DC and AC circuits; use of oscilloscopes and other test instruments; introduction to microwave and associated test equipment; physical standards; calibration operations; and maintenance of tools and equipment; and use of slide rules. *Version 1:* Includes vacuum tube and transistor theory, rectifiers, regulators, amplifiers, transmitters and receivers, wave-shaping pulse and gating circuits, power and attenuation measurements, secondary standards and meter calibrations, electronic instrument calibration and maintenance, bridge calibration, frequency measurement techniques, and reflectometry equipment and techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 30 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 2:* In the vocational certificate category, 12 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 21G; 21T; 22G; 22K; 23N; 23Q; 23S; 23T; 23U; 24B; 24F; 24Q; 24U; 25B; 25D; 25G; 25H; 25J; 26B; 26D; 26H; 26L; 26M; 26N; 26P; 26T; 27B; 27D; 31B; 31E; 31J; 31L; 32B; 32C; 32D; 32E; 32F; 32G; 35B; 35D; 35E; 35F; 35H; 35L; 35M; 35N.

AR-1715-0355

Nike Radar and Computer Repairer

(Nike Radar and Computer Repair Repair)

Course Number: *All Versions:* 104-23N20. *Version 5:* 104-F2; 9-S-F47.

Location: *Version 1:* Missile and Munitions School, Redstone Arsenal, AL. *Version 2:* Missile and Munitions School, Redstone Arsenal, AL. *Version 3:* Missile and Munitions School, Redstone Arsenal, AL. *Version 4:* Missile and Munitions School, Redstone Arsenal, AL. *Version 5:* Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: *Version 1:* 43 weeks (1477 hours). *Version 2:* 39 weeks (1286–1363 hours). *Version 3:* 35–39 weeks (1187–1329 hours). *Version 4:* 40 weeks (1374 hours). *Version 5:* 44 weeks (1586–1649 hours).

Exhibit Dates: *Version 1:* 10/79–Present. *Version 2:* 5/78–9/79. *Version 3:* 5/74–4/78. *Version 4:* 10/72–4/74. *Version 5:* 8/64–9/72.

Objectives: To train enlisted personnel to inspect, test, and perform support maintenance on Nike Hercules Lopar, missile-tracking radar, target-ranging radar, computers, SAMCAP, and associated test equipment.

Instruction: *Version 2:* Lectures and laboratories in DC and AC circuits, transient and pulse forming circuits, vacuum tube electronics, amplifiers, oscillators. mixer and detector circuits, and use of tools and Nike system theory, troubleshooting and maintenance procedures. Includes vacuum tube amplifiers, oscillators, voltage regulators, multivibrators, gating circuits, limiters, clamps, phase splitters, and video amplifiers. Microwave theory presented in this course covers frequency and characteristics, antennas, transmission lines, waveguides, modulation klystrons, magnetions, travelling wave tubes and receiver transmitter analysis. Nike specialist training consists of maintenance, repair and troubleshooting of the Nike radar and computer systems. *Version 3:* Lectures and laboratories in DC and AC circuits, transient and pulse-forming circuits, diode and vacuum tube electronics, amplifiers, oscillators, mixer and detector circuits, and use of tools and maintenance procedures. Phase I topics include basic electricity, concepts of work, energy, and power; DC and AC circuit theory—series, parallel, series-parallel, inductive, capacitive and LCR circuits; series and parallel resonant circuits; transformers and power supplies; triodes, biasing circuits, single- and multi-stage amplifiers, and voltage regulator circuits. Phase II topics include a simplified explanation of RC and LC transients and sine-wave oscillators; soldering techniques and practices; empirical description of the operation of vacuum tube pulse circuits; basic microwave procedures related to radar systems; and Nike radar and acquisition computer troubleshooting and repair. Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC, will complete only Phase II (35 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (39 weeks) of this course. *Version 4:* Lectures and laboratories in DC and AC circuits, transient and pulse-forming circuits, diode and vacuum tube electronics, amplifiers, oscillators, mixer and detector circuits, and use of tools and maintanance procedures. Emphasis on microwave circuits, transmission lines, and antennas; more detail on specific radar configurations; and Nike acquisition computer troubleshooting and repair. *Version 5:* Lectures and laboratories in DC and AC circuits, transient and pulse-forming circuits, diode and vacuum tube electronics, amplifiers, oscillators, mixer and detector circuits, and use of tools and maintenance procedures. Emphasis on heterodyne principles, servo systems, and Nike computer troubleshooting and repair.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 24 semester hours in basic electricity, electronics, and troubleshooting for those students completing 39 weeks; 21 semester hours in basic electronics and troubleshooting for those students completing 35 weeks (see note above) (3/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity or electronics for those students completing 39 weeks; no credit for those students completing 35 weeks (see note above) (3/75). *Version 3:* In the vocational certificate category, 1 semester hour in microwave radar, 5 in electronic equipment repair techniques (8/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in vacuum tube circuits, 1 in microwave theory and 3 in circuits/electronics laboratory (8/79). *Version 4:* In the vocational certificate category, 10 semester hours in circuits or electronics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in circuits or electronics (4/74); in the upper-division baccalaureate category, 4 semester hours in circuits or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 5:* In the vocational certificate category, 10 semester hours in circuits or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 23N; 252A; 09B.

AR-1715-0356

Nike Maintenance Supervision (Improved Hercules Transition)

(Nike Maintenance Supervision (Hercules Transition))

Course Number: 9-M-251B(TI); 9-N-251B(TI); 9-N-4811(TI); 9-N-4811(T).

Location: Ordnance Guided Missile School, Redstone Arsenal, AL.

Length: 14–16 weeks (516–601 hours).

Exhibit Dates: 1/59–12/68.

Objectives: To train qualified Nike Ajax repairmen to supervise the maintenance of Nike Hercules guided missile systems and associated equipment.

Instruction: Lectures and practical exercises in block-diagram description of acquisition and tracking radar systems; introduction to operation of control circuits, receivers, PPI monitors, MTI circuits, and system analysis; evaluation of target presentation system; and location and identification of malfunctions, use of test equipment, and system maintenance on improved Nike Hercules missile systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical techniques (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical techniques, and additional credit in electrical techniques on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

AR-1715-0357

Improved Hawk Continuous Wave (CW) Radar Repair Transition

Course Number: 104-24K40-T; 104-24K20-T.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 16–17 weeks (510–584 hours). *Version 2:* 18 weeks (633 hours).

Exhibit Dates: *Version 1:* 4/74–Present. *Version 2:* 2/72–3/74.

Objectives: To train Hawk continuous-wave radar repairmen to inspect, test, repair, and maintain the electronic systems of Improved Hawk launchers, continuous-acquisition radar, and continuous-wave, high-power illuminator radars.

Instruction: *Version 1:* Lectures and laboratory exercises including elementary semiconductor devices and circuits; soldering techniques and practices; introduction to computer subsystems, registers, counters, logic operations, memories, I/O, control, and arithmetic units; and troubleshooting and maintenance of electronic systems of Hawk launchers, continuous acquisition radar, continuous wave high power illuminator radar, and associated test equipment. *Version 2:* Lectures and laboratories in semiconductors, printed circuits, transistor electronics, pulse and gating circuits, power supplies, logic circuits and functions, computer control, and arithmetic circuits; binary and octal number systems; isolation and repair of major components of launcher and radar systems, including antennas, controls, servos, and power systems; inspection and testing of transmitter circuits, modulator oscillator assemblies, receivers, and counters; and functional block analysis of signal processors, sequencers, address counters, and logic control units.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in basic electronics (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (8/77). *Version 2:* In the vocational certificate category, 8 semester hours in electronic circuits (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic circuits (4/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 23T; 24K.

AR-1715-0358

Improved Hawk Pulse Radar Repair Transition

Course Number: 104-24J20-T; 104-24J40-T.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 8-9 weeks (242-316 hours).

Exhibit Dates: 1/72-Present.

Objectives: To train pulse radar repairmen to maintain and repair the electronic systems in the Improved Hawk pulse acquisition radar and associated equipment and test sets.

Instruction: Lectures and practical exercises in the maintenance and repair of the Improved Hawk pulse acquisition radar and associated equipment and test sets, including introduction to semiconductor diodes, transistors, amplifiers, power supplies, oscillators, nonsinusoidal oscillators, gating circuits, digital multimeter, dual-trace scope, electronic counter, function generator, microwave calibrator, high-frequency console operation, and various receiving systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electronics (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (8/77).

Related Occupation Codes: 23S; 24J.

AR-1715-0359

Radar Display Equipment Repair

Course Number: 4C-F4; 150-363.1; 11-N-363.1.

Location: Air Defense School, Ft. Bliss, TX.

Length: 30 weeks (1040 hours).

Exhibit Dates: 4/64-12/68.

Objectives: To train warrant officers and enlisted personnel who have had previous training in fire distribution system electronics fundamentals, radio electronics, or electronic engineering to maintain missile master equipment within the AN/FSG-1 air defense system.

Instruction: Lectures and practical exercises in the maintenance of missile master (radar display) equipment within the AN/FSG-1 air defense system, including block diagrams of system elements and signal flow, position indicators, sweep generators, deflection and intensity circuits, gate circuits, and amplifiers; display, multiplex, and blanking circuit analysis; tag presentation and auxiliary target tracking; and height determination and tactical display equipment.

Credit Recommendation: In the vocational certificate category, credit in electrical laboratory on the basis of evaluation examination (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

Related Occupation Codes: 223B; 251B.

AR-1715-0360

Field Radio Repair

Course Number: *Version 1:* 101-31E20. *Version 2:* 101-31E20; 11-R-296.1. *Version 3:* 11-E-12.

Location: Signal School, Ft. Gordon, GA; Southeastern Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 19-25 weeks (695-918 hours). *Version 2:* 15-23 weeks (547-850 hours). *Version 3:* 25 weeks (926-1000 hours).

Exhibit Dates: *Version 1:* 8/76-Present. *Version 2:* 12/59-7/76. *Version 3:* 3/54-11/59.

Objectives: To train enlisted personnel to maintain field radio and associated equipment.

Instruction: *All Versions:* Lectures and practical exercises in the maintenance of field radio and associated equipment, including introductory communications, radio repair, field radio teletypewriter equipment, radio relay equipment, and general principles and components of AM and FM radio equipment. *Version 1:* Note: Students who have attended Modules 1, 2, 3 and 4 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will attend only Phase II (19 weeks) of this course. See AR-1715-0389 for credit for COBET. Students who have not attended COBET will complete both Phases I and II (25 weeks) of this course.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in basic electronics and troubleshooting for students who complete 25 weeks of the course (see note above) (4/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in communication systems repair for students completing 19 or 25 weeks of the course (see note above) (4/77). *Version 2:* In the vocational certificate category, 3 semester hours in electricity or electronics and 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electricity or electronics (6/74). *Version 3:* In the vocational certificate category, 3 semester hours in electricity or electronics and 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68).

Related Occupation Codes: 09B; 31B; 31E.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 38 weeks (1344-1347 hours). *Version 2:* 37-40 weeks (1352-1427 hours). *Version 3:* 40 weeks (1508 hours). *Version 4:* 40 weeks (1426-1431 hours). *Version 5:* 48 weeks (1727 hours). *Version 6:* 41-44 weeks (1571-1645 hours). *Version 7:* 46 weeks (1781 hours).

Exhibit Dates: *Version 1:* 1/77-Present. *Version 2:* 4/70-12/76. *Version 3:* 5/68-3/70. *Version 4:* 1/66-4/68. *Version 5:* 9/64-12/65. *Version 6:* 5/59-8/64. *Version 7:* 11/57-4/59.

Objectives: To train enlisted personnel to maintain, troubleshoot, and align Improved Nike Hercules fire control systems equipment.

Instruction: *All Versions:* Lectures and practical experience in Nike Hercules fire control systems equipment operation, including schematic reading, circuit symbols identification, signal path tracing, components location, performing checks and adjustments, troubleshooting for faults, target ranging and tracking radars repair, missile tracking radar plotters repair, and missile prelaunch control and computer guidance circuits repair. *Version 1:* Course covers limited theoretical study of circuits with troubleshooting techniques being emphasized. *Version 2:* Instruction includes limited theoretical coverage of circuits—emphasis is on troubleshooting techniques. *Version 3:* Instruction includes basic circuits and electronics, including Ohm's Law for series, parallel, AC and DC circuits; vacuum tube principles; rectifier circuits; amplifiers frequency response and impedance matching; oscillators; modulation systems introduction; and detectors, mixers, superheterodyne receivers, multivibrators, synchros, and servo systems operation. *Version 4:* Instruction includes basic circuits and electronics, including Ohm's Law for series, parallel, AC and DC circuits; vacuum tube principles; rectifier circuits; amplifiers frequency response and impedance matching; oscillators; modulation systems introduction; and detectors, mixers, superheterodyne receivers, multivibrators, synchros, and servo systems operation. *Version 5:* Instruction includes basic circuits and electronics, including Ohm's Law for series, parallel, AC and DC circuits; vacuum tube principles; rectifier circuits; amplifiers frequency response and impedance matching; oscillators; modulation systems introduction; and detectors, mixers, superheterodyne receivers, multivibrators, synchros, and servo systems operation. *Version 6:* Instruction includes basic circuits and electronics, including Ohm's Law for series, parallel, AC and DC circuits; vacuum tube principles; rectifier circuits; amplifiers frequency response and impedance matching; oscillators; modulation systems introduction; and detectors, mixers, superheterodyne receivers, multivibrators, synchros, and servo systems operation. *Version 7:* Instruction includes basic circuits and electronics, including Ohm's Law for series, parallel, AC and DC circuits; vacuum tube principles; rectifier circuits; amplifiers frequency response and impedance matching; oscillators; modulation systems introduction: and detectors, mixers, superheterodyne receivers, multivibrators, synchros, and servo systems operation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronic circuits and systems (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (8/77). *Version 2:* In the vocational certificate category, 6 semester hours in electronic circuits and systems (2/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory and 3 in control systems (2/75). *Version 3:* In the vocational certificate category, 10 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, credit in electricity, electronics, or electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics for non-electrical engineering majors on the basis of institutional evaluation (4/74). *Version 4:* In the vocational certificate category, 10 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics for non-electrical engineering majors on the basis of institutional evaluation (4/74). *Version 5:* In the vocational certificate category, 10 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics for non-electrical engineering majors on the basis of institutional evaluation (4/74). *Version 6:* In the vocational certificate category, 10 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics for non-electrical engineering majors on the basis of institutional evaluation (4/74). *Version 7:* In the vocational certificate category, 10 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics for non-electrical engineering majors on the basis of institutional evaluation (4/74).

Related Occupation Codes: 24Q; 09B.

AR-1715-0362

1. Field Artillery Radar Maintenance
2. Weapons Support Radar Maintenance and Repair

Course Number: *Version 1:* 104-26B20/30-COBET. *Version 2:* 104-26B20; 104-26B30.

Location: Field Artillery School, Ft. Sill, OK.

Length: *Version 1:* Phase I 8 weeks, Phase II(B20/B2T)12–13 weeks, Phase III(B30/B3T)5–9 weeks (Ft. Sill, OK hours). *Version 2:* 22 weeks (770 hours).

Exhibit Dates: *Version 1:* 1/77–5/79. *Version 2:* 12/73–12/76.

Objectives: To provide enlisted personnel with a working knowledge of electricity and electronics fundamentals and the knowledge to operate, adjust, inspect, and maintain weapons support radar equipment.

Instruction: *All Versions:* Lectures and practical exercises in fundamentals of AC/DC circuits; electron theory; tube and transistor amplifiers and oscillators; antenna alignment; communication circuits; and oscillators, multivibrators, and associated test equipment including scopes and meters. *Version 1:* Phase II and III emphasize diagnostic testing and repair of field artillery radar units.

Credit Recommendation: *Version 1:* In the vocational certificate category, For those students completing Phase II (B20), 3 semester hours in electronics and laboratory; for those completing the add-on B2T, 4 semester hours in electronics and laboratory (1/80); in the lower-division baccalaureate/associate degree category, for those students completing phase II (B20) 2 semester hours in electronics and laboratory; for those completing B2T, 3 semester hours in electronics and laboratory and for those students completing Phase III, 3 semester hours in electronics and laboratory (2/80). NOTE: Refer to exhibit AR-1715-0389 for our credit recommendation for Phase I. *Version 2:* In the vocational certificate category, 10 semester hours in electronics and electronics laboratory (6/75); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics and electronics laboratory (6/75); in the upper-division baccalaureate category, 3 semester hours in electronics and electronics laboratory on the basis of institutional evaluation (6/75).

AR-1715-0363

Automatic Data Processing (ADP) Repair, Phase VIII—Automatic Central Office Repair

Course Number: 150-34D20 (Phase VIII).

Location: Signal School, Ft. Gordon, GA.

Length: 19 weeks (698 hours).

Exhibit Dates: 10/74–8/76.

Objectives: To train personnel to maintain the automatic telephone central office.

Instruction: Instruction in the operation and maintenance of automatic telephone central office equipment, including operational program loading, memory units, central processor, input and output assemblies, power supplies, and peripheral equipment maintenance.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic maintenance and 1 in telecommunications laboratory (5/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in computer operation laboratory (5/75).

Related Occupation Codes: 34D.

AR-1715-0364

AN/TTC-38(V) Automatic Central Office Supervisor

Course Number: 580-F3.

Location: Signal School, Ft. Gordon, GA.

Length: 5 weeks (163 hours).

Exhibit Dates: 1/75–Present.

Objectives: To train personnel to plan, supervise, coordinate, and assist in the installation, operation, and maintenance of a central office communication system.

Instruction: Topics include equipment power requirements, preparation of operational plans, inspection of installations and operational procedures, and general system practices.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (5/75).

Related Occupation Codes: 31Z.

AR-1715-0365

Automatic Central Office AN/TTC-25 Repair

Course Number: 150-F5.

Location: Signal School, Ft. Gordon, GA.

Length: 7 weeks (255 hours).

Exhibit Dates: 2/75–8/76.

Objectives: To provide personnel with the knowledge to install and maintain a specific automatic central office.

Instruction: Lectures on the basic operation of the specified equipment set.

Credit Recommendation: In the vocational certificate category, 1 semester hour in telecommunications laboratory (5/75).

Related Occupation Codes: 34D.

AR-1715-0366

Nuclear Weapons Technician (Phase I for Warrant Officers)

Course Number: 4E-260A.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 22–29 weeks (766–1005 hours).

Exhibit Dates: 7/74–Present.

Objectives: To provide the technical skills necessary for a supervisory position in nuclear weapons system maintenance.

Instruction: Lectures and practical exercises in nuclear weapons subjects and safety practices; basic electricity; inductive, capacitive, and LCR circuits; transformers and power supplies; triodes, biasing circuits, single- and multi-stage amplifiers, and voltage regulator circuits; simplified coverage of RC and LC transients and sine-wave oscillators; elementary theory of semiconductor devices and circuits; three-phase AC; schmitt triggers and control circuits; and troubleshooting and maintenance of general and specialized test equipment and electronic systems associated with nuclear weapons.

Credit Recommendation: In the vocational certificate category, 9 semester hours in basic electronics and troubleshooting (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics and troubleshooting (8/77).

AR-1715-0367

Nuclear Weapons Technician (Phase II for Enlisted Personnel Qualified in MOS 55G/261A)

Course Number: 4E-260A.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 16–19 weeks (555–672 hours).

Exhibit Dates: 7/74–Present.

Objectives: To provide the technical skills necessary for a supervisory position in nuclear weapons system maintenance.

Instruction: Lectures and practical exercises in nuclear weapons systems, inductive, capacitive, and LCR circuits; transformers and power supplies; triodes, biasing circuits, single- and multi-stage amplifiers, and voltage regulator circuits; simplified coverage of RC and LC transients and sine-wave oscillators; elementary theory of semiconductor devices and circuits; three-phase AC; schmitt triggers and control circuits; and troubleshooting and maintenance of general and specialized test equipment and electronic systems associated with nuclear weapons.

Credit Recommendation: In the vocational certificate category, 9 semester hours in basic electronics and troubleshooting (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics and troubleshooting (8/77).

Related Occupation Codes: 260A.

AR-1715-0368

Nuclear Weapons Technician (Phase III for Enlisted Personnel Qualified in MOS 35F/262A)

Course Number: 4E-260A.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 10–11 weeks (350–358 hours).

Exhibit Dates: 7/74–Present.

Objectives: To provide the technical skills necessary for a supervisory position in nuclear weapons system maintenance.

Instruction: Instruction covers specialized mechanical projectile subjects.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/77).

AR-1715-0369

Nike Missile-Launcher Repair Transition

Course Number: 121-22N20-T; 121-22N40-T.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 13 weeks (357–423 hours).

Exhibit Dates: 10/74–Present.

Objectives: To train qualified personnel to inspect, test, and repair the Nike-Hercules missile and associated test equipment.

Instruction: Instruction includes simplified coverage of RC and LC transients and sine-wave oscillators; empirical description of vacuum-tube pulse circuits; troubleshooting and maintenance of Nike-Hercules missile electronic and hydraulic circuits and associated test equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in basic electronics and troubleshooting (3/75).

Related Occupation Codes: 22G; 22N; 23W.

AR-1715-0370

NIKE RADAR AND COMPUTER REPAIR

Course Number: 104-F13.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 4 weeks (115 hours).

Exhibit Dates: 10/73–Present.

Objectives: To provide training in the function, operation, and maintenance of specific computer and radar equipment.

Instruction: Lectures and laboratories in systems maintenance for a specialized modification of the Nike-Hercules system.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/75).

Related Occupation Codes: 23N.

AR-1715-0371

PERSHING ELECTRONIC REPAIR TRANSITION

Course Number: 121-21L20-T; 121-21L40-T.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 10 weeks (343 hours).

Exhibit Dates: 12/73–Present.

Objectives: To train personnel to troubleshoot and maintain guidance and control assemblies of Pershing missile and ground support equipment.

Instruction: Lectures and laboratory exercises in maintenance and repair of computer support equipment including I/O interfaces, guidance computer, and main control computer for Pershing ground control equipment.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronic computer maintenance (3/75).

Related Occupation Codes: 21L; 21M.

AR-1715-0372

IMPROVED HAWK INFORMATION COORDINATION CENTRAL MAINTENANCE (TRANSITION)

Course Number: 104-24G40-T.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 19 weeks (665–698 hours). *Version 2:* 16 weeks (558–567 hours).

Exhibit Dates: *Version 1:* 11/75–Present. *Version 2:* 10/73–10/75.

Objectives: To provide enlisted personnel with a knowledge of organizational maintenance on the continuous-wave acquisition radar and missile launch control information processor system.

Instruction: Instruction includes transistor circuit fundamentals; digital system hardware and software fundamentals including general purpose computer usage; operation and troubleshooting of continuous-wave radar and missile launch control information processor system.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in transistor electronics, 3 in introduction to digital systems, 3 in electronics laboratory (8/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics on the basis of institutional evaluation 1 in digital electronics laboratory (8/77). *Version 2:* In the vocational certificate category, 3 semester hours in electronic systems maintenance, 3 in electronics laboratory, and 3 in introduction to digital systems (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory and 3 in introduction to digital systems (2/75); in the upper-division baccalaureate category, 3 semester hours in electronics laboratory and 3 in introduction to digital systems, all on the basis of institutional evaluation (2/75).

Related Occupation Codes: 24B; 24G.

AR-1715-0373

IMPROVED HAWK FIRE CONTROL MAINTENANCE SUPERVISOR

Course Number: 121-24E40.

Location: Air Defense School, Ft. Bliss, TX.

Length: 7 weeks (207–210 hours).

Exhibit Dates: 8/74–Present.

Objectives: To provide enlisted personnel with in-depth training in the performance of organizational maintenance on a pulse acquisition radar and a range-only radar.

Instruction: Instruction includes radar block diagram theory, basic theory of power distribution, transmitters, receivers, display systems, and synchro control systems.

Credit Recommendation: In the vocational certificate category, 5 semester hours in radar or communications (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in communications technology (2/75); in the upper-division baccalaureate category, 2 semester hours in communications or as an elective in electronic systems and additional credit on the basis of institutional evaluation (2/75).

Related Occupation Codes: 24E; 24V.

AR-1715-0374

FORWARD AREA ALERTING RADAR SYSTEM MAINTENANCE

(Forward Area Alerting Radar System)

Course Number: 121-24M30; 121-24N30.

Location: Air Defense School, Ft. Bliss, TX.

Length: 6 weeks (228 hours).

Exhibit Dates: 1/73–6/78.

Objectives: To provide enlisted personnel with a working knowledge of basic maintenance procedures on a radar system.

Instruction: Instruction includes radar emplacement and basic radar maintenance.

Credit Recommendation: In the vocational certificate category, credit in electronics laboratory on the basis of institutional evaluation (2/75).

Related Occupation Codes: 24M; 24N.

AR-1715-0375

IMPROVED HAWK FIRE CONTROL MAINTENANCE (TRANSITION)

Course Number: 121-24E30-T; 121-24E40-T.

Location: Air Defense School, Ft. Bliss, TX.

Length: 6 weeks (160–197 hours).

Exhibit Dates: 9/73–Present.

Objectives: To provide enlisted personnel with a working knowledge of organizational maintenance of an acquisitional radar system.

Instruction: Instruction includes use of basic test equipment, functional circuit analysis, and radar system fundamentals.

Credit Recommendation: In the vocational certificate category, 4 semester hours in communications systems (2/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in communications systems (2/75); in the upper-division baccalaureate category, 2 semester hours as an elective in communications systems and additional credit on the basis of institutional evaluation (2/75).

Related Occupation Codes: 24E; 24F.

AR-1715-0376

IMPROVED HAWK FIRING SECTION MAINTENANCE (TRANSITION)

Course Number: 121-24C40-T.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 13 weeks (476 hours). *Version 2:* 8 weeks (303 hours).

Exhibit Dates: *Version 1:* 3/77–Present. *Version 2:* 11/73–2/77.

Objectives: To provide enlisted personnel with a knowledge of organizational maintenance on a high-powered radar system and a missile launcher.

Instruction: Instruction includes performance checks, fault isolation, and corrective maintenance on the high-powered radar system and its subsystems. Version 1 provides a knowledge of electronic terminology and gives a working knowledge of missile launcher and loader maintenance and adjustment procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in basic electronics, 3 in electric circuit troubleshooting (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electric circuits laboratory on the basis of institutional evaluation 3 in industrial education basic electronics (8/77). *Version 2:* In the vocational certificate category, 6 semester hours in radar or communications (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronics laboratory (2/75); in the upper-division baccalaureate category, credit in radar or communications on the basis of institutional evaluation (2/75).

Related Occupation Codes: 24D; 24C.

AR-1715-0377

SAFEGUARD MISSILE MAINTENANCE TECHNICIAN/SPECIALIST

Course Number: 4F-221C; 121-28M20.

Location: Air Defense School, Ft. Bliss, TX.

Length: 26 weeks (804–857 hours).

Exhibit Dates: 1/74–Present.

Objectives: To train warrant officers and enlisted personnel in the assembly, installation, and maintenance of the Safeguard missile system.

Instruction: Instruction includes a review of electrical energy sources, Ohm's Law, multimeters, and digital logic terms.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electronics laboratory (2/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronics laboratory (2/75).

Related Occupation Codes: 28M; 221C; 221B.

AR-1715-0378

Improved Hawk Organization Maintenance Supervisor Transition

Course Number: 4F-223D-T.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 20 weeks (711–730 hours). *Version 2:* 18 weeks (659–668 hours).

Exhibit Dates: *Version 1:* 7/75–Present. *Version 2:* 9/73–6/75.

Objectives: To provide warrant officers with a working knowledge of the Improved Hawk guided missile system and associated equipment and to prepare them to function as supervisors.

Instruction: Lectures and practical exercises in transistor circuit fundamentals; digital system hardware and software fundamentals, including general purpose computer usage; operation and troubleshooting of pulsed- and continuous-wave radars, missile fire control information processing system, and other support equipment for a battery of surface-to-air missile launchers; and management and supervisory techniques relevant to missile control systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in computer fundamentals, 6 in electronics laboratory (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory applications, and, on the basis of institutional evaluation 3 semester hours in computer fundamentals (8/77). *Version 2:* In the vocational certificate category, 6 semester hours in electronic systems maintenance, 3 in electronics laboratory, and 3 in introduction to digital systems (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory and 3 in introduction to digital systems (2/75); in the upper-division baccalaureate category, 3 semester hours in electronics laboratory and 3 in introduction to digital systems, all on the basis of institutional evaluation (2/75).

Related Occupation Codes: 223D; 223C; 251D.

AR-1715-0379

Safeguard Ballistic Missile Defense Unit Commander

Course Number: 2F-1111.

Location: Air Defense School, Ft. Bliss, TX.

Length: 13 weeks (399 hours).

Exhibit Dates: 11/74–Present.

Objectives: To provide commissioned officers with a knowledge of the capabilities, functions, operations, and characteristics of a digitally controlled missile system.

Instruction: Instruction in digital data processing systems, peripheral interface elements, radar input devices, and electro-mechanical output devices.

Credit Recommendation: In the vocational certificate category, 4 semester hours in computer technology (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital systems or computer technology (2/75); in the upper-division baccalaureate category, 2 semester hours as an elective in computer science (2/75).

AR-1715-0380

Safeguard Staff Officer

Course Number: 2G-1115.

Location: Air Defense School, Ft. Bliss, TX.

Length: 22–24 weeks (662–725 hours).

Exhibit Dates: 8/73–Present.

Objectives: To provide commissioned officers with a general knowledge of the operation, maintenance, and performance capabilities of a digitally controlled missile system.

Instruction: Instruction in data processing systems, peripheral interface elements, and radar operation.

Credit Recommendation: In the vocational certificate category, 6 semester hours in computer technology (2/75); in the lower-division baccalaureate/associate degree category, 4 semester hours in computer technology (2/75); in the upper-division baccalaureate category, 3 semester hours as an elective in computer science (2/75).

AR-1715-0381

Ground Air Traffic Control/NAVAIDS Equipment Repair

Course Number: 102-F27.

Location: Signal School, Ft. Gordon, GA.

Length: 8 weeks (286 hours).

Exhibit Dates: 12/75–Present.

Objectives: To train students to perform direct and general support maintenance on ground air traffic control and navigation aids equipment.

Instruction: Instruction on the equipment and facilities used in a ground-based air traffic control network, including transmitters, meteorological equipment, tape recorders, communications systems, exciters, and power amplifiers.

Credit Recommendation: In the vocational certificate category, 6 semester hours in air traffic control systems maintenance and operation (4/77).

Related Occupation Codes: 26D; 35L.

AR-1715-0382

Improved Hawk Officer

Course Number: 2F-1180C.

Location: Air Defense School, Ft. Bliss, TX.

Length: 6–8 weeks (221–281 hours).

Exhibit Dates: 6/73–Present.

Objectives: To provide commissioned officers with a knowledge of the characteristics, capabilities, functions, and maintenance of a radar-controlled missile system.

Instruction: Instruction includes electronic warfare, missile system operation, and system components.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/75).

AR-1715-0383

Improved Hawk Information Coordination Central Maintenance Supervisor

Course Number: 104-24G40.

Location: Air Defense School, Ft. Bliss, TX.

Length: 7 weeks (204–214 hours).

Exhibit Dates: *Version 1:* 7/75–Present. *Version 2:* 8/74–6/75.

Objectives: To provide enlisted personnel with in-depth training in the performance of organizational maintenance.

Instruction: Instruction includes operational maintenance of microwave transmitters and receivers, servo positioning systems, and application of electronic circuit analysis to functional schematics.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in communications technology (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (8/77). *Version 2:* In the vocational certificate category, 5 semester hours in communications technology (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in communications technology (2/75); in the upper-division baccalaureate category, credit in communications technology on the basis of institutional evaluation (2/75).

Related Occupation Codes: 24G; 24V.

AR-1715-0384

Improved Hawk Firing Section Maintenance Supervisor

Course Number: 121-24C40.

Location: Air Defense School, Ft. Bliss, TX.

Length: 7 weeks (210–221 hours).

Exhibit Dates: 8/74–Present.

Objectives: To provide enlisted personnel with in-depth training in the performance of organizational maintenance on a high power illuminator radar system.

Instruction: Instruction includes power system circuit theory, transmitter modulation theory, radio frequency receiver theory, and control circuit analysis.

Credit Recommendation: In the vocational certificate category, 5 semester hours as an elective in communications technology (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in communications technology (2/75); in the upper-division baccalaureate category, 2 semester hours as an elective in electronic systems, and additional credit in electronic systems on the basis of institutional evaluation (2/75).

Related Occupation Codes: 24C; 24V.

AR-1715-0385

Surface-to-Air Missile Unit Commander

(Guided Missile Unit Commander (SAM))

Course Number: 44-0-17.

Location: Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: 15 weeks (600 hours).

Exhibit Dates: 8/55–12/55.

Objectives: To train commissioned officers in the duties and responsibilities of battery-grade officers in surface-to-air guided missiles units.

Instruction: Communications and staff procedures; combined arms; SAM tactics; motors and generators; Nike computer; Nike radars; missile electronics and launcher area equipment; mechanics; handling and battery operation; map reading and survey; basic electronics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electricity, and credit in electrical laboratory on the basis of institutional evaluation (12/68).

AR-1715-0386

Sound Ranging Crewman Noncommissioned Officer (NCO) Basic

Course Number: 412-17C40-EC.

Location: Field Artillery School, Ft. Sill, OK.

Length: 15 weeks (561 hours).

Exhibit Dates: 8/71–5/72.

Objectives: To provide personnel with knowledge sufficient to perform the duties of a sound-ranging crewman.

Instruction: Lectures and practical exercises in weapons, leadership, artillery transport, communications, tactics and combined arms, command and staff, nuclear weapons employment, survey, sound ranging, and determination of sound ranging weather data.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

Related Occupation Codes: 17C; 17Z.

AR-1715-0387

Audio Specialist

Course Number: *Version 1:* 191-84D20; 11-R-842.1. *Version 2:* 11-E-10.

Location: Signal School, Ft. Monmouth, NJ.

Length: *Version 1:* 13 weeks (455–478 hours). *Version 2:* 15 weeks (546 hours).

Exhibit Dates: *Version 1:* 7/57–Present. *Version 2:* 11/55–6/57.

Objectives: To provide enlisted personnel with a working knowledge of operation and maintenance of audio-visual equipment.

Instruction: *All Versions:* Lectures and practical exercises in sound amplifiers and recording devices, magnetic tape recording, television audio equipment, and motion picture sound recording. *Version 2:* Includes more emphasis on television studio practices, cameras, and transmitters.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in audio-visual equipment (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in audio-visual equipment (7/74); in the upper-division baccalaureate category, 2 semester hours in audio-visual equipment (7/74). *Version 2:* In the vocational certificate category, 3 semester hours in audio-visual equipment (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in audio-visual equipment (7/74); in the upper-division baccalaureate category, 3 semester hours in audio-visual equipment (7/74).

Related Occupation Codes: 84D; 84F.

AR-1715-0388

Multichannel Ciphony System TSEC/CY-104 Repair

Course Number: 160-F5.

Location: Signal School, Ft. Gordon, GA.

Length: 4 weeks (137 hours).

Exhibit Dates: 3/74–Present.

Objectives: To provide enlisted personnel with the technical knowledge to perform direct or general support maintenance on the specified multichannel ciphony system.

Instruction: Troubleshooting and theory of operation and maintenance are primary areas covered.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic troubleshooting on the basis of institutional evaluation (4/77).

Related Occupation Codes: 31T.

AR-1715-0389

1. Common Basic Electronics Training (COBET)—Modules 1, 201, 2, 202, 3, 303, 4, 5/6 and 7
2. Common Basic Electronics Training (COBET)—Modules I-IV

Course Number: None.

Location: Army Training School, Ft. Jackson, SC.

Length: *Version 1:* 2–10 weeks (64–346 hours). *Version 2:* 2–6 weeks (60–120 hours).

Exhibit Dates: *Version 1:* 6/75–Present. *Version 2:* 1/74–5/75.

Objectives: To provide personnel who will enter electronics-related courses with basic electronics skills and to familiarize them with the basic test equipment which they will be using.

Instruction: *All Versions:* Lectures and laboratory exercises in the fundamental theory of operation of basic circuits such as power supplies and amplifiers; use of basic test equipment, including multimeters, oscilloscopes, and function generators; and concepts of circuit and system troubleshooting. The level of instruction is primarily descriptive and empirical, utilizing basic arithmetic skills. Students may attend one or more modules, depending upon training requirements for entry into follow-on training. *Version 2:* Also covers the basic concepts of electricity, including energy, power, voltage and current.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in basic electronics and troubleshooting for each module for a possible total of 6 semester hours (4/77). *Version 2:* In the vocational certificate category, 1 semester hour in basic electronics and troubleshooting for each module for a possible total of 4 semester hours (3/75).

AR-1715-0390

1. Nike Missile Launcher Repairer
2. Nike Missile-Launcher Repair
3. Nike Missile-Launcher Repair (Phases I and II)

Course Number: *Version 1:* 121-22N10. *Version 2:* 121-22N10. *Version 3:* 121-22N20.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: *Version 1:* 32 weeks (1099–1100 hours). *Version 2:* 24 weeks (995 hours). *Version 3:* 26–30 weeks (875–1017 hours).

Exhibit Dates: *Version 1:* 3/79–Present. *Version 2:* 5/78–2/79. *Version 3:* 6/74–4/78.

Objectives: To train personnel to inspect, test, and repair the Nike-Hercules missile and launcher.

Instruction: *All Versions:* Instruction includes simplified coverage of RC and LC transients and sine-wave oscillators; soldering techniques and practices; empirical description of the operation of vacuum-tube pulse circuits; basic manual skills and missile hydraulic systems; Nike missile, launcher, and associated test equipment maintenance and repair. Topics include basic electricity concepts of work, energy, and power; DC and AC circuit theory—series, parallel, series-parallel, inductive, capacitive, and LCR circuits; series and parallel resonant circuits; transformers and power supplies; triodes, biasing circuits, single and multi-stage amplifiers, and voltage regulator circuits. *Version 3:* Note: Students who have completed Modules 1, 2, and 3 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II (26 weeks) of this course. See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete both Phases I and II (30 weeks) of this course.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 2 semester hours in hydraulic systems (8/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 2 in vacuum tube circuits, 3 in electronic equipment repair techniques and 2 in electrical measurements laboratory (8/79). *Version 3:* In the vocational certificate category, 12 semester hours in basic electronics and troubleshooting, 2 in hydraulic systems (3/75) for students who complete 26 weeks of the course, or 15 semester hours in basic electricity, electronics and troubleshooting, 2 in hydraulic systems (3/75) for students who complete 30 weeks of the course (see Note above); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity and electronics for students who complete Phase I and II (30 weeks) of the course (3/75).

AR-1715-0391

Data Processing Equipment Maintenance (DM-CMF) NCO Advanced

Course Number: 1-742-C42; 1-DM-C42.

Location: Signal School, Ft. Gordon, GA; Signal School, Ft. Monmouth, NJ.

Length: 10–11 weeks (363–384 hours).

Exhibit Dates: 7/73–Present.

Objectives: To train personnel as supervisors of data processing equipment maintenance functions.

Instruction: Lectures and practical exercises in general military subjects; combined arms; applied communications; administration and management; combat service support operations; communication security; data processing; and data communications.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

Related Occupation Codes: 34B; 34D.

AR-1715-0392

Improved Hawk Fire Control Maintenance

Course Number: 121-24E10; 121-24E20.

Location: Air Defense School, Ft. Bliss, TX.

Length: *Version 1:* 26 weeks (860–920 hours). *Version 2* : 26 weeks (812–846 hours).

Exhibit Dates: *Version 1:* 3/75–Present. *Version 2:* 7/73–2/75.

Objectives: To provide enlisted personnel with a working knowledge of organizational maintenance on a missile radar system.

Instruction: *All Versions:* Lectures and practical exercises on electronic fundamentals, radar system fundamentals and repair, and the use of basic test equipment such as oscilloscopes and multimeters. *Version 1:* Includes topics on troubleshooting regulated power supplies, low frequency amplifiers, and fundamentals of pulse acquisition radar.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronics (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (6/75). *Version 2:* In the vocational certificate category, 3 semester hours in electronic fundamentals, 3 in basic electronics (2/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems elective (2/75); in the upper-division baccalaureate category, elective credit in electronics on the basis of institutional evaluation (2/75).

Related Occupation Codes: 24E.

AR-1715-0393

Unattended Ground Sensor Specialist

Course Number: 221-17M20.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: 5 weeks (175 hours).

Exhibit Dates: 3/75–Present.

Objectives: To train enlisted personnel to install and operate unattended ground sensing devices.

Instruction: Lectures and practical exercises in ground sensing devices, detection devices, and associated hardware.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/75).

AR-1715-0394

Biomedical X-Ray Equipment Maintenance

Course Number: 4B-202A; 198-35T20.

Location: Medical Equipment and Optical School, Denver, CO.

Length: 40 weeks (1291–1334 hours).

Exhibit Dates: 9/73–Present.

Objectives: To train, beyond the basic level, personnel to install, inspect, calibrate, maintain, repair, and adjust medical X-ray and ancillary equipment.

Instruction: Lectures and practical exercises in fundamentals of DC and AC circuits, vacuum tubes, and solid-state electronic devices; specific pieces of commercially available X-ray equipment; technical writing; and applied physics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in DC and AC circuits, 1 in applied physics, 6 in electronics, 1 in technical writing, 8 in X-ray equipment maintenance (10/75).

Related Occupation Codes: 202A.

AR-1715-0395

Communications-Electronics Warrant Officer Advanced

Course Number: 4-11-C32.

Location: Signal School, Ft. Gordon, GA.

Length: 16–23 weeks (545–691 hours).

Exhibit Dates: 8/74–Present.

Objectives: To provide qualified warrant officers with a working knowledge of supervisory and staff management responsibilities in communication-electronics maintenance.

Instruction: Basic communication systems are covered in regard to management operational and maintenance procedures, including FM radio equipment, AM/SSB equipment, radio relays, telephone-digital communication equipment. War propagation, satellite communications, and various Army communication systems and procedures are also covered.

Credit Recommendation: In the vocational certificate category, 3 semester hours in telecommunications, 1 in telecommunications laboratory (4/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in telecommunications laboratory (4/77).

Related Occupation Codes: 286A; 281A; 282A.

AR-1715-0396

Digital European Backbone (DEB) Communications Systems Repair

Course Number: 101-F16.

Location: Signal School, Ft. Gordon, GA.

Length: 7–10 weeks (256–384 hours).

Exhibit Dates: 12/76–Present.

Objectives: To provide a working knowledge of the techniques required to maintain specified communications systems.

Instruction: Phase I (3 weeks) and Phase II (7 weeks) instruction in systems operation, including maintenance procedures, subsystem operation and function, block-diagram analysis, test procedures, and signal tracing. Note: Students may attend both Phases I and II or Phase II only.

Credit Recommendation: In the vocational certificate category, 1 semester hour in troubleshooting and maintenance procedures for Phase I and 3 semester hours in radio communications systems maintenance for Phase II (see note above) (4/77).

Related Occupation Codes: 26V; 26Y.

AR-1715-0397

Improved Hawk Radar Signal Simulator Station Repairer

(Improved Hawk Radar Signal Simulator Station Repair)

Course Number: 104-ASIW2; 104-F15.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 9–11 weeks (273–355 hours).

Exhibit Dates: 11/76–Present.

Objectives: To provide the student with the knowledge required for performing support maintenance functions on the electronic systems of the Hawk simulator station and associated test equipment.

Instruction: Course content is directed exclusively toward repair of the Hawk radar signal simulator station, including voltage regulators, PAR systems analysis, ROR, and CWIR systems analysis and ICWAR console and target effects system analysis.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, semester hours in electronics repair techniques (8/79).

Related Occupation Codes: 24H.

AR-1715-0398

USMC Missile Systems Maintenance Fundamentals

Course Number: 121-5900.

Location: Air Defense School, Ft. Bliss, TX.

Length: 9 weeks (317 hours).

Exhibit Dates: 11/75–Present.

Objectives: To provide U.S. Marine Corps enlisted personnel with basic knowledge of Missile electronics theory applicable to the Hawk missile system.

Instruction: Course includes information of general interest such as AC and DC circuit theory, resonance, vacuum tubes, transistors, and microwave techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electricity, 3 in basic electronics (8/77).

AR-1715-0399

Improved Hawk Firing Section Intermediate Maintenance

Course Number: 121-F23.

Location: Air Defense School, Ft. Bliss, TX.

Length: 13 weeks (445 hours).

Exhibit Dates: 5/75–Present.

Objectives: To qualify enlisted personnel to perform organizational maintenance on the Improved Hawk High Powered Illuminator, Missile, Loader, and Launcher at the middle manager level.

Instruction: Topics include DC circuits, RL and RC circuits, vacuum tubes, transistors, and microwave techniques. The remainder of the course is directed specifically toward the Hawk firing section.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electronics, 3 in electronic troubleshooting (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (8/77).

Related Occupation Codes: 24C.

AR-1715-0400

Improved Hawk Fire Control Intermediate Maintenance

Course Number: 121-F24.

Location: Air Defense School, Ft. Bliss, TX.

Length: 13 weeks (445 hours).

Exhibit Dates: 5/75–Present.

Objectives: The purpose of the course is to qualify enlisted personnel to perform organizational maintenance on the Improved Hawk Battery Control Center, Improved Acquisition Radar, and the Improved Range-Only Radar at the middle manager level.

Instruction: Significant coverage of general interest topics such as DC circuits, RL and RC circuits, resonance, vacuum tubes, and transistors is included. The remaining material covered applies to specific military systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic electricity, 1 in electronics laboratory (8/77).

AR-1715-0401

AN/TSQ-73 System Operator/Repairman Senior-Level

Course Number: 4F-361A; 150-25L40.

Location: Air Defense School, Ft. Bliss, TX.

Length: 17 weeks (587–647 hours).

Exhibit Dates: *Version 1:* 12/77–Present. *Version 2:* 7/76–11/77.

Objectives: This course provides warrant officers and senior enlisted personnel with knowledge of the operation, maintenance, tactics, and doctrine for the AN/TSQ-73 Missile Minder Command and Control System.

Instruction: The course content is oriented specifically to the AN/TSQ-73. There is a limited amount of basic computer concepts that is of general interest.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 3 semester hours in computer troubleshooting (8/77).

Related Occupation Codes: 361A; 25K; 25J; 25D; 25G; 25H; 25L; 287A; 301A; 361A.

AR-1715-0402

AN/TSQ-73 System Operator/Repairman Senior-Level (Transition)

Course Number: 4F-361A-T; 150-25L40-T.

Location: Air Defense School, Ft. Bliss, TX.

Length: 17 weeks (647 hours).

Exhibit Dates: 5/77–Present.

Objectives: Course provides warrant officers and senior enlisted personnel with knowledge of the operation, maintenance, tactics and doctrine for the AN/TSQ-73 Missile Minder Command and Control System.

Instruction: Topics include air defense tactics, system maintenance, weapons systems, and electronic warfare.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (8/77).

Related Occupation Codes: 361A; 25K; 25J; 25D; 25G; 25H; 25L; 287A; 301A; 361A.

AR-1715-0403

AN/TSQ-73 System Operator/Repairman Entry-Level

Course Number: 150-25L10; 150-F6.

Location: Air Defense School, Ft. Bliss, TX.

Length: 19 weeks (633–656 hours).

Exhibit Dates: 3/76–Present.

Objectives: To provide enlisted personnel with knowledge of the functions, operational procedures, and organizational maintenance procedures of Missile Command and Control System.

Instruction: Instruction provides student with radar nomenclature, functions and operation principles including related communications system. Some background in electrical circuit and digital system fundamentals is provided.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical circuits, 3 in electrical circuits laboratory (8/77).

Related Occupation Codes: 25L.

AR-1715-0404

Automated High Frequency Direction Finding (HFDF) Net Control Station (EELPOT) Maintenance

Course Number: 102-F36.

Location: Intelligence School, Ft. Devens, MA.

Length: 17 weeks (480 hours).

Exhibit Dates: 4/77–Present.

Objectives: To train the student to maintain the various items of equipment which make up the EELPOT net control station.

Instruction: Topics include minicomputer systems maintenance, floppy-disk maintenance, and serial I/O maintenance.

Credit Recommendation: In the vocational certificate category, 6 semester hours in computer system maintenance (9/77).

AR-1715-0405

Hazeltine 2000B Maintenance

Course Number: 102-F37.

Location: Intelligence School, Ft. Devens, MA.

Length: 3 weeks (99 hours).

Exhibit Dates: 4/77–Present.

Objectives: To train students to maintain the Hazeltine 2000B video-display terminal.

Instruction: Content is oriented specifically to the Hazeltine 2000B video-display terminal.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic maintenance (9/77).

AR-1715-0406

Fixed Countermeasures Receiving System Maintenance (AN/FLR-9)

Course Number: 102-F14.

Location: Intelligence School, Ft. Devens, MA.

Length: 4 weeks (160 hours).

Exhibit Dates: 8/73–Present.

Objectives: To train technicians in electronic maintenance of fixed-base countermeasures equipment.

Instruction: Electronic maintenance on elements of radio systems and digital logic.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic maintenance (9/77).

AR-1715-0407

Special Purpose Receiving Systems Maintenance

Course Number: 102-F15.

Location: Intelligence School, Ft. Devens, MA.

Length: 4 weeks (90 hours).

Exhibit Dates: 6/69–Present.

Objectives: To train technicians to maintain communications systems equipment.

Instruction: High-frequency (and above) radio receiving equipment, including electromechanical systems such as servomechanisms and hydraulic drives.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic maintenance (9/77).

AR-1715-0408

Complex Electronics Systems Analysis and Maintenance

Course Number: 102-F35.

Location: Intelligence School, Ft. Devens, MA.

Length: 39 weeks (1323 hours).

Exhibit Dates: 7/75–Present.

Objectives: To train students to maintain or supervise the maintenance of electronic warfare intercept systems.

Instruction: Topics include trigonometry, differential and integral calculus, applications of mathematics to electronic circuits, fundamentals of circuit analysis, logic fundamentals, computer architecture, computer programming, feedback theory, pulse circuits, and system testing and troubleshooting, analog and digital communications and antennas, and operational amplifiers and active filters.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronic troubleshooting (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in college algebra, 3 in calculus, 3 in electronics, 3 in logic fundamentals and computers, 6 in applied electronic circuits, and 3 in electrical communications (9/77).

AR-1715-0409

Automated High Frequency Direction Finding (HFDF) System Maintenance (EELPOT)

Course Number: 102-F33.

Location: Intelligence School, Ft. Devens, MA.

Length: 25 weeks (773 hours).

Exhibit Dates: 4/77–Present.

Objectives: To train students to maintain the various items of equipment which make up the EELPOT out-station processor unit.

Instruction: Course contains specific maintenance information on a Honeywell computer, floppy disk, video display, multiplexer receiver, and microprocessor controller.

Credit Recommendation: In the vocational certificate category, 9 semester hours in computer system maintenance (9/77).

AR-1715-0410

Environmental Collection System Maintenance (AN/GSR-4)

Course Number: 102-F25.

Location: Intelligence School, Ft. Devens, MA.

Length: 8 weeks (234 hours).

Exhibit Dates: 10/74–Present.

Objectives: To train students to maintain radio equipment used in electronic intelligence collection systems.

Instruction: Troubleshooting and repair of LF-UHF radio receivers.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic maintenance (9/77).

AR-1715-0411

Electronic Warfare (EW) Intercept Systems Maintenance Analyst

Course Number: 102-F30.

Location: Intelligence School, Ft. Devens, MA.

Length: 7 weeks (165 hours).

Exhibit Dates: 6/75–Present.

Objectives: To prepare personnel to supervise electronic maintenance activities.

Instruction: Training and practical exercises in property accounting, publications and files, training management, and U.S. Army organization.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management and supervision (9/77).

AR-1715-0412

Remote Control System Maintenance (AN/URR-66)

Course Number: 102-F18.

Location: Intelligence School, Ft. Devens, MA.

Length: 11–12 weeks (334 hours).

Exhibit Dates: 8/73–Present.

Objectives: To train students to maintain AN/URR-66 remote-controlled receiver equipment.

Instruction: Technician training for maintenance (operation, alignment, troubleshooting, and repair) of URR-66 advanced solid-state receiver system, including advanced logic techniques and circuits, frequency spectrum analysis, binary coding, and solid-state amplifier theory.

Credit Recommendation: In the vocational certificate category, 3 semester hours in digital electronics maintenance (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital electronics (9/77).

AR-1715-0413

Data Acquisition System Maintenance (AN/GSQ-76)

Course Number: 102-F19.

Location: Intelligence School, Ft. Devens, MA.

Length: 8 weeks (154 hours).

Exhibit Dates: 7/72–Present.

Objectives: To train enlisted personnel to maintain an AN/GSQ-76 data-acquisition system.

Instruction: Instruction and practical exercises in the repair and maintenance of magnetic tape units, digital assemblies, logic circuitry, memory units, and read-write controls.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/77).

AR-1715-0414

Voice Intercept Position Maintenance

Course Number: 102-F24.

Location: Intelligence School, Ft. Devens, MA.

Length: 7–8 weeks (200–225 hours).

Exhibit Dates: 1/75–Present.

Objectives: To train technicians in maintenance of voice-intercept signal analysis equipment.

Instruction: Topics such as receiver alignment, tape recorder alignment and maintenance, and spectrum analyzer alignment are included.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic maintenance (9/77).

AR-1715-0415

Advanced Identification Techniques Position Maintenance (RO361)

Course Number: 102-F16.

Location: Intelligence School, Ft. Devens, MA.

Length: 2–3 weeks (64 hours).

Exhibit Dates: 3/73–Present.

Objectives: To train students to maintain advanced identification techniques equipment.

Instruction: Course content consists of topics directly related to the maintenance of specific military equipment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (9/77).

AR-1715-0416

Tactical Countermeasures Receiving Systems Maintenance (AN/MLQ-24)

Course Number: 102-F17.

Location: Intelligence School, Ft. Devens, MA.

Length: 7 weeks (208 hours).

Exhibit Dates: 11/72–Present.

Objectives: The course trains the student to maintain the AN/MLQ-24 countermeasures system.

Instruction: Topics include high-frequency techniques, direction finding, block-diagram analysis, and practical exercises in alignment and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic maintenance (9/77).

AR-1715-0417

EW/Intercept Equipment Repairman (Electronic Warfare (EW) Intercept Systems Repairman)

Course Number: 102-33S10.

Location: Intelligence School, Ft. Devens, MA.

Length: 34–35 weeks (1020 hours).

Exhibit Dates: 7/75–Present.

Objectives: To train enlisted personnel to troubleshoot and repair electronic warfare/signal intelligence intercept equipment.

Instruction: Training and practical exercises in basic AC and DC fundamentals, electronic tubes, solid-state devices, amplifiers, meters, digital logic devices, modulation, multiplexing, wave propagation, communications devices, and military science.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronic maintenance (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electric circuit fundamentals, 3 in basis electronics (9/77).

Related Occupation Codes: 33S.

AR-1715-0418

Electronic Countermeasures Receiving System Maintenance (AN/TLQ-17)

Course Number: 102-F21.

Location: Intelligence School, Ft. Devens, MA.

Length: 7 weeks (204 hours).

Exhibit Dates: 2/74–Present.

Objectives: To provide technician training in the servicing of electronic countermeasures communications equipment.

Instruction: Systems-level theory of operation and troubleshooting of radio and electronic components.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic maintenance (9/77).

AR-1715-0419

Improved Hawk Launcher and Mechanical Systems Repair Transition

Course Number: 121-24L20-T; 121-24L40-T.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 10–12 weeks (325–385 hours).

Exhibit Dates: 6/76–3/79.

Objectives: To provide students with the knowledge and techniques for inspecting, testing, and repair of Improved Hawk launcher and selected support equipment. Course has MOS 46D (Improved Hawk Mechanical Systems Repairman) and MOS 22K (Hawk Missile-Launcher Repairman) tracks.

Instruction: Instruction is in the operation of the Improved Hawk missile system. Instruction in the 10-week 46D track includes basic electronic subjects such as resonant circuits, amplifier circuits, soldering techniques and transistor fundamentals. Instruction in the 12-week 22K track includes launcher electronics, hydraulic systems, electro-mechanical systems and hydro-pneumatic systems used in the Hawk system.

Credit Recommendation: In the vocational certificate category, 9 semester hours in basic electronics for students completing the 46D track, and, for students completing the 22K track, 3 semester hours in basic electronics, 6 in mechanical systems (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics for students completing the 46D track and, for students completing the 22K track, 1 semester hour in mechanical systems (8/77).

Related Occupation Codes: 46D; 22K; 24L; 24V.

AR-1715-0420

Defense Against Sound Equipment (DASE), Phase I

Course Number: Not available.

Location: Intelligence School, Ft. Devens, MA.

Length: 16 weeks (474 hours).

Exhibit Dates: 6/77–Present.

Objectives: To provide selected personnel with a working knowledge of specialized electronic equipment and techniques used in the detection and location of clandestine devices.

Instruction: Instruction and practical exercises in basic electricity and electronics including series and parallel circuits, meters, AC and DC properties, inductance, capacitance, resonance, solid-state devices, oscillators, digital logic, wave shaping, transmitters, and receivers. Phase II is at Ft. Huachuca, AZ.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics laboratory (9/77); in the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity and electronics (9/77).

AR-1715-0421

Multichannel Communications Equipment Operator Phase I by Correspondence

Course Number: None.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104–156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge necessary to install and perform on-going maintenance on low capacity PCM equipment, medium capacity PCM equipment, FDM-multiplying equipment and communications security devices.

Instruction: Students must complete Phase I. Once a student has completed Phase I, the student must complete one or more of the following phases: IA, IB, IC. The course provides the necessary instruction to develop the skill level of a journeyman multichannel equipment operator for the transmitters, receivers, multiplexers, repeaters, converters, carrier terminals and communications security devices in multichannel communication systems. Course includes proctored end-of-course examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (6/79).

Related Occupation Codes: 31M.

AR-1715-0422

Multichannel Communications Equipment Operator Phase IA by Correspondence.

Course Number: None.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104–156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge necessary to install and perform on-going maintenance on low capacity PCM equipment, medium capacity equipment and communications security devices.

Instruction: Students must complete Phase I prior to enrollment. Students must then complete one or more of Phases IA, IB, IC. The course provides the necessary instruction to develop the skill level of a journeyman multichannel equipment operator for the transmitters, receivers, multiplexers, repeaters, converters, carrier terminals and communications security devices in multichannel communication systems. Course includes comprehensive end-of-course proctored examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (6/79).

Related Occupation Codes: 31M.

AR-1715-0423

Multichannel Communications Equipment Operator Phase IB by Correspondence

Course Number: None.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104–156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge necessary to install and perform capacity PCM equipment, FDM-multiplxing equipment and communications capacity PCM equipment, FDM-multipleying equipment and communications security devices.

Instruction: Students must complete Phase I prior to enrollment. Students must then complete one or more of Phases IA, IB, IC. The course provides the necessary instruction to develop the skill level of a journeyman multichannel equipment operator for the transmitters, receivers, multiplexers, repeaters, converters, carrier terminals and communication systems. Course includes a comprehensive end-of-course proctored examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics plus 1 additional semester hour in electronics for those students completing the supervised on-job training option (6/79).

Related Occupation Codes: 31/M.

AR-1715-0424

Multichannel Communications Equipment Operator Phase IC by Correspondence

Course Number: None.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104–156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge necessary to install and perform on-going maintenance on low capacity PCM, medium capacity PCM equipment, FDM-multiplexing equipment and communications security devices.

Instruction: Students must complete Phase I. Once a student has completed Phase I, the student must then complete one or more of Phases IA, IB, IC. The course provides the necessary instruction to develop the skill level of a journeyman multichannel equipment operator for the transmitters, receivers, multiplexers, repeaters, converters, carrier terminals and communications security devices in multichannel communication systems. The course includes a comprehensive end-of-course proctored examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics plus an additional 1 semester hour in electronics for those students completing the supervised on-job training option (6/79).

Related Occupation Codes: 31M.

AR-1715-0425

Communications Techniques Control Center Operator

Course Number: 202-F2.

Location: Signal School, Ft. Gordon, GA.

Length: 3 weeks (92 hours).

Exhibit Dates: 12/78–Present.

Objectives: The course provides working knowledge of concepts, procedures, and equipment for the control and operation of a communications control center.

Instruction: Students learn to install, calibrate, and operate specialized military communications equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in radio communications (8/79).

Related Occupation Codes: 31N.

AR-1715-0426

AN/USC-26/CV-3034 Repair

Course Number: 101-F18.

Location: Signal School, Ft. Gordon, GA.

Length: 3 weeks (102 hours).

Exhibit Dates: 8/78–Present.

Objectives: The course trains the student in the troubleshooting, repair, and operation of one specific piece of equipment—an analog-digital converter.

Instruction: Each portion of this equipment is studied in detail with emphasis on troubleshooting. Topics covered include an overview of digital communications subsystems, A/D conversion, and block-diagram analysis.

Credit Recommendation: In the vocational certificate category, 2 semester hours in troubleshooting techniques (8/79); In the lower-division baccalaureate/associate degree category, 1 semester hour in troubleshooting techniques (8/79).

Related Occupation Codes: 26V10.

AR-1715-0427

Radio Set AN/FRC-113 Operation and Maintenance

Course Number: 101-AS1E3.

Location: Signal School, Ft. Gordon, GA.

Length: Phase I, 2 weeks; Phase II, 3 weeks; for a total of 5 weeks (106 hours).

Exhibit Dates: 12/78–Present.

Objectives: To provide students with knowledge and skills required to install, operate, align, and troubleshoot a specialized radio set, AN/FRC-113.

Instruction: Phase I includes an overview of radio set functions and characteristics and discussion of block diagrams. Student also performs alignments, traces signal paths, and troubleshoots and maintains circuits to operational standards. Phase II extends troubleshooting to the radio transmitter and isolates malfunctions to module and component levels.

Credit Recommendation: In the vocational certificate category, 1 semester hour in troubleshooting for Phase I, 2 semester hours in troubleshooting for Phase II, for a total of 3 semester hours for completion of the 5-week course (8/79).

AR-1715-0428

Nuclear Weapons Maintenance Leader

Course Number: 644-55G30-T.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 12 weeks (370 hours).

Exhibit Dates: 11/78–Present.

Objectives: To provide training necessary for supervision of maintenance, assembly, and calibration performed on nuclear weapons and associated electronics test equipment.

Instruction: Phase I includes maintenance records and report writing, inspection, storage, system performance testing, safety, and warhead disarming techniques. Phase II consists primarily of basic electronics training, through lectures and practical exercises, which includes Ohm's Law, power supplies, series and parallel circuits, AC circuits, amplifiers, oscillators, solid-state devices, special circuits, and soldering. Other subjects covered by Phase II training are use, maintenance, and calibration of commercial test equipment, including oscilloscopes, power supplies, and signal generators.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics and 3 in test equipment maintenance for Phase II. Credit is not recommended for students taking only Phase I (8/79). In the upper-division baccalaureate category, Credit is recommended on the basis of institutional evaluation (8/79).

Related Occupation Codes: 55G; 35F.

AR-1715-0429

Satellite Communications Systems Fundamentals

Course Number: 102-F39.

Location: Signal School, Ft. Gordon, GA.

Length: 18 weeks (677 hours).

Exhibit Dates: 3/78–Present.

Objectives: To train students to operate, troubleshoot, align and repair common analog and digital communications and spread spectrum subsystems.

Instruction: Student analyzes block diagrams of system components, including amplifiers, exciters, FM modulators, discriminators, sweep circuits, detectors, and phase shift networks. Student aligns and troubleshoots klystron systems, transmittors, demodulators, and other circuits; performs functional analyses, operational checks, and services on all equipment; and develops a knowledge of digital applications, including digital codes, base logic functions, clock circuits, A/D conversion, and error correcting codes. Student also traces signal flow on circuit diagrams, provides operational checks, isolates faults, and repairs receivers and transmitters.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic communications circuits, 3 in electronic troubleshooting, 1 in computer circuits (8/79). In the lower-division baccalaureate/associate degree category, 3 semester hours in communications circuits laboratory, 1 in digital logic (8/79).

AR-1715-0430

Strategic Satellite/Microwave Systems Operator

Course Number: 201-26R10.

Location: Signal School, Ft. Gordon, GA.

Length: 20 weeks (754 hours).

Exhibit Dates: 10/78–Present.

Objectives: To provide students with the knowledge and skills required to operate and perform minor maintenance on a satellite microwave system.

Instruction: Student is introduced to many of the ideas of basic electronics. Oscillators, power supplies, and amplifier circuits are studies and analyzed. Student learns troubleshooting and signal tracing techniques, using the VOM and oscilloscope. A variety of equipment is studied in detail.

Credit Recommendation: In the vocational certificate category, 6 semester hours in troubleshooting techniques, 3 in solid-state circuitry, 2 in DC circuit analysis (8/79); In the lower-division baccalaureate/associate degree category, 3 semester hours in troubleshooting techniques, 1 in solid-state circuitry, 3 in introduction to electronics, 1 in DC circuit analysis (8/79).

Related Occupation Codes: 26R.

AR-1715-0431

Avionic Navigation and Flight Control Equipment Repair

Course Number: 102-35M10.

Location: Signal School, Ft. Gordon, GA.

Length: Phase I, 8 weeks; Phase II, 16 weeks; for a total of 24 weeks (880 hours).

Exhibit Dates: 4/78–Present.

Objectives: To provide the working knowledge required to perform direct and general support maintenance on electronic navigation and automatic flight control equipment.

Instruction: Phase I consists of basic electronic theory, including basic circuits, rectifiers, meters, amplifiers, oscilloscopes, oscillators, and block-diagram analysis. Phase II includes repair, maintenance, and operation of specialized electronic equipment and components. Theory acquired in phase I is applied to activities in phase II.

Credit Recommendation: In the vocational certificate category, 6 semester hours in basic electronics, 2 2 in basic electronic communications, for phase I; 2 semester hours in soldering and printed circuit board repair, 6 in troubleshooting techniques for phase II, for a total of 16 semester hours for completion of the 24-week course (8/79); in the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 2 in basic electronic communication for phase I, 2 semester hours in troubleshooting techniques for phase II, for a total of 10 semester hours for completion of the 24-week course (8/79).

Related Occupation Codes: 35M.

AR-1715-0432

DIAL-MANUAL CENTRAL OFFICE REPAIR

Course Number: 622-36H10.

Location: Signal School, Ft. Gordon, GA.

Length: 38 weeks (1439 hours).

Exhibit Dates: 1/79–Present.

Objectives: Students are trained to perform maintenance, repair, and interconnection of central office telephone exchange equipment.

Instruction: The first part of this course concentrates on basic electronics; the second deals with the actual telephone equipment. Solid-state devices and circuits, including amplifiers, oscillators, pulse generators and power supplies, are studied. Analysis and troubleshooting of these circuits is emphasized. Familiarization with the basic ideas and language of electronics is accomplished, as well as troubleshooting of the specific equipment for telephone exchanges.

Credit Recommendation: In the vocational certificate category, 6 semester hours in troubleshooting techniques, 10 in telephone systems maintenance (8/79); in the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronics, 2 in troubleshooting techniques (8/79).

Related Occupation Codes: 36H.

AR-1715-0433

COMBAT AND STRATEGIC COMMUNICATION AND ELECTRONIC OFFICER

Course Number: 4-11-OA25.

Location: Signal School, Ft. Gordon, GA.

Length: 26 weeks (1055 hours).

Exhibit Dates: 7/78–Present.

Objectives: To prepare commissioned officers in grade of first lieutenant or captain to serve as a staff officer at battalion level for the planning, installing, maintaining, and managing of tactical communications systems and facilities in support of combat operations.

Instruction: The course includes general military topics covering organizational effectiveness, systems planning and communications. Course covers tactical communications-electronics equipment and planning to include telephone and teletypewriter systems, tactical multichannel system planning, and systems view; analysis of training needs and plans, organizational maintenance operations, cable distribution systems, ADP software, microwave and troposcatter systems engineering and path planning and independent study and research.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in human relations management (8/79); in the graduate degree category, 6 semester hours in human relations management, Credit is to be granted in either the upper division or the graduate category.

AR-1715-0434

TACTICAL WIRE OPERATIONS SPECIALIST

Course Number: 621-36K10-OSUT.

Location: Signal School, Ft. Gordon, GA.

Length: *Version 6:* 12 weeks (496 hours).

Exhibit Dates: 9/78–Present.

Objectives: Provide enlisted personnel with a general working knowledge of installation and maintenance of field wave lines, tactical switchboards and radar systems.

Instruction: Course includes installation, maintenance and operation of field wire switchboards and telephones. Student installs and repairs line systems in the field.

Credit Recommendation: In the vocational certificate category, 4 semester hours in lineman-installer, 2 in switchboard operator (8/79).

Related Occupation Codes: 36K; 31V.

AR-1715-0435

SATELLITE COMMUNICATIONS TERMINAL AN/MSC-46 REPAIR

Course Number: 102-F38.

Location: Signal School, Ft. Gordon, GA.

Length: 10 weeks (355 hours).

Exhibit Dates: 11/77–Present.

Objectives: To train military service personnel to operate, troubleshoot, align, and repair satellite communications earth terminal complex AN/MSC-46.

Instruction: Student learns to operate satellite earth terminal complex (ETC) equipment; analyze block diagrams; trace power distribution in the system; perform noise tests, perform operational checks and maintenance services on antenna, amplifier and frequency conversion circuitry; maintain test circuits; analyze subsystems; and trace block diagrams, including antenna feed, phase shifters, and low- and high-power amps, RF circuits, cooling units and heat exchangers. Student performs operational checks and services on above systems.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electrical system maintenance, 3 in electronics troubleshooting (8/79).

Related Occupation Codes: 26Y.

AR-1715-0436

TACTICAL MICROWAVE SYSTEMS REPAIR

Course Number: 101-26L10.

Location: Signal School, Ft. Gordon, GA.

Length: Phase I, 36 weeks; Phase II, 6 weeks; for a total of 42 weeks (Phase I, 1040; Phase II, 227; for a total of 1267 hours).

Exhibit Dates: 1/79–Present.

Objectives: To provide enlisted personnel with knowledge required to install, operate, troubleshoot and repair tactical microwave radio systems.

Instruction: The course has two phases. In phase I the student measures and compares voltages and resistances, isolates meter troubles, calibrates meters, uses oscilloscopes and multimeters, develops solder skills including printed circuit board repair, traces wire diagrams, reads schematic charts and traces signal and current paths. The course also includes troubleshooting of various low- and high-frequency electronic circuits, using logic trainer and check memory, counter, and decoder digital circuits as well as adjusting and aligning frequency shifting, RF meter, amplifier, multiplexer and RF receiver circuits. Student installs, adjusts, and aligns antennas and related drive circuits. Enlisted men will take this phase and not take phase II. Phase II is designed for the National Guard, the Reserves and foreign students. The student learns to troubleshoot, align, and maintain AN/TRC-24 radio set as well as telegraph terminal AN/TCC-4 and telephone terminal AN/TCC-7. Students taking Phase II may also take Phase I.

Credit Recommendation: In the vocational certificate category, 6 semester hours in system troubleshooting techniques, 2 in digital logic circuitry, 2 in soldering and printed circuit board repair for those taking Phase I; 3 semester hours in radio circuit troubleshooting for those taking Phase II, for a total of 13 semester hours for students completing both Phase I and II (8/79); in the lower-division baccalaureate/associate degree category, 6 semester hours in basic electronic, 2 in basic electronic communications, 2 in logic systems, 2 in troubleshooting for students completing Phase I. For those students completing Phase II credit is recommended on the basis of institutional evaluation (8/79).

Related Occupation Codes: 26L.

AR-1715-0437

STRATEGIC MICROWAVE SYSTEMS REPAIRER

Course Number: 101-26V10.

Location: Signal School, Ft. Gordon, GA.

Length: 37 weeks (1384 hours).

Exhibit Dates: 10/78–Present.

Objectives: To provide training in the installation, operation and repair of strategic microwave radio systems.

Instruction: The course includes comprehensive coverage of basic electronics: solid-state circuitry of power supplies, audio amplifiers, pulse generators, AM/FM transceivers, and logic trainers. Approximately 50 percent of course time is devoted to practical operation and troubleshooting of military radio equipment, including 76 hours in precision soldering. Prerequisites include completion of a course in algebra and some background in science.

Credit Recommendation: In the vocational certificate category, 6 semester hours in basic electronics, 6 in troubleshooting techniques, 2 in soldering of printed circuit board repair (8/79); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics basics, 2 in basic electronic communications, 2 in digital circuits, 2 in troubleshooting techniques (8/79); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, laboratory credit based on institutional evaluation (8/79).

Related Occupation Codes: 26V.

AR-1715-0438

SATELLITE COMMUNICATIONS (SATCOM) OPERATOR

Course Number: *Version 1:* 102-F43. *Version 2:* 102-F22.

Location: Signal School, Ft. Gordon, GA.

Length: 5–8 weeks (185–298 hours).

Exhibit Dates: *Version 1:* 4/78–Present. *Version 2:* 9/76–3/78.

Objectives: Provides personnel with skills required to operate a satellite communications terminal and a digital communications subsystem

Instruction: *Version 1:* Course includes practical, hands-on experience in the operation of highly specialized military communications equipment. Student must possess a background in communications operations and also demonstrate a capability to adjust and align the system. *Version 2:* In this version, fewer systems are covered in the specific maintenance program. Some training is given in signal flow tracing and block-diagram analysis.

Credit Recommendation: In the vocational certificate category, 3 semester hours in satellite communications maintenance (8/79).

AR-1715-0439

Electronic Warfare Staff Officer

Course Number: 2G-F8.

Location: Intelligence School, Ft. Huachuca, AZ.

Length: 2 weeks (76 hours).

Exhibit Dates: 5/79–Present.

Objectives: To prepare staff officers for coordinating, planning, and integrating tactical electronic warfare to support combat operations.

Instruction: Course discusses the electronic warfare environment, defensive electronic warfare, and electronic warfare tasking and deployment, and provides warfare training.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the training (6/79).

AR-1715-0440

Avionic Mechanic by Correspondence

Course Number: J34.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide enlisted personnel with a working knowledge of communications-electronic equipment (TEC) and general support maintenance on avionic communications equipment.

Instruction: Course includes introductory electronics, operation of general purpose multimeter and the testing of receiver and transmitter circuits of communication equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in basic electronics principles (6/79).

Related Occupation Codes: 35K.

AR-1715-0441

Fixed Telecommunications System Track 26 by Correspondence

Course Number: J-14; None.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 208 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To prepare the signal officer to plan, install, operate, and maintain field telecommunication equipment other than tactical communications systems and facilities.

Instruction: The instruction covers installation, operation, and maintenance of field communication equipment and introduction to basic electronics principles.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics, 5 in basic communications (6/79).

AR-1715-0442

Fixed Station Radio Repair by Correspondence

Course Number: J08.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 52 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge necessary to install and perform detailed and complete overhaul maintenance of fixed station radio receiving and transmitting equipment.

Instruction: The course gives instruction in the complete overhaul of radio receiving and transmitting equipment. Also included is instruction on the operation of multimeters, signal generators, and oscilloscopes necessary for the troubleshooting, repair and alignment of transmitting and receiving equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (6/79).

Related Occupation Codes: 32H.

AR-1715-0443

Fixed Station Technical Controller by Correspondence

Course Number: J07.

Location: Institute for Professional Development, tis, VA.

Length: Present weeks (Maximum 104 hours).

Exhibit Dates: Ft. Eustis, VA–1/80.

Objectives: To provide the knowledge necessary to maintain the quality and continuity in operation of all types of data communications networks.

Instruction: This course provides instruction in data communication systems, telephone and telegraph transmission, and teaches the maintenance of quality circuit conditions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (6/79).

Related Occupation Codes: 32D.

AR-1715-0445

Strategic Microwave Systems Repair by Correspondence

Course Number: J22.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge necessary to install, operate, troubleshoot and repair fixed and transportable strategic microwave communications systems.

Instruction: Course gives instruction in basic electricity, electronics to include tubes and their applications, semiconductor devices, and their application. Timing circuits, microwave techniques, single-sideband transmission as well as telephone and telegraph transmission are also provided for. Also covered is operation of the following test equipment: telephone test sets, digital readout counters for below and above 85 MHz, and oscilloscopes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in basic and advanced electronics theory, 2 in electronics communication systems, 2 in the operation of test equipment (6/79).

Related Occupation Codes: 26V.

AR-1715-0446

Ground Control Approach Radar Repair by Correspondence

Course Number: J20.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide knowledge for direct and general support maintenance on ground control approach radar and associated identification friend or foe (IFF) equipment.

Instruction: Course provides instruction in basic electricity, electronics, electron tubes and their uses in amplifiers, rectifiers, receivers and transmitters. Semiconductor devices and their application are covered in minute detail. Radar principles, timing circuits, indicators, transmitters, and receivers are also covered at the technician level. Multiplexing, digital circuit fundamentals and all the associated test equipment necessary to troubleshoot, repair and align the above equipment is covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in electronic fundamentals, 2 in radar theory and repair (6/79).

Related Occupation Codes: 26D.

AR-1715-0447

Circuit Conditioning by Correspondence

Course Number: I69.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 52 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To introduce the student to the theories and principles involved in the electrical conditioning of circuits used in telephone and telegraph systems.

Instruction: Course covers a broad field of subjects related to signal conditioning in telephone and telegraph systems. Subject matter includes wire transmission principles, patch panels, line terminations, communication circuit quality, telephone system characteristics, and equipment used for measuring system noise and equalization.

Credit Recommendation: In the vocational certificate category, 10 semester hours in telephony (6/79).

AR-1715-0448

Data Processing Systems Repair Technician by Correspondence

Course Number: I15.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide knowledge of semiconductors and introduction to digital circuitry and Autodin systems.

Instruction: The course offers the following subjects: semiconductor theory and applications, power transistors, digital circuit fundamentals, basic test equipment operation, shop practices, introduction to Autodin, supply management and organizational maintenance, machine shop operation, and communications-electronics and maintenance organization.

Credit Recommendation: In the vocational certificate category, 2 semester hours in machine shop practices (6/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in intermediate and advanced electronics theory (6/79).

Related Occupation Codes: 287A.

AR-1715-0449

RADAR EQUIPMENT REPAIR BY CORRESPONDENCE

Course Number: I12.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To obtain a working knowledge of semiconductors and transistors and of the principles employed in radar. Theory of AM radio transmitters and receivers, cathode ray tubes and digital circuit fundamentals are provided for.

Instruction: The course provides instruction in: semiconductor devices and their application, power transistors, AM radio transmitters and receivers, principles of radar, timing circuits, radar indicators, radar transmitters, radar receivers, digital circuit fundamentals, basic test equipment, electronic communication systems, and machine shop and machinist skills.

Credit Recommendation: In the vocational certificate category, 2 semester hours in machine shop skills and metal working (6/79); in the lower-division baccalaureate/associate degree category, 10 semester hours in advanced electronic theory (6/79).

Related Occupation Codes: 286A.

AR-1715-0450

C-E OPERATIONS CHIEF BY CORRESPONDENCE

(Communications-Electronics Operations Chief by Correspondence)

Course Number: JO6.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 416 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To develop technical depth and system orientation in the installation, operation and management of tactical and strategic communications systems and networks.

Instruction: The course provides the student with a broad coverage of studies related to communication systems and equipment, their installation, operation, and organizational maintenance. Subjects covered in this course include large scale communication systems (AUTODIN, Long Range Radio Systems, satellite communications, etc.), microwave fundamentals, and basic theory related to digital equipment and techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 7 semester hours in communication systems, 3 in communication equipment, 3 in microwave theory, 2 in digital equipment and systems (6/79).

AR-1715-0451

TELETYPEWRITER EQUIPMENT REPAIR BY CORRESPONDENCE

Course Number: J53.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge and skills to install, test, and perform basic and advanced levels of maintenance of electrical, mechanical and electronic teletypewriter equipment.

Instruction: The course provides supervised training in the installation, testing, troubleshooting and repair of teletypewriter equipment. It covers the complete theory of operation of various teletypewriter sets and their associated equipment. The operation and use of basic types of test equipment such as multimeters and oscilloscopes is covered in fine detail. All training requires the actual equipment specified and all practice sessions in the various lessons are supervised by qualified technicians.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in electromechanics, 2 in electronics (6/79).

Related Occupation Codes: 31J.

AR-1715-0452

TACTICAL MICROWAVE SYSTEMS OPERRATOR BY CORRESPONDENCE

Course Number: J51.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 52 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide knowledge necessary to install, operate and perform minimal maintenance on microwave communications systems and equipment.

Instruction: This course provides instruction in the installation, operation and basic maintenance of microwave systems. Optional supervised on-job training is provided in the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics plus an additional 7 hours in electronics for those students completing the supervised on-job training option (6/79).

Related Occupation Codes: 26Q.

AR-1715-0453

FIELD RADIO REPAIR BY CORRESPONDENCE

Course Number: J52.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge of how to maintain field type radios and associated equipment at the functional level.

Instruction: The course provides supervised on-job training for the operation and on-going maintenance procedures on various types of field radio systems. Operations training is also provided on the test equipment necessary to check the above systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (6/79).

Related Occupation Codes: 31E.

AR-1715-0454

STRATEGIC SATELLITE/MICROWAVE SYSTEMS OPERATOR BY CORRESPONDENCE

Course Number: J21.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide individuals with an understanding of the operation of microwave and satellite systems.

Instruction: The course gives instruction in basic and advanced electronic fundamentals and radio wave transmission and reception. Microwave systems are covered in detail. The student will be able to operate, check-out, and repair the systems outlined in the course. Operation of basic types of test equipment is covered; shop practices, safety and signal security are stressed throughout the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics to include microwave and test equipment (6/79).

Related Occupation Codes: 26R.

AR-1715-0455

NCR-500 COMPUTER REPAIR BY CORRESPONDENCE

Course Number: J30.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide enlisted personnel with a general working knowledge of automatic data processing equipment (ADPE) and the fundamentals of basic electricity, electronics and digital principles and the techniques required to inspect, test and repair the NCR-500 computer.

Instruction: The course gives instruction in introductory electricity and basic test equipment operation and also provides instruction in introductory electronics, semiconductor devices, applications, and digital circuit fundamentals.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity and test equipment, 4 in basic electronics and digital circuits (6/79).

Related Occupation Codes: 34E.

AR-1715-0456

TACTICAL MICROWAVE SYSTEMS REPAIR BY CORRESPONDENCE

Course Number: J49.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: This course provides the knowledge and plots the necessary training required to perform detailed maintenance and alignment of microwave communications systems.

Instruction: This course provides for direct supervised training on various microwave systems. On-the-job training requiring hands-on work on actual equipment is stressed throughout this course. A thorough knowledge of electronics theory is required to understand the detailed circuit analysis outlined. A complete understanding of the operation, to include hands-on training of various pieces of test equipment such as multimeters, frequency counters, dual trace oscilloscopes, tube testers and solid state testers for e troubleshooting and alignment of microwave systems is provided for in this course. In all areas a supervised end-of-subject examination is given using the actual equipment involved.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 10 semester hours in electronics (5/79).

Related Occupation Codes: 26L.

AR-1715-0457

Radio Operator by Correspondence

Course Number: J47.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 52 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide basic skills and knowledge necessary for operation of single-channel AM and FM radio systems.

Instruction: This course gives instruction in the physical characteristics of various radio sets and explains how these sets are connected with their associated equipment. It covers operating procedures under different situations such as normal conditions, inclimate weather, and deliberate jamming. After taking the course the individual should be able to operate the different radios, recognize the different subunits, and perform basic checkout and preventive maintenance procedures.

Credit Recommendation: Credit is not recommended due to the limited scope and level of the course (5/79).

Related Occupation Codes: 05B.

AR-1715-0458

Signal Advanced Noncommissioned Officer (NCO) Education System, Phases I and IB by Correspondence

Course Number: SO8.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 260 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: The course is to familiarize the student with the basic principles of time division multiplexing and pulse code modulation as used in multichannel communications equipment and systems operations.

Instruction: This correspondence course gives instruction in the basic principles of division multiplexing, pulse code modulation (PCM), PCM multiplexer sets, and multichannel PCM cable systems.

Credit Recommendation: Credit is not recommended because of the limited nature of the training (5/79).

AR-1715-0459

Signal Advanced Noncommissioned Officer (NCO) Education System, Phases I and IA by Correspondence

Course Number: SO7.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 364 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To familiarize the student with the basic principles of time division multiplexing and pulse code modulation as used in multichannel communications equipment and systems operation.

Instruction: Course gives instruction in the basic principles of time division multiplexing, pulse code modulation (PCM), PCM multiplexer sets, and multichannel PCM cable systems.

Credit Recommendation: Credit is not recommended because of the limited nature of the training (5/79).

AR-1715-0460

Radio Systems Officer by Correspondence

Course Number: O505; I98.

Location: Institute for Professional Development, FT. Eustis, VA.

Length: Maximum 156 weeks (FT. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide an individual with basic knowledge and planning skill in directing and supervising the installation, operation and maintenance of a tactical station radio and field communication equipment and systems.

Instruction: This correspondence course gives instruction in fundamentals of DC and AC and basic theory of electrical networks and solid state devices. Practical instruction is also given in AM/FM transmitter and receiver systems including field exercise in both theory and practice in handling multichannel communication systems and equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 10 semester hours in electronics to include fundamentals in DC/AC, solid state devices and networks, and fundamentals of communication (5/79).

AR-1715-0461

Television Equipment Repair by Correspondence

Course Number: J50.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide an individual with the essential knowledge and skill to install, test, adjust and perform direct general support in maintenance of black-and-white and color television equipment such as vidicon camera chains, control, switching, monitor, transmitting, receiving and recording audio and associated microwave and closed circuit distribution systems.

Instruction: The course provides practical instruction on installing, adjusting, and troubleshooting the black-and-white television, color television, radio transmitter, audio systems, and associated equipment. A limited portion of this course requires prior knowledge of basic electricity and electronics as well as digital circuit fundamentals.

Credit Recommendation: Credit is not recommended because of the limited nature of the training (5/79).

AR-1715-0462

Telephone-Digital Communications Officer by Correspondence

Course Number: O405; I97.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the student with a basic knowledge of DC and AC curcuit theory.

Instruction: This correspondence course gives instruction in series and parallel resistive circuits, magnetism, electromagnetism and basic network analysis.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics technology, 4 in electromechanical technology (5/79).

AR-1715-0463

Communications-Electronics Material Management Specialty Track 72 by Correspondence

Course Number: J17.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: This course enables the student to supervise operation or material management centers for communications-electronics material.

Instruction: The course provides training in the principles related to maintenance management, supply management, mechanized stock control, combat service support, procurement and similar subjects pertaining to the operation of material management centers for communications-electronics material.

Credit Recommendation: Credit is not recommended due to the military-specific nature of the training (6/79).

AR-1715-0464

Communications-Electronics Repair Technician by Correspondence

Course Number: J19.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 208 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To present a knowledge of transistors and other semiconductor devices and of principles of communications-electronics equipment.

Instruction: The course provides instruction in the following electronic subjects: semiconductor devices and their application, power transistors, AM-FM radio transmitters and receivers, radio wave propagation, frequency synthesis, basic test equipment operation, satellite communication, multiplexing, digital circuit fundamentals, principles of radar, local and common battery telephone systems, and television principles.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 12 semester hours in basic, intermediate, and advanced electronics (6/79).

Related Occupation Codes: 286A.

AR-1715-0465

Audio-Visual Equipment Repair by Correspondence

Course Number: J45.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 52 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To assist students in developing abilities as an audio-visual equipment repairer; providing them with basic knowledge in photography, test equipment operation, shop practices, and maintenance concepts.

Instruction: The course concentrates in three main areas of instruction: photography (principles of photography including still picture camera equipment, flash photography, special photographic techniques), electronic test equipment (use of ohmmeters, voltmeters, ammeters, signal generators, and oscilloscopes) and shop practices and safety (identification, use and care of common hand tools used in the servicing of audio-visual equipment and safety practices as well as basic first aid).

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics or electromechanical (6/79).

Related Occupation Codes: 41E.

AR-1715-0466

ADMSE Repair by Correspondence

Course Number: J32.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide a working knowledge of the fundamentals of automatic data processing equipment and the techniques required to perform all levels of maintenance on the overseas AUTODIN.

Instruction: This correspondence course provides instruction in basic electronics. Theory of semiconductors and their application in amplifiers, oscillators, power supply regulation, modulation and demodulation are covered in great detail. Timing circuits and digital circuit fundamentals are covered along with punched card operation. The course also gives instruction in the operation of numerous types of multimeters and oscilloscopes and their uses in troubleshooting of the above equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electronics, 1 in operation of test equipment, 1 in digital electronics (9/79).

Related Occupation Codes: 34F.

AR-1715-0467

Avionic Navigation and Flight Control Equipment Repair by Correspondence

Course Number: J36.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide a working knowledge of principles, procedures and test equipment required to perform maintenance on electronic navigation and automatic flight control equipment.

Instruction: This correspondence course provides instruction in electricity and electronics theory and application. Electron tube theory and application to basic electronic circuitry is provided. Semiconductor devices theory and application, uses and applications of numerous types of test equipment, and troubleshooting techniques as applied to avionic navigation and flight control equipment are included.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electronics theory and application, 2 in operation and use of test equipment (9/79). Course includes a proctored end-of-course examination.

Related Occupation Codes: 35M.

AR-1715-0468

Avionic Special Equipment Repair by Correspondence

Course Number: J38.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 208 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To present a working knowledge of all the techniques required to support the maintenance on airborne radar systems operating in the microwave frequencies.

Instruction: This correspondence course provides instruction in the fundamental theory of electricity and electronics and their application to radar principles and equipment. Electron tubes theory and applications as well as semiconductor device theory and applications are covered. Course presents principles of radar transmitters and receivers along with digital fundamentals. Numerous types of test equipment theories, use, and application to the troubleshooting techniques of radar systems are covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in electronics theory and application, 2 in test equipment operation and application (9/79).

Related Occupation Codes: 35R.

AR-1715-0469

Electronic Switching Systems Repair by Correspondence

Course Number: J44.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge necessary to repair and maintain the tactical telephone communication systems used in the field.

Instruction: This course gives instruction in basic electricity and electronics theory and application. Theory of semiconductor devices and their applications is covered. Communication fundamentals and the troubleshooting, repair and maintenance of tactical telephone communication systems is covered. Operation and use of test equipment necessary to carry on these functions is also covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electronics theory and application (9/79). Credit recommended is based on completion of proctored end-of-course examination.

Related Occupation Codes: 36L.

AR-1715-0470

Dial/Manual Central Office Repair by Correspondence

Course Number: J43.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 260 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge necessary to install, operate and perform maintenance on dial and manual central office equipment.

Instruction: Course provides instruction in fundamentals of electricity and electronic theory. Electron tube and semiconductor devices theory and their application in electronic circuits are covered in great detail. Telephone systems theory and installation as well as troubleshooting and repair are covered. Some of the systems covered are local battery telephone, common battery, telephone systems, step-by-step dial central office, XY dial central office.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in electronics theory and application, 10 in telephone communication systems (9/79). Course includes proctored end-of-course examination.

Related Occupation Codes: 36H.

AR-1715-0471

Basic Electronics by Correspondence

Course Number: I67.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 52 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the basic electronic concepts necessary to enter the various career areas in electronics.

Instruction: Course provides instruction in electron tubes and their applications. Semiconductor devices and their applications in amplifiers, oscillators, power supplies, regulation, pulse and switching circuits as well as AM and FM modulators and demodulations are covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in electronics (9/79). Course includes proctored end-of-course examination.

AR-1715-0472

COMSEC Equipment Repair Technician by Correspondence

Course Number: I83.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum of 163 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide a knowledge of semiconductors, transistors teletypewriter equipment. Machine shop practices are presented to aid in the repair of the hardware involved.

Instruction: The course provides instruction in semiconductor devices and the basic test equipment operation for the troubleshooting, repair and maintenance of teletypewriter equipment. Machine shop practices are also included to aid in the repair of the teletypewriter hardware involved.

Credit Recommendation: In the vocational certificate category, 2 semester hours in machine shop practices (6/79); in the lower-division baccalaureate/associate degree category, 2 in electronics, 2 in electromechanics (6/79).

Related Occupation Codes: 341A; 290A.

AR-1715-0473

Field General COMSEC Repair by Correspondence

Course Number: J24.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the information necessary to gain the skills required to use the test equipment in the troubleshooting and repair of field communications security equipment.

Instruction: Course provides correspondence instruction in basic electricity, semiconductor devices and their various applications in electronic circuits. Instruction in digital fundamentals is also provided.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics, 1 in the operation of test equipment (9/79). Course includes proctored end-of-course examination.

Related Occupation Codes: 31S.

AR-1715-0474

COMMUNICATIONS-ELECTRONICS ENGINEERING TRACK 27 BY CORRESPONDENCE

Course Number: J15.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To prepare the signal officer to design, develop, engineer, test, construct, install and system integrate transmission switching, terminal and input/output communications equipment to include automatic data processing communications-electronics support.

Instruction: This course is designed to provide the student with knowledge related to the generation, transmission, and reception of radio signals. Presentation of the materials begins with a basic coverage of DC and AC circuits and proceeds through studies of radio transmitters, receivers, radio wave propagation and integrated communication systems. Included also in this course are detailed studies pertaining to telephone central office systems and equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 10 semester hours in electronics in an applied science cirriculum, 3 in telephony in an applied science curriculum (6/79).

AR-1715-0475

AVIONIC EQUIPMENT MAINTENANCE SUPERVISOR BY CORRESPONDENCE

Course Number: J37.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 312 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge and skills required to apply advanced maintenance techniques and to supervise maintenance activities of avionic equipment and systems.

Instruction: This correspondence course provides instruction in basic electricity and electronics. Detailed instruction in electron tubes and their applications, semiconductor devices and their applications are provided. Subjects in radio wave propagation, frequency synthesis, AM transmitters and receivers, FM radio transmitters and receivers, and single sideband transmission are explained. Operation of various pieces of test equipment such as multimeters, oscilloscopes, signal generators, frequency counters and digital readout counters are covered. Principles of radar transmitters and receivers as well as radar indicators are covered. Digital circuit fundamentals are also presented.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in electronics theory and applications, 2 in operation and use of test equipment, 6 in communications and radar principles and application (9/79). Course credit recommendation is based on completion of proctored end-of-course examination.

Related Occupation Codes: 35P.

AR-1715-0476

FIELD SYSTEMS COMSEC REPAIR BY CORRESPONDENCE

Course Number: J25.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide skills and knowledge necessary to operate test equipment and to maintain field systems communication security equipment.

Instruction: Course provides instruction in the fundamentals of electricity theory and application. Semiconductor devices theories and their application in electronic circuits are covered. Digital circuit fundamentals, communication fundamentals, tactical TDM-PCM multichannel cable communications systems are all covered. Uses and operation procedures on various types of test equipment needed to test out the above equipment is also provided for in the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics theory and application, 1 in test equipment operation (9/79). Credit recommendation is based on completion of proctored end-of-course examination.

Related Occupation Codes: 31T.

AR-1715-0477

FIXED CIPHONY REPAIR BY CORRESPONDENCE

Course Number: J27.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge required to develop the skills necessary to operate test equipment and maintain fixed ciphony COMSEC equipment.

Instruction: This correspondence course provides instruction in electricity and electronic fundamental theory and application. Semiconductor device theory of application in basic circuits is explained in great detail. Use of test equipment and their application to troubleshooting of telephone systems is also covered. Digital circuits fundamentals is included.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electronics, 1 in test equipment operation (9/79). Recommendation of credit is based on completion of proctored end-of-course examination.

Related Occupation Codes: 32F.

AR-1715-0478

ELECTRONIC INSTRUMENT REPAIR BY CORRESPONDENCE

Course Number: J33.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the skills and knowledge necessary to perform all degrees of maintenance on general purpose electronic test equipment such as multimeters, wattmeters, audio FM and AM signal generators, oscilloscopes and radio instruments.

Instruction: This correspondence course provides instruction in the fundamental theory of electricity and electronics and their applications to test equipment. Instruction in electron tubes and their application and theory of semiconductor devices and their application to the fundamental circuits found in the more general type of test equipment is covered. Operation and use of all types of electronic measuring instruments to include those that operate on digital principles are covered. This course provides for the complete foundation of electronic theory and principles for the precision measurement equipment laboratory technician.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in electronic theory and application, 2 in operation and use of test equipment (9/79). Credit recommendation is based on completion of proctored end-of-course examination.

Related Occupation Codes: 35B.

AR-1715-0479

DIGITAL SUBSCRIBER TERMINAL EQUIPMENT (DSTE) REPAIR BY CORRESPONDENCE

Course Number: J31.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: This course provides the individual with the knowledge of the fundamentals of automatic data processing (ADP) equipment and the techniques required to troubleshoot, repair, and maintain automatic digital network (AUTODIN), and digital subscriber terminal equipment (DSTE).

Instruction: This course provides instruction in basic electricity and electronics. Theory on semiconductor devices and their applications are covered along with power transistors. Multiplexing, digital circuit fundamentals is covered, as is an introduction to computer programming. All types of the more common test equipment such as oscilloscopes, frequency counters, multimeters and signal generators are covered. Punched card operation is included.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in electronics, 1 in use of test equipment, 1 in computer electronics (digital) (9/79). Course recommendation is based on proctored end-of-course examination.

Related Occupation Codes: 34F.

AR-1715-0480

FIELD RADIO MECHANIC BY CORRESPONDENCE

Course Number: J26.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the knowledge necessary to install, operate and perform preventive maintenance on field radio equipment.

Instruction: This correspondence course gives instruction in basic communication fundamentals and basic electricity to the extent necessary to operate and perform simple preventive maintenance procedures while performing the main function as radio operator.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in communication fundamentals and basic electricity (9/79). Credit recommendation is based on successful completion of proctored end-of-course examination.

Related Occupation Codes: 31V.

AR-1715-0481

Satellite Communications Ground Station Equipment Repair by Correspondence

Course Number: J23.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 260 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the training necessary to install, operate and program detailed maintenance of satellite communications ground station equipment.

Instruction: Course offers a complete understanding of basic electronics, timing circuits, microwave techniques, single side band transmitter, multiplexing, digital circuit fundamentals and the use of various pieces of the more common test equipment. Course also includes electron tubes and their applications in electronic circuits, semiconductor devices and their applications in electronic circuits; principles of FM transmitters and receivers, radio wave propagation, principles of radar timing circuits, radar indicators, and servo mechanisms.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in basic electronics and electrical, 10 in communication and radar principles, 1 in the use of test equipment (10/79). Course recommendation is based on completion of proctored end-of-course examination.

AR-1715-0482

Satellite Communications by Correspondence

Course Number: I70.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: Course provides the individual with the theories and techniques involved in satellite communications.

Instruction: This correspondence course provides instruction in semiconductor devices and their application in various electronic circuits. Digital multiplexing techniques and satellite acquisition and tracking are covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics (solid state theory and applications and digital circuit fundamentals), 3 in satellite communication techniques (10/79). Course recommendation is based on completion of proctored end-of-course examination.

AR-1715-0483

Radio Fundamentals by Correspondence

Course Number: I68.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 104 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide the individual with the background knowledge necessary to maintain and repair various radio systems.

Instruction: This course provides instruction in communication fundamentals and various types of AM and FM transceivers. Instruction in radio wave propagation, single sideband transmission and frequency synthesis is also covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in radio communications (10/79). Credit recommendation is based on completion of proctored end-of-course examination.

AR-1715-0484

Fixed Cryptographic Equipment Repair by Correspondence

Course Number: J28.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 156 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: To teach the skills necessary to troubleshoot and maintain fixed cryptographic systems COMSEC equipment.

Instruction: This course covers the skills necessary to troubleshoot and maintain fixed cryptographic systems COMSEC equipment and includes electron tube test and application, semiconductor devices and applications, power transistors, electronic digital readout counter and oscilloscope operation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in electronics, 1 in operation of test equipment (9/79). Course recommendation is based on completion of proctored end-of-course examination.

Related Occupation Codes: 32G.

AR-1715-0485

Avionic Communications Equipment Repair by Correspondence

Course Number: J35.

Location: Institute for Professional Development, Ft. Eustis, VA.

Length: Maximum 208 weeks (Ft. Eustis, VA hours).

Exhibit Dates: 1/80–Present.

Objectives: This course provides the individual with knowledge of electronics theory of operation on avionic communications equipment. The operating procedures for the test equipment necessary to check out, troubleshoot and align avionic communications equipment is also provided.

Instruction: This course provides instruction in fundamentals of electricity and electronics. Detailed instruction in electron tubes and semiconductor devices and their applications is included. Subjects in radio wave propagation, frequency synthesis, AM transmitters and receivers, FM radio transmitters and receivers, and single sideband transmissions are explored. Operation and use of various types of test equipment is taught and supervised on-the-job training is provided.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in electronics theory and application, 2 in operation and use of test equipment, 4 in communication electronics (9/79).

Related Occupation Codes: 35L.

AR-1715-0486

Pershing Missile Crewman

Course Number: 043-15E10; 15E10-OSUT.

Location: Field Artillery School, Ft. Sill, OK.

Length: 5–13 weeks (206 hours).

Exhibit Dates: 2/79–Present.

Objectives: To provide the student with the skills, knowledge and experience required to perform the duties of a Pershing missile crewman.

Instruction: The student is instructed in the procedures required to set up a Pershing missile system and perform daily maintenance procedures. These tasks include assembling the missile sections and mounting it to the launcher, operating the power generator and laying cables. NOTE: The 13 week course has 8 weeks of basic training included.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (1/80).

Related Occupation Codes: 15E.

AR-1715-0487

Pershing Operator Maintenance Assistance

Course Number: 4F-214E-A; 121-21G10.

Location: Field Artillery School, Ft. Sill, OK.

Length: 9 weeks (316 hours).

Exhibit Dates: 6/78–Present.

Objectives: To train students with a working knowledge of the assembly procedure, maintenance and operation of the Pershing missile and associated ground support equipment.

Instruction: The student is introduced to the major items of equipment that comprise the basic Pershing missile, its principle of operation, diagnostic test procedures, repair and maintenance methods. The student learns the function and purpose of each electrical and hydraulic subsystem, standard troubleshooting and repair procedures including the interpretation of computer diagnostic techniques to determine computer malfunctions. The course also includes basic 5 ton truck maintenance.

Credit Recommendation: In the vocational certificate category, 1 semester hour general technical elective (1/80), in the lower-division baccalaureate/associate degree category, 1 semester hour technical elective for students in a non-technical program (1/80).

Related Occupation Codes: 26G.

AR-1715-0488

Pershing System Maintenance

Course Number: 4F-214EB; 121-21G20.

Location: Field Artillery School, Ft. Sill, OK.

Length: 7 weeks (255 hours).

Exhibit Dates: 8/77–Present.

Objectives: To train advanced students in the troubleshooting and effective repair techniques of both the manual and electrical components of the Pershing missile ground support equipment.

Instruction: Students are instructed in procedures for tracing AC and DC voltage levels and system signals to isolate faults and perform repair of electrical subsystems. Approximately 25% of the course is devoted to working knowledge of electronic devices and circuitry including DC waves and parallel circuits, AC and DC motor functional characteristics, solid state diode applications transistor biasing and functional operation and octal number conversions.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electric and electronic circuits (1/80), in the lower-division baccalaureate/associate degree category, 2 semester hours as a technical elective for students in a non-technical program (1/80).
Related Occupation Codes: 21G.

AR-1715-0489

1. Tactical Communications Chief Noncommissioned Officers (NCO) Advanced
2. Tactical Electronic Equipment Maintenance Noncommissioned Officers (NCO) Advanced (USAFAS)

Course Number: *Version 1:* 101-31V40. *Version 2:* 1-31-C42B.
Location: Field Artillery School, Fort Sill, OK.
Length: *Version 1:* 7 weeks (246 hours). *Version 2:* 10 weeks (346 hours).
Exhibit Dates: *Version 1:* 3/79–Present. *Version 2:* 11/75–2/79.
Objectives: To prepare the NCO for the responsibility of organizing and supervising a complete field artillery communication system including wire, FM radio and cryptograph operations.
Instruction: *All Versions:* Through lecture, support and practical demonstrations the student is taught communication system principles, equipment maintenance procedures and repair of equipment. Course includes work with test equipment. *Version 1:* Stresses organization, supervision and preventative maintenance with less emphasis on troubleshooting.
Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in electronic troubleshooting and laboratory (1/80); in the lower-division baccalaureate/associate degree category, 2 semester hours in supervision and human services (1/80). *Version 2:* In the vocational certificate category, 2 semester hours in electronic troubleshooting and laboratory (1/80); In the lower-division baccalaureate/associate degree category, 2 semester hours in supervision and human relations (1/80).

AR-1715-0490

Weapons Support Radar AN/TPS-58

Course Number: 104-26BIT.
Location: Field Artillery School, Ft. Sill, OK.
Length: Self-paced 3–7 weeks (90–240 hours).
Exhibit Dates: 8/78–Present.
Objectives: To train the radar operator to perform operational tests, isolate malfunctions, and repair minor malfunctions in the radar set, plotting board, power supply and digital display.
Instruction: Students learn diagnostic test procedures and proper use of test equipment to troubleshoot, align and repair the major components of the radar installation. The student is evaluated by demonstrating his troubleshooting skills prior to graduation.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics system troubleshooting (1/80).
Related Occupation Codes: 26B.

AR-1715-0491

Weapons Support Radar Repairer

Course Number: 104-26B10.
Location: Field Artillery School, Ft. Sill, OK.
Length: Self-paced 20–31 weeks (Ft. Sill, OK hours).
Exhibit Dates: 8/78–Present.
Objectives: To provide enlisted students with knowledge to properly use test equipment in diagnostic testing to pinpoint malfunctions.
Instruction: Course includes self-paced instruction, laboratories, and performance testing using test equipment and training modules capable of accepting bugs. Instruction covers preventative maintenance procedures for a wide range of radar and associated equipment, solid state circuits and wave guide.
Credit Recommendation: In the vocational certificate category, 5 semester hours in electronic system troubleshooting and high frequency circuits (1/80). in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic system troubleshooting, high frequency circuits and electronics laboratory (1/80).
Related Occupation Codes: 26B.

AR-1715-0492

Tactical Communications Chief

Course Number: 1-31-C40B/31V30.
Location: Artillery School, Ft. Sill, OK.
Length: 9 weeks (308 hours).
Exhibit Dates: 4/78–Present.
Objectives: To train field radio mechanics as tactical communications chiefs.
Instruction: Lectures and practical exercises on the installation and operation of AM or FM radio telephone equipment, security standards, preventative maintenance, basic troubleshooting with a multimeter, radioteletypewriter procedures; message center procedures, applied communications tactical subjects, and map reading including topographic symbols and map measurements.
Credit Recommendation: Pending evaluation.
Related Occupation Codes: 31V.

AR-1715-0493

Field Artillery Radar Operator (AN/TPS-58)

Course Number: 221-17B1T.
Location: Field Artillery School, Ft. Sill, OK.
Length: Self-paced 2 weeks (Ft. Sill, OK hours).
Exhibit Dates: 2/79–Present.
Objectives: To train enlisted personnel to operate and maintain field artillery radar.
Instruction: Self-paced instruction and practical exercises in field artillery radar operation and preventative maintenance including radar site evaluation, equipment emplacement, adjustment, calibration and orientation.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/80).

AR-1715-0494

Air Defense Artillery Command and Control Officer

Course Number: 2F-14G.
Location: Air Defense School, Ft. Bliss, TX.
Length: 10 weeks (341–347 hours).
Exhibit Dates: *Version 1:* 3/78–Present. *Version 2:* 7/77–2/78.
Objectives: To provide commissioned officers with a knowledge of the characteristics, operations and functions of the AN/TSQ-73 missile minder command and control system.
Instruction: Officers will be able to assume duty as an operations officer/tactical director in a Nike Hercules or Improved Hawk ADA battalion or group after studying digital fundamentals, system initialization, console operations and radar interface equipment and simulation.
Credit Recommendation: Pending evaluation.

AR-1715-0495

Vulcan/Forward Area Alerting Radar Mechanic
(Vulcan/FAAR Mechanic)

Course Number: 121-24M10.
Location: Air Defense School, Ft. Bliss, TX.
Length: 20 weeks (726 hours).
Exhibit Dates: 6/78–Present.
Objectives: To provide knowledge to perform organizational maintenance on Vulcan weapons systems/forward area alerting radar.
Instruction: Phase I includes missile electronic fundamentals, digital fundamentals, organizational maintenance of the radar set. Phase II covers forward area alerting radar and is self-paced.
Credit Recommendation: Pending evaluation

AR-1715-0496

Improved Hawk Continuous Wave (CW) Radar Repairer

Course Number: 104-24K1T/2T/3T.
Location: Missile and Munitions School, Redstone Arsenal, AL.
Length: 2 weeks (61 hours).
Exhibit Dates: 1/80–Present.
Objectives: To provide the knowledge and techniques for inspecting, testing and repairing the Improved Hawk PIP equipment associated with continuous wave radar and associated test equipment at direct and general support levels.
Instruction: Topics include repair high voltage power supply and repair ICWAR main power and power supply circuits and transmitter circuits.
Credit Recommendation: Pending evaluation.

AR-1715-0497

Improved Hawk Fire Control Repairer Transition (PIP)

Course Number: 104-24H1T/2T/3T.
Location: Missile and Munitions School, Redstone Arsenal, AL.
Length: 9–10 weeks (293 hours).
Exhibit Dates: 1/80–Present.
Objectives: To provide the student with knowledge and techniques for inspecting, testing, and repairing the Improved Hawk IBCC, IPCP and ICC.
Instruction: Course covers fire control equipment including transmit and receive data processing, SDE receiver and transmit circuits, memory addressing and symbol generator and intensity gate generation circuits.
Credit Recommendation: Pending evaluation.

AR-1715-0498

Ground Surveillance Radar Crewman

Course Number: 221-17K10.
Location: Intelligence School, Ft. Huachuca, AZ.

Length: 4-5 weeks (120-160 hours).
Exhibit Dates: 2/80-Present.

Objectives: To train personnel in the operation and maintenance of ground surveillance radar sets and associated equipment.

Instruction: The course covers map reading and how to install, operate and disassemble two different radar sets. Operator maintenance of the sets is covered with discussion of multimeters and batteries; also covered are procedures for radio and telephone communications.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electromechanical maintenance(6/79); in the lower-division baccalaureate/associate degree category, 1 in electromechanical maintenance, 1 in map reading (6/79).

AR-1715-0499

Improved Hawk Information and Coordination Central Maintenance Transition (PIP)

Course Number: 104-24G1T/2T/3T.
Location: Air Defense School, Ft. Bliss, TX.
Length: 5 weeks (159 hours).
Exhibit Dates: 10/79-Present.

Objectives: To provide personnel with knowledge of organizational maintenance for the Product Improvement Program (PIP) of the Improved Continuous Wave Acquisition Radar.

Instruction: Includes use of test equipment and procedures to assume that the equipment operates within prescribed tolerances; also functional theory of operation of the equipment, use of diagnostic equipment and diagnostic procedures, troubleshooting, and organizational level repair.

Credit Recommendation: Pending evaluation.

AR-1715-0500

Tactical Fire Direction System (TACFIRE) Direct Support Maintenance

Course Number: 4B-F16; 113-F1.
Location: Field Artillery School, Ft. Sill, OK.
Length: 12-13 weeks (459-460 hours).
Exhibit Dates: 11/79-Present.

Objectives: To train maintenance personnel in the techniques and concepts pertaining to maintenance of the TACFIRE system.

Instruction: Course includes system initialization, computer maintenance and basics, communications equipment and artillery control console.

Credit Recommendation: Pending evaluation.

AR-1715-0501

Operation of the Automated Multimedia Exchange (AMME) System

Course Number: None.
Location: Communications Electronics Installation, Ft. Huachuca, AZ.
Length: 2 weeks (80 hours).
Exhibit Dates: 12/79-Present.

Objectives: To provide enlisted personnel with a specialized training on this system.

Instruction: Includes message entry, traffic management, and operation equipment maintenance. Top secret clearance required.

Credit Recommendation: Pending evaluation.

AR-1715-0502

Electronic Warfare (EW)/Intercept Systems Repairer, Basic Technical

Course Number: 102-33S30.
Location: Intelligence School, Ft. Devens, MA.
Length: 19 weeks (632 hours).
Exhibit Dates: 12/79-Present.

Objectives: To prepare selected electronics maintenance personnel for assumption of mid-level noncommissioned officer technical and managerial duties.

Instruction: Course begins with advanced electromagnetic wave and signal and spectra analysis, theory and their practical applications to electronic equipment. Digital electronics is examined in depth, including digital theory, computer language, microprocessors, computers and computer architecture. Digital theory is then applied to understanding troubleshooting and aligning all types of digital equipment, including remotely controlled systems and advanced transmission identification equipment. Use of test and measurement equipment is stressed.

Credit Recommendation: Pending evaluation.

AR-1715-0503

Aerial Surveillance Sensor Repairer

Course Number: 104-26E10.
Location: Intelligence School, Ft. Huachuca, AZ.
Length: 47 weeks (1912 hours).
Exhibit Dates: 5/79-Present.

Objectives: To train enlisted personnel with functional knowledge to maintain aerial surveillance sensing equipment.

Instruction: Lectures and practical application in electronics and mechanics in maintaining aerial survey sensor equipment. Course includes the study of electronic devices, testing equipment, controls and servos, mechanical systems, optics, photography, digital circuits, troubleshooting, machine tooling and microwaves.

Credit Recommendation: In the vocational certificate category, 2 semester hours in photographic repair, 2 in machine tool operations, 3 in introduction to electronics, 1 in technical mathematics, 2 in AC/DC theory, 2 in solid state circuits, 2 in troubleshooting techniques, 2 in digital circuits and, for National Guard and reserve personnel, 2 in vacuum tube circuits (5/79); in the lower-division baccalaureate/associate degree category, 3 in microwaves, 3 in solid state, 3 in digital, 2 in computer circuits, 3 in electro-mechanical and industrial control circuits, 2 in basic photography, 2 in optics, 4 in electronic circuits, 4 in troubleshooting electronic and electro-mechanical circuits and additional 3 in introduction to electronics, 1 in technical mathematics, 2 in AC/DC theory, 2 in solid-state circuits, 2 in troubleshooting techniques, 2 in digital circuits and, for National Guard and reserve personnel, 2 in vacuum tube circuits (5/79).

Related Occupation Codes: 26E.

AR-1715-0504

Communications Technical Control Center

Course Number: 622-ASIV4.
Location: Signal School, Ft. Gordon, GA.
Length: 5 weeks (177 hours).
Exhibit Dates: 4/79-Present.

Objectives: To provide enlisted personnel with knowledge to troubleshoot, repair and maintain the control center.

Instruction: Course covers such subjects as soldering and unsoldering, equipment evaluation procedures, troubleshooting the attenuator and line amplifier.

Credit Recommendation: Pending evaluation.

AR-1716-0001

Textile Repair

Course Number: 760-43J20; 760-461.1; 10-R-461.1; 10-E-15.
Location: Quartermaster School, Ft. Lee, VA.
Length: 8 weeks (320 hours).
Exhibit Dates: 3/56-Present.

Objectives: To train personnel to alter and repair individual clothing, textile items, and raincoats.

Instruction: Lectures and practical exercises in textile repair, including Army maintenance system; inspecting, marking, classifying, resizing, and fitting of clothing; hand sewing; operator maintenance and adjustments of clothing and textile repair sewing machines; machine sewing; clothing and textile shop operation; mobile clothing trainer operations; and moral leadership and responsibility.

Credit Recommendation: In the vocational certificate category, 4 semester hours in power sewing machines (6/74).

Related Occupation Codes: 43A; 43J.

AR-1716-0002

Textile Repair, Skill Development Base

Course Number: 760-43J40-I.
Location: Quartermaster School, Ft. Lee, VA.
Length: 13 weeks (461 hours).
Exhibit Dates: 10/68-Present.

Objectives: To train textile repairmen to supervise textile, canvas, and shoe repair operations and maintenance.

Instruction: Lectures and practical exercises in nomenclature; identification and repair methods used on canvas, tentage, webbed equipage, and shoes; and practical experience in repair methods and equipment maintenance and operation.

Credit Recommendation: In the vocational certificate category, 2 semester hours in power sewing machines, 3 in shoemaking, 1 in textile fabrication (6/74).

Related Occupation Codes: 43J; 43M.

AR-1716-0003

Canvas and Webbed Equipage Repair (Canvas and Leather Repair)

Course Number: 760-43K20; 10-R-462.1; 10-E-11.
Location: Quartermaster School, Ft. Lee, VA.
Length: 7-8 weeks (245-282 hours).
Exhibit Dates: 3/56-Present.

Objectives: To train enlisted personnel in the duties and skills required to inspect, mark, repair and store tentage, body armor, and canvas and webbed items.

Instruction: Lectures and practical exercises in canvas and webbed equipage repair. Topics include the use of sewing machines; the repair of canvas items, including body armor, seats of jeeps, and tents; mobile textile trailer operations; and the operation of a canvas and webbed repair shop.

Credit Recommendation: In the vocational certificate category, 2 semester hours in power sewing machines, 1 in upholstery, 2 in textile fabrication (6/74).

Related Occupation Codes: 43K.

AR-1716-0004

1. LAUNDRY AND DRYCLEANING OPERATIONS (NAVY)
2. LAUNDRY AND DRYCLEANING OPERATIONS (NAVY)

Course Number: None.

Location: Quartermaster School, Ft. Lee, VA.

Length: *Version 1:* 4 weeks (200 hours). *Version 2:* 6 weeks (264 hours).

Exhibit Dates: *Version 1:* 10/70–Present. *Version 2:* 4/63–9/70.

Objectives: To train enlisted personnel to dry-clean and launder and to operate dry-cleaning equipment.

Instruction: Lectures and practical exercises in laundry and dry cleaning, and in dry-cleaning equipment operation, including marking, finishing, and assembly of clothing, use of various chemicals and equipment, preventive maintenance of dry-cleaning equipment, and fiber and fabric identification, construction, and chemical treatment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in laundry and dry cleaning (6/74). *Version 2:* In the vocational certificate category, 4 semester hours in laundry and dry cleaning (6/74).

AR-1716-0005

LAUNDRY, BATH AND IMPREGNATION
(Laundry and Impregnation)

Course Number: *All Versions:* 840-57E20. *Version 2:* 10-R-546;1 10-E-9.

Location: Quartermaster School, Ft. Lee, VA.

Length: *Version 1:* 5 weeks (167 hours). *Version 2:* 7–8 weeks (240–280 hours).

Exhibit Dates: *Version 1:* 5/74–Present. *Version 2:* 3/56–4/74.

Objectives: To train enlisted personnel as laundry, bath, and impregnation specialists.

Instruction: *All Versions:* Lectures and practical exercises in laundry, bath and impregnation, including laundry and impregnating procedures; maintenance procedures; operation and operator maintenance of field bath and delousing equipment; and operation and maintenance of mobile laundry equipment. *Version 2:* Topics include operation and operator maintenance of dry-cleaning equipment and dry-cleaning procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in laundry operation (6/75). *Version 2:* In the vocational certificate category, 2 semester hours in laundry operations, 1 in dry cleaning (5/74).

Related Occupation Codes: 57E.

AR-1716-0006

LAUNDRY AND FUMIGATION OFFICER

Course Number: 10-O-19.

Location: Quartermaster School, Ft. Lee, VA.

Length: 6 weeks (210 hours).

Exhibit Dates: 3/56–12/68.

Objectives: To train selected quartermaster officers to supervise and direct the operation of mobile, semimobile, or fixed laundries; dry-cleaning plants; shower-bath units; or fumigation and delousing facilities.

Instruction: Lectures and practical exercises in the supervision of mobile, semimobile, or fixed laundries; dry-cleaning plants; shower-bath units; or fumigation and delousing facilities. Course includes laundry and dry-cleaning procedures; operation of a fixed dry-cleaning plant; mobile laundry equipment operation and maintenance; and fumigation and bath operations.

Credit Recommendation: In the vocational certificate category, 4 semester hours in laundry and dry-cleaning management (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in laundry and dry-cleaning management (8/74).

AR-1717-0001

MATERIEL MAINTENANCE MANAGEMENT INTERN PROGRAM

Course Number: None.

Location: DARCOM Intern Training Center, Red River Depot, Texarkana, TX.

Length: 48 weeks (1,920 hours).

Exhibit Dates: 7/68–Present.

Objectives: To provide students with training which will enhance their ability to perform effectively in various Army maintenance management positions.

Instruction: Lectures, conferences, cases, practical exercises, guest speakers, field trips, on-the-job training, demonstrations, group discussions, and research covering plans, programs, and budgets as they relate to maintenance control systems, control techniques, management of maintenance operations, the relationship of maintenance to other activities, and the importance of the human element in management. Topics include general management, production planning and control, maintenance management, and introduction to blueprint reading, automotive mechanics, and basic electricity.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in introduction to blueprint reading, automotive mechanics, and basic electricity (12/76); in the upper-division baccalaureate category, 6 semester hours in general management, 5 in production planning and control, 6 in maintenance management (12/76).

AR-1717-0002

AIR DEFENSE MISSILE REPAIR (23-CMF) NONCOMMISSIONED OFFICER (NCO) ADVANCED
(Air Defense (AD-CMF) Noncommissioned Officer (NCO) Advanced)

Course Number: 1-23-C42B; 1-AD-C42B.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 10–12 weeks (318–442 hours).

Exhibit Dates: *Version 1:* 12/77–Present. *Version 2:* 4/73–11/77.

Objectives: To provide noncommissioned officers with advanced training in management techniques and air defense operations.

Instruction: *Version 1:* Lectures and practical exercises in management, materials and supply handling and control, data processing, Nike Hercules and Hawk Missile system analysis and air defense operations and intelligence. *Version 2:* Lectures and practical exercises in management, data processing, Nike Hercules and Hawk missile system analysis, and air defense operations and intelligence.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours maintenance management, 2 in materials/ supply handling and control and 1 in communicative arts (8/79). *All Versions:* Credit is not recommended because of the limited technical nature of the course (6/75).

Related Occupation Codes: 23V; 23W; 24V; 00Z; 22K; 22L; 22N; 23Q; 23N; 23S; 23T; 23U; 24H; 24J; 24K; 46D; 24L; 26H.

AR-1717-0003

NUCLEAR WEAPONS MAINTENANCE WARRANT OFFICER ADVANCED

Course Number: 4-9-C32; 4-9-C32E.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 9 weeks (320 hours).

Exhibit Dates: 1/72–10/76.

Objectives: To provide warrant officers with a working knowledge of nuclear weapons management.

Instruction: Conferences on nuclear weapons, management, special warfare operations, inspections, and quality assurance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in management (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in management (2/74); in the upper-division baccalaureate category, 2 semester hours in management (2/74).

AR-1717-0004

AIRPLANE TECHNICAL INSPECTOR
(Fixed Wing Technical Inspector)

Course Number: *All Versions:* 600-67F20. *Version 2:* 600-679;4 55-R-679.4.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 11 weeks (372 hours). *Version 2:* 9 weeks (318–334 hours).

Exhibit Dates: *Version 1:* 8/74–Present. *Version 2:* 6/65–7/74.

Objectives: To train enlisted personnel in the techniques and procedures of technical inspection of fixed-wing light aircraft.

Instruction: Lectures and practical exercises in maintenance management, maintenance shop operations, engine troubleshooting, and aircraft inspections on fixed-wing light aircraft.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in aviation maintenance management (6/75). *Version 2:* In the vocational certificate category, 4 semester hours in aircraft inspections and maintenance management (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft inspections and maintenance management (3/74); in the upper-division baccalaureate category, 2 semester hours in aircraft inspections and maintenance management (3/74).

Related Occupation Codes: 67B; 67C; 67G; 67H; 67F; 67Z.

AR-1717-0005

AIRCRAFT MAINTENANCE (AV-CMF) NONCOMMISSIONED OFFICER (NCO) ADVANCED

Course Number: 6-AV-C42.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 9–10 weeks (325–345 hours). *Version 2:* 12 weeks (363 hours).

Exhibit Dates: *Version 1:* 12/73–Present. *Version 2:* 8/72–11/73.

Objectives: To provide noncommissioned officers with advanced training in aircraft maintenance management.

Instruction: Lectures and practical exercises in military operations; military management, including personnel, records, and logistics; aviation maintenance management and supervision; and aviation maintenance.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in aviation maintenance management (6/75). *Version 2:* In the vocational certificate category, 6 semester hours in aircraft maintenance management (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft maintenance management (3/74); in the upper-division baccalaureate category, credit in aircraft maintenance management on the basis of institutional evaluation (3/74).

Related Occupation Codes: 67B; 67C; 67F; 67G; 67H; 67M; 67N; 67P; 67U; 67V; 67W; 67X; 67Y; 67Z; 68B; 68D; 68E; 68F; 68G; 68H.

AR-1717-0006

Aircraft Maintenance (AV-CMF) Noncommissioned Officer (NCO) Basic

Course Number: 6-AV-C40.

Location: Transportation School, Ft. Eustis, VA.

Length: 9–12 weeks (321–403 hours).

Exhibit Dates: 7/72–Present.

Objectives: To provide enlisted personnel with training in aviation maintenance management.

Instruction: Lectures and practical training in aviation systems maintenance, military operations, leadership training, maintenance management, airframe repair, turbine engines, and aircraft repair performance tests.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision, 3 in aviation maintenance management, and 3 in aircraft systems maintenance (6/75).

Related Occupation Codes: 67B; 67N; 67C; 67G; 67H; 67P; 67T; 67U; 67X; 67Y; 67V; 67M; 68B; 68D; 68E; 68F; 68G; 68H.

OV-1 Airplane Repair Specialist Candidate

(OV-1 Airplane Repair, Skill Development Base)

Course Number: 600-67H20-I.

Location: Transportation School, Ft. Eustis, VA.

Length: 12–13 weeks (480–534 hours).

Exhibit Dates: 10/68–Present.

Objectives: To train aircraft repairmen to maintain and repair OV-1 aircraft.

Instruction: Lectures and practical exercises in leadership, maintenance management, and familiarization with the OV-1 aircraft.

Credit Recommendation: In the vocational certificate category, 1 semester hour in aviation maintenance management (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aviation maintenance management (3/74); in the upper-division baccalaureate category, 2 semester hours in aviation maintenance management (3/74).

Related Occupation Codes: 67H.

AR-1717-0008

OH-13/OH-23 Helicopter Repairman, Skill Development Base

Course Number: 600-67M20-I.

Location: Aviation School, Ft. Rucker, AL.

Length: 13 weeks (513 hours).

Exhibit Dates: 1/69–Present.

Objectives: To train enlisted personnel in OH-13/OH-23 helicopter repair and maintenance management.

Instruction: Lectures and practical exercises in leadership; communication skills; aviation maintenance management; OH-13/OH-23 helicopter inspection, maintenance, and repair; and aircraft life support equipment inspection, maintenance, and repair procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in aviation maintenance management (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aviation maintenance management (3/74); in the upper-division baccalaureate category, 2 semester hours in aviation maintenance management (3/74).

Related Occupation Codes: 67M; 67W.

AR-1717-0009

1. Aircraft Maintenance Supervisor
2. Aircraft Maintenance Supervisor
3. Army Aviation Maintenance Management

Course Number: *Version 1:* 600-67Z40. *Version 3:* 55-R-679;6 55-R-671;7 55-R-672;7 55-R-673;7 55-R-674.7.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 8 weeks (273 hours). *Version 2:* 5 weeks (175–181 hours). *Version 3:* 8 weeks (282 hours).

Exhibit Dates: *Version 1:* 9/66–12/68. *Version 2:* 7/60–8/66. *Version 3:* 3/58–6/60.

Objectives: To provide selected enlisted personnel with advanced training in aviation maintenance management, production, and quality control.

Instruction: Lectures and practical exercises in management, general and technical inspection, maintenance procedures, aircraft components maintenance and repair, planning and controls, and shop management.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in shop management (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in shop management (2/74); in the upper-division baccalaureate category, 2 semester hours in shop management (2/74). *Version 2:* In the vocational certificate category, 3 semester hours in shop management (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in shop management (2/74); in the upper-division baccalaureate category, 2 semester hours in shop management (2/74). *Version 3:* In the vocational certificate category, 4 semester hours in shop management (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in shop management (2/74); in the upper-division baccalaureate category, 2 semester hours in shop management (2/74).

Related Occupation Codes: 67F; 67W; 67Z.

Petroleum (PT-CMF)
Noncommissioned Officer (NCO)
Basic (F6W)

Course Number: 8-PT-C40.

Location: Quartermaster School, Ft. Lee, VA.

Length: 12 weeks (422 hours).

Exhibit Dates: 11/72–Present.

Objectives: To train junior noncommissioned officers to perform as senior noncommissioned officers in basic petroleum products management.

Instruction: Lectures and practical exercises in petroleum products management, including leadership, logistical combat support, communicative techniques, class III supply point operations, terminal operations, military pipeline operations, general petroleum subjects and ground vehicles, laboratory management and maintenance of laboratory equipment, evaluation of laboratory test reports, and operation, maintenance, and troubleshooting of CFR test engines.

Credit Recommendation: In the vocational certificate category, 8 semester hours in industrial management (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in industrial management (6/74); in the upper-division baccalaureate category, 3 semester hours in industrial management (6/74).

Related Occupation Codes: 76W.

AR-1717-0013

Petroleum (PT-CMF)
Noncommissioned Officer (NCO)
Basic (92C)

Course Number: 8-PT-C40.

Location: Quartermaster School, Ft. Lee, VA.

Length: 8 weeks (294 hours).

Exhibit Dates: 11/72–Present.

Objectives: To train junior noncommissioned officers to perform as senior noncommissioned officers in basic petroleum products management.

Instruction: Lectures and practical exercises in petroleum products management, including leadership, logistical combat support, communicative techniques, class III supply point operations, terminal operations, military pipeline operations, general petroleum subjects and ground vehicles, laboratory management and maintenance of laboratory equipment, evaluation of laboratory test reports, and operation, maintenance, and troubleshooting of CFR test engines.

Credit Recommendation: In the vocational certificate category, 6 semester hours as an elective in industrial management (6/74); in the lower-division baccalaureate/associate degree category, 5 semester hours as an elective in industrial management (6/74); in the upper-division baccalaureate category, 3 semester hours as an elective in industrial management (6/74).

Related Occupation Codes: 92C.

AR-1717-0014

Armament Maintenance and Repair
Officer

Course Number: *All Versions:* 4E-4808. *Version 2:* 9-B-4808.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 10–14 weeks (352–441 hours). *Version 2:* 6–7 weeks (210–256 hours).

Exhibit Dates: *Version 1:* 10/70–Present. *Version 2:* 10/56–9/70.

Objectives: To train commissioned and warrant officers to supervise repair and maintenance of small arms, artillery and artillery fire control materiel.

Instruction: *All Versions:* Lectures and practical exercises in the supervision of the repair and maintenance of small arms, artillery and artillery fire control materiel, including maintenance management, shop operation, communication equipment, and aircraft armament subsystems; and in inspection, malfunction diagnosis, disassembly, reassembly and testing of rifles, machine guns, tank turrets, artillery, recoilless rifles, and air defense and fire direction equipment. *Version 1:* Includes maintenance operations. *Version 2:* Includes bore evaluation and range firing.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in industrial management (5/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in industrial management (5/74).

AR-1717-0015

Fixed Plant Communications
Equipment Maintenance (CM-CMF) NCO Advanced

Course Number: 1-CM-C42.

Location: Signal School, Ft. Monmouth, NJ.

Length: 11 weeks (383 hours).

Exhibit Dates: 7/73–Present.

Objectives: To train experienced personnel to maintain and repair fixed-plant communications equipment.

Instruction: Lectures and practical exercises in fixed-plant communications equipment maintenance, including general military subjects, command and staff operations, combined arms, special weapons and CBR operations, applied communications, leadership, administration and management, combat service support operations, logistics, satellite communications, communications security, fixed-station radio communications, data processing and data communications, and dial exchange equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in administrative management (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in administrative management (6/74); in the upper-division baccalaureate category, 2 semester hours in administrative management (6/74).

Related Occupation Codes: 26V; 32D; 32E; 32F; 32G; 32H; 32Z.

AR-1717-0016

Communications Operations (CO-CMF)
NCO Basic

Course Number: 5-CO-C40A.

Location: Signal School, Ft. Gordon, GA; Southeastern Signal School, Ft. Gordon, GA.

Length: 8–12 weeks (286–475 hours).

Exhibit Dates: 2/73–Present.

Objectives: To qualify enlisted personnel as noncommissioned officers in communications operations.

Instruction: Lectures and practical exercises in communications operations, including leadership; career management and administrative technical training; radio relay and carrier, communications center, data terminal, radio teletypewriter, field radio, field wire, antenna, lineman, cable splicer, switchboard, and circuit controller operations; and functional and field training.

Credit Recommendation: In the vocational certificate category, 1 semester hour in leadership (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in leadership (6/74).

Related Occupation Codes: 05B; 05C; 05E; 05F.

AR-1717-0017

Combat Area Surveillance Radar
Repair, Specialist Candidate
(Combat Area Surveillance Radar Repair,
Skill Development Base)

Course Number: 104-26C30-I.

Location: Signal School, Ft. Monmouth, NJ.

Length: 12 weeks (584–624 hours).

Exhibit Dates: 10/68–Present.

Objectives: To qualify enlisted personnel as supervisors or technicians in combat area surveillance radar repair.

Instruction: Lectures on the duties and responsibilities of supervisors and technicians in combat area surveillance radar repair. Course includes leadership principles, maintenance and supply management, shop organization and administration, installation requirements, direct and general support maintenance, and techniques of military instruction.

Credit Recommendation: In the vocational certificate category, 2 semester hours in supervisory training or human relations (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in supervisory training or human relations (6/74).

Related Occupation Codes: 26C; 26W.

AR-1717-0018

Combat Surveillance and Target
Acquisition (SA-CMF) NCO Basic

Course Number: 2-SA-C40B.

Location: Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ.

Length: 10–12 weeks (362–424 hours).

Exhibit Dates: 12/72–Present.

Objectives: To train enlisted personnel as non-integrated radar maintenance noncommissioned officers.

Instruction: Lectures and practical exercises on non-integrated radar maintenance, including individual career development, individual and mass communications, company administration, company operations, army organization and operations, advanced map and navigation principles, communications, STANO, ground surveillance radar operation procedures, new equipment training, trends and developments, airborne photographic surveillance, specific surveillance systems, and specific aircraft and systems.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/74).

Related Occupation Codes: 17K; 17L; 17M.

AR-1717-0019

Non-Integrated Radar Maintenance
(RM-CMF) Noncommissioned
Officer (NCO) Basic

Course Number: 1-RM-C40B.

Location: Combat Surveillance and Electronic Warfare School, Ft. Huachuca, AZ.

Length: 12 weeks (426 hours).

Exhibit Dates: 12/73–12/78.

Objectives: To train enlisted personnel as non-integrated radar maintenance noncommissioned officers.

Instruction: Lectures and practical exercises on non-integrated radar maintenance, including individual career development, individual and mass communications, company administration, company operations, army organization and operations, advanced map and navigation principles, communications, STANO, ground surveillance radar operations procedures, new equipment training, trends and developments, airborne photographic surveillance, specific surveillance systems, and specific aircraft and systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in maintenance management (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance management (6/74).

Related Occupation Codes: 26C; 26K; 26M; 26N.

AR-1717-0020

Non-Integrated Radar Maintenance (RM-CMF) Noncommissioned Officer (NCO) Advanced

Course Number: 1-RM-C42.

Location: Signal School, Ft. Monmouth, NJ.

Length: 10–11 weeks (369–383 hours).

Exhibit Dates: 7/73–Present.

Objectives: To qualify enlisted personnel as advanced noncommissioned officers in non-integrated radar maintenance.

Instruction: Lectures and practical exercises in non-integrated radar maintenance, including general military subjects, command and staff operations, combined arms, special weapons and CBR operations, applied communications, fixed-station communications, radar equipment communications security, satellite communications, logistics, combat service support operations, administration and management, and communicative arts or human relations and management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in administrative management (6/74).

Related Occupation Codes: 26H; 26K; 26M; 26P; 26W.

AR-1717-0021

Aircraft Maintenance Officer (Phases I, II and III)

Course Number: 4D-4823; 4D-671B; 4D-671C.

Location: Transportation School, Ft. Eustis, VA.

Length: 18 weeks (672 hours).

Exhibit Dates: 6/68–9/69.

Objectives: To train commissioned and warrant officers as aircraft maintenance officers.

Instruction: Lectures and practical exercises on organizational, direct, and general support aircraft maintenance and maintenance management procedures, including logistics, management training, aviation maintenance support, maintenance management, fixed-wing and rotary-wing aircraft, aircraft component repair, aircraft welding, specific technical subjects, basic aerodynamics, fuels, lubricants, dispensing equipment, safety procedures, and corrosion control.

Credit Recommendation: In the vocational certificate category, 2 semester hours in industrial management (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in industrial management (6/74); in the upper-division baccalaureate category, 2 semester hours in industrial management (6/74).

Related Occupation Codes: 160A; 103A.

AR-1717-0022

Aircraft Maintenance Officer

Course Number: *All Versions:* 55-O-16. *Version 1:* 55-B-4823; 55-B-671B; 55-B-671C.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 14–16 weeks (496–549 hours). *Version 2:* 12 weeks (433 hours).

Exhibit Dates: *Version 1:* 4/55–5/68. *Version 2:* 3/54–3/55.

Objectives: To train commissioned and warrant officers in aircraft maintenance and maintenance management procedures.

Instruction: *All Versions:* Lectures and practical exercises in aircraft maintenance and maintenance management procedures, including logistics, maintenance fundamentals, maintenance operations, fixed- and rotary-wing aircraft, and aircraft component repair. *Version 1:* Instruction includes personnel management, financial management and inventory accounting, programming and budget system, and management structure.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in industrial management (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in industrial management (6/74); in the upper-division baccalaureate category, 2 semester hours in industrial management (6/74). *All Versions:* Credit is not recommended because of the limited technical nature of the course (6/74).

Related Occupation Codes: 160A; 103A.

AR-1717-0023

Aircraft Maintenance Officer and Repair Technician (Phase I)
(Aircraft Maintenance Officer (Phase I))

Course Number: 4D-4823; 4D-671B; 4D-671C; 4D-671D; 4D-671E.

Location: Transportation School, Ft. Eustis, VA.

Length: 13 weeks (451–472 hours).

Exhibit Dates: 8/70–9/74.

Objectives: To train commissioned and warrant officers as aircraft maintenance officers and repair technicians.

Instruction: Lectures and practical exercises in aircraft maintenance management procedures, including logistics, management training, aviation maintenance support, maintenance fundamentals, applied management, maintenance and shop operations, fixed-wing aircraft, multiengine helicopters, single-engine helicopters, aircraft armament and recovery, and field and mechanized stock-control procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in industrial management (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in industrial management (6/74); in the upper-division baccalaureate category, 2 semester hours in industrial management (6/74).

Related Occupation Codes: 160A; 103A; 100Q; 100R; 100B.

AR-1717-0024

Aircraft Maintenance Officer (Phase IV)

Course Number: 4D-4823; 4D-671B; 4D-671C; 4D-671D; 4D-671E.

Location: Transportation School, Ft. Eustis, VA.

Length: 3 weeks (94 hours).

Exhibit Dates: 6/68–9/74.

Objectives: To qualify commissioned or warrant officer aviators with experience in aircraft maintenance as maintenance test pilots.

Instruction: Lectures and practical exercises in detection and diagnosis of, and prescription of appropriate corrective action for, problems encountered in preflight, ground run, maintenance and functional flight tests of OV-1 aircraft, including OV-1 design and standards, functional flight test, AC and DC electrical systems, hydraulic systems, propeller and rigging, flight control system, utility and environmental systems, Martin-Baker J-5 ejection seat, instruments, turbine engine analysis, and fuel control.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/74).

Related Occupation Codes: 160A; 103A.

AR-1717-0025

Aircraft Maintenance Officer (Phase V)

Course Number: 4D-4823; 4D-671B; 4D-671C.

Location: Transportation School, Ft. Eustis, VA.

Length: 3 weeks (108 hours).

Exhibit Dates: 6/68–9/74.

Objectives: To train commissioned and warrant officer aviators experienced in aircraft maintenance to perform as maintenance test pilots.

Instruction: Lectures and practical exercises in detection and diagnosis of, and prescription of appropriate corrective action for, problems encountered during a preflight, ground run, maintenance and functional flight test of OH-6 and OH-58 helicopters, including functional test flight, test flight troubleshooting, functional test flight vibrations, anti-torque system, electrical instrument and warning system, maintenance readiness inspection, and airframe and engine fuel system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

Related Occupation Codes: 160A; 103A.

AR-1717-0026

Aircraft Maintenance Officer (Phase III)

Course Number: 4D-4823; 4D-671B; 4D-671C; 4D-671E.

Location: Transportation School, Ft. Eustis, VA.

Length: 3 weeks (106 hours).

Exhibit Dates: 6/68–9/74.

Objectives: To train aircraft maintenance officers to perform as maintenance test pilots.

Instruction: Lectures and practical exercises in detection and diagnosis of, and prescription of appropriate corrective action for, problems encountered in preflight and functional flight tests of CH-47 helicopters, including general information and preflight review, airframe and fuel systems, flight control neutral rig checks and hydraulic systems, AC-DC electrical system, blade tracking, hover and forward flight checks, SAS and speed trim introduction and troubleshooting, and T-55 turbine engine systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

AR-1717-0027

AIRCRAFT MAINTENANCE OFFICER (PHASE II)

Course Number: 4D-4823; 4D-671B; 4D-671C.

Location: Transportation School, Ft. Eustis, VA.

Length: 3 weeks (116 hours).

Exhibit Dates: 6/68–9/74.

Objectives: To train commissioned officers or warrant officers to detect and diagnose problems related to helicopter flight clearance.

Instruction: Lectures and practical exercises in the duties of aircraft maintenance officers. Course includes technical topics relating to the design and functions of helicopters.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

AR-1717-0028

MAINTENANCE SUPERVISOR

(Intercept Equipment Maintenance Supervisor)

Course Number: 102-F8; 102-33D40; 32-R-286.6.

Location: Security Agency, Ft. Devens, MA.

Length: 17–27 weeks (605 hours).

Exhibit Dates: 1/64–Present.

Objectives: To train personnel to perform as maintenance supervisors.

Instruction: Lectures and practical exercises in the duties of USASA maintenance supervisors, including functions of NSA and organization, missions, and function of USASA; state-of-the-art electronics devices; intercept receiving systems; ECM/DF systems; intercept recording systems; intercept demultiplexing systems; automatic data processing systems; communciations equipment; maintenance concepts; principles of management; resources management; administration; and signal supply and training management.

Credit Recommendation: In the vocational certificate category, 3 semester hours in principles of management (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in principles of management (6/74); in the upper-division baccalaureate category, 3 semester hours in principles of management (6/74).

Related Occupation Codes: 33C; 33D; 33F; 33G.

AR-1717-0029

PERSHING GUIDANCE AND CONTROL REPAIRMAN I(A) NONCOMMISSIONED OFFICER (NCO) ADVANCED

Course Number: 121-21L50-EC.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 13 weeks (477 hours).

Exhibit Dates: 11/70–3/73.

Objectives: To train enlisted personnel as senior noncommissioned administrators of Pershing missile guidance and control repair units.

Instruction: Lectures and practical exercises in repair of Pershing missile guidance and control systems. Course includes military organization and functions, and Pershing missile ancillary test equipment.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics laboratory, 6 in business management (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory, 3 in business management (6/74).

Related Occupation Codes: 21L; 21M.

AR-1717-0030

LAND COMBAT SUPPORT SYSTEM (LCSS)—MISSILE MAINTENANCE NONCOMMISSIONED OFFICER (NCO) ADVANCED

Course Number: 121-27Z50-EC.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 20 weeks (710 hours).

Exhibit Dates: 2/71–3/73.

Objectives: To train senior enlisted personnel to organize, manage, and maintain specific missile systems.

Instruction: Lectures and practical exercises in the duties of a missile maintenance chief. Course includes Chaparral missile, Vulcan air defense, Redeye weapon, Tow missile, and Shillelagh missile systems, and general combat support systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in business management, 4 in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in business management, 2 in electronics laboratory (6/74); in the upper-division baccalaureate category, 2 semester hours in business management, 1 in electronics laboratory (6/74).

Related Occupation Codes: 27B; 27D; 27E; 27F; 27G; 27H; 27Z; 16Z.

AR-1717-0031

SERGEANT MAINTENANCE CHIEF NONCOMMISSIONED OFFICER (NCO) ADVANCED

Course Number: 121-21U50-EC.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 19 weeks (689 hours).

Exhibit Dates: 11/70–3/73.

Objectives: To train noncommissioned officers in the maintenance and management of Sergeant missile systems.

Instruction: Lectures and practical exercises in the duties of Sergeant maintenance chiefs. Course includes management functions, data processing operations, human factors budget cycles, and a complete overview of the Sergeant missile systems, including block-diagram analysis, troubleshooting techniques and system operation.

Credit Recommendation: In the vocational certificate category, 6 semester hours in industrial management, or as an elective in management (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in industrial management, or as an elective in management (6/74); in the upper-division baccalaureate category, 2 semester hours in industrial management, or as an elective in management (6/74).

Related Occupation Codes: 21R; 21S; 21T; 21U; 46L.

AR-1717-0032

SURFACE-TO-AIR MISSILE SYSTEM MAINTENANCE (NIKE) WARRANT OFFICER ADVANCED

Course Number: 4-9-C32; 4-9-C32-B; 4F-251B-B.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 17 weeks (616 hours).

Exhibit Dates: 2/72–10/76.

Objectives: To train warrant officers in Nike and Hawk missile management and logistics.

Instruction: Lectures and practical exercises at the advanced level in the maintenance of surface-to-air missile systems, including the Hawk and Nike missile system. Course includes personnel management, data processing, operations research, systems and analysis, motivation techniques, budget cycles, statistics, human factors, missile systems, AC and DC distribution systems, communication systems, radar, and digital systems.

Credit Recommendation: In the vocational certificate category, 12 semester hours in industrial management or management elective (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in industrial management or management elective (6/74); in the upper-division baccalaureate category, 2 semester hours in industrial management or management elective (6/74).

AR-1717-0033

ARMOR MAINTENANCE OFFICER

(Armor Maintenance and Motor Transport)

(Armor Motor Officer)

Course Number: 17-B-0606; 17-B-631A; 17-B-0600; 17-O-5.

Location: Armor School, Ft. Knox, KY.

Length: 14–15 weeks (549–591 hours).

Exhibit Dates: 11/55–12/68.

Objectives: To train officers to supervise armor maintenance units.

Instruction: Lectures and practical exercises in armor unit maintenance, including engine and fuel systems construction, disassembly, and assembly; engine, electrical air, fuel, cooling, and lubricating systems diagnosis and repair; wheeled-vehicle power trains maintenance and administrative operations; recovery vehicle maintenance; medium guntank maintenance; and armored infantry vehicle maintenance.

Credit Recommendation: In the vocational certificate category, 3 semester hours as an elective in business or industrial management (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in business or industrial management (7/74); in the upper-division baccalaureate category, 3 semester hours as an elective in business or industrial management (7/74).

AR-1717-0034

SURFACE-TO-SURFACE MISSILE SYSTEM MAINTENANCE (SERGEANT) WARRANT OFFICER ADVANCED

Course Number: 4-9-C32; 4-9-C32-C; 4F-241E-B.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 11 weeks (402 hours).

Exhibit Dates: 3/72–10/76.

Objectives: To train warrant officers in Pershing and Sergeant missile system management and logistics.

Instruction: Lectures and practical exercises in Pershing and Sergeant missile system management and logistics, including missile system functions and operations, ground handling equipment, system component test station, programmer test station, emergency and safety procedures, and missile maintenance.

Credit Recommendation: In the vocational certificate category, 6 semester hours in military management and business administration (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in military management and business administration (6/74).

AR-1717-0035

Associate SAM Officer Advanced

Course Number: 44-O-4B.

Location: Antiaircraft Artillery and Guided Missile School, Ft. Bliss, TX.

Length: 16 weeks (568 hours).

Exhibit Dates: 10/56–12/68.

Objectives: To train officers to be surface-to-air missile officers.

Instruction: Lectures and practical exercises in nuclear weapons and safety, Nike Ajax missile systems, command and staff procedures, communications, tactics, and leadership principles.

Credit Recommendation: In the vocational certificate category, 6 semester hours in business administration (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in business administration (6/74); in the upper-division baccalaureate category, 3 semester hours in business administration (12/68).

Quartermaster Maintenance
Supervision

Course Number: *All Versions:* 10-B-F7. *Version 1:* 10-A-F7.

Location: Quartermaster School, Ft. Lee, VA.

Length: *Version 1:* 3 weeks (105 hours). *Version 2:* 6 weeks (210 hours).

Exhibit Dates: *Version 1:* 8/61–12/68. *Version 2:* 7/60–7/61.

Objectives: To train commissioned and warrant officers in the principles, methods, and techniques of supervising quartermaster maintenance operations.

Instruction: *All Versions:* Lectures and practical exercises in the supervision of quartermaster maintenance operations. *Version 1:* Topics include administration and maintenance procedures, organization and operation of field maintenance shops, depot shop operations, and technical inspection of equipment. *Version 2:* Topics include supervision and management of personnel, Army command management system, repair parts supply, packaging, leadership, teaching principles and effective speaking, administrative and maintenance procedures, supervision of shop operations, and operation of TOE maintenance activities.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in shop management (7/74); in the upper-division baccalaureate category, 2 semester hours in shop management (12/68). *Version 2:* In the vocational certificate category, 3 semester hours in shop management (7/74); in the upper-division baccalaureate category, 3 semester hours in shop management (12/68).

AR-1717-0037

Electronic Warfare (EW)
Cryptologic Interceptor—Morse
Basic Technical

Course Number: 231-05H30.

Location: Intelligence School, Ft. Devens, MA.

Length: 8–10 weeks (300–341 hours).

Exhibit Dates: 4/77–Present.

Objectives: To train electronic-warfare/cryptologic-interceptor (Morse) technicians to become supervisors of Morse Intercept operations.

Instruction: Instruction and practical exercises in map reading, maintenance management procedures, supervision of maintenance personnel, electronics warfare, intelligence and security operations, and military science.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management and supervision (9/77).

Related Occupation Codes: 05H.

AR-1717-0038

Artillery Vehicle Maintenance
Supervisor
(Artillery Vehicle Maintenance Supervision)

Course Number: 6-R-631.7; 6-R-631.6; 6-R-632.7; 6-E-10; 6-R-632.6.

Location: Artillery and Missile School, Ft. Sill, OK.

Length: 4–12 weeks (141–422 hours).

Exhibit Dates: 8/55–12/68.

Objectives: To train enlisted personnel to supervise turret maintenance, organizational maintenance, and recovery of artillery vehicles.

Instruction: Lectures and practical exercises in the supervision of turret maintenance, organizational maintenance, and recovery of artillery vehicles, including maintenance management, internal-combustion engines, starting and charging systems, hydraulic actuators and controls, transmissions and final drives, braking systems, fuel and other engine systems, welding, troubleshooting of specific engine equipment and systems, missile- and rocket-handling equipment, and engine electrical systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in automotive technology and middle management (7/74); in the upper-division baccalaureate category, 2 semester hours in automotive technology and middle managememt (7/74).

AR-1717-0039

Course Number: 4N-4815.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 10–11 weeks (348–370 hours). *Version 2:* 8 weeks (294 hours).

Exhibit Dates: *Version 1:* 11/69–Present. *Version 2:* 7/65–10/69.

Objectives: To train commissioned officers to supervise the repair of mechanical devices.

Instruction: *All Versions:* Lectures and practical exercises in the supervision of repair of mechanical devices, including maintenance management, supply procedures, principles of mechanical maintenance, specialized equipment maintenance, heavy-equipment recovery operations, electrical and communications equipment, and armament materiel. *Version 1:* Includes construction, materials-handling, and support equipment. *Version 2:* Includes electronic equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in mechanical and vehicle maintenance (7/74); in the lower-division baccalaureate/associate degree category, 7 semester hours in mechanical and vehicle maintenance (7/74). *Version 2:* In the vocational certificate category, 9 semester hours in mechanical and vehicle maintenance (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in mechanical and vehicle maintenance (7/74); in the upper-division baccalaureate category, 3 semester hours in maintenance management (12/68).

AR-1717-0045

Chemical Corps Orientation

Course Number: 3-O-18.

Location: Chemical Corps School, Ft. McClellan, AL.

Length: 6 weeks (198 hours).

Exhibit Dates: 3/57–12/68.

Objectives: To train officers and civilian personnel in the organization, operation, and management of the Chemical Corps.

Instruction: Lectures and practical exercises in the organization, operation, and management of the Chemical Corps, including organization, administration, intelligence, CBR operations, logistics, management, chemical and biological warfare, atomic and radiological warfare, and protection and materiel.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in business organization and management (7/74); in the upper-division baccalaureate category, 2 semester hours in business organization and management (12/68).

AR-1717-0046

Fixed Plant Communications
Equipment Maintenance (CM-CMF) Noncommissioned Officer (NCO) Basic

Course Number: 1-CM-C40.

Location: Signal School, Ft. Monmouth, NJ.

Length: 12 weeks (414 hours).

Exhibit Dates: 7/73–Present.

Objectives: To train enlisted personnel to perform as noncommissioned officers in fixed-plant communications equipment maintenance.

Instruction: Lectures and practical exercises in fixed-plant communications equipment maintenance. Course includes leadership, general military subjects, such as military justice and map and photo reading; maintenance and supply elements; introduction to defense communications; and management of various communications systems.

Credit Recommendation: In the vocational certificate category, 1 semester hour in organization and management (8/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in organization and management (8/74); in the upper-division baccalaureate category, 1 semester hour in organization and management (8/74).

Related Occupation Codes: 26V; 26Y; 32A; 32D; 32E; 32F; 32G; 32H; 36H.

AR-1717-0047

Armament Maintenance Foreman
(Armament Maintenance Supervision)

Course Number: 9-R-425.6.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 8 weeks (304 hours).

Exhibit Dates: 2/56–12/68.

Objectives: To train enlisted personnel to organize armament maintenance facilities and supervise personnel.

Instruction: Lectures and practical exercises in leadership fundamentals, instructor training, small arms, field artillery, antiaircraft and turret artillery materiel, shop organization, supply procedures, and ordnance service management.

Credit Recommendation: In the vocational certificate category, 2 semester hours in shop management (7/74); in the upper-division baccalaureate category, 2 semester hours in shop management (12/68).

AR-1717-0048

Ammunition Officer and Ammunition Technician
(Ammunition Officer)
(Ordnance Ammunition Officer)

Course Number: 4E-4514; 4E-411A; 9-B-4514.

Location: Missile and Munitions School, Redstone Arsenal, AL; Ordnance School, Aberdeen Proving Ground, MD.

Length: 7–8 weeks (246–297 hours).

Exhibit Dates: 6/57–7/75.

Objectives: To provide commissioned and warrant officers with a knowledge of the organization, management, and operation of ammunition supply activities.

Instruction: Instruction includes conventional ammunition material and destruction; storage and transportation of ammunition; ammunition service and destruction.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/75).

Related Occupation Codes: 411A.

AR-1717-0049

Electronic Warfare (EW)
Cryptologic Interceptor—Non-Morse Basic Technical

Course Number: 231-05K30.

Location: Intelligence School, Ft. Devens, MA.

Length: 10 weeks (289 hours).

Exhibit Dates: 4/77–Present.

Objectives: To train electronic warfare interceptor non-Morse technicians to become intercept operations supervisors.

Instruction: Instructions and practical exercises in map reading; maintenance management procedures; supervision of maintenance personnel; tube-based telecommunications procedures, including modulation and wave propagation; basic communication systems; multiplexing and test equipment; security operations; and military science.

Credit Recommendation: In the vocational certificate category, 3 semester hours in communications systems (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management and supervision (9/77).

Related Occupation Codes: 05K.

AR-1717-0050

Ballistic Missile Repair (21-CMF) Noncommissioned Officer (NCO) Advanced (USAMMCS)

Course Number: 1-21-C42B.

Location: Missile and Munitions School, Redstone Arsenal, AL.

Length: 10 weeks (334 hours).

Exhibit Dates: *Version 1:* 2/78–Present. *Version 2:* 5/75–1/78.

Objectives: To provide enlisted personnel with knowledge of duties and supervisory skills required of senior noncommissioned officers in the Missile Career Management Field.

Instruction: *All Versions:* Lectures and practical exercises in military subjects and missile maintenance management. *Version 1:* This version includes specific training for qualification in certified soldering. *Version 2:* This version includes effective writing, effective speaking and administrative exercises in management.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour toward certified soldering; in the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management (8/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in communication skills (6/79).

Related Occupation Codes: 21G; 21L; 21R; 21S; 21T; 21U; 46L; 46N.

AR-1717-0051

Aircraft Maintenance Officer and Repair Technician

Course Number: 4D-4823; 4D-671B; 4D-671C; 4D-671D; 4D-671E.

Location: Transportation School, Ft. Eustis, VA.

Length: 13–15 weeks (445–479 hours).

Exhibit Dates: 10/74–Present.

Objectives: To train commissioned and warrant officers to manage aircraft maintenance resources, to inspect aircraft systems, and to perform operational checks on light aircraft.

Instruction: Instruction in maintenance concepts, management of aircraft maintenance resources, inspection and diagnostic procedures, subsystems and support equipment, and operational checks to determine airworthiness of light aircraft.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in aviation maintenance management (6/75).

Related Occupation Codes: 160A; 103A.

AR-1717-0052

Armament Repair Technician

Course Number: 4E-421A.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 17 weeks (536–587 hours).

Exhibit Dates: *Version 1:* 1/78–Present. *Version 2:* 3/72–12/77.

Objectives: To train personnel to perform the duties of an armament repair technician or repair shop foreman.

Instruction: *Version 1:* Lectures and practical exercises in the areas of management procedures, basic electricity, inspection and repair of artillery, small arms and fire control materiel. *Version 2:* Includes maintenance and supply management; personnel management; care and use of hand, power, and machine tools.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and 3 in shop management (1/78); in the upper-division baccalaureate category, 2 semester hours in management (1/78). *Version 2:* In the vocational certificate category, 1 semester hour in personnel management, 4 in mechanical/industrial technology (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in personnel management, 3 in mechanical/industrial technology (5/74).

Related Occupation Codes: 421A.

AR-1717-0053

Information and Audio Visual (IV-CMF) Noncommissioned Officer (NCO) Basic (USASCS)

Course Number: 4-IV-C40.

Location: Signal School, Ft. Monmouth, NJ.

Length: 12 weeks (414 hours).

Exhibit Dates: 8/72–Present.

Objectives: To train personnel to perform in managerial or supervisory roles in television and radio broadcasting and photographic repair and operations.

Instruction: Conferences and practical exercises to include leadership training; management principles and practices; and familiarity instruction in the areas of radio and television broadcasting, photographic repair, and photographic equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in audio-visual maintenance and management (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in audio-visual maintenance and management (7/74); in the upper-division baccalaureate category, 2 semester hours in audio-visual maintenance and management (7/74).

Related Occupation Codes: 26T; 41E; 41F; 41G; 84B; 84C; 84D; 84E; 84F; 84G.

AR-1717-0054

Signal Security Specialist Basic Technical

Course Number: 231-05G30.

Location: Intelligence School, Ft. Devens, MA.

Length: 11 weeks (335 hours).

Exhibit Dates: 4/77–Present.

Objectives: To prepare personnel who have been trained as signal security specialists to become supervisors of signal security operations.

Instruction: Instructions and practical exercises in map reading, maintenance management procedures, supervision of maintenance personnel, communications/telecommunications operations, communication security, and military science.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management and supervision (9/77).

Related Occupation Codes: 05G.

AR-1717-0055

Electronic Warfare (EW) Cryptologic Interceptor—Voice Basic Technical

Course Number: 232-98G30; 232-98G3L; 231-98G3L.

Location: Intelligence School, Ft. Devens, MA.

Length: 6–10 weeks (176–293 hours).

Exhibit Dates: 4/77–Present.

Objectives: To prepare electronic warfare cryptologic voice interceptors to supervise voice intercept operations.

Instruction: Instruction and practical exercises in map reading, maintenance management procedures, and supervision of maintenance personnel. Language options include German, Russian, and others.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management and supervision (9/77).

Related Occupation Codes: 98G.

AR-1717-0056

Electronic Warfare (EW) Cryptologic Traffic Analyst Basic Technical

Course Number: 232-98C30.

Location: Intelligence School, Ft. Devens, MA.

Length: 11–12 weeks (335 hours).

Exhibit Dates: 4/77–Present.

Objectives: To prepare electronic warfare/cryptologic traffic analysts to supervise analytic operations.

Instruction: Instruction and practical exercises in map reading, maintenance management procedures, supervision of maintenance personnel, and traffic analysis techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management and supervision (9/77).

AR-1717-0057

Mechanical Maintenance (MM-CMF) Warrant Officer Advanced (252A)

Course Number: 4-9-C32; 4-9-C32F.

Location: Ordnance School, Aberdeen Proving Ground.

Length: 14 weeks (427 hours).

Exhibit Dates: 11/76–Present.

Objectives: To train warrant officers in the operation and management of a calibration company or facility.

Instruction: Phase I: Lectures and practical exercises in leadership and managerial studies, management systems concerned with supply and maintenance, and common technical subjects. Phase II: Lectures and practical exercises to provide technical and supervisory skills in control office operation, laboratory and supply operations pertinent to a calibration facility or company. Course provides a working knowledge to perform the duties of a radiological protection or control officer.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in management, 3 in personnel administration, 1 in supervision of training, 2 in human relations and 3 in radiological safety (1/78).

Related Occupation Codes: 252A.

AR-1717-0058

Air Defense (CMF-27) Noncommissioned Officer (NCO) Advanced

Course Number: 1-27-C42B.

Location: Air Defense School, Ft. Bliss, TX.

Length: 10 weeks (366 hours).

Exhibit Dates: 7/77–Present.

Objectives: To prepare students to perform leadership duties in air defense areas.

Instruction: Subjects include tactics, communicative arts, leadership, management, air defense, artillery maintenance and operations and tactics, and systems orientation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in communication skills (11/77).

AR-1717-0059

Mechanical Maintenance (MM-CMF)
Warrant Officer Advanced
(441A)

Course Number: 4-9-C32B.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD.

Length: 15 weeks (452 hours).

Exhibit Dates: 11/76–Present.

Objectives: To train warrant officers in operation and maintenance of a metal working shop.

Instruction: Phase I includes lectures and practical exercises in leadership and managerial studies; management system concerned with supply and maintenance; and common technical subjects; Phase II provides lectures and in metal body repair; knowledge of machine shop operation and recovery equipment techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in shop practices, 3 in shop management (1/78); up 6 semester hours in management, 3 in personnel administration, 1 in supervision of training, 2 in human relations (1/78).

AR-1717-0060

Mechanical Maintenance (MM-CMF)
Warrant Officer Advanced
(632A)

Course Number: 4-9-C32E.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD.

Length: 17 weeks (516 hours).

Exhibit Dates: 11/76–Present.

Objectives: To train warrant officers in operation and management procedures related to wheel and tracked automotive equipment.

Instruction: Phase I provides lectures and practical exercises in leadership and managerial studies; management systems concerned with supply and maintenance, and common technical subjects. Phase II covers lectures and practical exercises in troubleshooting, overhaul and repair of wheeled and tracked automotive equipment; recovery equipment and techniques, and armament and fire control materials.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in automotive repair, 3 in automotive service management (1/78); in the upper-division baccalaureate category, 6 semester hours in management, 3 in personnel administration, 1 in supervision of training, 2 in human relations (1/78).

AR-1717-0061

Mechanical Maintenance (MM-CMF)
Warrant Officer Advanced
(631A)

Course Number: 4-9-C32D.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD.

Length: 15 weeks (462 hours).

Exhibit Dates: 11/76–Present.

Objectives: To train warrant officers in operation and management procedures related to wheel and tracked automotive equipment.

Instruction: Phase I involves lectures and practical exercises in leadership and managerial studies; management systems concerned with supply and maintenance, and common technical subjects. Phase II includes lectures and practical exercises in troubleshooting, overhaul and repair of wheeled and tracked automotive equipment; recovery equipment and techniques, and armament and fire control materials.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in automotive service management (1/78); up 6 semester hours in management, 3 in personnel administration, 1 in supervision of training, 2 in human relations (1/78).

AR-1717-0062

Mechanical Maintenance (MM-CMF)
Warrant Officer Advanced
(421A)

Course Number: 4-9-C32A.

Location: Ordnance and Chemical School, Aberdeen Proving Ground.

Length: 14 weeks (432 hours).

Exhibit Dates: 11/76–Present.

Objectives: To train warrant officers in the operation and management of armament maintenance for weapons systems.

Instruction: Phase I includes lectures and practical exercises in leadership and managerial studies; management systems concerned with supply and maintenance, and common technical subjects. Phase II consists of lectures and practical exercises to provide a working knowledge of maintenance problems, probable causes, and procedures necessary to repair armament weapon systems.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in management, 3 in personnel administration, 1 in supervision of training, 2 in human relations (1/78).

AR-1717-0063

Ordnance Officer Advanced
Armament

Course Number: 4-9-C22C.

Location: Ordnance and Chemical School, Aberdeen Proving Ground, MD.

Length: 26 weeks (812–844 hours).

Exhibit Dates: 2/76–Present.

Objectives: To train commissioned officers in advanced armament operations.

Instruction: Lectures and practical experiences in advanced armament operations including organization for logistics; administration and operations; tactics and staff procedures; management functions and techniques, logistics management and armament track including electrical materials.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in automotive or heavy equipment repair (1/78); in the upper-division baccalaureate category, 3 semester hours in business organization and management, 3 in human relations (1/78).

AR-1719-0002

Lithographic Platemaking

Course Number: 740-83E20; 740-834.1; 5-E-51.

Location: Engineer School, Ft. Belvoir, VA.

Length: 7–8 weeks (254–290 hours).

Exhibit Dates: 2/56–Present.

Objectives: To train enlisted personnel to prepare offset plates to be used in lithographic printing processes.

Instruction: Lectures and practical exercises in the preparation and processing of materials for offset lithographic plate production, including layout and stripping procedures, various plate types, lithographic platemaking procedures, mathematics review, and advanced map and aerial photograph reading.

Credit Recommendation: In the vocational certificate category, 3 semester hours in graphics or printing (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in graphics or printing (5/74).

Related Occupation Codes: 83E; 83Z.

AR-1719-0003

Offset Press Operation

Course Number: 740-83F20; 740-835.1; 5-E-23.

Location: Engineer School, Ft. Belvoir, VA.

Length: 8 weeks (282–294 hours).

Exhibit Dates: 2/56–10/73.

Objectives: To train enlisted personnel to operate offset presses in the reproduction of maps, charts, and other printed line work.

Instruction: Lectures and practical exercises in offset press operations, including printing-bindery and press fundamentals, photolithography, the use of a power paper cutter, maintenance of an offset press, controls, feeder and delivery assemblies, cylinder assembly, dampening assembly, inking assembly, identifying printing problems, printing a three-color and a five-color map, and bindery equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in graphic arts (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in graphic arts (5/74).

Related Occupation Codes: 83F.

AR-1720-0002

1. Prime Power Production
   Specialist (Health Physics and
   Plant Chemistry Specialty)
2. Nuclear Power Plant Operators
   (Health Physics and Plant
   Chemistry Specialty)
   (Nuclear Power Plant Operators
   (Process Control Specialty))

Course Number: None.

Location: Prime Power Production School, Ft. Belvoir, VA; Engineer Reactors Group, Ft. Belvoir, VA.

Length: *Version 1:* 43 weeks (1,481–1,723 hours); 43 weeks (1489 hours).

Exhibit Dates: *Version 1:* 10/77–Present. *Version 2:* 1/58–9/77.

Objectives: To provide enlisted personnel with the skills and knowledge necessary to operate and maintain nuclear/conventional power plants and to perform as specialists in all health/biological/chemical/radiological monitoring systems of nuclear/conventional power plants.

Instruction: *Version 1:* Students complete academic phase training which covers algebra, trigonometry and general mathematics, general physics, chemistry, A/C circuits analysis, D/C circuits analysis and mechanical engineering (thermodynamics) prior to specialty training. Specialty concentration provides enlisted personnel with a working knowledge of water chemistry and health physics. Upon completion of program student will be able to perform tests in health monitoring, chemical analysis and water treatment and analysis. Lectures and practical experiences include fundamentals of electrical and mechanical systems. Operator phase is equivalent to cooperative work experience in professional practice or real-life situations. This phase may be considered for credit dependent on policies of receiving institution with regard to cooperative work experience. *Version 2:* Lectures and practical exercises to cover math, physics, chemistry, radiology, health physics, and the electrical and mechanical systems of a nuclear power plant.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in mathematics to include algebra and trigonometry, 3 in general physics, 3 in A/C circuits analysis, 3 in D/C circuits analysis, 6 in mechanical engineering to include 3 specifically in thermodynamics, 0-6 in cooperative work experience, 8 in general chemistry, 3 in water analysis and treatment (11/78); in the upper-division baccalaureate category, 6 semester hours in health physics (11/78). *Version 2:* In the vocational certificate category, 12 semester hours in general mathematics, 6 in nuclear technology, and 12 in health physics or chemistry (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in general mathematics, 3 in nuclear technology, and 6 in health physics or chemistry (6/74); in the upper-division baccalaureate category, 3 semester hours in chemistry/radiology or electrical laboratory for engineering majors, or 5 semester hours as a technical elective for non-engineering majors (6/74).

Related Occupation Codes: *Version 1:* 52E. *Version 2:* 52H; 52M.

AR-1720-0003

1. Prime Power Production Specialist (Electrical Specialty)
2. Nuclear Power Plant Operators (Electrical Specialty)

Course Number: None.

Location: Prime Power Production School, Ft. Belvoir, VA; Engineer Reactors Group, Ft. Belvoir, VA.

Length: *Version 1:* 52 weeks (1826 hours); 52 weeks (1826 hours). *Version 2:* 40-56 weeks (1,355-1,943 hours).

Exhibit Dates: *Version 1:* 10/77-Present; 10/77-Present.

Objectives: To provide enlisted personnel with the skills and knowledge necessary to operate and maintain nuclear/conventional power plants and to perform as specialists in the maintenance of all electrical systems of nuclear/conventional power plants.

Instruction: *Version 1:* Students complete academic phase which covers algebra, trigonometry, general mathematics, general physics, chemistry, A/C circuits analysis, D/C circuits analysis, and mechanical engineering to include thermodynamics. Specialty phase includes analysis of power plant electrical systems including motors and generators, transformers, instrumentation, and protection apparatus. Includes control circuits, regulations and preventive maintenance procedures. Operator phase is equivalent to cooperative work experience in professional practice or real-life situations. This phase may be considered for credit dependent on policies of receiving institution with regard to cooperative work experience. *Version 2:* Lectures and practical exercises to cover math; physics; nuclear physics; analysis of power plant mechanical and electrical systems; the operation of a nuclear power plant; motor generation theory; transistor circuit theory; and electrical wiring.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in mathematics to include algebra and trigonometry, 3 in general physics, 3 in A/C circuits analysis, 3 in D/C circuits analysis, 6 in lecture and 2 in laboratory in AC/DC electrical machines and power, 6 in mechanical engineering including 3 in thermodynamics, 2 in chemistry, 0-6 in cooperative work experience (11/78). *Version 2:* In the vocational certificate category, 10 semester hours in general science and mathematics, 10 in nuclear technology, and 6 in electrical or instrumentation laboratory (6/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in general science and mathematics, 5 in nuclear technology, and 3 in electrical or instrumentation laboratory (6/74); in the upper-division baccalaureate category, 3 semester hours in nuclear, electrical, or electronic instrumentation laboratory for engineering majors, or 5 semester hours as a technical elective for non-engineering majors (6/74).

Related Occupation Codes: 52E; 52J; 52M.

AR-1720-0004

1. Prime Power Production Specialist (Mechanical Specilty)
2. Nuclear Power Plant Operators (Mechanical Specialty)

Course Number: None.

Location: Prime Power Production School, Ft. Belvoir, VA; Engineer Reactors Group, Ft. Belvoir, VA.

Length: *Version 1:* 51 weeks (1751 hours). *Version 2:* 40-52 weeks (1,465-1,741 hours).

Exhibit Dates: *Version 1:* 10/77-Present. *Version 2:* 1/58-9/77.

Objectives: To provide enlisted personnel with the skills and knowledge necessary to operate and maintain nuclear/conventional power plants and to perform as specialists in all mechanical systems of nuclear/conventional power plants.

Instruction: *Version 1:* Students complete academic phase which covers algebra, trigonometry, and general mathematics, general physics, chemistry, A/C circuits analysis, D/C circuits analysis, and mechanical engineering. Course includes lectures and practical exercises to cover electrical and mechanical components of power plants, and the operation and maintenance of its auxiliary standby, and related equipment. Operation phase is equivalent to cooperative work experience in professional practice or real-life situations. This phase may be considered for credit dependent on policies of receiving institution with regard to cooperative work experience. *Version 2:* Lectures and practical exercises to cover math; physics; electrical systems of a nuclear power plant; and the operation and maintenance of nuclear power plant mechanical systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in welding and machine shop techniques, 1 in heat exchange and compression, 1 in circuit and wiring methods, 2 in internal engines and heating systems (11/78); in the lower-division baccalaureate/associate degree category, 6 semester hours in mathematics to include algebra and trigonometry, 3 in general physics, 2 in chemistry, 3 in A/C circuits analysis, 3 in D/C circuits analysis, 6 in mechanical engineering to include 3 in thermodynamics, 0-6 in cooperative work experience (11/78). *Version 2:* In the vocational certificate category, 10 semester hours in general mathematics and science, 10 in nuclear technology, and 6 in mechanical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in general mathematics and science, 5 in nuclear technology, and 3 in mechanical laboratory (6/74); in the upper-division baccalaureate category, 3 semester hours in mechanical or instrumentation laboratory for engineering majors, or 5 semester hours as a technical elective for non-engineering majors (6/74).

Related Occupation Codes: 52E; 52K; 52M.

AR-1720-0005

1. Prime Power Production Specialist (Instrumentation Specialty)
2. Nuclear Power Plant Operators (Instrumentation Specialty)

Course Number: None.

Location: Prime Power Production School, Ft. Belvoir, VA; Engineer Reactors Group, Ft. Belvoir, VA.

Length: *Version 1:* 52 weeks (1860 hours). *Version 2:* 40-64 weeks (1,480-2,207 hours).

Exhibit Dates: *Version 1:* 10/77-Present. *Version 2:* 1/58-9/77.

Objectives: To provide enlisted personnel with the skills and knowledge necessary to operate and maintain nuclear/conventional power plants and to perform as specialists in all electrical and mechanical systems of nuclear/conventional power plants.

Instruction: *Version 1:* Academic phase covers algebra, trigonometry and general mathematics, general physics, chemistry, A/C circuit analysis, D/C circuit analysis and mechanical engineering including thermodynamics. Sensors and measurement technology, electronics for instrumentation, signal processing, elements of automatic control including controllers and their tuning. Operator phase is equivalent to cooperative work experience in professional practice or real-life situations. This phase may be considered for credit dependent on policies of receiving institution with regard to cooperative work experience. *Version 2:* Lectures and practical exercises to cover math, physics, operation of nuclear power plants, electronics, and electrical and mechanical instrumentation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in mathematics to include algebra and trigonometry, 3 in general physics, 2 in chemistry, 3 in A/C circuit analysis, 3 in D/C circuit analysis, 6 in mechanical engineering to include 3 in thermodynamics, 0-6 in cooperative work experience (11/78); in the upper-division baccalaureate category, 3 semester hours in instrumentation for electrical engineering majors or 6 in electronics/instrumentation for non-engineering majors (11/78). *Version 2:* In the vocational certificate category, 12 semester hours in general mathematics and science, 18 in nuclear technology, and 6 in electronics (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in general mathematics and science, 9 in nuclear technology, and 3 in electronics (6/74); in the upper-division baccalaureate category, 6 semester hours in electricity or electronic circuits theory and maintenance for non-engineering majors, or 3 semester hours in electronics and 1 in electronics laboratory for non-electrical engineering majors, or 1 semester hour in electrical laboratory for electrical engineering majors (6/74).

Related Occupation Codes: 52E; 52L; 52M.

AR-1721-0001

Fire Control Instrument Repair (Basic)

Course Number: 9-R-403.1.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 8 weeks (280 hours).

Exhibit Dates: 2/57–12/68.

Objectives: To train enlisted personnel to assist in the repair of optical and nonoptical precision instruments and related equipment.

Instruction: Lectures and practical exercises in hand tools use and maintenance; optics cleaning; precision and non-precision-measuring instruments repair; basic electricity; Ohm's law; quadrants, mounts, and instrument accessories operation and repair; optics, refraction, and reflection; and prisms, lenses, and optical instruments inspection, adjustment, and repair.

Credit Recommendation: Insufficient data for evaluation (3/74).

AR-1721-0002

Fire Control Instrument Repair
(Optical Instrument Repairman (USMC))

Course Number: *Version 1:* 670-41C10. *Version 2:* 670-41C20. *Version 3:* 670-41C20. *Version 4:* 670-403;1 670-403.2. *Version 5:* 9-R-403.2.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 14–20 weeks (390–634 hours). *Version 2:* 29–31 weeks (947–995 hours). *Version 3:* 19 weeks (645 hours). *Version 4:* 12 weeks (443 hours). *Version 5:* 8 weeks (280 hours).

Exhibit Dates: *Version 1:* 11/76–Present. *Version 2:* 9/73–10/76. *Version 3:* 6/72–8/73. *Version 4:* 8/64–5/72. *Version 5:* 2/57–7/64.

Objectives: To train enlisted personnel to inspect, adjust, and repair optical, nonoptical, and electrical precision instruments and related equipment.

Instruction: *All Versions:* Lectures and practical exercises in optics fundamentals and repair techniques; care and use of common hand tools and measuring instruments; inspection and troubleshooting of binoculars, periscopes, telescopes, aiming circles, and tank fire control systems; and diagnosis and repair of electromechanical computers and gun aiming systems. Note: Course is 14 weeks long for Marine enlisted personnel. Army and Marine personnel who have completed Module 201 of Common Basic Electronics Training (COBET) at Ft. Jackson, SC will complete only Phase II of course. See AR-1715-0389 for credit recommendation for COBET. Students who have not attended COBET will complete Phases I and II of this course. *Version 1:* Training for Army includes telescope mount, periscope (passive) and mount and panel assemblies. For students completing Phases I and II the course includes basic concepts of electricity including solid state testing, inspection, and troubleshooting of electronic circuits; inspection and repair of binoculars, periscopes, telescopes, aiming circles, mounts and artillery, and tank fire control mechanisms. *Version 2:* Instruction includes principles and components of optical, electro-mechanical, electronic, and laser range finders, aimers, and computer systems. *Version 3:* Instruction includes basic measurement and repair tasks for electronic equipment. *Version 5:* Instruction includes mechanical instrument repair.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 5 semester hours in optical instrument repair and 5 in basic electricity and electronics for Army personnel completing Phases I and II or 4 semester hours in optical instrument repair and 3 in basic electricity and electronics for Marine Corps completing Phases I and II. For Army personnel completing COBET and Phase II of this course, 5 semester hours in optical instrument repair or for Marine Corps personnel completing COBET and Phase II of this course, 4 semester hours in optical instrument repair (see note above for explanation of COBET) (1/78). *Version 2:* In the vocational certificate category, 5 semester hours in optical equipment principles and maintenance, 4 in basic electricity, 4 in basic electronics, 4 in electro-mechanical devices, 2 in basic laser principles, and 1 in basic infrared principles (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in optical instrumentation, 3 in introduction to electricity and electronics, 2 in electro-mechanical devices, and 2 in laser and infrared principles (6/75). *Version 3:* In the vocational certificate category, 4 semester hours in electronics, 2 in electrical laboratory, 4 in optical instrument repair, 3 in electromechanical technology (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical technology (3/74). *Version 4:* In the vocational certificate category, 4 semester hours in optical instrument repair, 3 in electromechanical technology (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical technology (3/74). *Version 5:* In the vocational certificate category, 3 semester hours in optical instrument repair, 2 in electromechanical technology (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical technology (3/74).

Related Occupation Codes: 41C; 09B.

AR-1721-0003

Electrical Instrument Repair

Course Number: 198-295.1; 11-R-295.1.

Location: Southeastern Signal School, Ft. Gordon, GA.

Length: 12 weeks (432–440 hours).

Exhibit Dates: 3/57–12/68.

Objectives: To train enlisted personnel to inspect, test, and repair electrical indicating instruments, combination meters, multipurpose meters, and electromechanical meteorological instruments.

Instruction: Lectures and practical exercises in basic electrical principles; inspection, testing, adjustment, and repair of DC and AC voltmeters and ammeters, common multimeters, anemometers, barometers, barographs, thermographs, wind equipment, and theodolites.

Credit Recommendation: In the vocational certificate category, 6 semester hours in instrument repair, and additional credit in instrument repair on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in instrument repair, and additional credit in instrument repair on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in instrument repair on the basis of institutional evaluation (3/74).

AR-1721-0004

Aircraft Instrument Repair

Course Number: *All Versions:* 602-68F30. *Version 2:* 602-688;1 55-R-688;1 55-E-56.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 8 weeks (241 hours). *Version 2:* 10–18 weeks (343–640 hours).

Exhibit Dates: *Version 1:* 4/74–Present. *Version 2:* 4/57–3/74.

Objectives: To train enlisted personnel to repair and maintain aircraft instruments and allied equipment.

Instruction: *All Versions:* Lectures and practical exercises in the repair and maintenance of aircraft instruments and allied equipment, including electrical fundamentals, aircraft instruments (gauges, indicators, gyroscopic principles, compasses, and test equipment), and mathematics and physical principles related to aircraft systems. *Version 1:* Topics include troubleshooting instrument systems. *Version 2:* Topics include flight theory and counterinsurgency operations.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in aircraft electrical repair or electrical laboratory (6/75). *Version 2:* In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

Related Occupation Codes: 68F.

AR-1721-0005

Topographic Instrument Repair

Course Number: 670-41B20.

Location: Engineer School, Ft. Belvoir, VA.

Length: 12 weeks (452 hours).

Exhibit Dates: 9/66–Present.

Objectives: To train enlisted personnel to maintain and repair engineer surveying and mapping instruments and allied equipment.

Instruction: Lectures and practical exercises in surveying and mapping instruments maintenance and repair, including surveying rods, Abney hand level, Dumpy level, transit, telescopic alidade, Wild T-16 and Wild T-2 theodolites, Brunson 900 theodolite, multiplex, and survey tapes, and tools and equipment operation.

Credit Recommendation: In the vocational certificate category, 3 semester hours in topographic instrument repair, 1 in surveying instrument familiarization (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in surveying instrument familiarization (5/74).

Related Occupation Codes: 41B.

AR-1721-0006

Camera Equipment Repair

Course Number: 198-41E20; 11-R-401.1; 11-E-2.

Location: Signal School, Ft. Monmouth, NJ.

Length: 12–15 weeks (432–554 hours).

Exhibit Dates: 2/56–Present.

Objectives: To train enlisted personnel to maintain and repair still and motion-picture cameras and related equipment.

Instruction: Lectures and practical exercises in still and motion-picture camera maintenance and repair, including electrical fundamentals, electronic flash unit, photographic equipment repair principles, motion-picture cameras, press cameras, between-the-lens cameras, focal-plane cameras, and supply and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electromechanical or camera repair (5/74);

in the lower-division baccalaureate/associate degree category, 4 semester hours in electromechanical repair (6/74).

Related Occupation Codes: 41E; 41H.

AR-1721-0007

AIRCRAFT INSTRUMENT AND ELECTRICAL SYSTEMS REPAIR

Course Number: Not available.

Location: Transportation School, Ft. Eustis, VA.

Length: 18 weeks (714 hours).

Exhibit Dates: 2/54–12/68.

Objectives: To train enlisted personnel as aircraft instrument and electrical systems repairmen.

Instruction: Lectures and practical exercises in repair, overhaul and rebuilding of aircraft instruments, electrical systems and their components, including common maintenance subjects, elementary physics and electricity, aircraft DC electrical power and actuator systems, aircraft AC electrical power and ignition systems, miscellaneous systems and troubleshooting, instrument repair fundamentals, gyroscopic instrument and magnetic compass, and mechanical systems.

Credit Recommendation: In the vocational certificate category, 12 semester hours in instrument maintenance (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in instrument maintenance (6/74).

AR-1721-0008

1. METEOROLOGICAL EQUIPMENT REPAIRER
2. METEOROLOGICAL EQUIPMENT MECHANIC AND REPAIRMAN

Course Number: *Version 1:* 420-ASIH1. *Version 2:* 198-35D20; 198-35D30.

Location: Field Artillery School, Ft. Sill, OK.

Length: *Version 1:* Self-paced 9–14 weeks (270–420 hours). *Version 2:* 20 weeks (662 hours).

Exhibit Dates: *Version 1:* 8/79–Present. *Version 2:* 2/74–7/79.

Objectives: To train enlisted personnel to perform maintenance and repair of electrical and mechanical meteorological equipment.

Instruction: *All Versions:* Lectures and practical exercises in electrical and electronic fundamentals, radio equipment, and common ground meteorological equipment (wind measuring equipment, Azimuth and Elevation equipment, and related equipment). *Version 1:* Course follows a self-paced format with individualized instruction and modulated learning packets, including extensive laboratories for diagnosis and repair of total equipment package.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in basic electronics (1/80); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronics and 1 in communications laboratory (1/80). *Version 2:* In the vocational certificate category, 3 semester hours in basic electronics, 1 in communications laboratory (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in communications laboratory (6/75).

Related Occupation Codes: *Version 1:* 93F. *Version 2:* 35D; 35F.

AR-1722-0001

MARINE DECK OFFICER ADVANCED

Course Number: 8C-561C.

Location: Transportation School, Ft. Eustis, VA.

Length: 21 weeks (780 hours).

Exhibit Dates: 1/72–8/76.

Objectives: To train deck officers to be vessel commanders.

Instruction: Lectures and practical exercises in nautical rules and regulations; cargo stowage planning; advanced marlinspike seamanship; hazardous-cargo handling; ship's administration; ship's construction and repair; vessel stability; fire prevention and control; piloting and open water navigation, including charts, plotting, aids to navigation, dead reckoning, radar piloting, loran, meteorology, celestial navigation, midlatitude sailing, Mercator sailing, and great-circle sailing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in trigonometry or navigation, 12 in marine vessel operation (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in trigonometry or navigation, 6 in marine vessel operation (5/74); in the upper-division baccalaureate category, 3 semester hours in trigonometry or navigation (12/68).

AR-1722-0002

CREWMAN

Course Number: *Version 1:* 062-61B20. *Version 2:* 813-61B20.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 6 weeks (200–224 hours). *Version 2:* 4 weeks (140 hours).

Exhibit Dates: *Version 1:* 9/71–Present. *Version 2:* 11/66–8/71.

Objectives: To provide enlisted personnel with a working knowledge of the duties and responsibilities of a crewman on U.S. Army watercraft.

Instruction: Lectures and practical exercises in ships radio communication and code flags; rigging; piloting, navigation, and charts; and watercraft operations to include tugs and towing equipment, single and multiple screw craft, retrieving and towing disabled vessels, and cargo loading.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in seamanship (7/74). *Version 2:* In the vocational certificate category, 3 semester hours in seamanship (7/74).

Related Occupation Codes: 61A; 61B.

AR-1722-0003

HARBOR CRAFT COMPANY OFFICER

Course Number: 8C-F7.

Location: Transportation School, Ft. Eustis, VA.

Length: 3 weeks (111–119 hours).

Exhibit Dates: 10/68–Present.

Objectives: To provide officers with a general knowledge of the planning, directing, maintenance, administration, and supervision necessary in a U.S. Army harbor craft unit.

Instruction: Lectures and practical exercises in seamanship and boat handling skills; piloting; and engineering, including operation, maintenance, and support of Army floating equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in ship piloting and engineering (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in ship piloting and engineering (7/74).

AR-1723-0001

MARINE HULL REPAIR

Course Number: *Version 1:* 704-44K20. *Version 2:* 55-R-563;2 55-E-6.

Location: Transportation School, Ft. Eustis, VA.

Length: *Version 1:* 13–17 weeks (450–607 hours). *Version 2:* 9 weeks (315 hours).

Exhibit Dates: *Version 1:* 5/66–Present. *Version 2:* 10/55–4/66.

Objectives: To train enlisted personnel to repair metal, fiberglass, and wood hulls and related structures.

Instruction: *All Versions:* Lectures and practical exercises in the repair of metal, fiberglass, and wood hulls and related structures, including marine welding and pipefitting, sheet metal repair, and basic shipfitting. *Version 1:* Includes emergency repairs, aluminum hull repair, and plastic hull repair. *Version 2:* Includes blacksmithing.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in welding or metalworking (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in welding or metalworking (6/74). *Version 2:* In the vocational certificate category, 8 semester hours in welding or metalworking, and 8 in cabinetmaking (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in welding or metalworking, and 4 in cabinetmaking (6/74).

Related Occupation Codes: 44K.

AR-1723-0002

MARINE HULL REPAIR SUPERVISION

Course Number: 55-R-563.6; 55-E-28.

Location: Transportation School, Ft. Eustis, VA.

Length: 11 weeks (388–391 hours).

Exhibit Dates: 9/55–1/65.

Objectives: To train enlisted personnel to supervise repair of wood and steel hulls, superstructures, and internal structural accessories of harbor craft and landing craft.

Instruction: Lectures and practical exercises in marine hull repair. Topics include shipfitting, marine pipefitting, and ship carpentry.

Credit Recommendation: In the vocational certificate category, 3 semester hours in welding and metal work (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in welding and metal work (6/74).

AR-1723-0003

METAL WORKING (ENTRY)

Course Number: 9-R-440.0; 9-E-74.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 8 weeks (280–304 hours).

Exhibit Dates: 6/56–12/68.

Objectives: To train personnel to perform as metal working helpers.

Instruction: Lectures and practical exercises on machining, welding, forging and metal body repair, including basic mathematics and drawing interpretation applied specifically to metal body fabrication and repair, the identification and use of hand cutting and measuring tools, the setup and operation of welding equipment and materials, basic operations on the metal hand saw, engine lathe and the drill press, and preventive maintenance, tool inventory and inspection.

Credit Recommendation: In the vocational certificate category, 3 semester hours in metal working or body repair (5/74).

AR-1723-0004

MACHINIST

Course Number: *All Versions:* 9-R-443.1. *Version 1:* 702-44E10; 5ABA-53130 (USAF). *Version 2:* 702-44E20; 5ABA53130 (USAF); 702-443.1. *Version 3:* 9-E-2.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: *Version 1:* 8-15 weeks (256-488 hours). *Version 2:* 14-16 weeks (434-556 hours). *Version 3:* 10 weeks (350-380 hours).

Exhibit Dates: *Version 1:* 6/76-Present. *Version 2:* 4/58-5/76. *Version 3:* 11/55-3/58.

Objectives: To train enlisted Marine Corps and Air Force personnel to be machinists and Army enlisted personnel to become lathe operators.

Instruction: *All Versions:* Lectures and practical exercises in blueprint reading and sketching, applied shop mathematics, use of technical manuals; theory, set up, and operation of lathe, milling machine, shaper, contour machine, and precision grinding machine; use of hand tools for layout and assembly; use of measuring instruments for maintenance and fabrication of ordnance parts and equipment. *Version 1:* Instruction for Army personnel includes shop fundamentals; use of hand tools, technical manuals, use of measuring instruments maintenance and fabrication of parts and equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 8 semester hours in lathe operation for Army personnel, or 14 in machinist training for Marine Corps and Air Force personnel (1/78). *Version 2:* In the vocational certificate category, 8 semester hours in machine trades or machine technology (5/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in machine trades or machine technology (5/74); in the upper-division baccalaureate category, 2 semester hours in machine trades or machine technology (5/74). *Version 3:* In the vocational certificate category, 5 semester hours in machine trades or machine technology (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in machine trades or machine technology (5/74); in the upper-division baccalaureate category, 1 semester hour in machine trades or machine technology (5/74).

Related Occupation Codes: 44E.

AR-1723-0005

MACHINIST

Course Number: 702-44E20.

Location: Ordnance School, Aberdeen Proving Ground, MD.

Length: 8 weeks (256 hours).

Exhibit Dates: 7/76-Present.

Objectives: To train enlisted personnel as machinists.

Instruction: Practical exercises and examinations in machine shop techniques, including shop mathematics, drawing and sketching, use of the vertical bandsaw, the milling machine, milling attachments, grinding, welding equipment, and heat treating for the maintenance and fabrication of ordnance parts and equipment.

Credit Recommendation: In the vocational certificate category, 8 semester hours in machine shop (1/78).

Related Occupation Codes: 44E.

AR-1728-0001

ASSOCIATE MILITARY POLICE OFFICER CAREER

Course Number: 19-A-C23.

Location: Provost Marshal General's School, Ft. Gordon, GA; Military Police School, Ft. Gordon, GA.

Length: 14 weeks (507-529 hours).

Exhibit Dates: 6/60-12/68.

Objectives: To qualify officers to perform as commanders, supervisors, or planners of police agency activities.

Instruction: Role of supervising police administrator within combat and peacetime Army operations; tactical employment of the combined arms, staff organization and procedures; mine warfare; supply economy; fundamentals of the Army Command Management System, including programming, budgeting, scheduling, and review and analysis; chemical, biological, and radiological warfare; civil affairs organization, operation, and functions; military leadership; motor vehicle maintenance inspection; military justice; nuclear weapons employment; duties and responsibilities of military police in civil disturbances; operation and supervision of confinement facilities; criminal investigation facilities; methods, procedures, and policies related to military police organizations and operations; prisoners of war; communications; traffic control; civil defense, industrial defense, and natural disaster relief; principles of physical security.

Credit Recommendation: In the upper-division baccalaureate category, 9 semester hours in criminal justice (12/68).

AR-1728-0002

MILITARY POLICE NONCOMMISSIONED OFFICER (NCO) REFRESHER

Course Number: 19-E-13.

Location: Provost Marshal General's School, Ft. Gordon, GA.

Length: 3 weeks (118 hours).

Exhibit Dates: 11/56-12/68.

Objectives: To provide noncommissioned officers with refresher training in the basic duties and functions of the Military Police Corps.

Instruction: Familiarization with chemical, biological, and radiological agents; fundamentals of military law; weapons; civil disturbances; familiarization with the military police criminal investigation program; organization and functions of military police units; traffic control; military confinement facilities; and handling of prisoners of war.

Credit Recommendation: In the vocational certificate category, 3 semester hours in criminal justice (11/73); in the upper-division baccalaureate category, 2 semester hours in criminal justice (12/68).

AR-1728-0003

MILITARY POLICE SUPERVISION (ENLISTED)

(Military Police Supervision)

Course Number: 830-F2; 19-R-951.6; 19-E-4.

Location: Military Police School, Ft. Gordon, GA; Provost Marshal General's School, Ft. Gordon, GA.

Length: 6 weeks (264 hours).

Exhibit Dates: 8/55-3/72.

Objectives: To qualify students to serve as first-line supervisors for police, minor investigation, traffic, security, and corrections operations.

Instruction: Police organizations; police operations and administration; corrections facilities; provost marshal activities; supervision; apprehension; criminal investigation methods; fingerprinting; confessions; public relations; tactical and organizational concepts of military police units; physical security; military police operations at a post, camp, or a station, and in support of combat operations; communication procedures; traffic control; civil emergencies.

Credit Recommendation: In the vocational certificate category, 6 semester hours in criminal justice (11/73); in the lower-division baccalaureate/associate degree category, 3 semester hours in criminal justice (11/73).

Related Occupation Codes: 95B; 95D.

AR-1728-0004

CORRECTIONS AND CONFINEMENT OFFICER

Course Number: 19-O-6.

Location: Provost Marshal General's School, Ft. Gordon, GA.

Length: 4 weeks (156 hours).

Exhibit Dates: 11/54-12/68.

Objectives: To train officers in the administration and operation of installation corrections facilities.

Instruction: Military law; weapons; basic investigative methods; corrections facilities; military police techniques; police administration.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in criminal justice (11/73).

AR-1728-0005

ASSOCIATE MILITARY POLICE COMPANY OFFICER

Course Number: 19-B-C3; 19-O-2.

Location: Provost Marshal General's School, Ft. Gordon, GA.

Length: 13 weeks (490-504 hours).

Exhibit Dates: 8/55-11/59.

Objectives: To provide branch training to officers in the duties and responsibilities appropriate to company-grade Military Police Corps officers.
